two dimensional airfoil with distributed suction

p0424 N72-24359

Numerical computation of transonic flow around  
leading edge of wing profile

[NASA-TT-F-14285]

p0618 N72-32010

## NUMERICAL CONTROL

Large automated tape placement machine tool design  
and construction for laying up aircraft  
structures from composite materials

p0196 A72-21690

Measuring technique importance for aircraft R and  
D, emphasizing quartz tensometer, digital  
control and signal processing

p0359 A72-30286

Computer control of aircraft landing.

p0455 A72-35950

Advanced fighter controls flight simulator for

all-systems compatibility testing.

[AIAA PAPER 72-837]

p0505 A72-39090

Electrical components in gas turbine control

systems.

p0563 A72-42521

Digital computer controlled testing equipment for  
separately driven coaxial gas turbine low and  
high pressure compressors, emphasizing

reliability and flexibility in system design

p0564 A72-42682

Computer control of the General Dynamics High

Speed Wind Tunnel.

p0564 A72-42697

Design and development of numerically controlled  
machine for laying composite tape used in  
building aircraft structured from filament

reinforced resin matrix composite materials

[AD-725765]

p0035 N72-10425

## NUMERICAL INTEGRATION

Aircraft stability coefficient determination by  
numerical integration fitting to differential  
equations of motion

p0013 A72-11136

Numerical evaluation of downwash integral for

lifting rectangular wings noting wing loading

[NPL-AERO-NOTE-1095]

p0038 N72-11012

Turbulent boundary layer equations applicable to  
compressible flow over surface with longitudinal  
curvature evaluated by numerical integration

using tabulated profile data - Part 2

[AD-729325]

p0158 N72-14310

## NUMERICAL WEATHER FORECASTING

Thunderstorm encounter probability at SST

altitudes for selected cross country routes,

using radar observation data

p0348 A72-28853

Mathematical criteria for probable and potential  
aircraft icing occurrence, using radiosonde and  
empirical climatological data

p0348 A72-28856

Multiscale numerical model for local weather  
development simulation, noting forecasting for  
long distance air travel

p0348 A72-28857

Winds aloft forecast use to predict southwestern  
mountain lee wave behavior for general aviation  
cross country flights

p0348 A72-28863

## ROTATING DAMPERS

Design analysis of rotating plate drive for 2500  
horse power helicopter rotor gearbox

[NASA-TN-X-68117]

p0521 N72-28504

## NUTS (FASTENERS)

Reliability engineering of aft transmission  
planetary carrier bearing nut in mechanical  
drive assembly of CH-46 helicopter

[AD-743073]

p0587 N72-31037

## NYLON (TRADEMARK)

Parachute canopy fabrics and rigging lines cordage  
properties requirements, considering nylon,  
polypropylene, silk, cotton and nonwoven

scrim-reinforced fabrics

p0008 A72-10314

Webbing joints stitching strain, considering nylon  
and flax yarns stretching properties and various  
stitching patterns strengths

p0008 A72-10315

## OBLIQUE SHOCK WAVES

Two-dimensional model for thermal compression.

p0567 A72-42868

Supersonic aircraft engine inlet performance in  
terms of pressure recovery, discussing oblique  
shock wave formation ahead of entrance to  
improve efficiency

p0611 A72-44991

Boundary layers on airfoils in oblique transonic  
terminal shock wave and control of shock induced  
separation

[AD-731830]

p0208 N72-16227

## OBSERVATION

## SUBJECT INDEX

## OBSERVATION

NT SATELLITE OBSERVATION  
NT VISUAL OBSERVATION

## OBSERVATION AIRCRAFT

Results of the reliability and maintainability demonstration of the OH-58A light observation helicopter.

[AHS PREPRINT 652] p0447 A72-34507

## OCCLUDED FRONTS

U FRONTS (METEOROLOGY)

## OCEAN SURFACE

Radiometer system for measuring total heat flow through ocean surface from low-flying aircraft [AD-740092] p0520 N72-28429

## OCEANS

NT ATLANTIC OCEAN

NT PACIFIC OCEAN

## OGEE WINGS

U VARIABLE SWEEP WINGS

## OH-6 HELICOPTER

Hughes 500 and OH-6 helicopter tail rotor cambered blades, comparing thrust and stall characteristics with symmetrical blades p0359 A72-30290

Aerodynamic characteristics and performance of OH-6 helicopter with emphasis on flight loads imposed during combat operations [AD-738202] p0422 N72-24032

## OHIO

Environmental impact surveys of quiet engine program [NASA-TN-X-68545] p0487 N72-27814

## OILS

NT CRUDE OIL

NT LUBRICATING OILS

NT MINERAL OILS

Turbojet engine oil circuit contamination rate determination by spectrometric analysis, obtaining mathematical theory for data interpretation [SAE PAPER 720303] p0288 A72-25567

## OKLAHOMA

Tropospheric and ground layer turbulence contribution to sonic boom magnification noting Oklahoma test [PFA-121] p0321 N72-20023

## OMEGA NAVIGATION SYSTEM

Omega system in short range navigation supplementing VORTAC for coverage at low altitudes in mountain areas p0138 A72-17334

Navigation accuracy of corrected OMEGA close to transmitter, using aircraft flight test at 500 nm range p0352 A72-29186

Airborne OMEGA navigation system performance, discussing transmission facilities, three frequency receiver, flight tests and optimization of receiving antenna p0352 A72-29191

Aircraft applications of composite signal OMEGA configuration with phase data combined at separate carrier with weighting coefficients, discussing advantages over uncompensated navigation systems p0352 A72-29192

FAA airborne OMEGA development program covering signal monitoring, airborne data collection and system operational evaluation p0352 A72-29195

OMEGA effect on oceanic airway safety, noting improvement over inertial navigation systems p0352 A72-29197

Preproduction OMEGA aircraft receivers and antennas development and flight testing, noting signal loss problems in high noise or precipitation static environments p0353 A72-29198

Aeronautical navigation/guidance standardization in conjunction with OMEGA, covering sensor and computer equipment life cycles p0353 A72-29199

Polar region performance of OMEGA navigation system, noting addition of selectable grid reference, multiple parallel DR system, manual celestial computation and bearing resolver p0353 A72-29200

Small aircraft navigation over 10-400 mile course segments by raw OMEGA phase information dc presentation on conventional ID-249 course

deviation indicator

p0353 A72-29201

OMEGA receiver integration into Navy P-3C airborne computerized navigation system, describing flight test, maintainability and laboratory simulation programs p0353 A72-29202

Test flights into weather at midlatitudes and tropical systems with airborne OMEGA navigation system, discussing E field and H field antennas p0353 A72-29203

Subtraction circuit design for impulse noise elimination at front end of aircraft oriented OMEGA navigation system receiver p0354 A72-29204

Avionics equipment for signal processing onboard civil aircraft to improve flight safety, discussing uses of OMEGA navigation system and digital computers p0393 A72-31178

OMEGA air and maritime navigation system development, test phase and application, potential, discussing operational modes, propagation parameters, solar activity effects and signal loss p0493 A72-37796

Proceedings of conference on Omega navigation system and recommendations for modified hyperbolic navigation system [NASA-CR-125807] p0280 N72-19718

Application of airborne digital computers to loran C/D and Omega navigation and guidance systems p0336 N72-21225

Application of antenna dumping techniques to reduce precipitation interference in airborne Omega navigation system [AD-736516] p0377 N72-22659

## OMNIDIRECTIONAL ANTENNAS

NT MONOPOLE ANTENNAS

## OMNIRANGE NAVIGATION

U VHF OMNIRANGE NAVIGATION

## ON-LINE PROGRAMMING

Slat-airfoil combinations aerodynamics modeled by single point vortex to represent leading edge slat, discussing on-line computer graphics program [AIAA PAPER 72-221] p0127 A72-16798

On-line digital computer for wind tunnel, operating systems, and real time operation [NFI-AERO-1326] p0033 N72-10184

Real time, on-line turning flight optimization [AD-732938] p0219 N72-17012

## ONBOARD COMPUTERS

U AIRBORNE/SPACEBORNE COMPUTERS

## ONBOARD EQUIPMENT

NT AIRBORNE EQUIPMENT

NT AIRBORNE/SPACEBORNE COMPUTERS

NT AIRCRAFT EQUIPMENT

NT SPACECRAFT ELECTRONIC EQUIPMENT

Pilot role in automated ATC system using onboard situation display with navigation and collision avoidance devices p0137 A72-17332

Military transport helicopter optimum secondary power system, considering onboard auxiliary power unit, electric or hydraulic engine start system, environmental control, etc [AHS PREPRINT 664] p0444 A72-34480

Area navigation and its affect on aircraft operation and systems design. [AIAA PAPER 72-754] p0498 A72-38125

## ONBOARD NAVIGATION

U NAVIGATION

## ONE DIMENSIONAL FLOW

One dimensional unsteady flow in turbine engines rotating and static vane cascades, discussing vibrations propagation p0014 A72-11584

Mathematical models for analyzing quasi-one-dimensional flow across face seals and narrow slots of turbine engines [NASA-TN-D-6668] p0435 N72-25468

## OPENINGS

NT APERTURES

## OPERATING SYSTEMS (COMPUTERS)

On-line digital computer for wind tunnel, operating systems, and real time operation [NFI-AERO-1326] p0033 N72-10184

## OPERATIONAL HAZARDS

Rotary wing and VTOL aircraft induced downwash

# SUBJECT INDEX

# OPTICAL RADAR

- effects on ground personnel, considering injuries, body heat loss, work capability impairment and sound pressure effects p0360 A72-30425
- The onboard authority of the aircraft commanding officer as provided by the 1963 Tokyo Convention p0454 A72-35763
- OPERATIONAL PROBLEMS**
  - Prediction of weather induced airline operating delays, discussing fog, snow, freezing rain, thunderstorms, crosswind, headwinds, CAT, wind shear, wet runways and tail winds p0184 A72-19597
  - Aircraft transparencies from civil operator viewpoint, considering replacement cost of flight deck and cabin windows p0305 A72-27005
  - Hypersonic commercial aircraft operational problems, considering passenger physiology limits flight profile, sonic pollution, traffic demands, route structure, etc p0362 A72-30830
  - Aircraft CRT electronic displays discussing operational flexibility versus control and monitor complexities, economics, reliability and human factors p0404 A72-32636
  - Methods for solving engine airplane interference and wall corrections in transonic wind tunnel tests for predicting aerodynamic performance of airplane design p0076 N72-11877
  - Statistical evaluation of operational load forces on undercarriage of F-104 aircraft [RAE-LIB-TRANS-1591] p0101 N72-12989
  - Technological and operational methods in aircraft noise abatement p0104 N72-13012

  - Optical quality requirements for aircraft transparencies, considering resolution, haze, halation, light transmission, distortion, binocular deviation, double images, scratches and inclusions p0305 A72-27003
  - Optical qualities of aircraft windshields and direct vision windows, considering color, light transmission, faults, heating, distortion, inside reflections and double images p0305 A72-27004
- OPTICAL PYROMETERS**
  - Pyrometer for measuring surface temperature distribution on rotating turbine blade [NASA-TN-X-68113] p0629 N72-32459
- OPTICAL RADAR**
  - CAT detection by airborne laser Doppler radar and

ground based ultrasensitive microwave Doppler radar methods p0067 A72-14822

Lidar application to aircraft and missile tracking and rangefinding, describing results obtained with ONERA experimental equipment p0242 A72-24655

Slant range visibility measurements by lidar for aircraft landing operations under low clouds and fog at coastal region p0347 A72-28847

STRADA landing trajectory recording system for real time flight path restitution during approach and landing, using computer and lidar techniques p0404 A72-32895

Airport runway fog dispersal in UK, discussing cost projection for chemical seeding system combined with lidar remote sensing p0411 A72-33500

Application of lidar to determine slant range visibility conditions and atmospheric transmittance aloft [AD-742359] p0530 N72-29021

**OPTICAL RANGE FINDERS**

Lidar application to aircraft and missile tracking and rangefinding, describing results obtained with ONERA experimental equipment p0242 A72-24655

Electro-optical attitude sensing device for landing approach of flight vehicle [NASA-CASE-XMS-01994-1] p0222 N72-17326

**OPTICAL REFLECTION**

Light transmission, reflection and environment problems of hydrophilic coatings for fog and frost protection in aviation instrument window design p0563 A72-42519

**OPTICAL SCANNERS**

NT MULTISPECTRAL BAND SCANNERS

Base motion isolation characteristics of optical deflector with two axis gimbal support [AD-743002] p0590 N72-31680

**OPTICAL SENSORS**

U OPTICAL MEASURING INSTRUMENTS

**OPTICAL TRACKING**

Lidar application to aircraft and missile tracking and rangefinding, describing results obtained with ONERA experimental equipment p0242 A72-24655

Base motion isolation characteristics of optical deflector with two axis gimbal support [AD-743002] p0590 N72-31680

**OPTIMAL CONTROL**

NT TIME OPTIMAL CONTROL

High speed helicopter elastic rotor blade suboptimal motion controller decreasing flapping motion and bending loads despite small control angles and vertical gusts p0071 A72-15504

Airborne computer programmed adaptive optimal control for subsonic vehicle automatic landing with aerodynamic performance p0120 A72-16430

Optimization algorithms for jet transport aircraft inertially based flight trajectory control in turbulent atmosphere, comparing with ILS p0120 A72-16472

Extremal field properties in optimal control problem applied to aircraft flight over assigned distance with minimum fuel consumption p0139 A72-17727

Optimal thrust reversing in pursuit evasion games between two aircraft in horizontal plane, considering cost functions and termination criteria p0183 A72-19282

Multiinput and multioutput linear and nonlinear dynamic system maximum likelihood identification based on state vector formulation and optimal filter use p0183 A72-19286

Aircraft optimal terminal guidance nonlinear feedback control law, deriving maximum principle by digital computer program p0183 A72-19287

Optimal control of two shaft gas turbine engine in helicopter, using cybernetic equipment p0231 A72-22862

Optimal control synthesis for linear passive stationary plants with symmetrical coefficient matrices of minimized functional p0234 A72-23431

Near optimal closed loop control laws for fixed time pursuit-evasion differential game between two aircraft in vertical plane, using dynamic modeling p0236 A72-23805

Extremal field properties in optimal control problem applied to aircraft flight over assigned distance with minimum fuel consumption p0285 A72-25329

Suboptimal feedback control for aircraft gust alleviation design, using indirect perturbation information through normal acceleration factor measurement p0396 A72-32025

Computer control of aircraft landing p0455 A72-35950

Optimally sensitive adaptive control techniques for systems with unknown time-varying parameters, suggesting applicability to ATC p0490 A72-37289

Homogeneous linear partial differential equation for optimal control with boundary condition formed by terminal component, noting weighting functions for linear plant p0494 A72-37989

Optimal selection of stability augmentation parameters for excellent pilot acceptance p0501 A72-38227

An optimal model-following flight control system for manual control p0501 A72-38228

Investigation of data rate requirements for low visibility approach with a scanning beam landing guidance system p0502 A72-38259

Optimal control synthesis for linear passive stationary plants with symmetrical coefficient matrices of minimized functional p0503 A72-38514

Optimum aiding of inertial navigation systems using air data [AIAA PAPER 72-847] p0504 A72-39082

Optimization of controlled plants sequence with stochastic process described by partial differential equations, noting hydropneumatic system of liquid fuel jet engine p0509 A72-39903

Output-feedback control law for randomly distributed multivariable system p0597 A72-43608

The optimal control of merging aircraft - Implementation of the hybrid air traffic controller p0599 A72-43868

Application of quadratic optimization to supersonic inlet control p0599 A72-44195

Optimal synthesis of a two-parameter continuous controller for a jet engine with an afterburner p0601 A72-44284

Allowable region of approach height and desirable approach path of aircraft for safe landing, presenting optimal control trajectories p0603 A72-44497

Optimization of automatic flight control concepts for light helicopters with all-weather capability p0081 N72-11917

Derivation of differential equations for optimal feedback for constant linear system [VTH-165] p0279 N72-19663

Optimal control theory for determining thrust and bank angle programs [AD-736964] p0384 N72-23033

Design of optimal feedback controller for multivariate linear systems having subsystem sensitivity constraints [NASA-TM-X-68041] p0387 N72-23195

Optimum adaptive phase estimation receiver for one-way ranging air navigation p0389 N72-23660

Singular optimal control and minimum time of ascent for supersonic aircraft p0419 N72-24006

Kalman-Schmidt filters applied to optimal control of air submarine inertial navigation systems

# PARACHUTE DESCENT

## OXYGEN SENSORS U OXYGEN ANALYZERS OXYGEN SUPPLY EQUIPMENT NT OXYGEN MASKS

Soviet book on civil aircraft high altitude equipment covering air conditioning systems, oxygen equipment and cabin pressurization p0018 A72-12295

LOX supply systems installation for civil transport aircraft crew and/or passenger breathing oxygen [SAE AIR 1223] p0301 A72-26030

## OXYGEN SYSTEMS U OXYGEN SUPPLY EQUIPMENT OZONE

Stratospheric pollution by SST exhaust gases, discussing water vapor and nitrogen oxides effects on ozone concentration p0451 A72-35327

Possible catalytic reduction of stratospheric ozone by nitrogen oxides emitted from SST aircraft [UCRL-20568] p0045 N72-11334

## P

### P-3 AIRCRAFT

OMEGA receiver integration into Navy P-3C airborne computerized navigation system, describing flight test, maintainability and laboratory simulation programs. p0353 A72-29202

Computerized simulation used to obtain time optimal trajectories for P-3C ASW aircraft [AD-734167] p0272 N72-19046

Design, development, and translation of general purpose software for P-3C aircraft digital computer [AD-741066] p0532 N72-29171

### P-1127 AIRCRAFT

Flying experience with the SC1 research aircraft and the P1127 prototype at the Royal Aircraft Establishment, Bedford, England. p0560 A72-42324

Stability and control flight test procedures for V/STOL aircraft in general and specific application to P-1127 and Harrier aircraft p0328 N72-20980

Development of techniques and equipment for determining moment of inertia of aircraft as applied to A-37 and P-1127 aircraft [FTC-TIH-71-1001] p0331 N72-21007

Wind tunnel stability tests of XV-6A vectored thrust vertical takeoff aircraft model in and out of ground effect at low speed [NASA-TN-D-6826] p0572 N72-30008

Aerodynamic characteristics of SC-1 and P-1127 V/STOL aircraft with emphasis on flight tests to determine control system performance p0649 N72-33968

### PACIFIC OCEAN

Pacific Ocean meteorological data collection from military and civil aircraft in-flight reports, discussing computer processing for daily analysis and monthly and seasonal means p0349 A72-28874

Estimates of maximum number of aircraft likely to be airborne simultaneously over Pacific for planning operational satellite service p0096 N72-12588

### PACKAGES

#### NT INSTRUMENT PACKAGES

#### PACKAGING

#### NT ELECTRONIC PACKAGING

Air cargo intermodal and interline containers handling in warehouse storage, transportation and distribution, considering total pack and interlock requirements p0405 A72-33174

Conference papers on shock and vibration including specifications, mechanical impedance, and transportation and packaging [AD-739574] p0474 N72-26815

#### PACKINGS (SEALS)

Characteristics of self-acting seal for range of simulated gas turbine engine conditions [NASA-TN-D-6563] p0093 N72-12419

Determination of optimum gland dimensions and ring packings to eliminate leakage in aircraft brake piston seals

[AD-728216]

p0094 N72-12437

## PAINTS

Development and application of foam plastics and intumescent paints for commercial aircraft fire protection systems p0174 N72-15898

Evaluation of bisphenol polyether, styrene acrylate, and chlorinated rubber alkyd as coatings for airfield runway marking [AD-734320] p0279 N72-19644

Analysis of aircraft exterior lighting and marking configurations to provide visual detection at maximum range [FAA-NA-72-29] p0368 N72-22025

Surface properties and soil retention of aircraft painted with polyurethane paint, and requirements for aircraft cleaner [AD-736971] p0426 N72-24613

Electrodeposition of paints on aircraft aluminum and magnesium alloys [D-MAT/AV-175] p0535 N72-29570

Practical procedure for removal of baked-on aluminumized silicone paint from aircraft engines [AD-742795] p0587 N72-31174

Painting schemes for improving rotating propeller and tail rotor visibility of military aircraft [AD-744453] p0629 N72-32579

## PANEL FLUTTER

Hypersonic nonlinear aerodynamic loading effect on panel flutter, examining stability for various initial conditions [AIAA PAPER 72-345] p0286 A72-25374

Computerization of panel flutter boundary calculations with aerodynamic forces derived from linear three dimensional unsteady potential flow theory [AIAA PAPER 72-403] p0287 A72-25424

Aeroelastic optimization of a panel in high Mach number supersonic flow. p0593 A72-43327

Experimental determination of stability and stall flutter of scale model of tilt-propeller free-wing V/STOL aircraft [NASA-TN-D-6831] p0463 N72-25998

## PANELS

### NT RECTANGULAR PANELS

### NT WING PANELS

Evaluation of steady-state and nonsteady-state methods for measuring panel damping with emphasis on use of random process techniques and digital data reduction methods [NASA-CR-114423] p0264 N72-18909

Buckling due to transient compressive stresses in aircraft panel during deceleration [ESDU-70002] p0647 N72-33882

## PAPERS

Quality control of paper-based emulsions for industrial radiography [AQD/XNDT-001158] p0371 N72-22472

## PARABOLIC VELOCITY

### U ESCAPE VELOCITY

## PARACHUTE DESCENT

Paratroop type parachutes breathing oscillations and stability characteristics, using high speed cinematography and kinetheodolites to track during steady state descent p0007 A72-10307

Parachutes flow characteristics in low speed free descent, discussing glide angle effect on total drag and water channel flow pattern studies p0007 A72-10309

Parachute opening shock and filling time calculation based on aerodynamic drag, air mass and effective porosity time functions, using momentum and continuity equations p0007 A72-10310

Parachute inflation loads and times, presenting calculation method based on unsteady pressure distribution on decelerating inflating parabolic shell of revolution with unsteady starting vortex p0007 A72-10311

Boron/potassium nitrate parachute mortar design for aircraft and spacecraft applications, comparing with high-low propellant p0189 A72-20783

Emergency systems for helicopter crew and passenger survivability improvement, discussing use of ejection seats, extraction systems parachute bail-out and shaped explosive charges

## PARACHUTE FABRICS

## SUBJECT INDEX

Effects of aerodynamic coefficients, launch velocity, and burning rate on trajectory of self-suspended parachute flare [AD-731683] p0195 A72-21581

Pressure distribution, canopy shape, cord, and fabric stresses for parachutes in steady descent [DLR-FB-71-98] p0217 N72-16955

Development of para-foil high glide steerable parachute controlled by ground and airborne electronics homing systems for delivery of military equipment [AD-742294] p0467 N72-26026

PARACHUTE FABRICS p0574 N72-30019

Parachute canopy fabrics and rigging lines cordage properties requirements, considering nylon, polypropylene, silk, cotton and nonwoven scrim-reinforced fabrics

Wind tunnel measurements to determine stability and drag of parachutes with varying effective porosity [AD-729858] p0008 A72-10314

Development and characteristics of parachute fabric for aerodynamic decelerator using lightweight, variable solidity, knitted material [NASA-CASE-LAR-10776-1] p0152 N72-14000

Pressure distribution, canopy shape, cord, and fabric stresses for parachutes in steady descent [DLR-FB-71-98] p0331 N72-21004

Design, development, and specifications of ringsail parachute with emphasis on inflation characteristics of cluster canopies [AD-745335] p0467 N72-26026

PARACHUTES p0642 N72-33051

NT DRAG CHUTES

NT RECOVERY PARACHUTES

NT RIBBON PARACHUTES

Parachutes and related technologies - Conference, London, September 1971

Parachute designs and applications to escape systems, paratrooping, supply dropping, aircraft braking, weapons systems stabilization, flight testing aids and sport p0006 A72-10301

Nonporous rigid parachute models three component measurements, using low speed wind tunnel for testing skirt length effects on aerodynamic characteristics p0006 A72-10302

Industrial parachute R and D in UK, discussing management, technical staff requirements and government/industry liaison p0006 A72-10303

Axial cords effects on parachute drag and stability characteristics and opening time, discussing wind tunnel and balloon drop tests results p0006 A72-10304

Pneumatically assisted parachute deployment at high altitudes with low accelerations p0007 A72-10306

Incompressible potential flow model of porous parachute canopy flow field, using Stokes stream function for axisymmetric vortex sheet in uniform steady stream p0240 A72-24273

Tables and graphs of canopy geometry effects on drag coefficients in cross parachutes [AD-731023] p0313 A72-28123

DFVLR conference on V/STOL flight mechanics, computerized simulation for reliability, and values and units in flight dynamics, Brunswick, Apr. 1971 p0167 N72-15017

Drag of supersonic parachutes in dependence of Mach and Reynolds numbers [DLR-MITT-71-14] p0203 N72-15963

Massless-spring modeling of suspension-line elasticity during parachute unfurling process using Runge-Kutta integration technique [NASA-TN-D-6671] p0204 N72-15967

Design of aircraft seat cushions and parachute support spacers to improve comfort and safety factors [AD-736873] p0224 N72-17930

Pressure distribution, canopy shape, cord, and fabric stresses for parachutes in steady descent p0384 N72-23032

[DLR-FB-71-98] p0467 N72-26026

Materials and design for textile mechanical elements in aerospace parachute systems p0471 N72-26382

Construction and function of pyrotechnic-ballistic device for assisting opening of parachutes [DLR-MITT-72-07] p0514 N72-28004

Subsonic wind tunnel tests to determine aerodynamic forces and pressure distribution on parachute canopy of ring-slot parachute model [AD-744103] p0625 N72-32063

Design, development, and specifications of ringsail parachute with emphasis on inflation characteristics of cluster canopies [AD-745335] p0642 N72-33051

PARACHUTING

U PARACHUTE DESCENT

PARAGLIDERS

NT FLEXIBLE WINGS

NT PARAWINGS

Flight tests of parafoil glider and comparison of flight test data with wind tunnel data using small scale and full scale models [AD-731143] p0167 N72-15012

PARALLEL PROCESSING (COMPUTERS)

Univac 1832 multiprocessor avionics computer for airborne ASW, discussing input/output controllers and interfaces and IC design features p0407 A72-33245

Future trends of airborne computers. [AIAA PAPER 72-895] p0505 A72-39109

Digital data system with real time displays and multiprocessing capability for multitest of aircraft structure with operational manpower reduction, assessing performance p0564 A72-42696

PARAWINGS

Buoyancy systems and parawings application in short haul passenger transportation, discussing VTOL and STOL operations p0406 A72-33183

Free flight tests to determine deployment characteristics and aerodynamic loads for all-flexible parawings with 4000 square foot wing area [NASA-TM-X-2326] p0087 N72-11956

Design and development of ground to air self-rescue aircraft with vertical takeoff capability and seventy-five nautical mile cruise range [AD-743477] p0624 N72-32059

PARTIAL DIFFERENTIAL EQUATIONS

Pressure and convective heat transfer distribution at air inlet central body surface, reducing Navier-Stokes equations to partial differential equations with similar solutions p0069 N72-14971

Homogeneous linear partial differential equation for optimal control with boundary condition formed by terminal component, noting weighting functions for linear plant p0494 A72-37989

Optimization of controlled plants sequence with stochastic process described by partial differential equations, noting hydropneumatic system of liquid fuel jet engine p0509 A72-39903

## PERFORMANCE DECREMENT

## U PERFORMANCE

## PERFORMANCE PREDICTION

## NT PREDICTION ANALYSIS TECHNIQUES

Sail rotors for hovering platform, calculating rotor performance based on ideal two-dimensional flexible airfoil section characteristics [AIAA PAPER 72-66] p0131 A72-16925

Mach 2.65 axisymmetric mixed-compression inlet system diffuser and boundary layer bleed system performance estimates confirmed by tests [AIAA PAPER 72-45] p0134 A72-16959

Fatigue behavior of notched or cracked aircraft structure parts, examining service life prediction problem p0139 A72-17811

Aircraft preliminary design procedure with integrated performance simulation, using time sharing computer facility p0188 A72-20353

Hub and shroud boundary layer growth in centrifugal compressor vaneless diffusers, comparing predicted and measured performance at high pressure ratio per stage [ASME PAPER 72-GT-54] p0296 A72-25645

Inward radial flow turbines under unsteady flow conditions with full and partial admission, predicting performance by method of characteristics p0308 A72-27349

Strike aircraft reliability prediction in cost effectiveness analyses, showing failure probability distribution with time p0343 A72-28360

Aerodynamic properties prediction procedure for thin jet-flapped airfoil in incompressible inviscid flow bounded by different types of boundaries p0397 A72-32147

Aerodynamic stall characteristic prediction from static experimental data for airfoils, noting boundary layer effects [AIAA PAPER 72-682] p0414 A72-34060

Simulation models for airports performance evaluation through replication of traffic units actual movement p0443 A72-34414

The wake geometry of a hovering helicopter rotor and its influence on rotor performance. [AHS PREPRINT 620] p0446 A72-34497

Performance of low pressure ratio ejectors for engine nacelle cooling. [SAE AIR 1191] p0458 A72-36530

Integration of aerospace vehicle performance and design optimization. [AIAA PAPER 72-948] p0562 A72-42355

Two-dimensional model for thermal compression. p0567 A72-42868

Empty weight and cruise performance of very large subsonic jet transports. [SAE PAPER 919] p0596 A72-43466

Procedure for measuring performance of aircraft fire extinguishing powders p0049 A72-11691

Transonic wind tunnel testing for predicting flight performance characteristics of aircraft p0075 A72-11865

Correlation of transonic wind tunnel test data with flight test results on slender wing airplanes for double delta configuration development p0075 A72-11868

Comparison of wind tunnel and theoretical techniques for determining full scale aerodynamic flight drag factors [NASA-TM-X-67413] p0075 A72-11869

Comparison of performance predictions and flight data for optimizing transonic wind tunnel design p0076 A72-11871

Performance and operational characteristics of high Reynolds number blowdown and shock wind tunnels for transonic model testing p0078 A72-11884

Shock tunnel measurements of aerodynamic forces on thin delta wings for performance prediction of hypersonic vehicle cruising flight [ARC-CP-1148] p0080 A72-11905

Models applied to predict communication system performance for aircraft/TDRS and meteorological

satellite/TDRS relay [NASA-CR-122295] p0091 A72-12086

Theoretical prediction of dynamic behavior of rotary wings supported in hydrostatic and hydrodynamic gas lubricated journal bearings [AD-732211] p0208 A72-16350

Experimental study of effect of blade aspect ratio on performance of axial flow compressors [ARC-CP-1179] p0277 A72-19331

Role of air cargo in Canadian transportation for period 1967 to 1987 p0341 A72-21969

Computer program for predicting performance, noise, weight, and cost of general aviation aircraft propellers for 1980 time period [NASA-CR-2066] p0431 A72-25005

Development of methods for predicting hovering performance of single rotor helicopters [AD-738531] p0467 A72-26029

Optimization techniques for estimating height-velocity diagram and critical decision point for rotorcraft based on impulsive response functions [NAL-TR-245] p0479 A72-27026

PORTMAN program for predicting total efficiency - specific speed characteristics of centrifugal compressors. [NASA-TM-X-2594] p0513 A72-27994

Evaluation of method for predicting performance of steam catapults used for shipboard aircraft launching [AD-742804] p0585 A72-31027

Development of mathematical models for estimating takeoff distance over barriers between thirty and fifty feet high [EG-5/1-AMEND-A] p0619 A72-32014

Analysis of methods for predicting aircraft performance and recommendations for computer programs to provide accurate prediction capability p0621 A72-32036

Method for evaluation of operational and functional performance characteristics of landing mats [AD-741857] p0627 A72-32278

## PERFORMANCE TESTS

Supersonic ribbon parachute testing by transonic wind tunnel, rocket sled and water channel simulator p0006 A72-10305

Military aircraft inertial navigation system design, discussing gyroscope, gyro compassing alignment, accuracy and performance p0072 A72-15666

Supersonic axial flow shock-in-rotor type compressor performance tests, discussing factors responsible for low efficiency p0120 A72-16481

Circular arc blades two dimensional cascade performance test data for various cambers comparison with potential theory data p0121 A72-16485

Large scale high aspect ratio multielement suppressor nozzle arrays testing for augmentor wings and internally blown flaps [AIAA PAPER 72-131] p0130 A72-16888

Carrier suitability testing for aircraft landing, considering landing gear and supporting structure under simulated shipboard conditions p0146 A72-18497

Flame resistant materials for aircraft fire fighter protective clothing from systems approach tests p0195 A72-21585

Low speed performance and boundary layer growth in optimal annular diffuser with uniform center body diameter and conically diverging wall p0237 A72-23856

Reliability program for SAAB 37 Viggen airborne computer, discussing prototype and components operating tests and failure rates p0239 A72-23984

Three dimensional wind tunnel investigation of vortex augmented unswept wing with leading edge cusp flap and split upper and lower trailing edge flaps [SAE PAPER 720321] p0290 A72-25584

Liquid metal regenerator design and test evaluation for gas turbine engine fuel consumption improvement

[ASME PAPER 72-GT-33] p0295 A72-25629  
 Cascade technology for centrifugal compressor  
 vanned diffuser design, comparing performance  
 results with conventional diffuser data

## PHYSICAL PROPERTIES

High speed jet noise source physical properties interpretation by theory and scale-model experiments for supersonic transport aircraft noise suppression problem  
p0016 A72-11973

High strength Ti alloys for aircraft accessories structural materials, comparing room temperature physical properties of ultrahigh tensile steels and other alloys  
p0058 A72-13617

Aerodynamic noise measurement, discussing physical units, spectral analysis, conversion and correction formulas  
p0136 A72-17195

Crash safe turbine fuel to reduce fire probability and severity during aircraft ground crash, investigating physical and chemical properties [ASME PAPER 72-GT-28] p0294 A72-25624  
Russian book - Handbook of aircraft materials.  
p0548 A72-40459

Making a product from composites. II.  
p0604 A72-44556

Development of nickel base superalloys for powder metallurgy application as compressor and turbine discs in jet engines  
[NASA-CR-72968] p0110 N72-13468

## PHYSIOLOGICAL EFFECTS

Physiological evaluation of modified jet transport passenger oxygen mask from altitude chamber experiments  
p0194 A72-21571

Medical and physiological hazards for SST passengers and crews, discussing cumulative cosmic radiation and high altitude decompression risks  
p0300 A72-25816

Case report of rapid decompression in supersonic trainer aircraft pressurized cabin, discussing physical and blast effects, pressurization safety, decompression sickness and hypoxia  
p0301 A72-26020

Acoustic measurements of T-41 trainer aircraft during ground and airborne operation  
[AD-731128] p0167 N72-15014

Analysis of riding discomfort in aircraft resulting from mechanical vibration and swing motion  
[RAE-LIB-TRANS-1605] p0203 N72-15961

Measurement of positive ions near air traffic control radar and effects on near-by personnel  
[FAA-NA-72-19] p0388 N72-23400

## PHYSIOLOGICAL FACTORS

Aircraft and other vehicle simulators for training crews, discussing evolution of needs, digital techniques, and visual and physiological experiences  
p0362 A72-30844

## PIASECKI MILITARY AIRCRAFT

### U MILITARY AIRCRAFT

### PICKOFFS

### U SENSORS

### PILOT ERROR

Airplane attitude display motion relationship to external world as factor in pilot error due to visual frame of reference shift  
p0363 A72-31151

Report of aircraft accident at Augusta, Maine airport during landing approach of PA-31 aircraft, August 1971  
[NTSB-AAR-72-6] p0269 N72-19028

Relative incidence and cost data for orientation-error accidents in regular Army UH-1 aircraft during fiscal year 1968  
[AD-735457] p0332 N72-21016

Aircraft accident involving DC-3 aircraft during instrument landing approach to La Guardia Airfield, New York on 4 Jan. 1971  
[NTSB-AAR-71-11] p0528 N72-29008

Aircraft accident involving Convair 340 aircraft during landing approach at New Haven, Connecticut, on 7 June 1971  
[NTSB-AAR-72-20] p0583 N72-31010

## PILOT PERFORMANCE

Pilots in aircraft systems management involving machine and air traffic environment  
p0055 A72-13419

Collision avoidance systems and pilot warning instruments, minimizing cost by pilot detection,

# SUBJECT INDEX

# PILOT TRAINING

evaluation and avoidance execution p0067 A72-14823

Feedback gains for STOL aircraft display pilot interactive flight director design, using computerized approach-touchdown simulation and optimal control theory [ASME PAPER 71-WA/AUT-9] p0117 A72-15956

Pilot perception tests on estimating flight path inclination, ground image and touchdown time under poor visibility p0119 A72-16180

General aviation type light airplanes pilot workload during steep landing approach, comparing flight tested control response parameters with handling qualities criteria [AIAA PAPER 72-125] p0132 A72-16941

Pilot evaluation of Boeing 747 handling, directional stability, stall, rudder feel forces, landing, inertial navigation and reliability p0135 A72-16992

Airline pilot performance in automated ATC system involving use of surveillance data and instantaneous discrete communications p0137 A72-17331

Pilot role in automated ATC system using onboard situation display with navigation and collision avoidance devices p0137 A72-17332

Aircraft pilot performance during instrument approach in low visibility conditions p0179 A72-18832

Pilot warning systems for visual midair collision avoidance, noting reaction to imminent threats, scanning patterns and display sector size effects [SAE PAPER 720312] p0289 A72-25576

Flight tests of stability augmentation system for light airplane improving pilot control during IFR encounter p0309 A72-27513

Project pilot criteria for preparation and execution of flight test specifications p0310 A72-27517

Pilot evaluation of C-5 automatic landing system in Category III weather environment p0310 A72-27521

Airplane attitude display motion relationship to external world as factor in pilot error due to visual frame of reference shift p0363 A72-31151

Pilot-fighter aircraft system mathematical model relating pilot performance to air to ground weapon delivery accuracy p0453 A72-35564

Human factors engineering techniques in pilot-aircraft-environment adaptation to ease workload and in performance efficiency improvement p0455 A72-35792

Midair collision causes and prevention, considering pilot responsibilities, anticollision devices and procedures p0493 A72-37800

Instruments installation effect on Soviet passenger aircraft pilot performance, discussing Tupolev aircraft control systems p0545 A72-40173

Application of the head-up display /HUD/ to a commercial jet transport. p0556 A72-41256

Improved qualitative flight data rating scales. p0556 A72-41257

An analysis of aircraft lateral-directional handling qualities using pilot models. [AIAA PAPER 72-962] p0561 A72-42347

Agricultural aircraft flight loads - Typical spectra and some observations on airworthiness. p0608 A72-44734

Evaluation of simulated pilot/system performance in manually controlled IFR formation flight task for UH-1 helicopter under various environmental and operational conditions [AD-725209] p0031 A72-10044

Flight simulator exercise for investigation of pilot performance in low visibility conditions during approach and landing [RAE-TR-71044] p0042 A72-11042

Development of model to determine effects of pilot performance and aircraft dynamics on accuracy of tactical weapon delivery

[AD-728324] p0091 A72-12037

Technological forecasting of future pilot-aircraft interface requirements p0104 A72-13010

Procedures for predicting pilot-vehicle-flight control system performance [AD-729869] p0153 A72-14007

Analytical predictions compared with experimental results of motion effects on pilot performance in IFR hovering task [NASA-CR-1933] p0165 A72-14999

Application of Markov game approach to planar air combat problems [NASA-CR-1979] p0218 A72-17006

Psychological autopsy for analyzing immediate psychodynamic processes leading to suicidal aircraft accidents [FAA-AM-72-2] p0268 A72-19020

Simulation of wind, system data rate, and contingency event variables during steep descent of vertical lift aircraft under instrument conditions to determine pilot performance [AD-734702] p0272 A72-19051

Analysis of aircraft accidents resulting from pilot disorientation and vertigo during flights on military aircraft and helicopters [AD-735119] p0272 A72-19053

Prediction and measurement of multichannel pilot performance, and system design implications for pilot capability and limitations p0374 A72-22626

Rate-of-closure as performance monitoring parameter during approach and landing p0375 A72-22643

Effect of head-up display on pilot ability to see runway lights in fog [AD-738591] p0471 A72-26360

Six degree of freedom simulator tests to determine effects of motion cues on short takeoff and landing aircraft approach [NASA-CR-114458] p0480 A72-27032

Analysis of pilot performance in establishing specific glide path by reference to oblong diamond marks on runway [FAA-NA-72-57] p0485 A72-27702

Analysis of problems encountered by pilots of jet aircraft and application of engineering psychology to eliminate difficulties [NASA-TT-F-14351] p0514 A72-28008

Development of method for identifying visibility conditions on runway during takeoff and landing and comparison with visual perception of pilot [NLL-M-22355-(5828.4F)] p0522 A72-28661

Development of broadcast system of flight traffic control for increased flight safety based on increased pilot participation of control procedures [NASA-CR-127452] p0522 A72-28662

Analysis of pilot duties during low visibility approaches for landing and man machine relationship with automatic pilot operation [AD-740502] p0529 A72-29014

Performance tests of manual control displays and formats to evaluate effectiveness in performing precision tracking tasks [AD-742127] p0532 A72-29031

Efficient pilot management of cockpit control/display devices [AD-741945] p0573 A72-30016

Development of schematic representation of pilot workload and functions for various portions of aircraft flight and reaction to various stimuli p0621 A72-32035

Fixed base simulator evaluation of effect of pictorial display realism on frequency of control reversals due to roll disturbances [NASA-TM-X-62191] p0639 A72-33023

## PILOT TRAINING

Fighter pilots training by simulators, determining learning effectiveness by mathematical model based on renewal theory [AIAA PAPER 72-161] p0128 A72-16827

Night Carrier Landing Trainer flight and carrier environment simulator for A-7 aircraft pilot training, discussing performance predictions from computer data analysis p0182 A72-19137

Interactive computer graphics with three dimensional real time CRT display of air combat

## PILOTED CENTRIFUGES

## SUBJECT INDEX

maneuvers for fighter pilot training p0302 A72-26291

Pilot trainer transfer function identification for man-machine and on-line adaptive control system using analog/hybrid computer p0361 A72-30721

Aircraft and other vehicle simulators for training crews, discussing evolution of needs, digital techniques, and visual and physiological experiences p0362 A72-30844

Low cost flight simulator for general aviation pilot training, containing IFR instrumentation and turbulence injection device p0399 A72-32211

Simulated blind approach trainer for general aviation aircraft pilot training, discussing design concept and instrumentation with emphasis on components simplicity and economy p0450 A72-35325

Future aspects of business aviation, discussing pilot training and aircraft reliability and maintenance in context of flight safety p0507 A72-39741

Procedures for training pilots in assessment of flight systems during attendance at Empire Test Pilot School, England p0330 A72-20995

Interface and options definition for advanced simulation in undergraduate pilot training visual simulator, including electrical properties and edge smoothing p0518 A72-28262

**PILOTED CENTRIFUGES**

**U HUMAN CENTRIFUGES**

**PILOTLESS AIRCRAFT**

**NT DRONE AIRCRAFT**

**NT JINDIVIK TARGET AIRCRAFT**

**NT TARGET DRONE AIRCRAFT**

Unified single rf channel tracking, telemetry and command control systems for guidance of unmanned vehicles, including pilotless aircraft and satellites p0123 A72-16556

Remotely manned vehicles /RMV/ application in aerial warfare, considering antiaircraft defenses lethality increase, equipment costs and role of man during combat mission p0344 A72-28451

**PILOTS (PERSONNEL)**

**NT AIRCRAFT PILOTS**

**NT TEST PILOTS**

Crew compartment vibration environment in B-52 aircraft during low altitude, high speed flight [AD-727023] p0033 A72-10127

Analysis of information flow requirements between control tower operators and aircraft pilots and methods for displaying information [DOT-TSC-FAA-71-18] p0330 A72-21000

Importance of advanced information given to pilots considered as element in automatic control system [REPT-64] p0480 A72-27034

Analysis of pilot duties during low visibility approaches for landing and man machine relationship with automatic pilot operation [AD-740502] p0529 A72-29014

Equipment for automatic recording and rebroadcast of pilot reports on weather conditions [FAA-WA-72-62] p0643 A72-33153

**PIPE FLOW**

Pitot stem blockage corrections in uniform and nonuniform pipe flow determined by wind tunnel measurements [ARC-CP-1175] p0045 A72-11295

**PIPER AIRCRAFT**

Design and development program for air conditioning system of twin engine unpressurized Piper Navajo, noting flight test results [SAE PAPER 720328] p0291 A72-25590

**PIPES (TUBES)**

Pipe joint flexible metal seal development and testing for Concorde Olympus 593 under thermal and pressure cycling p0199 A72-21938

Metric swaged pipe coupling design and development for aircraft hydraulic systems, presenting fatigue test results p0199 A72-21940

## PISTON ENGINES

Russian book - The ASH-62IR engine /4th enlarged edition/. p0548 A72-40463

Comparison of Wankel engine characteristics with small reciprocating and jet engines used as power plants in light aircraft [REPT-908] p0326 A72-20764

Analysis of emissions from aircraft piston and gas turbine engines - tables [PB-207107] p0435 A72-25589

History of Curtis D-12 aircraft engine to show design, development, manufacture, and application p0590 A72-31781

## PISTON THEORY

Flying machine using reaction forces on body moving in compressible fluids within piston device equivalent to air pressure pump p0197 A72-21798

## PITCH

Multiple pure tone noise generation from turbobfan blade to blade nonuniformities in rotor geometry, using two dimensional inviscid flow model p0072 A72-15568

Tone noise from rotor/stator interactions in high speed fans. p0610 A72-44917

## PITCH (INCLINATION)

Aircraft pitching and yawing cross couplings compensation at high speed p0008 A72-10506

Self organizing adaptive aircraft control system with C criterion pitch axis performance and failure compensation p0053 A72-12920

Integration method to derive angle of pitch, flight-path angle, and angle of attack from measurements in nonsteady flight [VTH-156] p0267 A72-19008

Wind tunnel tests to determine effectiveness of cyclic pitch control on V/STOL aircraft for longitudinal control during hover and transition [AD-734237] p0271 A72-19039

## PITCH ANGLES

## U PITCH (INCLINATION)

## PITCH ATTITUDE CONTROL

## U LONGITUDINAL CONTROL

## PITCHING MOMENTS

Wind tunnel stability tests of aerodynamic pitch damping of aircraft model oscillating in two degrees of freedom p0057 A72-13539

Pitching moments effect on phugoid and height mode stability of aircraft in supersonic flight p0236 A72-23622

Multipropeller slipstream and wing interference, noting lift, drag, pitching moment, normal force distribution, and wakes p0029 A72-10015

Determination of interference lift, aerodynamic coefficients, and pitching moment for cruciform wings by iterative solution [BHVG-PBWT-71-18] p0166 A72-15009

Performance of cyclic pitch propellers for longitudinal control of V/STOL tilt wing aircraft [DGLR-71-019] p0381 A72-23012

## PITOT STATIC TUBES

## U PITOT TUBES

## U SPEED INDICATORS

## PITOT TUBES

Flight test procedures for subsonic transport aircraft pitot static pressure system, recommending trailing cone calibration method [SAE ARP 921] p0008 A72-10389

Low speed wind tunnel calibration of SC-1 aircraft pitot and static pressure sensors and wind vanes for flight test recording of airspeed and flight altitude [ARC-CP-1162] p0093 A72-12392

Static pressure position error calibrations for compensated and uncompensated XB-70 nose boom pitot static tube [NASA-TN-D-6827] p0421 A72-24016

## PLASTIC AIRCRAFT STRUCTURES

Price/demand/cost economic aspects of carbon fiber  
reinforced plastics composites in aero-engine  
applications  
p0065 A72-14743

Carbon fiber resin composite characteristics for  
airframe component design, comparing with metal  
materials  
p0065 A72-14746

Low cost 300 gallon fiber reinforced plastic  
aircraft wing fuel tank manufacturing technology  
p0196 A72-21693

Titanium-boron-epoxy composite materials selection  
and fracture mechanics criteria for B-1 bomber  
structural design  
p0228 A72-22477

Boron-epoxy composite design for aircraft  
structures, discussing materials variations,  
strength prediction inadequacies and full scale  
tests  
p0288 A72-25454

Structural requirements for normal category  
plastic aircraft civil certification, noting  
compliance with Federal Aviation Regulations  
[SAE PAPER 720304] p0288 A72-25568

Dynamic properties of thermosetting plastic  
composites unidirectionally reinforced by high  
elastic moduli boron and carbon fiber for  
aircraft structural applications  
p0308 A72-27343

Fiberglass reinforced plastic fuselage production  
for AN-2m aircraft, noting plastic-plastic and  
metal-plastic joints  
p0354 A72-29462

Lightning current tests of aircraft glass/carbon  
fiber reinforced plastics materials  
p0357 A72-30040

Data generation for engineering design with  
advanced composites.  
p0454 A72-35653

## PLASTIC COATINGS

Aircraft fuselage acrylic glazing design, covering  
passenger cabin window, cockpit windscreen and  
various surface coatings  
p0305 A72-27008

Development of sprayable urethane sealant for  
protection of heated areas on aircraft structures  
[AD-727592] p0035 N72-10489

Elastomeric coating materials for use in sealing  
fastener-head countersinks in highly loaded  
aircraft skins susceptible to exfoliation  
corrosion  
[AD-728039] p0110 N72-13429

Surface properties and soil retention of aircraft  
painted with polyurethane paint, and  
requirements for aircraft cleaner  
[AD-736971] p0426 N72-24613

Chemical and structural properties of urethane  
elastomers and resistance to rain erosion  
[AD-737624] p0426 N72-24618

**POLYCARBONATES**

Acrylics and polycarbonates properties in aircraft transparencies design, emphasizing cost and optical, mechanical, thermal and chemical properties  
p0305 A72-27009

Polycarbonates applications in aircraft transparencies, discussing chemical, heat, impact and abrasion resistance, toughness and weathering  
p0305 A72-27010

Transparent aircraft polycarbonate glazing systems shielding properties for projectile and bird impacts  
p0306 A72-27015

Ethylene terpolymer material used as thermoplastic transparent adhesive for bonding polycarbonate to glass  
[AD-728174] p0094 N72-12520

**POLYETHYLENES**  
Use of polyethylene thin films for ice prevention and ice-shedding on helicopter rotary wings  
[RAZ-TR-71238] p0640 N72-33032

**POLYIMIDE RESINS**  
Thermally stable laminating resins based on addition-type pyrolytic polymerization  
[NASA-CR-72984] p0260 N72-18584

High temperature resins for use in graphite fiber composites for jet engines  
[NASA-CR-72983] p0324 N72-20508

**POLYIMIDES**  
Boron polyimide composite development.  
p0549 A72-40553

Polyimide hydraulic actuator rod seals for application in high performance aircraft  
[NASA-CR-120878] p0425 N72-24530

**POLYIMERIC FILMS**  
Evaluation of bisphenol polyether, styrene acrylate, and chlorinated rubber alkyd as coatings for airfield runway marking  
[AD-734320] p0279 N72-19644

Aircraft paint film mechanical property changes caused by artificial weathering noting glass transition temperature and flexibility measurements  
[D-MAT-165] p0324 N72-20519

**POLYMERIZATION**  
Thermally stable laminating resins based on addition-type pyrolytic polymerization  
[NASA-CR-72984] p0260 N72-18584

**POLYMERS**  
Fiber reinforced composites and design analysis methods for metal and polymer matrix structures in aeronautical and space vehicle applications  
[NASA-TM-X-68101] p0521 N72-28545

**POLYPROPYLENE**  
Parachute canopy fabrics and rigging lines cordage properties requirements, considering nylon, polypropylene, silk, cotton and nonwoven scrim-reinforced fabrics.  
p0008 A72-10314

**POLYTROPIC PROCESSES**  
Compressor exergetic efficiency calculation from gas exergy losses caused by pressure drop and cooling, noting relations to isothermal, adiabatic and polytropic efficiencies  
p0491 A72-37668

Closed form solution for the sonic boom in a polytropic atmosphere.  
p0556 A72-41258

**POLYURETHANE FOAM**  
Vibration isolation and shock attenuation properties of polyurethane foam isolator for avionic components  
p0217 N72-16881

Lightweight fire resistant plastic foam for thermal protection of reentry vehicles and aircraft structures  
[NASA-CASE-ARC-10180-1] p0326 N72-20767

**PONTRYAGIN PRINCIPLE**  
Pontryagin minimum principle applied to aircraft heading change and aircraft interception  
[ETN-4] p0420 N72-24007

POPULATION THEORY

Maximum likelihood technique for estimating deviations from parent population of aircraft fatigue failures determined from sample containing failed and non-failed members  
[ARC-CP-1144] p0098 N72-12925

POROSITY

Wind tunnel measurements to determine stability and drag of parachutes with varying effective porosity  
[AD-729858] p0152 N72-14000

POROUS BOUNDARY LAYER CONTROL

Investigation of propeller vortex noise including the effects of boundary layer control.  
p0607 A72-44680

POROUS MATERIALS

Incompressible potential flow model of porous parachute canopy flow field, using Stokes stream function for axisymmetric vortex sheet in uniform steady stream  
p0313 A72-28123

Effect of several geometrically different porous castings on rotor stall limit line and overall performance improvement  
[NASA-TN-D-6537] p0078 N72-11888

POROUS WALLS

Wall porosity and angle of attack effects on jet-stretcher flow field for supersonic engine inlet testing, using three dimensional method of characteristics  
[AIAA PAPER 72-1025] p0558 A72-41603

PORTABLE EQUIPMENT

Portable detector-recorder for automobile, blast furnace, railroad car, engine room and helicopter infrasonic noise measurements, discussing peak frequencies and subjective effects  
p0001 A72-10157

Portable self contained ultrasonic field inspection equipment for nondestructive crack detection in T53 gas turbine compressor disks  
p0009 A72-10814

Active transistorized directional dipole VHF receiving antennas for ATC and mobile applications and field intensity measurement  
p0549 A72-40527

Requirements for using Talar 4 landing aid as portable ground station in tactical helicopter operations  
p0083 N72-11925

POSITION (LOCATION)

Synchronous satellite surveillance system for transoceanic ATC, using suboptimal /modified Kalman/ filter for aircraft position and velocity computation  
p0191 A72-21091

Log periodic dipole antenna systems for ILS localizers, noting reduced sensitivity to snow and ice  
p0489 A72-37279

Applications of a technique for estimating aircraft states from recorded flight test data.  
[AIAA PAPER 72-965] p0563 A72-42360

System and method for position locating for air traffic control involving supersonic transports  
[NASA-CASE-GSC-10087-3] p0091 N72-12080

VHF ranging and position fixing techniques using ATS 1 and ATS 3 for ship and aircraft navigation  
[NASA-CR-125538] p0209 N72-16510

VHF ranging and position fixing techniques using ATS 1 and ATS 3 for ship and aircraft navigation - executive summary  
[NASA-CR-125537] p0209 N72-16511

Airport planning in West Germany discussing surface transport facilities and pollution  
[DGLR-PAPER-71-075] p0430 N72-24986

Location identification system with ground based transmitter and aircraft borne receiver/decoder  
[NASA-CASE-ERC-10324] p0433 N72-25173

POSITION ERRORS

ATC separation minima and navigational errors on airways in general and long range oceanic environments  
p0001 A72-10177

Relationship between static pressure error /position error/ and measurable flight parameters for different aircraft weights and configurations  
p0412 A72-33637

Coordinate and speed error dependence on instrumental errors of inertial navigation system using gyrohorizoncompass  
p0414 A72-33960

The impact of gradiometer techniques on the performance of inertial navigation systems.  
[AIAA PAPER 72-850] p0504 A72-39079

A versatile Kalman technique for aircraft or missile state estimation and error analysis using radar tracking data.  
[AIAA PAPER 72-838] p0505 A72-39089

Possible impact of area navigation upon MLS requirements for azimuth angular coverage and range.  
p0606 A72-44643

Static pressure position error calibrations for compensated and uncompensated XB-70 nose boom pitot static tube  
[NASA-TN-D-6827] p0421 N72-24016

POSITION INDICATORS

NT RADIO DIRECTION FINDERS:  
Polar navigation with transverse mercator technique for aircraft using secant geared ground position indicators  
p0002 A72-10181

Airborne pictorial navigation systems for visual indication of aircraft position in addition to digital readout  
p0018 A72-12106

Doppler system with navigation radar device, computer unit and data transmitter for continuous recording of aircraft position and speed  
p0024 A72-12749

Electromagnetic position sensor for magnetically supported model in wind tunnel, discussing design, operation principles and performance  
p0243 A72-24773

Airplane attitude display motion relationship to external world as factor in pilot error due to visual frame of reference shift  
p0363 A72-31151

Choice of optimal geometrical relationships in a transformer-type angle converter  
p0559 A72-41805

Aircraft position and motion controlled by photogrammetric three reference point method noting coordinate transformations  
[SAAB-TN-68] p0484 N72-27472

POTASSIUM COMPOUNDS

Boron/potassium nitrate parachute mortar design for aircraft and spacecraft applications, comparing with high-low propellant  
p0189 A72-20783

POTENTIAL FLOW

Complex perturbation potential of constant vortex shear flows around airfoil activated by motion in presence of rectilinear wall  
p0118 A72-16122

Nonlinear unsteady potential flow of incompressible fluid past slender wing, using linearized vortex distribution method  
p0119 A72-16214

Subsonic and transonic compressible potential flow over nonlifting hovering helicopter rotor blades, calculating flow field by three-dimensional nonlinear relaxation scheme  
[AIAA PAPER 72-39] p0130 A72-16901

Subsonic three dimensional potential flow computational method lifting aerodynamic configurations analysis and design  
[AIAA PAPER 72-188] p0180 A72-18958

Irrational two dimensional transonic flow past symmetric profile with and without shock  
p0185 A72-20068

Plane potential flow problem for laminar boundary layer on rotating infinite cylindrical blade, using conformal coordinate transformation  
p0195 A72-21614

Computerization of panel flutter boundary calculations with aerodynamic forces derived from linear three dimensional unsteady potential flow theory  
[AIAA PAPER 72-403] p0287 A72-25424

Unsteady aerodynamic forces on flat plate in locally perturbed incompressible potential flow, investigating angle of attack frequency response to periodic local perturbations  
p0303 A72-26579

## POTENTIAL PROBLEMS

Incompressible potential flow model of porous parachute canopy flow field, using Stokes stream function for axisymmetric vortex sheet in uniform steady stream

p0313 A72-28123

Elliptic-hyperbolic relaxation algorithm for solution to three dimensional nonlinear transonic small disturbance potential equation for flow about swept wings  
[AIAA PAPER 72-677]

p0414 A72-34063

Surface vorticity theory for axisymmetric potential flow past annular aerofoils and bodies of revolution with application to ducted propellers and cowls.

p0503 A72-38554

Potential flow calculations to support two-dimensional wind tunnel tests on high-lift devices.

[ICAS PAPER 72-13]

p0553 A72-41138

Calculation of potential flow about aerofoils using approximation by splines.

p0566 A72-42849

An improved solution of the two-dimensional jet-flapped airfoil problem.

p0594 A72-43329

Computation of the potential-theoretical flow around wing-fuselage combinations and a comparison with measurements.

p0602 A72-44298

The determination of a general relation between the aerodynamic properties of a single airfoil and those of the same airfoil arranged in an arbitrary cascade.

p0614 A72-45363

Lifting potential flow in terms of doublet distribution over body surface and trailing vortex sheet

[NAL-TR-243]

p0258 N72-18281

Transonic potential flow around quasi-elliptic wing profile noting shockless compression  
[REPT-10/1971]

p0317 N72-19996

Computation of potential flow around axisymmetric bodies, cowls, and engine inlets using singularity method  
[AVA-FB-7131]

p0324 N72-20331

Numerical analysis of potential flow problem of two dimensional airfoil with distributed suction

p0424 N72-24359

## POTENTIAL PROBLEMS

### U POTENTIAL THEORY

#### POTENTIAL THEORY

Lifting surface linearized potential theory for unsteady aerodynamic forces on wing and horizontal tail surfaces, using computer program

p0057 A72-13541

Circular arc blades two dimensional cascade performance test data for various cambers comparison with potential theory data

p0121 A72-16485

Harmonically oscillating rectangular wing in unsteady transonic flow, obtaining two part boundary value problem for linear potential equation

p0310 A72-27545

#### POWDER (PARTICLES)

Procedure for measuring performance of aircraft fire extinguishing powders

p0049 N72-11691

#### POWDER METALLURGY

Forged Inconel alloy 718 metal powder preforms for dense aircraft engine compressor rotor blades

p0014 A72-11441

Metal forming techniques for gas turbine engines, considering isothermal, radial and powder metallurgy preform forgings, contoured cross and form rolling, and squeeze casting  
[ASME PAPER 72-GT-58]

p0296 A72-25649

Methods and sequences for producing precision forged structural and jet engine components from metal powder preforms of titanium alloys

p0372 N72-22511

## POWER

Helicopter lift margin system to aid in determining power requirements for takeoff and landing

[AD-725207]

p0043 N72-11053

## POWER CONVERSION

### U ELECTRIC GENERATORS

## SUBJECT INDEX

### POWER EFFICIENCY

Hydrothermodynamic foundations of hydrofoil engines employing gas-water mixtures and gas turbine generators, analyzing thrust coefficient and power efficiency

p0247 A72-25128

Axial flow compressor and turbine loss coefficients, correlating blade rows geometric and aerodynamic variables effects

p0294 A72-25617

Military jet engines centrifugal fuel pumps power requirements for throttled operation, noting pressure stability improvement at low flow rates

p0456 A72-36041

### POWER GAIN

Four uhf antennas buried beneath refractory concrete, discussing design, fabrication and power gain and azimuthal pattern measurements

p0138 A72-17345

Diagram and gain measurements regarding antennas conducted with a helicopter for the range from 0.5 to 800 MHz

p0549 A72-40545

Helicopter payload gains utilizing water injection for hot day power augmentation  
[NASA-TM-X-62195]

p0639 N72-33027

### POWER GENERATORS

#### U ELECTRIC GENERATORS

#### POWER PLANTS

Russian book - Optimization of thermal circuits of complex gas-turbine power plants

p0490 A72-37450

### POWER SPECTRA

Nonlinear longitudinal aerodynamic characteristics effect on rigid aircraft response to normal acceleration due to atmospheric turbulence, using power spectral technique

p0236 A72-23461

Sonic jet noise pressure source model for radiated sound power and jet pressure frequency spectra ratio derivation with application to noise suppression

p0457 A72-36414

Aircraft structural design loads definition by mission analysis criteria, taking into account gust loads via power spectral density method

p0566 A72-42828

Atmospheric turbulence power spectra for predicting rigid aircraft center of gravity response

[ARC-R/M-3665]

p0089 N72-11965

### POWER SUPPLIES

Aircraft hybrid electrical power systems, describing variable frequency generation and high voltage dc distribution

p0011 A72-11068

Concorde aircraft electrical power systems design, noting dc and emergency supplies and installation

p0053 A72-12910

Airborne equipment electric power supply standards to provide characteristics limits for compatibility with ground support systems  
[SAE AS 1212]

p0458 A72-36535

Airport power supply system to meet increased load terminal demands, describing main and emergency standby network layout and equipment

p0612 A72-45272

Analysis of wiring weight, conductor weight, and conductor losses as function of system voltage in aircraft electrical power systems  
[AD-732001]

p0207 N72-16164

Development of methods for conducting climatic tests with emphasis on design, construction, and operation of climatic hangar  
[AD-733299]

p0257 N72-18268

Development and evaluation of built-in test equipment for aircraft systems  
[AD-734853]

p0321 N72-20028

Design and characteristics of integrated engine-generator system for installation on aircraft turbojet and turbofan engines  
[NASA-TM-X-25791]

p0468 N72-26037

Analysis of secondary power system for use with advanced rotary wing aircraft for reliable production of electric power

p0482 N72-27069

### POWER SUPPLY CIRCUITS

Low pass filter requirements and performance in variable speed constant frequency system for

## SUBJECT INDEX

## PRESSURE DISTRIBUTION

- aircraft electric power supplies  
[RAE-TR-71088] p0434 N72-25273
- POWER TRANSMISSION**  
Hydraulic transmission for driving helicopter tail rotor, noting compensatory system for engine failure p0311 A72-27862
- PRECAUTIONS**  
U ACCIDENT PREVENTION
- PRECIOUS METALS**  
U NOBLE METALS
- PRECIPITATION (METEOROLOGY)**  
NT HAIL  
NT RAIN  
Wind shear, turbulence, precipitation, temperature, visibility and ceiling effects on airport capacity, suggesting weather data integration into ATC system for pilots information p0192 A72-21521  
Liquid and solid precipitation on aircraft structure surfaces, discussing potential hazards to engine components and aircraft controls due to ice formation p0603 A72-44339
- PRECIPITATION HARDENING**  
Gas turbine superalloys high temperature oxidation resistance by fiber strengthening, rare earth alloying, precipitation hardening and intermetallic compounds p0139 A72-17611
- PREDICTION ANALYSIS TECHNIQUES**  
Deterministic model for new product innovation adoption rate in commercial aircraft jet engine market p0186 A72-20269  
Inflight vibration and noise study of several helicopters for upgrading environmental design criteria and verifying dynamic prediction techniques p0215 N72-16823  
Technique for predicting etiology of decompression sickness in unpressurized aircraft above 20,000 feet [AD-731118] p0273 N72-19106  
Laplace transform applied to aerodynamic characteristics prediction of aircraft configurations in subsonic flow [NLR-HP-71018-U] p0321 N72-20025  
Method for computing noise generated by standing and flying jet aircraft [ONERA-NT-187] p0437 N72-25636  
Waverider prediction of hypersonic behavior of wing planforms p0617 N72-31997
- PREDICTIONS**  
NT PERFORMANCE/PREDICTION  
Prediction of high lift wing characteristics in relation to detachment phenomena [NASA-TT-F-14073] p0100 N72-12983  
Prediction tables of air carrier operations at large and medium hubs [EC-200] p0105 N72-13021  
Method for predicting profile drag of airfoils at subcritical and supersonic speeds [NAL-TR-253] p0365 N72-21995  
Mathematical model for predicting radiated rotational noise of lifting rotor or propeller [AD-740816] p0579 N72-30611
- PREDICTORS**  
U PREDICTIONS
- PREFORMS**  
Forged Inconel alloy 718 metal powder preforms for dense aircraft engine compressor rotor blades p0014 A72-11441
- PREHEATERS**  
U HEATING EQUIPMENT
- PRELOADING**  
U PRESTRESSING
- PREMIXED PLANES**  
Directionality and far field structure of combustion generated noise, using premixed turbulent flame models [AIAA PAPER 72-198] p0129 A72-16875
- PREPARATION**  
NT PRESTRESSING
- PRESSING (FORGING)**  
Development of incremental technique for forging thin-web, tall-rib configurations for aircraft structures
- [AD-729012] p0110 N72-13434
- PRESSURE**  
NT ATMOSPHERIC PRESSURE  
NT BASE PRESSURE  
NT DYNAMIC PRESSURE  
NT IMPACT LOADS  
NT INLET PRESSURE

NT VAPOR PRESSURE  
NT WALL PRESSURE  
NT WATER PRESSURE  
NT WIND PRESSURE  
Automatic throttle control system for transport aircraft engines which limits maximum throttle level position by pressure ratio [AD-743314] p0647 N72-33753
- PRESSURE CABINS**  
U PRESSURIZED CABINS
- PRESSURE COEFFICIENT**  
U AERODYNAMIC COEFFICIENTS
- PRESSURE DISTRIBUTION**  
Parachute inflation loads and times, presenting calculation method based on unsteady pressure distribution on decelerating inflating parabolic shell of revolution with unsteady starting vortex p0007 A72-10311  
Sonic boom pressure signatures during F-104 overflights at Mach 1.3 and 30,000 ft, explaining variations by atmospheric turbulence p0013 A72-11158  
Aerodynamic forces and pressure distribution measurement on wing-body combination model, investigating boundary layer on wing upper surface p0018 A72-12228  
Force and pressure distribution measurements on delta wing-body combination in compressible flow, investigating Reynolds number effect [DGLR PAPER 71-118] p0022 A72-12707  
Unsteady pressure distribution on harmonically oscillating circular cylindrical fuselage body with conical nose and delta wing with straight, cubic or sinusoidal leading edges [DGLR PAPER 71-080] p0023 A72-12730  
Two dimensional airfoil pressure distribution measurements at high subsonic speeds, comparing normal force coefficients corrected for wind tunnel interference effects with theoretical calculations [DFVLR-SONDDR-168] p0058 A72-13609  
Pressure and convective heat transfer distribution at air inlet central body surface, reducing Navier-Stokes equations to partial differential equations with similar solutions p0069 A72-14971  
Leaning vanes for fan noise reduction, discussing rotor-stator plane fluctuating pressure amplitude decrease and radial distribution modification [AIAA PAPER 72-126] p0128 A72-16823  
Laminar flow airfoils for gliders, optimizing profiles for favorable velocity and pressure distribution p0136 A72-17194  
Jet flaps for high turning compressor cascades in incompressible axial flow, calculating blade pressure and jet slope distributions [ASME PAPER 72-GT-16] p0293 A72-25615  
Secondary flow measurements in rotating ducts, obtaining pressure distributions and cross-flow velocities [ASME PAPER 72-GT-17] p0294 A72-25616  
Supersonic turbine cascade flow properties and pressure distributions on blades, comparing calculated results with experimental data [ASME PAPER 72-GT-47] p0296 A72-25639  
Turbocompressor deceleration cascades blades surface roughness effects on boundary layer, noting pressure and velocity distributions [ASME PAPER 72-GT-48] p0296 A72-25640  
Gas-particle flow trajectories, velocities and pressure distribution in axial flow turbine stage, using cascade tunnel and high speed photographic techniques [ASME PAPER 72-GT-57] p0296 A72-25648

French monograph on flow near rotor blade tips, discussing three dimensional circulation and boundary layer effects, energy losses, velocity and pressure distributions, etc.

p0363 A72-30950

Pressure distribution over delta wing with blunted edges at small angles of attack in hypersonic wind tunnel tests

p0363 A72-31022

Contracting or diverging stream flow mean velocity change effects on airfoil pressure distribution, circulation and lift, deriving vortex distribution expression

p0396 A72-32023

Transonic airfoil section design to given surface pressure distribution, applying finite difference procedures to transonic small disturbance equations

[AIAA PAPER 72-679] p0414 A72-34062

Engine inlet total pressure distortion effects on multistage axial compressor and turbojet/turbofan engine performance and stability, considering inlet-engine compatibility

[ICAS PAPER 72-19] p0553 A72-41144

Flutter analysis and unsteady pressure fields induced by pitching motions of wall mounted sweptback wing, verifying experimentally lifting surface theory in high subsonic range

p0569 A72-43094

Computation of the potential-theoretical flow around wing-fuselage combinations and a comparison with measurements

p0602 A72-44298

Viscous interaction over concave and convex surfaces at hypersonic speeds.

p0602 A72-44308

Trailing vortex effects on wing pressure distribution from low speed wind tunnel tests, discussing effect of wing-vortex distance

p0613 A72-45331

An experimental investigation of a jet issuing from a wing in crossflow.

p0613 A72-45332

Calculation of pressure distribution on cylindrical fuselage with perpendicular lifting jet using singularity method

p0029 N72-10014

In-flight investigation of installation effects and aerodynamic characteristics of local flow field on auxiliary inlet ejector nozzle on underwing engine nacelle

[NASA-TN-X-2396] p0051 N72-11711

Reynolds number effect on flow past body of revolution at transonic speed

p0074 N72-11864

Pressure plotting tests on swept wings for analyzing scale effect at high subsonic speeds

p0075 N72-11867

Maximum lift coefficient airfoils developed through optimization of pressure distribution

[NASA-TN-X-67591] p0164 N72-14992

Nonlinear lift evaluated from pressure distribution on fuselage and two body-wing configurations in transonic flow

[BMVG-PBWT-71-24] p0166 N72-15011

Hypersonic wind tunnel tests to determine surface pressures and flow distribution on orbiter space shuttle

[NASA-CR-120037-VOL-1] p0201 N72-15942

Pressure distribution on swept wing-body junction at supersonic speeds

[ARC-R/M-3661] p0202 N72-15949

Theoretical pressure distributions on caret and plane delta wings for supersonic flow

[ARC-CP-1178] p0202 N72-15952

Pressure distribution on 45 deg swept half wing including effectiveness of upper surface spoiler as roll control

[ARC-CP-1184] p0270 N72-19032

Unsteady pressure distribution on harmonically oscillating slender wing fuselage configurations

[AVA-FB-7126] p0317 N72-19997

Aerodynamic forces, pitching moments, and pressure distributions measurements on delta wing-body combinations at transonic speed in compressible flow

[AVA-FB-7129] p0317 N72-19998

Numerical analysis of flow distribution behind rectangular wings at supersonic speed using

optimum differencing methods

[NASA-CR-126214] p0365 N72-21998

Method for using lifting-surface theory to obtain pressure distribution on wing with trailing-edge flap or control surface

[NASA-TN-D-6798] p0366 N72-22007

Free streamline theory for determining pressure distribution on airfoil with flow separation

[NAL-TR-247] p0371 N72-22333

Linearized lifting surface theory for determining pressure distribution on subsonic delta wing

p0379 N72-22992

Wind tunnel tests to determine aerodynamic interference and jet-wake interference produced by components of high wing, logistics transport type aircraft

[NASA-TM-X-2530] p0421 N72-24020

Kernel function solution for pressure distribution over wing with oscillating control surfaces in subsonic flow

[NLR-TR-70123-U] p0424 N72-24368

Analysis of pressure field generated by passage of three dimensional disturbance over airfoil shape

p0463 N72-25994

Development of approximate method for calculating pressure distribution on thick cambered airfoil in subcritical viscous flow

[PPA-AU-901] p0463 N72-26001

Extrapolation of sonic boom pressure signatures by waveform parameter method and comparison with F-function method

[NASA-TN-D-6832] p0463 N72-26004

Hypersonic wind tunnel tests on delta wing models at high incidence for pressure distribution determination

[ARC-CP-1198] p0476 N72-27004

Computer program for airfoil pressure distribution for subcritical viscous attached flow

[NAL-TR-248] p0484 N72-27317

Boundary layer pressure distribution measured on Shark 1 free flight test vehicle at Mach numbers from 1.5 to 2.2 and high Reynolds numbers

[ARC-CP-1208] p0527 N72-28999

Analytical method to predict coolant pressure and airflow distribution in strut-supported transpiration cooled vane for gas turbine engine

[NASA-TN-D-6916] p0528 N72-29003

Simulation of stage pressure and efficiency maps of multistage compressor

[NASA-TN-D-6917] p0571 N72-29993

Measurement of wind tunnel background pressure fluctuations for application to design of aerospace vehicles

[NASA-CR-123810] p0575 N72-30245

Pressure distribution on sweptback wing at subsonic speeds noting boundary layer transition

[ARC-CP-1215] p0583 N72-31003

Development of procedures for calculating pressure distribution on airfoil in sonic stream

[ESDU-69013] p0617 N72-31989

Wind tunnel tests to determine path of vortex moving from each rotor blade tip of helicopter rotor to establish effect on aerodynamic forces and pressure distribution

[NASA-TT-F-14462] p0618 N72-32012

Subsonic wind tunnel tests to determine aerodynamic forces and pressure distribution on parachute canopy of ring-slot parachute model

[AD-744103] p0625 N72-32063

Wind tunnel wall corrections for two-dimensional flow applied to pressure distribution measurements in transonic wind tunnel

[NASA-TT-F-14316] p0626 N72-32264

#### PRESSURE DRAG

NT INTERFERENCE DRAG

NT SUPERSONIC DRAG

NT WAVE DRAG

Base pressure drag reduction on rectangular wings with blunt trailing edges from low speed wind tunnel measurements

[DPVLR-SONDDR-219] p0244 A72-24842

Subsonic powered nacelle wind tunnel model for investigation of geometric variables effect on pressure drag

[ASME PAPER 72-GT-14] p0293 A72-25613

#### PRESSURE DROP

Shocked flow and pressure loss computation for axial flow compressor cascades, using time dependent finite difference technique

# SUBJECT INDEX

# PRESSURE MEASUREMENTS

- [ASME PAPER 72-GT-31] p0295 A72-25627  
Compressor exergetic efficiency calculation from gas energy losses caused by pressure drop and cooling, noting relations to isothermal, adiabatic and polytropic efficiencies p0491 A72-37668
- PRESSURE EFFECTS**  
Acoustic power radiated by jet aircraft fuselage structure exposed to turbulent boundary layer pressure field, evaluating noise reduction treatments p0002 A72-10216  
SST operational maneuver effects on sonic boom, discussing steady flight and acceleration-to-cruise pressure signatures [AIAA PAPER 72-196] p0134 A72-16981  
Hydraulic fluids behavior under extreme temperature, pressure and filtration conditions, considering viscosity, wear and corrosion resistance p0135 A72-17084  
Building structures response to transient pressures caused by sonic booms, discussing three dimensional loading effects, air cavity coupling and nonlinearities influence p0198 A72-21908  
Pipe joint flexible metal seal development and testing for Concorde Olympus 593 under thermal and pressure cycling p0199 A72-21938  
Rectangular skin panel vibration modes aerodynamic damping dependence on Mach number, dynamic pressure, mode shape and turbulent boundary layer thickness [AIAA PAPER 72-402] p0287 A72-25423  
Design considerations in selecting geometries for high pressure ratio single stage centrifugal compressors [ASME PAPER 72-GT-91] p0298 A72-25665  
Dynamic deflection of elastic rectangular plate hinged to rigid base moving under sinusoidal pressure impulse action, noting base inertia effect p0306 A72-27091  
Gas turbine engine compressor blade and materials fatigue strength dependence on pressure under contact friction corrosion p0315 A72-28244  
Engine inlet total pressure distortion effects on multistage axial compressor and turbojet/turbofan engine performance and stability, considering inlet-engine compatibility [ICAS PAPER 72-19] p0553 A72-41144  
Characteristics of sonic booms and damage caused to buildings due to supersonic overflights [NTID300.12] p0633 N72-32913

Composite propeller blades with carbon fiber reinforced plastics spar for hovercraft, presenting mechanical properties test data for different composite configurations p0181 A72-19062

# SUBJECT INDEX

Plane potential flow problem for laminar boundary layer on rotating infinite cylindrical blade, using conformal coordinate transformation p0195 A72-21614

Comparison of two types of blade profile for axial-flow fans p0456 A72-36000

Investigation of the stability of the tip vortex generated by hovering propellers and rotors. p0612 A72-45327

Analytical and experimental investigation of vortex noise generated by propellers with low tip speeds [AD-731156] p0167 N72-15015

Development of composite structure for propeller blade retention on V/STOL aircraft propulsion system [AD-739555] p0481 N72-27047

Painting schemes for improving rotating propeller and tail rotor visibility of military aircraft [AD-744453] p0629 N72-32579

# PROPELLER DRIVE

NT HELICOPTER PROPELLER DRIVE

Slipstream vortex street geometry influence on velocity and load distribution of VTOL propellers p0037 N72-11004

# PROPELLER EFFICIENCY

Altitude-velocity dependence of turboprop engine equivalent horse power, propeller output and specific fuel consumption, discussing performance characteristics relation to ambient air temperature p0136 A72-17100

Leading edge serrations effect on rotor noise and aerodynamic characteristics, noting vortex and rotational noise reduction and overall efficiency decrease [AIAA PAPER 72-655] p0415 A72-34079

Rotary wings lift and efficiency increase by circulation control via tangential blowing about bluff trailing edge airfoils [AHS PREPRINT 603] p0445 A72-34492

Computer program for determining characteristics of propellers used in general aviation aircraft to include blade shape parameter and integrated design lift coefficient [NASA-CR-114399] p0251 N72-18004

# PROPELLER FANS

Prop-fan engine for quiet STOL propulsion, discussing noise characteristics, weight advantage, response and reduced fuel consumption p0059 A72-13697

Variable pitch fans for STOL aircraft thrust/shaft engine, noting short field capability and quietness p0234 A72-23447

Low pressure ratio Q-FAN propulsor noise reduction tests on wind tunnel model, discussing source components and design configurations [ASME PAPER 72-GT-40] p0295 A72-25634

Comparison of two types of blade profile for axial-flow fans p0456 A72-36000

Variable pitch fans - Successors to the aircraft propeller. p0567 A72-42927

Performance tests of fan stages operating with oblique weak shocks in rotor blade tip region and analysis of damage in leading edge tip region [NASA-TN-X-68027] p0428 N72-24813

# PROPELLER SLIPSTREAMS

Nonuniform propeller streams effects on aerodynamic characteristics of high aspect ratio wing, using airfoil theory [AD-745477] p0182 A72-19092

Conference papers on jet and slipstream influence on aerodynamic coefficients using aircraft models [DLR-MITT-70-28] p0027 N72-10004

Multipropeller slipstream and wing interference, noting lift, drag, pitching moment, normal force distribution, and wakes p0029 N72-10015

Rotor and propeller wake calculation, recovery rotors, and rotor feedback control - conference [DLR-MITT-71-12] p0037 N72-11001

Slipstream vortex street geometry influence on velocity and load distribution of VTOL propellers p0037 N72-11004

PROPELLER SYNCHRONIZERS

U PROPELLERS

PROPELLERS

NT PROPELLER FANS

NT SHROUDED PROPELLERS

NT TILTED PROPELLERS

NT VARIABLE PITCH PROPELLERS

Critique of general momentum theory of propeller actuator disk model, showing flow field determination from nonlinear elliptic differential equation solution

p0301 A72-25998

Acoustic measurements for STOL turboprop transport aircraft propeller configurations under static, taxi and flyover conditions, discussing quiet propeller noise signature

p0355 A72-29571

Investigation of propeller vortex noise including the effects of boundary layer control.

p0607 A72-44680

User manual for propeller noise detectability program

[AD-729435] p0156 N72-14223

Propeller noise detectability computer program for prediction of harmonic rotational noise

[AD-729432] p0161 N72-14709

Computer program for determining characteristics of propellers used in general aviation aircraft to include blade shape parameter and integrated design lift coefficient

[NASA-CR-114399] p0251 N72-18004

Wind tunnel tests to determine longitudinal control capability of four propeller, tilt wing aerodynamic configuration with cyclic pitch propellers

[AD-734236] p0271 N72-19040

Flight mechanical aspects for V/STOL propeller and rotor design

[DGLR-71-016] p0381 N72-23009

Numerical optimization methods for aerodynamic V/STOL propeller design

[DGLR-71-017] p0381 N72-23010

Computer program for predicting performance, noise, weight, and cost of general aviation aircraft propellers for 1980 time period

[NASA-CR-2066] p0431 N72-25005

Mathematical model for predicting radiated rotational noise of lifting rotor or propeller

[AD-740816] p0579 N72-30611

PROPORTIONAL LIMIT

Calculation of a thin-walled small-aspect-ratio wing beyond the limit of proportionality

Engine-aircraft interference, thrust, inlets, nozzles, and propulsion systems - conference

[AGARD-CP-91-71] p0209 N72-16685

Research equipment, methods, and facilities at

Propulsion Test Center, France p0209 N72-16690

Inlet, engine, and exhaust nozzle tests for supersonic propulsion system

[NASA-TM-X-67494] p0210 N72-16692

Propulsion jet flow for vertical takeoff aircraft

p0211 N72-16700

PROPULSION CALCULATIONS

U MATHEMATICAL MODELS

U PROPULSION

PROPULSION SYSTEM CONFIGURATIONS

Propulsion system optimization for commercial transport aircraft design under Advanced Transport Technology study, considering impact on aircraft gross weight

[SAE PAPER 710760] p0005 A72-10257

Propulsion system optimization in transonic transport aircraft design, considering nacelle integration, engine choice, noise attenuation and technology utilization

[SAE PAPER 710762] p0005 A72-10259

Aircraft power plant management, discussing integration of intake, engine and exhaust system from control standpoint

p0055 A72-13418

Propulsion twin spool power plant design and dimensioning with selective high pressure cut-off for supersonic aircraft with part of flight in subsonic range

[DFVLR-SONDDR-169] p0058 A72-13608

Prop-fan engine for quiet STOL propulsion, discussing noise characteristics, weight advantage, response and reduced fuel consumption

p0059 A72-13697

Ramjet engine propulsion systems for large aircraft above Mach number 2.5

p0062 A72-14450

Aircraft and reusable spacecraft propulsion systems current status and future development, discussing noise and exhaust emission problems, V/STOL bypass and fan engines, ramjets, etc

p0127 A72-16735

VJ-101A and B V/STOL weapon system design, describing various propulsion system configurations

p0183 A72-19250

Mitsubishi T-2 two-place supersonic trainer, describing prototype airframe and propulsion system design and operational features

p0187 A72-20306

Commercially available aircraft turbofan engines specifications, describing design features and performance characteristics

p0189 A72-20625

Propulsion system/airframe matching in hybrid V/STOL airplanes, stressing thrust vector management, lift engine bypass ratio and power plant packaging design

[ASME PAPER 72-GT-106] p0299 A72-25671

Tu-154 aerodynamic design, discussing arrow wing and propulsion unit characteristics

p0307 A72-27268

L-1011 propulsion, fuel, flight control, navigation, avionics, communication, electrical, environmental control and auxiliary power systems, discussing structure and high lift devices

p0400 A72-32427

Propulsion technology advance factors, stressing noise and exhaust emissions reduction, economic considerations and aircraft performance

p0491 A72-37679

High subsonic transport aircraft design development based on supercritical aerodynamic configuration and advanced structural, flight control and propulsion system technologies

[AIAA PAPER 72-756] p0510 A72-40056

Analysis of a lateral-directional airframe/propulsion system interaction of a Mach 3 cruise aircraft.

[AIAA PAPER 72-961] p0561 A72-42348

IL-62 aircraft propulsion system design and installation details, operational surveillance system and maintenance operations

p0597 A72-43639

Application of quadratic optimization to supersonic inlet control.

p0599 A72-44195

Aircraft gas turbine engines environmental effects, considering thermal radiation, acoustic emissions and exhaust gases in relation to propulsion system design parameters

p0602 A72-44296

Forecasting trends in subsonic and supersonic propulsion aircraft technology

p0103 N72-13002

Development of analytical flow configuration models for designing supersonic air breathing propulsion systems

[AD-728675] p0109 N72-13331

Noise measurement of deflected jet VTOL aircraft for determining design configurations and selecting propulsion systems

p0215 N72-16817

Selection of engine parameters for various types of aircraft to maximize aircraft performance and meet constraints imposed by design and operational requirements

[NASA-TM-X-68009] p0263 N72-18769

Fan and wing force data on wind tunnel model of VTOL lift fan in two dimensional wing, with and without exit louvers

[NASA-TN-D-6654] p0263 N72-18775

# PROPULSION SYSTEM PERFORMANCE

# SUBJECT INDEX

Design problems of inlets and nozzles used in supersonic and V/STOL propulsion systems  
[NASA-TN-X-67741] p0340 N72-21819

Effects of engine pressure ratio, engine size, and engine location on aerodynamic characteristics of STOL wing propulsion system  
[NASA-TN-X-2541] p0378 N72-22795

Propulsion requirements for advanced high performance V/STOL designs  
[DGLR-71-018] p0381 N72-23011

Separated flow point determination on blown flap airfoil of STOL wing propulsion system  
p0483 N72-27286

Design of transport helicopter with integrated regenerative engine propulsion systems  
[AD-741379] p0538 N72-29813

Flight tests to determine performance of air cooled plug nozzle with afterburning turbojet  
[NASA-TN-X-2607] p0590 N72-31785

**PROPULSION SYSTEM PERFORMANCE**

Advanced technology air transports propulsion system requirements, considering design, engine performance and reliability, maintenance, airline problems, noise and pollution control  
[SAE PAPER 710761] p0005 A72-10258

Jet noise reduction technology, hardware and tests for NASA Quiet Engine Program to develop low noise subsonic civil transport aircraft propulsion system  
[SAE PAPER 710774] p0005 A72-10266

Airline Propulsion Team approach to DC-10 aircraft power plant design for maximum operational effectiveness  
[SAE PAPER 710778] p0006 A72-10270

Ramjet engine propulsion systems for large aircraft above Mach number 2.5  
p0062 A72-14450

Gas generator performance shifts involving military trim level variations by TF-30 engines in high relative humidity environment caused by condensation in inlet duct  
p0176 A72-18759

Commercially available aircraft turbofan engines - specifications, describing design features and performance characteristics  
p0189 A72-20625

Soviet civil gas turbine engines construction and performance, noting relatively high specific fuel consumption  
p0191 A72-21275

Air lubricated bearings for high performance aircraft gas turbines, studying design and performance in turboshaft engine  
[ASME PAPER 72-GT-38] p0295 A72-25632

Propulsion system design for military VTOL aircraft, emphasizing subsonic cruise to maximum thrust ratio and exhaust downwash characteristics  
[ASME PAPER 72-GT-73] p0297 A72-25655

Propulsion control systems design for military and commercial V/STOL aircraft, considering power management performance with minimum weight and maximum reliability and maintainability  
[ASME PAPER 72-GT-79] p0297 A72-25659

Propulsion system flexibility in V/STOL aircraft with one lift-cruise engine, discussing takeoff thrust requirements and cruise fuel consumption efficiency  
[ASME PAPER 72-GT-105] p0299 A72-25670

Aero engines and propulsion systems development contribution to air transport economics and regularity, considering environmental factors  
p0408 A72-33313

Engine inlet total pressure distortion effects on multistage axial compressor and turbojet/turbofan engine performance and stability, considering inlet-engine compatibility  
[ICAS PAPER 72-19] p0553 A72-41144

Elements of the theory of gas-turbine-unit designs  
p0559 A72-41700

Variable pitch fans - Successors to the aircraft propeller.  
p0567 A72-42927

Experience with the NRC 10 ft. x 20 ft. V/STOL propulsion tunnel - Some practical aspects of V/STOL engine model testing.  
p0600 A72-44247

Thermodynamic cycle parameter effects on bypass turbofan jet engine fuel consumption and performance under various flight conditions and

engine ratings  
p0600 A72-44281

Supersonic aircraft engine inlet performance in terms of pressure recovery, discussing oblique shock wave formation ahead of entrance to improve efficiency  
p0611 A72-44991

Test facilities for aeropropulsion systems, emphasizing utilization, cost and technical advantages, aircraft inlet-engine systems compatibility and test types  
[AIAA PAPER 72-1034] p0615 A72-45401

Propulsion systems for low emission urban vehicles and analysis of exhaust emissions from fossil-fueled heat engines  
[PB-200144] p0036 N72-10830

Fuel related problems in aircraft fuel systems, emphasizing hydrogen treated fuel  
p0047 N72-11677

Feasibility analysis of solid lubricated ball bearings for aircraft propulsion systems application  
p0050 N72-11700

Destabilizing factors affecting supersonic inlets and turbofan engines of propulsion system  
p0212 N72-16711

Turbojet engine analog simulation technique applicable to propulsion system dynamics and controls research  
[NASA-TN-D-6610] p0213 N72-16722

Wind tunnel tests to determine performance of bicone inlet designed for Mach 2.5 with internal distributed compression and 40 percent internal contraction  
[NASA-TN-X-2416] p0214 N72-16723

Selection of engine parameters for various types of aircraft to maximize aircraft performance and meet constraints imposed by design and operational requirements  
[NASA-TN-X-68009] p0263 N72-18769

Characteristics of aircraft using supercritical aerodynamics and analysis of turbofan engine performance with single and double stage configurations  
[NASA-TN-X-68031] p0340 N72-21816

Analog and digital computer simulation analysis of performance and control of low-pressure-ratio turbojet engine for drone aircraft  
[NASA-TN-X-2537] p0340 N72-21817

Development of procedure for calculating off-design-point performance of turbojet and turbofan engines  
[LR-555] p0378 N72-22798

Factors affecting altitude relight performance of ram-induction combustor designed for Mach 3 cruise operation  
[NASA-TN-X-2630] p0590 N72-31777

Aerodynamic drag and hypersonic aircraft propulsion  
p0618 N72-32000

Wind tunnel tests of multiple vertical takeoff aircraft propulsion fans to determine effects of aircraft components on thrust development  
[NASA-TN-X-68138] p0640 N72-33031

Comparison of turbojet, turborocket, and ramjet engines for long distance hypersonic cruising flight  
[DLR-FB-72-38] p0647 N72-33750

**PROPULSION EFFICIENCY**

**NT PROPELLER EFFICIENCY**

Small three spool, reverse and mixed flow turbofan engine for business jets, discussing fuel consumption reduction, thermodynamic performance, efficiency and maintainability  
[SAE PAPER 710776] p0005 A72-10268

Convergent conical nozzle shape effect on propulsive performance and compressible flow field internal characteristics  
[ASME PAPER 71-WA/FE-3] p0117 A72-15937

Numerical analysis of turbine efficiency for two stage turbine and comparison with estimations of first stage efficiency  
[NASA-TN-D-6960] p0590 N72-31783

**PROTECTION**

NT ACCELERATION PROTECTION

Effects of aerodynamic coefficients, launch  
velocity, and burning rate on trajectory of  
self-suspended parachute flare  
[AD-731683] p0217 N72-16955  
Construction and function of pyrotechnic-ballistic  
device for assisting opening of parachutes  
[DLR-MIT-72-07] p0514 N72-28004

**QUALIFICATIONS**  
Information measurement tests and development for  
aircraft maintenance jobs  
[AD-725814] p0094 N72-12427  
Information measurement tests for review of  
aircraft maintenance job aids  
[AD-725815] p0094 N72-12428

**QUALITY**  
NT ENVIRONMENTAL QUALITY  
**QUALITY CONTROL**  
Integrity control procedures for machining,  
drilling and grinding of steel and Ti alloy  
aircraft parts, discussing nondestructive  
inspection method  
[SME PAPER IQ 71-238] p0011 A72-10969  
Turbojet aircraft engine overhauling planning and  
execution, discussing dismantling, washing,  
galvanic treatments, acceptance checks and  
quality controls  
p0118 A72-16014  
Turbo-prop electric igniter climatic test problems  
and equipment for assessing quality control  
p0182 A72-19112

Optical quality requirements for aircraft  
transparencies, considering resolution, haze,  
halation, light transmission, distortion,  
binocular deviation, double images, scratches  
and inclusions  
p0305 A72-27003

Surface integrity machining practices application  
to jet engines production, noting cost reduction  
and process selection and quality control  
improvement  
[ASM PAPER W 72-27,2] p0314 A72-28163  
Parametric approaches to statistical burn-in or  
debugging problems in aircraft reliability  
analysis  
p0343 A72-28363

Russian book on aircraft turbine and spacecraft  
rocket engine assembly covering process  
schedules, work organization, precision, joints  
and couplings, quality control, etc.  
p0410 A72-33373

Surface evaluation of airfoils via contouring.  
p0490 A72-37605

Paper and pencil tests to support in-process  
review of aviation maintenance job aids  
[AD-725816] p0094 N72-12429

Development of maintenance quality audit program  
and application to maintenance of commercial  
aircraft  
p0252 N72-18015

Development of procedures for conducting  
structural inspection program on DC-10 aircraft  
to reduce effects of crack propagation with  
increased service life  
p0252 N72-18019

Application of fracture mechanics to design,  
analysis, and qualification of aircraft  
structural systems  
[AD-731565] p0255 N72-18045

Flight tests performed following initial delivery  
or extensive repair and overhaul as performed by  
Canadian Armed Forces  
p0329 N72-20987

Quality control of paper-based emulsions for  
industrial radiography  
[AQD/INDT-001158] p0371 N72-22472

Nondestructive test for failure inspection and  
quality control of composite structures and  
materials - conference  
[AGARD-R-590] p0429 N72-24934

Nondestructive tests applied to quality control of  
airframes made of boron composites  
p0429 N72-24936

**QUANTIZATION**

U MEASUREMENT

**QUANTIZER**

U COUNTERS

**QUASI-STEADY STATES**

Hingeless elastic helicopter blades coupled  
flap-lag motion under quasi-steady aerodynamic  
loads, reducing equations of motion to coupled  
nonlinear differential equations  
p0393 A72-31211

**QUASILINEARITY**

U NONLINEARITY

**QUESTOL**

Q/STOL jet aircraft engines design for low noise  
levels, describing takeoff thrust, bypass ratio  
and turbine stages  
p0020 A72-12501

Prop-fan engine for quiet STOL propulsion,  
discussing noise characteristics, weight  
advantage, response and reduced fuel consumption  
p0059 A72-13697

NASA R and D programs for quiet STOL aircraft and  
engines development  
p0457 A72-36503

NASA's quiet engine programs.  
p0569 A72-43152

**QUEUEING THEORY**

Reliability design for airborne ecological system  
for jumbo jets, discussing toilet flushing and  
multiple server queueing model  
p0239 A72-23999

Procedures for determining capacity of air traffic  
control systems and application to long range  
planning, management decisions, and system  
performance evaluation  
[AD-738892] p0486 N72-27710

Q

# SUBJECT INDEX

# RADAR BEAMS

Maximum throughput rate for runway serving single stream of landing aircraft  
[AD-744481] p0630 N72-32648

**QUIET ENGINE PROGRAM**  
Jet noise reduction technology, hardware and tests for NASA Quiet Engine Program to develop low noise subsonic civil transport aircraft propulsion system  
[SAE PAPER 710774] p0005 A72-10266

NASA Quiet Engine experimental program for jet aircraft noise reduction, discussing aerodynamic and acoustic evaluation and tests of three fans  
p0059 A72-13679

NASA quiet engine program, discussing noise reduction technology for subsonic civil transport aircraft propulsion system  
[ASME PAPER 72-96] p0298 A72-25667

NASA/General Electric joint development of low noise propulsion technology, describing demonstrator engine A design, components development and aerodynamic/acoustic performance evaluation  
[AIAA PAPER 72-657] p0414 A72-34077

NASA R and D programs for quiet STOL aircraft and engines development  
p0457 A72-36503

NASA Quiet Engine program R and D on conventional takeoff and landing subsonic cruise aircraft engine noise  
[ICAS PAPER 72-48] p0556 A72-41173

Environmental impact surveys of quiet engine program  
[NASA-TM-X-68545] p0487 N72-27814

Aerodynamic performance test of Fan B for Experimental Quiet Engine Program  
[NASA-CR-72993] p0538 N72-29808

NASA quiet engine technology for reducing noise levels in conventional and subsonic aircraft  
[NASA-TM-X-68121] p0580 N72-30775

##### U RADIO ALTIMETERS

##### RADAR ANTENNAS

Vertical dipole antenna design for CW Doppler radar midair collision avoidance system  
p0123 A72-16571

Single engine aircraft-borne weather radar with electronically scanned steerable phased array antenna  
[SAE PAPER 720315] p0289 A72-25579

Radar double beam dielectric radiator antenna design for ATC in 1250-1350 MHz range  
p0549 A72-40530

Linear HF radar antenna array aperture synthesis for ionospherically propagated signal reception in airplane for achievement of ideal directivity without ionospheric compensation  
p0551 A72-41080

#### RADAR APPROACH CONTROL

Terrain clearance during descent and approach of aircraft under radar control, discussing optimum profile, ATC, nav aids and rules  
p0002 A72-10183

Airfield Vehicle Obstacle Indication Device short range high-definition radar system for aircraft navigation aid  
p0017 A72-12042

Limited scan antenna system for precision approach radar, detailing design for reflector, aperture gain and phased array  
p0019 A72-12393

Tactical ATC display system for airport surveillance, precision approach and landing and operator/aircraft/machine operations by using terminal Area Surveillance Radar  
p0020 A72-12421

Low cost vertical crossed beam radar systems for nonprecision approach in small airports, reducing track error  
p0068 A72-14829

ILS development, discussing four course radio ranges, autoland and radar systems  
p0234 A72-23449

Aircraft accident involving DC-8 aircraft during precision radar approach at Naha Air Base, Okinawa on 27 Jul. 1970  
[PB-208767] p0642 N72-33043

#### RADAR BACKSCATTER

##### U BACKSCATTERING

##### RADAR BEACONS

Phased scanning array for ATC radar beacon systems, airport or air route surveillance radars and ground landing systems  
p0010 A72-10962

Discrete address ATC radar beacon system operation and design  
p0019 A72-12378

Pulse coded processing system EMC performance measurement, considering CW and pulsed interference effects and application to ATC radar beacon system transponders  
p0061 A72-14033

ATC radar beacon system developments, considering diversity transponders, interrogator environment control, electronic scan cylindrical array antenna design and discrete address mode  
p0068 A72-14832

FORTRAN digital simulation of ATC radar beacon system making possible computer generated movie display  
p0184 A72-19301

C-band pulse beacon ranging system for collision avoidance, detailing interrogation, response and system test modes  
p0232 A72-22908

Bearing azimuth measurement accuracy improvement by ATC beacon system/secondary surveillance radar using monopulse technique  
p0461 A72-37047

Potential value of turn-rate telemetry in tracking of aircraft equipped with discrete address beacon system /DABS/ for ATC, discussing tracking algorithms design  
p0489 A72-37282

Air traffic control radar beacon systems and laser warning systems  
[AD-725743] p0035 N72-10543

Error analysis on range and azimuth resolution characteristics of digital radar air traffic control system  
[AD-730056] p0223 N72-17592

Application of sun-difference beam techniques to air traffic control radar beacon system  
[DOT-TSC-FAA-72-6] p0322 N72-20165

Performance tests of transponders installed in commercial and general aviation aircraft to determine compliance with specifications  
[FAA-RD-72-301] p0376 N72-22649

Analysis of discrete address beacon system operation for air traffic control to identify problems created by interrogation scheduling  
[AD-737294] p0389 N72-23671

Application of discrete address beacon for surveillance system used with independent landing approaches to closely spaced runways  
[ATC-13] p0578 N72-30587

#### RADAR BEAMS

Microwave Doppler scanning landing guidance system with radar beam comparison and signal format simplification suggestion  
p0144 A72-18398

Microwave instrument landing systems based on continuous radar scanning technique, using pulse format for data transmission  
p0144 A72-18399

Error analysis for digital avionics system involving Doppler navigation by intermittent scanning of single beam multimode radar, noting optimum statistical data processing  
p0398 A72-32204

# RADAR DATA

# SUBJECT INDEX

Application of sum-difference beam techniques to air traffic control radar beacon system [DOT-TSC-PAA-72-6] p0322 N72-20165

**RADAR DATA**

Radar data automatic extraction, discussing azimuth quantization methods, moving window detection, coordinate measurement and ATCAS extractor p0022 A72-12650

Radar data statistical evaluation, emphasizing mean Doppler shift for aircraft radial velocity calculation p0231 A72-22897

**RADAR DETECTION**

CAT detection by airborne laser Doppler radar and ground based ultrasensitive microwave Doppler radar methods p0067 A72-14822

Passive detection radar system for bombers, calculating target distance during horizontal flight p0302 A72-26316

Radar detection of clear air turbulence by region of disturbed refractive index associated with it p0159 N72-14343

**RADAR DIRECTION FINDERS**

**U RADIO DIRECTION FINDERS**

**RADAR ECHOES**

Persistent intense CAT in upper level frontal zone, discussing synoptic features, vertical wind shears, radar echoes and turbulence intensity p0356 A72-29622

Test procedures for evaluating radar reflectivity of aircraft [AD-729851] p0156 N72-14189

**RADAR EQUIPMENT**

**NT RADAR ANTENNAS**

**NT RADAR BEACONS**

ATC radar performance monitoring, considering advances in radar signal processing and digital display techniques p0193 A72-21525

Airport meteorological instrumentation, discussing ground wind, visibility, cloud height, air temperature and humidity detectors and radar equipment p0246 A72-25093

Secondary surveillance radar systems design and planning for ATC application p0344 A72-28698

Surveillance radar for clutter rejection and signal loss reduction at airports, discussing system design features p0461 A72-37046

Flight tests to determine feasibility of detecting vortices from low flying aircraft with acoustic radar [TR-7] p0168 N72-15140

Radar nose package shock and vibration experienced during carrier landings p0173 N72-15837

Onboard aircraft and missile radar systems for interception of airborne targets p0256 N72-18158

UTES multipurpose radar complex for air traffic control [AD-733273] p0256 N72-18173

Analysis of air traffic control systems based on equipment specifications, data processing equipment, display simulation, and cost benefits [AD-735322] p0377 N72-22657

Measurement of positive ions near air traffic control radar and effects on near-by personnel [FAA-NA-72-19] p0388 N72-23400

Characteristics and operation of air traffic control radar system installed at USSR airports [JPBS-56463] p0486 N72-27705

Test and evaluation of VHF and UHF air/ground communication transceivers at long range radar sites p0517 N72-28177

Developments in air traffic control equipment to include radar technology, airborne graphical displays, influence of propagation effects on navigation, and microwave landing guidance systems [AD-740877] p0537 N72-29676

**RADAR IMAGERY**

Flight test evaluation of a forward looking radar system for search and rescue applications.

[AHS PREPRINT 633] p0446 A72-34499

Side-looking radar for multispectral terrain imaging p0534 N72-29335

**RADAR MAPS**

**NT RADAR IMAGERY**

Aircraft radar for weather data, ground mapping, avoidance modes and independent landing monitor function, presenting straight and slant approach simulation data p0547 A72-40290

**RADAR MEASUREMENT**

Noncontacting measurements by miniature CW Doppler radar with semiconductor microwave generator p0229 A72-22691

Flight tests to determine feasibility of detecting vortices from low flying aircraft with acoustic radar [TR-7] p0168 N72-15140

**RADAR NAVIGATION**

Mathematical analysis of separation standards and aircraft navigational collision risk for parallel tracks in radar monitored systems p0001 A72-10178

Stellar attitude reference and navigation associative processor with high computational speed for radar approach control in ATC p0017 A72-12033

Proposed microwave ILS, discussing continuous step and Doppler scanned radar scanning beams p0144 A72-18396

Tactical approach landing radar tests for low lift drag ratio aircraft in unpowered flight, using F-104D as test aircraft p0395 A72-31694

Banging signals for aeronautical satellite systems p0450 A72-35220

Collision avoidance system electromagnetic compatibility with radar altimeters designed for 1600 MHz aeronavigation band p0550 A72-40881

CW radar system for tactical aircraft real time command, control and positioning, using combination of frequency and time multiplexing for range measurement p0567 A72-42946

Terrain avoidance radar for US Army rotary wing aircraft p0083 N72-11927

**RADAR OBSERVATION**

**U RADAR TRACKING**

**RADAR RANGE**

Automated radar terminal system /ARTS/ for monitoring and tracking all aircraft within radar range, displaying identification, altitude and ground speed information to air traffic controller p0010 A72-10960

Airfield Vehicle Obstacle Indication Device short range high-definition radar system for aircraft navigation aid p0017 A72-12042

Aircraft geodetic coordinates computation from radar range measurements and flight altitude over earth ellipsoid p0394 A72-31601

CW radar system for tactical aircraft real time command, control and positioning, using combination of frequency and time multiplexing for range measurement p0567 A72-42946

**RADAR REFLECTIONS**

**U RADAR ECHOES**

**RADAR SCANNING**

Phased scanning array for ATC radar beacon systems, airport or air route surveillance radars and ground landing systems p0010 A72-10962

Limited scan antenna system for precision approach radar, detailing design for reflector, aperture gain and phased array p0019 A72-12393

Proposed microwave ILS, discussing continuous step and Doppler scanned radar scanning beams p0144 A72-18396

Microwave Doppler scanning landing guidance system with radar beam comparison and signal format simplification suggestion p0144 A72-18398

# RADIATION SOURCES

# SUBJECT INDEX

## RADIATION SOURCES

The estimation of nonstationary spectra from moving acoustic source distributions.  
[AIAA PAPER 72-667] p0452 A72-35486  
Aerodynamic noise sources at subsonic speeds  
[ARC-CP-1195] p0473 N72-26556

## RADIATION SPECTRA

NT EMISSION SPECTRA  
NT INFRARED SPECTRA  
NT MICROWAVE SPECTRA  
NT VIBRATIONAL SPECTRA

## RADIATIVE TRANSFER

Radiation properties of the semi-infinite vortex sheet.  
p0610 A72-44918

## RADIO ALTIMETERS

Airborne gravimetry experiment yielding high resolution pressure and altitude measurements, describing equipment  
p0350 A72-28877  
Collision avoidance system electromagnetic compatibility with radar altimeters designed for 1600 MHz aeronavigation band  
p0550 A72-40881  
Performance of radio altimeter in automatically landing high performance aircraft  
[NAL-TR-235] p0111 N72-13589

## RADIO ANTENNAS

Airborne OMEGA navigation system performance, discussing transmission facilities, three frequency receiver, flight tests and optimization of receiving antenna  
p0352 A72-29191  
Active transistorized directional dipole VHF receiving antennas for ATC and mobile applications and field intensity measurement  
p0549 A72-40527

## RADIO BEACONS

Radio aids for air navigation and traffic control in Italy, discussing facilities development  
p0024 A72-12748  
ILS development, discussing four course radio ranges, autoland and radar systems  
p0234 A72-23449  
Ground and air tests of flight inspection marker beacon receiving system  
[FAA-WA-71-29] p0033 N72-10173  
Development of discrete address beacon system to provide improved surveillance and ground to air communication in support of air traffic control automation  
[AD-732585] p0223 N72-17598  
Very high frequency radio beacon system for location marking in jungle  
[AD-733916] p0281 N72-19725  
Specifications, flight test, and evaluation of low power radio buoys used for search and rescue operations  
[DLR-PB-71-110] p0472 N72-26520  
Methods for performing evaluation and processing data following flight tests of air traffic control beacon  
[AD-738680] p0486 N72-27709  
Design, development, and application of flight recorders and crash location instruments used in NATO nations  
[AGARD-AR-39] p0628 N72-32457

## RADIO BROADCASTING

## U BROADCASTING

## RADIO COMMUNICATION

## NT RADIO TELEMETRY

Airline air/ground radio communications and data link service implementation for San Francisco-Hawaii center  
p0138 A72-17337  
Aircraft antennas design for radio links to satellites for aeronautical communication and ATC, proposing use of beam steering system  
p0354 A72-29347  
A comparison of voice communication techniques for aeronautical and marine applications.  
p0442 A72-34267  
VHF/UHF ground-air-ground communications siting criteria and field manual  
[FAA-RD-71-76] p0092 N72-12087  
Simulation and analysis of characteristics of air traffic control voice communication channels  
[FAA-RD-71-78] p0095 N72-12578

Development of discrete address beacon system to provide improved surveillance and ground to air communication in support of air traffic control automation  
[AD-732585] p0223 N72-17598

Characteristics of ultrahigh frequency and very high frequency aircraft antennas for aircraft-satellite communications link  
[PB-204799] p0335 N72-21165

Performance tests of L band communication concepts for air traffic control equipment installed in Applications Technology Satellite-F  
[NASA-TM-X-65906] p0436 N72-25601

## RADIO CONTROL

Unified single rf channel tracking, telemetry and command control systems for guidance of unmanned vehicles, including pilotless aircraft and satellites  
p0123 A72-16556

## RADIO DIRECTION FINDERS

Specifications, flight test, and evaluation of low power radio buoys used for search and rescue operations  
[DLR-PB-71-110] p0472 N72-26520  
Development of Doppler monopulse system for direction finding, and evaluation of effectiveness with respect to ionospheric propagation  
[AD-741807] p0579 N72-30593

## RADIO ELECTRONICS

Systems performance and safety in helicopter approach and landing, and radioelectronic guidance array  
p0085 N72-11939

## RADIOISOTOPES

### U RADIOISOTOPES

### RADIOISOTOPES

### NT RADIOISOTOPES

### RADIOISOTOPES

Improved chemical lasers and current limitations of radomes  
[AD-726202] p0094 N72-12448

Flight tests of EC-130E aircraft with I band radome installed  
[ENEA-71-45] p0432 N72-25007

### RAIL TRANSPORTATION

Air transport vs other travel, discussing time, costs, popularity and technology p0057 A72-13485

Prediction models for dynamic environment experienced by cargo during air and rail transportation p0402 A72-32610

Human comfort measured from vibration ride environments of STOL aircraft and high speed train  
[NASA-TM-X-67586] p0174 N72-15841

Design of vibration test facility and equipment for simulating ground transportation and aircraft environments p0214 N72-16792

Effects of Canadian air traffic controllers strike on economy and other transportation systems p0378 N72-22969

Compendium of US ground, water, and air transportation statistics p0634 N72-32966

Analysis of accomplishments in public transportation developments and predictions of future requirements p0634 N72-32982

General description of, and information on 1974 National Transportation Study for State and local governments and work programs for each State  
[OMB-04-S72004] p0649 N72-33973

### RAILROADS

### U RAIL TRANSPORTATION

Probability estimates for aircraft encounters with heavy rain p0188 A72-20365

Turbulent jets effectiveness in protection of aircraft surfaces from rain, describing wind tunnel simulation of takeoff and landing p0247 A72-25137

### RAIN IMPACT DAMAGE

Thunderstorm flight testing for evaluation of rain, ice, lightning and turbulence effects on aircraft, engine and systems operating characteristics p0147 A72-18500

Raindrop breakup in the shock layer of a high-speed vehicle. p0616 A72-45780

Chemical and structural properties of urethane elastomers and resistance to rain erosion  
[AD-737624] p0426 N72-24618

### RAINDROPS

Raindrop breakup in the shock layer of a high-speed vehicle. p0616 A72-45780

### RAINSTORMS

### NT THUNDERSTORMS

### RAKES

Engine compressor face rake for flight test instrumentation F-14A/TF-30. p0564 A72-42686

### RAMJET ENGINES

### NT PULSEJET ENGINES

### NT SUPERSONIC COMBUSTION RAMJET ENGINES

Ramjet engine propulsion systems for large aircraft above Mach number 2.5 p0062 A72-14450

Axisymmetric jet stretcher diffuser performance for ramjet engine inlet configurations, testing at angles of attack and supersonic flow velocities  
[AIAA PAPER 72-1024] p0558 A72-41602

Analysis of interaction of oblique shock with bow shock of blunt leading edge and application to design of hypersonic ramjet inlets  
[AD-726111] p0045 N72-11312

History of first tests of ramjet engines  
[AD-732275] p0214 N72-16728

Turbulence and fuel-air mixing in supersonic combustion ramjet p0427 N72-24807

Hydrocarbon fuel systems for ramjet-powered vehicles  
[AD-738634] p0524 N72-28801

Comparison of turbojet, turborocket, and ramjet engines for long distance hypersonic cruising flight  
[DLR-FB-72-38] p0647 N72-33750

### RANDOM DISTRIBUTIONS

### U STATISTICAL DISTRIBUTIONS

### RANDOM ERRORS

Gas turbine engine performance measurement via parameters averaging method, noting integration time determination for given error limits. p0598 A72-43669

### RANDOM LOADS

### NT GUST LOADS

Helicopter rotor blade response to random loads treated by theory of linear dynamic systems with time-varying coefficients p0132 A72-16940

Welded steel airframe residual fatigue life tests by nonstationary random loading, applying to jet trainer aircraft landing gear p0358 A72-30277

Method of measuring modal characteristics of a structure subjected to a random excitation p0569 A72-43095

Response of flexible helicopter rotor blade to random loading near hover p0475 A72-26909

### RANDOM NUMBERS

Simulation of flight maneuver-load distributions utilizing stationary, nonGaussian random load histories p0098 N72-12908

### [NASA-TN-D-6570]

### RANDOM PROCESSES

Airplane sideslip and yaw rate perturbations by continuous random vertical and side gusts, using low pass filtered white noise representation for mathematical modeling p0313 A72-28125

### RANDOM VIBRATION

Random vibration of linearly elastic lumped mass systems containing, nonlinear damping to ideal stationary Gaussian white noise excitation p0235 A72-23460

Random vibration statistics of lifting rotors with feedback controls, solving response variance matrix by random inputs shaping filters p0351 A72-29096

### RANGE (EXTREMES)

### NT FREQUENCY RANGES

### NT PROPORTIONAL LIMIT

Dynamic structural analysis by finite element method, describing error bounds for eigenvalue analysis by elimination of variables p0055 A72-13401

### RANGE CONTROL

### U TRAJECTORY CONTROL

### RANGE FINDERS

### NT OPTICAL RANGE FINDERS

C-band pulse beacon ranging system for collision avoidance, detailing interrogation, response and system test modes p0232 A72-22908

Passive detection radar system for bombers, calculating target distance during horizontal flight p0302 A72-26316

System design and flight test evaluation of range only multiple aircraft navigation system

 Doppler system with navigation radar device, computer unit and data transmitter for continuous recording of aircraft position and speed p0024 A72-12749  
 Cathode ray tube recorder for remote airborne photographic mission p0060 A72-13711  
 Intense noise measurement device for heat flow environments, discussing applications to jet engines, nozzle exits, turbine exhausts and volcanic craters [ONERA, TP NO. 1010] p0118 A72-16025  
 Laser recording real time imagery for use in tactical reconnaissance aircraft p0239 A72-23928  
 Crack initiation detecting and recording instrument with optical strain gages for double shear fatigue tests of aircraft fasteners p0300 A72-25823  
 Automated airborne recording system to obtain data on aircraft engines, subsystems and operational performance, considering cost and economic benefits [AIAA PAPER 72-752] p0498 A72-38126  
 An advanced strain level counter for monitoring aircraft fatigue. p0564 A72-42688  
 Multichannel voice recorder-reproducer sets for air traffic control [AD-731562] p0256 N72-18180  
 Evaluation of airborne audio-video recording system for aircraft equipped with head-up display [AD-736818] p0386 N72-23144  
 In flight monitoring system to measure and record helicopter performance in real time for all six degrees of freedom [AD-745118] p0629 N72-32476

# RECOVERABLE SPACECRAFT

## NT REUSABLE SPACECRAFT

## NT SPACE SHUTTLES

### RECOVERY

Design and construction of hydraulic controlled rotor with erectable blade recovery system  
[DGLR-71-020-PT-1] p0382 N72-23073  
Aerodynamics of rotary recovery system for flying bodies during transition from horizontal to gliding flight  
[DGLR-71-020-PT-2] p0382 N72-23014

### RECOVERY PARACHUTES

Low altitude air-drop system using inflation-aided recovery parachutes for extraction  
[AD-735375] p0332 N72-21013

### RECTANGULAR PANELS

Rectangular skin panel vibration modes aerodynamic damping dependence on Mach number, dynamic pressure, mode shape and turbulent boundary layer thickness  
[AIAA PAPER 72-402] p0287 A72-25423

### RECTANGULAR PLANFORMS

#### NT RECTANGULAR PANELS

#### NT RECTANGULAR PLATES

#### NT RECTANGULAR WINGS

Evaluation of the downwash integral for rectangular planforms by the BAC subsonic lifting-surface method.  
p0503 A72-38810

### RECTANGULAR PLATES

Dynamic deflection of elastic rectangular plate hinged to rigid base moving under sinusoidal pressure impulse action, noting base inertia effect  
p0306 A72-27091

### RECTANGULAR WINGS

Drag and lift experimental determination for low aspect ratio rectangular wings with blunt trailing edges at Mach numbers 0.5-2.2  
[DGLR PAPER 71-114] p0023 A72-12712

Wind tunnel investigation of unswept rectangular wing with externally blown single slotted flap, determining optimum slot width as function of momentum coefficient and flap deflection  
p0070 A72-15461

Wind tunnel measurements for near flow field velocity distribution in rectangular wing wake turbulence, comparing with flight measurements  
[AIAA PAPER 72-41] p0133 A72-16948

Base pressure drag reduction on rectangular wings with blunt trailing edges from low speed wind tunnel measurements  
[DPVLR-SONDDR-219] p0244 A72-24842

Harmonically oscillating rectangular wing in unsteady transonic flow, obtaining two part boundary value problem for linear potential equation  
p0310 A72-27545

Downwash distribution at surface of rectangular planform wings with prescribed subsonic aerodynamic loading for various aspect ratios  
p0503 A72-38809

Application of the finite element method to torsional flutter analysis on an analog computer  
p0509 A72-39907

Influence of jet interference on aerodynamic coefficients of rectangular and swept wings mounted above the engine  
p0028 N72-10010

Numerical evaluation of downwash integral for lifting rectangular wings noting wing loading  
[NPL-AERO-NOTE-1095] p0038 N72-11012

Development of theory for predicting sonic boom pressure signatures emitted by nonlifting rectangular wings  
[NASA-TN-D-6619] p0087 N72-11949

Numerical analysis of flow distribution behind rectangular wings at supersonic speed using optimum differencing methods  
[NASA-CR-126214] p0365 N72-21998

Nonplanar method for predicting incompressible aerodynamic coefficients of rectangular wings with circular-arc camber  
[NASA-TN-X-67791] p0379 N72-22995

Calculating aerodynamic characteristics of lifting systems composed of rectangular wings arranged one behind other  
p0618 N72-32007

Nonlinear theory of lifting surfaces applied to problem of forces acting on rectangular wing in stream of incompressible fluid  
p0618 N72-32008

### RECTIFIERS

#### NT AVALANCHE DIODES

Silicon carbide rotating rectifier alternator with solid lubricated bearings for high altitude environments, noting applicability to supersonic aircraft  
p0453 A72-35565

### RECUPERATORS

#### U REGENERATORS

### RECYCLING

#### U CIRCULATION

### REDUCTION (CHEMISTRY)

#### NT HYDROGENATION

### REDUNDANCY

Statistical method of failure analysis for redundancy foras, selection, noting aircraft safety and reliability  
p0568 A72-42973

### REDUNDANT COMPONENTS

German VAK 191B V/STOL fighter aircraft design, development and flight tests, noting redundant control systems  
p0307 A72-27166

Electromechanical redundant activating mechanism for F-4 aircraft dual tandem hydraulic power servo, noting application to fly by wire control  
p0360 A72-30422

Analog simulation method for highly redundant structure optimization based on reproducing structure mechanical behavior in stabilized stress states  
p0405 A72-32899

Functional equipment active and standby redundancy for flight safety and air traffic punctuality improvement, noting Boeing 747 aircraft redundant systems  
p0452 A72-35476

Integrity of flight control system design.  
p0461 A72-37032

Quadruple-redundancy management for fly-by-wire control system reliability, discussing analog circuit and digital computer voter/monitor techniques  
[AIAA PAPER 72-884] p0505 A72-39117

### REDUNDANT STRUCTURES

## REUSABLE SPACECRAFT

NT SPACE SHUTTLES

Aircraft and reusable spacecraft propulsion systems current status and future development, discussing noise and exhaust emission problems, V/STOL bypass and fan engines, ramjets, etc p0127 A72-16735

## REVERSED FLOW

Supersonic flow patterns near yawed obstacles around flat plate sharp leading edge with high pressure regions in reversed separated flow zone p0142 A72-18122

## REYNOLDS NUMBER

Force and pressure distribution measurements on delta wing-body combination in compressible flow, investigating Reynolds number effect [DGLR PAPER 71-118] p0022 A72-12707

Axial flow multistage compressor design, discussing high speed flow measurements and Reynolds number and blade airfoil shape effect on aerodynamic performance p0121 A72-16483

Increased Reynolds number simulation with roughness set on aircraft model in transonic flow, investigating flow separation by parietal visualization technique p0140 A72-17846

Laminar/turbulent boundary layer transition on parabolic wing profile in supersonic wind tunnel, noting critical Reynolds number increase with leading edge thickness p0227 A72-22407

Wind tunnel investigation of Reynolds number effects on boundary layer separation incidence and maximum lift coefficient of high-lift device equipped aircraft model

p0242 A72-24657

Incompressible boundary layer velocity profile on swept wings, comparing critical Reynolds number to straight wing value

p0356 A72-29639

Unsteady viscous flow effects on aerodynamic forces exerted on oscillating elliptic airfoil for various Reynolds numbers, angles of attack and frequencies

p0400 A72-32344

Generating high Reynolds-number flows.

p0501 A72-38222

Some results from tests in the NAE high Reynolds number two-dimensional test facility on 'shockless' and other airfoils.

[ICAS PAPER 72-33] p0554 A72-41158

Lift on airfoils with separated boundary layers.

p0557 A72-41264

High Reynolds number transonic wind tunnel facility /HIRT/ for improved aerodynamic testing of modern combat and commercial aircraft performance, maneuverability and handling qualities

[AIAA PAPER 72-1035] p0559 A72-41609

Effects of Reynolds number and frequency parameters on buzz characteristics at subsonic speeds using free oscillation method

[NPL-AERO-1312] p0045 N72-11291

Conference on theoretical methods and wind tunnel facilities for transonic aerodynamic testing of aircraft at high Reynolds numbers

[AGARD-CP-83-71] p0073 N72-11854

Scale effects in flows past swept wings at transonic speeds

p0073 N72-11855

Reynolds number effects in viscous-inviscid interactions on transonic swept wings

p0073 N72-11856

Method for estimating transonic buffet boundary and Reynolds number effects for straight and swept wings

p0073 N72-11857

Minimum level of Reynolds number for reliable flow simulation in transonic test facilities

[NASA-TN-X-67412] p0074 N72-11859

Transonic wind tunnel determination of Reynolds number effect on jet-flapped airfoil drag divergence, pressure distribution, and buffet onset

p0074 N72-11861

Wind tunnel measurements of Reynolds number effect on force and pressure coefficients for slender delta wing at transonic speed

p0074 N72-11863

Reynolds number effect on flow past body of revolution at transonic speed

p0074 N72-11864

Transonic wind tunnel testing requirements for simulating transonic aerodynamic data at flight Reynolds numbers

p0076 N72-11873

Equivalent body of revolution for simulating high Reynolds number effect on transonic flow past two dimensional airfoil

p0076 N72-11874

Wind tunnel model boundary layer reduction through suction for accurate simulation of high Reynolds number full scale aircraft characteristics

p0076 N72-11875

Aerodynamic suitability of Freon 12 for wind tunnel testing of transport aircraft models at increasing Reynolds numbers and subcritical and supercritical Mach numbers

[NASA-TN-X-67417] p0077 N72-11879

Comparison between conventional blowdown and Ludwig tube driven transonic wind tunnels for high Reynolds number range

p0077 N72-11881

Performance characteristics of high Reynolds number tube wind tunnel

[NASA-TN-X-67419] p0077 N72-11882

Specifications for high Reynolds number wind tunnel design for flow simulation in swept wing aircraft development tests

p0077 N72-11883

Performance and operational characteristics of high Reynolds number blowdown and shock wind tunnels for transonic model testing

p0078 N72-11884

Transonic wind tunnel design for model testing at high Reynolds number

p0078 N72-11887

Effect of Reynolds number on overall performance of 3.7-inch diameter, six stage axial flow compressor

[NASA-TN-D-6628] p0201 N72-15945

Wind tunnel test section for simulating high Reynolds number over transonic speed range

[NASA-CASE-HFS-20509] p0221 N72-17183

Methods for simulating high level Reynolds number for wind tunnel model testing at transonic speed

[NASA-TT-P-14290] p0463 N72-26000

## RHEOGRAPHY

### U RECORDING INSTRUMENTS

### RIBBON PARACHUTES

Supersonic ribbon parachute testing by transonic wind tunnel, rocket sled and water channel simulator

p0006 A72-10305

Wind tunnel and rocket sled results with ribbon parachutes for supersonic release, discussing aerodynamic, structural flutter and inflation time characteristics.

p0007 A72-10308

Ribbon parachutes drop tests at Mach 0.57-1.70, measuring opening shock loads and functioning time sequence

p0007 A72-10312

Flight tests of ribbon parachutes with 2000 lb store at low altitude

[SC-DC-71-4022] p0151 N72-13994

## RICHARDSON-DUSHMAN EQUATION

### U TEMPERATURE EFFECTS

### RIEMANN INTEGRAL

### U MEASURE AND INTEGRATION

### RIEMANN PROBLEM

### U CAUCHY PROBLEM

### RIGGING

Parachute canopy fabrics and rigging lines cordage properties requirements, considering nylon, polypropylene, silk, cotton and nonwoven scrim-reinforced fabrics

p0008 A72-10314

## RIGID BODIES

### U RIGID STRUCTURES

### RIGID ROTOR HELICOPTERS

Bolkow 105C 5-place helicopter with twin turbine engine driven rigid glass-reinforced plastic rotor blades, emphasizing design philosophy of easy maintainability

p0357 A72-29871

German Bo 105 five/six seat light utility helicopter with rigid glass-fiber reinforced plastic rotor blades, presenting design and performance

p0360 A72-30678

The fatigue and fail-safe program for the certification of the Lockheed Model 286 rigid rotor helicopter.

p0608 A72-44733

Helicopter development, discussing articulated, rigid, tilt and stowed rotors, compound helicopters, rotor drives, flight control and avionics systems

p0616 A72-45558

## RIGID ROTORS

Hingeless rotor helicopter blade steady state response with nonuniform inflow and elastic blade bending

[AIAA PAPER 72-65] p0132 A72-16933

Hingeless blades flap-lag oscillations linear stability characteristics in hovering flight, examining precone, elastic and pitch-lag coupling and induced inflow aerodynamic effects

p0359 A72-30289

Hingeless elastic helicopter blades coupled flap-lag motion under quasi-steady aerodynamic loads, reducing equations of motion to coupled nonlinear differential equations

p0393 A72-31211

Exploration of aeroelastic stability boundaries with a soft-in-plane hingeless-rotor model.

[AHS PREPRINT 610] p0445 A72-34493

# SUBJECT INDEX

ROLL

- Static and dynamic stability and controllability of rigid rotor BO-105 helicopter noting feedback effects  
p0038 N72-11008
- Wind tunnel tests to determine dynamic characteristics of hingeless rotors with hub moment feedback controls and rotor frequency response - Vol. 1

HP-115 slender wing research aircraft linear motion and undamped Dutch roll oscillations at high angles of attack  
[AIAA PAPER 72-62] p0132 A72-16932
- Lateral-directional handling qualities and roll control power requirements of jet aircraft in landing approach  
[AD-725461] p0153 N72-14008
- Wind tunnel/flight simulation of slender delta wing aircraft dynamic response to Dutch roll at low speed  
[ARC-R/M-3669] p0204 N72-15970
- Slender wings in roll noting dependence of rolling moment and roll damping on angular velocity and angle of attack

# ROLL CONTROL

# SUBJECT INDEX

Simulation study of lift-roll coupling on handling qualities of hovering VTOL aircraft using thrust for roll control  
[NASA-TN-D-6906] p0266 N72-19004

Landing simulation to determine effects of turbulence on roll of swept fighter aircraft at low speed  
[ARC-R/M-3697] p0516 N72-28020

**ROLL CONTROL**  
O LATERAL CONTROL  
**ROLL FORMING**  
Metal forming techniques for gas turbine engines, considering isothermal, radial and powder metallurgy preform forming, contoured cross and form rolling, and squeeze casting  
[ASME PAPER 72-GT-58] p0582 N72-31001

**ROLLER BEARINGS**  
Lubrication system filtration effects on rolling element bearing life and extended mean time to failure of gas turbine engines  
p0175 A72-18754

Heat generation sources in high speed cylindrical roller bearings for gas turbine oil cooler design  
p0313 A72-28111

**ROLLING**  
Wing tip shape effects on vortex sheet rolling calculation by Belotserkovskii method  
p0140 A72-17850

Rolling vertical takeoff and landing procedure for VTOL aircraft using thrust augmentation by afterburning  
[BMVG-FBWT-71-13] p0030 N72-10034

**ROLLING CONTACT BEARINGS**  
U ANTIFRICTION BEARINGS  
**ROLLING CONTACT LOADS**  
Jet fuel hydrocarbon group chemical composition effects on antiwear characteristics in sliding friction and rolling simulation experiments  
p0350 A72-29073

**ROLLING MOMENTS**  
STOL aircraft roll moment control possibility for externally-blown jet flap due to engine failure  
p0015 A72-11700

Ground effect on slender wing rolling moment during landing approach and its consequence on aircraft lateral control  
[ARC-CP-1152] p0088 N72-11961

Slender wings in roll noting dependence of rolling moment and roll damping on angular velocity and angle of attack  
p0266 N72-19004

Equations for angles of attack and sideslip relative to rolling and nonrolling axis system  
[NASA-TM-X-2514] p0280 N72-19721

Effect of fin and rudder on rolling moments due to sideslip and yawing  
[ESDU-70006] p0617 N72-31992

**ROOTS OF EQUATIONS**  
Linear equations with periodic coefficients in mathematical models for systems with rotating components, discussing methods for obtaining closed form solutions  
p0186 A72-20204

**ROTARY DRIVES**  
U MECHANICAL DRIVES  
**ROTARY GYROSCOPES**  
Application of lasers to rotary gyroscope vibration interferometry, gyroscope balancing, and gravimetric accelerometers  
[REPT-59] p0372 N72-22524

**ROTARY STABILITY**  
NT GYROSCOPIC STABILITY  
Description of elastomeric damper for prevention of helicopter or vertical takeoff aircraft rotor instability  
p0214 N72-16778

**ROTARY WING AIRCRAFT**  
NT COMPOUND HELICOPTERS  
NT HELICOPTERS  
NT MILITARY HELICOPTERS  
NT RIGID ROTOR HELICOPTERS  
Rotary wing aircraft design features and performance, discussing military and civilian helicopters and future developments  
p0126 A72-16734

Rotary wing aircraft first flight and envelope expansion at design gross weight  
p0146 A72-18493

Tethered autostabilized rotor platform for military surveillance, target location and communication, discussing flight vehicle, tethering cable, ground station and guidance-control system  
p0357 A72-30078

Rotary wing and VTOL aircraft induced downwash effects on ground personnel, considering injuries, body heat loss, work capability impairment and sound pressure effects  
p0360 A72-30425

A survey of rotary-wing aircraft crashworthiness.  
p0565 A72-42763

Performance tests on static electricity dissipator used on fixed and rotary wing aircraft  
[AD-729534] p0156 N72-14247

Compilation of accidents involving helicopters and rotor craft for United States general aviation operations during 1969  
[PB-204812] p0333 N72-21024

Accidents involving rotorcraft in US general aviation for calendar year 1970  
[NTSB-AMM-72-3] p0421 N72-24019

Optimization techniques for estimating height-velocity diagram and critical decision point for rotorcraft based on impulsive response functions  
[NAL-TR-245] p0479 N72-27026

**ROTARY WINGS**  
NT LIFTING ROTORS  
NT RIGID ROTORS  
NT TILTING ROTORS  
NT TIP DRIVEN ROTORS  
Automatic ultrasonic testing equipment for NDT tests of helicopter rotor blades  
p0011 A72-11021

Matrix method calculation for aerodynamic loads, transverse forces, bending moments, torques and twist of hinged main rotor blades in helicopter during forward flight  
p0020 A72-12440

Helicopter rotor tip drag relief estimate based on two dimensional drag divergence with Mach number, airfoil parameters and flight conditions  
p0024 A72-12882

High speed helicopter elastic rotor blade suboptimal motion controller decreasing flapping motion and bending loads despite small control angles and vertical gusts  
p0071 A72-15504

Helicopter rotor boundary layer, comparing analytical shear stress and velocity distributions obtained by momentum integral techniques with hot wire probe experimental data  
[AIAA PAPER 72-38] p0130 A72-16900

Papers on critical and exploratory flight testing covering rotary wings, lifting bodies and jet engine airstart  
p0145 A72-18487

Articulated rotor blade flapping at 0-0.24 advance ratios and constant lift, discussing effects of shaft tilt and collective pitch variations  
p0186 A72-20205

Critical lift and flow separation on helicopter rotor under dynamic loading as function of flow and blade characteristics  
p0285 A72-25285

Helicopter rotor blades bending vibrations, examining scale effects, dynamic similarity and natural frequencies via series of Legendre polynomials  
[AD-745569] p0299 A72-25733

Helicopter rotor blade spars shot peening in centrifugal vibrator, optimizing Cr-Mo-Ni steel surfaces work hardening  
p0304 A72-26820

Ice formation on helicopter rotor blades, discussing atmospheric moisture and temperature conditions, blade surface temperature, centrifugal and aerodynamic forces and preventive measures  
p0309 A72-27414

Hydraulic transmission for driving helicopter tail rotor, noting compensatory system for engine failure  
p0311 A72-27862

Rotating airfoil experimental test program for verification of Himmelskamp and Dwyer-McCroskey theoretical analysis, presenting graphs of lift

- coefficient vs angle of attack p0313 A72-28124
- Subsonic and supersonic heavily loaded axial flow rotors noise, discussing helicopter blade slap effect and compressor rotor-stator interaction p0355 A72-29570
- Hingeless blades flap-lag oscillations linear stability characteristics in hovering flight, examining precone, elastic and pitch-lag coupling and induced inflow aerodynamic effects p0359 A72-30289
- Hughes 500 and OH-6 helicopter tail rotor cambered blades, comparing thrust and stall characteristics with symmetrical blades p0359 A72-30290
- French monograph on flow near rotor blade tips, discussing three dimensional circulation and boundary layer effects, energy losses, velocity and pressure distributions, etc p0363 A72-30950
- Hingeless elastic helicopter blades coupled flap-lag motion under quasi-steady aerodynamic loads, reducing equations of motion to coupled nonlinear differential equations p0393 A72-31211
- Nonlinear analysis of helicopter rotor blade free transverse vibration under air and centrifugal loadings during forward flight, using matrix method p0394 A72-31407
- American Helicopter Society Noise Subcommittee report on physical characteristics and major controlling parameters of rotor induced aerodynamic noise [AHS PREPRINT 625] p0443 A72-34476
- Boundary layer velocity profiles on a helicopter rotor blade in hovering and forward flight. [AHS PREPRINT 622] p0444 A72-34482

[NAL-TM-256] p0479 N72-27028  
Application of downwash from helicopter rotors for dissipation of fog  
[AD-739487] p0481 N72-27042  
Analysis of helicopter rotor wake patterns using water tunnel test facility  
[AD-739946] p0482 N72-27052  
Computer program for determining natural frequencies and normal modes existing in helicopter rotary wings  
[NASA-CR-112071] p0513 N72-27999  
Structural analysis of rotor system of hot gas-jet helicopter  
[NASA-TT-P-14281] p0513 N72-28001  
Analysis of effects of lifting rotor blade flexibility and rotor support flexibility on performance and structure of rotary wing assembly  
[NASA-CR-114480] p0516 N72-28018  
Aerodynamic characteristics of progressing and regressing forced rotary wing flapping modes  
[NASA-CR-114481] p0516 N72-28019  
Application of reliability and maintainability trade-off considerations in design of main rotor blade for heavy lift helicopter  
[AD-739582] p0516 N72-28021  
Analysis of failure rate for rotary wings on CH-47 helicopter and determination of mean-time-between-failure leading to final replacement  
[AD-739568] p0516 N72-28022  
Design analysis of nutating plate drive for 2500 horse power helicopter rotor gearbox  
[NASA-TM-X-68117] p0521 N72-28504  
Comparative lubrication tests of OH-58A tail rotor drive shaft bearings  
[NASA-TM-X-68118] p0521 N72-28505  
Evaluation of time division multiplexing system for helicopter rotor tests  
[AD-740773] p0534 N72-29480  
Wind tunnel tests to determine aerodynamic characteristics of folding helicopter rotor in various configurations  
[NASA-CR-114464] p0573 N72-30013  
Helicopter rotary wing noise in hover and forward flight produced by Karman street type vortex shedding  
[AD-741778] p0574 N72-30020  
Aerodynamic characteristics of three types of variable diameter rotary wings with telescoping

# SUBJECT INDEX

# ROTOR AERODYNAMICS

- blades, folding rigid blades, and flexible blades  
[AD-740911] p0575 N72-30025
- Effects of blade section camber and blade planform  
taper on helicopter rotary wing hovering  
performance  
[AD-743232] p0586 N72-31033
- Wind tunnel tests to determine path of vortex  
moving from each rotor blade tip of helicopter  
rotor to establish effect on aerodynamic forces  
and pressure distribution  
[NASA-TT-P-14462] p0618 N72-32012
- Mathematical model and computer program for  
determining helicopter main rotor wake geometry  
effects on rotor blade air loads and response in  
steady maneuvers - Vol. 1  
[NASA-CR-2110] p0636 N72-32995
- Design of rotor system research aircraft for  
flight testing advanced helicopter and compound  
rotor systems - Vol. 1  
[NASA-CR-112152] p0638 N72-33014
- Design of rotor system research aircraft for  
flight testing advanced helicopter and compound  
rotor systems - Vol. 2  
[NASA-CR-112153] p0638 N72-33015
- Design of rotor system research aircraft for  
flight testing advanced helicopter and compound  
rotor systems - Vol. 3  
[NASA-CR-112154] p0638 N72-33016
- Design of rotor system research aircraft for  
flight testing advanced helicopter and compound  
rotor systems - Vol. 4  
[NASA-CR-112155] p0638 N72-33017
- Design, development, and aerodynamic  
characteristics of compound helicopter designed  
for rotor systems research applications  
[NASA-CR-112156] p0639 N72-33020
- Use of polyethylene thin films for ice prevention  
and ice-shedding on helicopter rotary wings  
[RAE-TR-71238] p0640 N72-33032
- Aerodynamic characteristics and operational  
experiences with various types of helicopter  
rotors  
[AD-745124] p0641 N72-33041
- Development of model to represent induced flow  
through rotary wing of helicopter in descending  
flight  
[AD-745103] p0642 N72-33047
- Experimental and analytical determination of  
boundary layers and tip flows of helicopter  
rotor blades

[AIAA PAPER 72-38] p0130 A72-16900

Sail rotors for hovering platform, calculating rotor performance based on ideal two-dimensional flexible airfoil section characteristics  
[AIAA PAPER 72-66] p0131 A72-16925

High tip speed low loading transonic fan rotor design for weak oblique shocks with improved efficiency and stall margin  
[AIAA PAPER 72-83] p0180 A72-18951

Articulated rotor blade flapping at 0-0.24 advance ratios and constant lift, discussing effects of shaft tilt and collective pitch variations  
p0186 A72-20205

General solution for thin airfoil rectilinear motion in ideal incompressible gas, applying to rotor blade lift calculation  
p0231 A72-22860

Leading edge serrations effect on rotor noise and aerodynamic characteristics, noting vortex and rotational noise reduction and overall efficiency decrease  
[AIAA PAPER 72-655] p0415 A72-34079

Exploration of aeroelastic stability boundaries with a soft-in-plane hingeless-rotor model.  
[AHS PREPRINT 610] p0445 A72-34493

Hingeless rotor - Experimental frequency response and dynamic characteristics with hub moment feedback controls.  
[AHS PREPRINT 612] p0446 A72-34494

Parametric studies of instabilities associated with large, flexible rotor propellers.  
[AHS PREPRINT 615] p0446 A72-34496

State-feedback-controllers and state-estimators design for roll-pitch-horizontal motions of helicopter near hover, using rotor dynamics model  
[AIAA PAPER 72-778] p0500 A72-38137

Analytical investigation of the effects of blade flexibility, unsteady aerodynamics, and variable inflow on helicopter rotor stall characteristics.  
p0503 A72-38950

Tilt-prop-rotor VTOL aircraft design evaluation based on aerodynamic and aeroelastic model and full scale performance tests  
[AIAA PAPER 72-803] p0510 A72-40054

Statistical analysis of influence coefficients and unbalance forces measurement errors in balancing of rotors  
p0556 A72-41229

Unsteady rotor aerodynamics at low inflow and its effect on flutter.  
[AIAA PAPER 72-959] p0561 A72-42349

Helicopter rotor blade flapping motion stability, applying perturbation technique to linear equations of motion for different advance ratios and lock numbers  
[AIAA PAPER 72-955] p0562 A72-42351

Flap-lag induced nonlinear oscillations in torsionally rigid helicopter blade, solving nonlinear equations of motion by multiple time scales asymptotic expansion  
[AIAA PAPER 72-956] p0562 A72-42356

Investigation of the stability of the tip vortex generated by hovering propellers and rotors.  
p0612 A72-45327

The dissipation of tip vortices by mass injection with application to rotor systems.  
p0612 A72-45329

Blade torsional tuning to manage rotor stall flutter.  
[AIAA PAPER 72-958] p0615 A72-45412

The use of complex coordinates in the study of rotor dynamics.  
[AIAA PAPER 72-954] p0615 A72-45413

Rotor and propeller wake calculation, recovery rotors, and rotor feedback control - conference  
[DLR-MITT-71-12] p0037 N72-11001

Linear aerodynamic rotor theories showing effect of applied vortex model on exactitude of numerical analysis  
p0038 N72-11005

Conference on aerodynamic design aspects of V/STOL and STOL propellers and rotors  
[DLR-MITT-71-18] p0381 N72-23008

Aerodynamics of rotary recovery system for flying bodies during transition from horizontal to gliding flight  
[DGLR-71-020-PT-2] p0382 N72-23014

Vortex model for calculating airstream at rotor blade of helicopter  
[NASA-TT-F-14228] p0430 N72-24990

ROTOR BLADES

Automatic ultrasonic testing equipment for NDT tests of helicopter rotor blades  
p0011 A72-11021

Two dimensional transonic airfoil section testing at ONERA S3MA wind tunnel, comparing results with helicopter rotor blades test data  
[ONERA, TP NO. 1028] p0059 A72-13642

Closed loop fluidic bidirectional jet flap airfoil lift control system, considering application to helicopter rotor blades  
p0124 A72-16659

Subsonic and transonic compressible potential flow over nonlifting hovering helicopter rotor blades, calculating flow field by three-dimensional nonlinear relaxation scheme  
[AIAA PAPER 72-39] p0130 A72-16901

Hingeless rotor helicopter blade steady state response with nonuniform inflow and elastic blade bending  
[AIAA PAPER 72-65] p0132 A72-16933

Helicopter rotor blade response to random loads treated by theory of linear dynamic systems with time-varying coefficients  
[AIAA PAPER 72-169] p0132 A72-16940

Articulated rotor blade flapping at 0-0.24 advance ratios and constant lift, discussing effects of shaft tilt and collective pitch variations  
p0186 A72-20205

Pressure sensor measurements of fluctuating aerodynamic forces on rotor blades related to compressor noise generation  
[ASA PAPER H 6] p0192 A72-21486

General solution for thin airfoil rectilinear motion in ideal incompressible gas, applying to rotor blade lift calculation  
p0231 A72-22860

Fan-in-wing model noise due to cross flow generated in- and outflow distortions and unsteady rotor blade forces  
[ASME PAPER 72-GT-92] p0298 A72-25666

Integral equation for calculation of unsteady aerodynamic forces on helicopter lifting rotor blades, taking into account air compressibility  
[ONERA, TP NO. 1081] p0356 A72-29671

Hughes 500 and OH-6 helicopter tail rotor cambered blades, comparing thrust and stall characteristics with symmetrical blades  
p0359 A72-30290

Nonlinear analysis of helicopter rotor blade free transverse vibration under air and centrifugal loadings during forward flight, using matrix method  
p0394 A72-31407

Flow analysis in the axial-flow compressor impeller with meridional stream acceleration.  
p0614 A72-45371

Effects of torsional blade flexibility on single blade random gust response  
[NASA-CR-114386] p0078 N72-11889

Blade/disk attachment methods for gas turbine engines  
[AD-877170] p0097 N72-12796

Aerodynamics of helicopter rotor blade tip vortices  
[NASA-CR-112009] p0101 N72-12992

Aerodynamic design and performance of axial flow compressor rotor with tip speed of 1380 feet per second and 1.1 blade tip solidity  
[NASA-TM-X-2449] p0266 N72-18998

Full scale wind tunnel investigation of advancing blade concept rotor system  
[AD-734338] p0271 N72-19038

Application of state transition matrix for numerical analysis of stability and gust response of lifting rotor with rigid flapping blades and rigid hub  
p0431 N72-25001

Destabilization effects of flap-lag coupling in hingeless rotor blade oscillations during hover  
[NASA-TM-X-62179] p0572 N72-30003

Aerodynamic characteristics of three types of variable diameter rotary wings with telescoping blades, folding rigid blades, and flexible blades  
[AD-740911] p0575 N72-30025

Painting schemes for improving rotating propeller and tail rotor visibility of military aircraft  
[AD-744453] p0629 N72-32579

ROTOR BLADES (TURBOMACHINERY)  
Sound radiation from axial flow fans running in

- turbulent flow, evaluating fluctuating lift on rotor blades due to incident gusts  
p0003 A72-10220
- Forged Inconel alloy 718 metal powder preforms for dense aircraft engine compressor rotor blades  
p0014 A72-11441
- Multiple pure tone noise generation from turbofan blade to blade nonuniformities in rotor geometry, using two dimensional inviscid flow model  
p0072 A72-15568
- Noise reduction effects of wake interaction between rotor blade rows in axial flow compressor, cancelling velocity defect at stator position  
[ASME PAPER 72-GT-15] p0293 A72-25614
- Hot corrosion effects on Inconel-700 and Inconel-X gas turbine rotor blades during burning of high sulfur concentration residual oil fuels  
[ASME PAPER 72-GT-87] p0298 A72-25662
- Composite turbofan blades for high temperature applications, discussing weight reduction and design procedure  
p0313 A72-28102
- Lift fan blade interaction discrete frequency noise, discussing potential and viscous interactions relation to rotor-stator spacing  
p0395 A72-32019
- Filament winding techniques for rotor blade applications.  
p0501 A72-38165
- Analytical method for combining the interaction of inlet distortion and turbulence.  
p0594 A72-43330
- Design and performance of supersonic stator and rotor blading  
[NASA-TM-X-67961] p0097 N72-12783
- FORTRAN 4 computer program for design of two-dimensional supersonic turbine rotor blades with boundary layer correction  
[NASA-TM-X-2434] p0099 N72-12975
- Computer programs for wake geometry, and blade loads and responses  
[NASA-CR-1912] p0149 N72-13977
- Calculation of nonstationary lift and moment coefficients for vibrating cascade of blades  
p0158 N72-14292
- Development of wake model for predicting rotor free wake positions and resulting rotor blade air loads - Vol. 1  
[NASA-CR-1911] p0164 N72-14990
- Performance tests of single-stage turbine with low solidity jet flap rotor blade assembly using various cavity pressure ratios, equivalent speeds, and expansion ratios  
[NASA-CR-1968] p0265 N72-18994
- Experimental study of effect of blade aspect ratio on performance of axial flow compressors  
[ARC-CP-1179] p0277 N72-19331
- Transonic propulsion fan for turbofan engine with rotor blade spacing designed to minimize noise emission  
[NASA-CASE-LEW-11402-1] p0327 N72-20770
- Rotor head, rotor blade, transmission, and Rolls Royce 360 engine studies  
[AD-737611] p0433 N72-25014
- Design and performance data for stage C  
[NASA-CR-120938] p0524 N72-28796
- Collision force method for studying impact interaction of engine rotor blade fragment with containment ring  
[NASA-CR-120952] p0528 N72-29004
- Fluctuating lift on axial flow of turbomachine rotor  
[ARC-R/M-3684] p0534 N72-29247
- ROTOR DISKS**  
**U TURBINE WHEELS**  
**ROTOR HUBS**  
**U HUBS**  
**U ROTORS**  
**ROTOR LIFT**  
Critical lift and flow separation on helicopter rotor under dynamic loading as function of flow and blade characteristics  
p0285 A72-25285
- Flow separation effects on critical lift of helicopter rotor, using blade angle of attack criterion  
p0304 A72-26893
- Helicopter maneuverability factors, discussing flight direction change ability, acceleration limitations and rotor thrust requirements  
[AHS PREPRINT 640] p0446 A72-34500
- Helicopter design figure of merit weight ratios definition in terms of rotor thrust coefficient, substituting pure airframe structure weight for conventionally used empty weight  
[SAWE PAPER 916] p0596 A72-43463
- Calculation of nonstationary lift and moment coefficients for vibrating cascade of blades  
p0158 N72-14292

NT FLIGHT RULES  
NT INSTRUMENT FLIGHT RULES
- RUN TIME (COMPUTERS)**  
Stellar attitude reference and navigation associative processor with high computational speed for radar approach control in ATC  
p0017 A72-12033
- RUNWAY ALIGNMENT**  
Magnetic method for detection of aircraft position relative to runway  
[NASA-CASE-ARC-10179-1] p0373 N72-22619
- RUNWAY CONDITIONS**  
Crosswind landing under adverse runway conditions, illustrating technique with sketches  
p0179 A72-18833  
Airport fog dispersion methods review, noting seeding and hot air injection techniques  
p0198 A72-21920  
Runway fog dispersal system based on underground installed flight-discarded turbojet engines, discussing system efficiency and economics  
p0232 A72-22910  
Runway unevenness and landing gear characteristics effects on SST vibration during taxiing, taking off and landing  
p0235 A72-23459  
Airport lights system design for optical landing aids, discussing runway illumination conditions  
p0309 A72-27402  
FAA airport fog dispersal program, discussing techniques effectiveness evaluation vs defined goals  
p0347 A72-28843  
Low level vertical wind shear effect on aircraft control, considering runway selection with respect to surface wind conditions  
p0348 A72-28862  
Aeronautical requirements for meteorological reporting and instruments at aerodromes, discussing surface wind, visibility, runway range, weather, temperature and pressure observations  
p0349 A72-28868  
Airport runway fog dispersal in UK, discussing cost projection for chemical seeding system combined with lidar remote sensing  
p0411 A72-33500  
Runway marking requirements for visibility under day and night conditions, considering night reflection value, color stability, durability, noninterference with flight operations, etc  
p0442 A72-34243  
Airport improvements needed for safety.  
p0460 A72-36784  
Airfield flexible pavement design - A state of the art paper.  
p0460 A72-36787  
Airlines and aircraft manufacturers requirements for airport pavement evaluation/data system, discussing relationships between strength, landing gear design, aircraft weight, range, etc  
p0460 A72-36789  
Day-to-day operational airplane-airport relationship, discussing runway grooving impact and friction coefficient measurement  
[AIAA PAPER 72-813] p0497 A72-38118  
Survey of runway pavement condition at US Naval Air Station, Imperial Beach, California  
[AD-733656] p0276 N72-19304  
Signal data converter for multirunway visibility measuring system, using ground illuminance sensors  
[DOT-TSC-FAA-72-1] p0323 N72-20254  
Airfield pavement condition survey of asphaltic and Portland concrete at USNAS Barbers Point, Hawaii
- [AD-735105] p0323 N72-20268  
Computer program and numerical analysis of feasibility of using suction between and along runways to remove trailing edge vortex streets  
[IDA-LOG-HQ-69-10164] p0337 N72-21290  
Measurement of runway and taxiway conditions at two international airports to determine effects of ground roughness on aircraft operations  
[NASA-TN-D-6680] p0368 N72-22023  
Runway friction under dry and artificially wet conditions  
[PS-160-65-68-4] p0371 N72-22248  
Improved aircraft ground performance in slush and wet runway conditions by addition of extra nose wheel  
[ARC-CP-1206] p0432 N72-25009  
Airfield pavement condition survey of USMCAS facilities at Santa Ana and Mile Square, California  
[AD-738828] p0518 N72-28267  
Condition survey of airfield pavements at USNALF San Clemente Island, California  
[AD-738827] p0518 N72-28268  
Surface stabilization of snow on helicopter landing fields by chemical treatment  
[AD-738561] p0519 N72-28271  
Development of method for identifying visibility conditions on runway during takeoff and landing and comparison with visual perception of pilot  
[NLL-M-22355-(5828.4F)] p0522 N72-28661  
Development of method for determining orientation of runway to minimize probability of certain critical crosswinds  
[NASA-TN-D-6930] p0576 N72-30250  
Analysis of operational factors involved in frictional and retarding forces between aircraft tires and hard surface runways  
[ESDU-71025-PT-1] p0636 N72-33001  
Planning of aircraft tires on wet runways  
[ESDU-72008-PT-3] p0637 N72-33010
- RUNWAY LIGHTS**  
Airport lights system design for optical landing aids, discussing runway illumination conditions  
p0309 A72-27402  
Airport runway lighting systems development, noting lamp for night flights and control console  
p0358 A72-30119  
Intensity control of condenser discharge light (flashers) for runway alignment indicator system  
[FAA-RD-72-54] p0485 N72-27700  
Development of method for identifying visibility conditions on runway during takeoff and landing and comparison with visual perception of pilot  
[NLL-M-22355-(5828.4F)] p0522 N72-28661  
Development and characteristics of visual landing aids systems  
[NBS-10-837] p0523 N72-28673  
Evaluation of tricolor visual approach path indicator for suitability as part of two segment visual approach slope indicator system  
[FAA-ARD-72-49] p0590 N72-31653  
Evaluation of visual approach system to determine improvements resulting from change in color density and hue of transition zone  
[FAA-ARD-72-91] p0590 N72-31654
- RUNWAYS**  
Airport apron surface pavement strain measurements under field loading conditions, considering static and dynamic loads with finite element method  
p0002 A72-10192  
Atmospheric temperature and pressure altitude effects on runway lengths and aircraft takeoff weights  
[ASCE PREPRINT 1242] p0002 A72-10193  
Line, cement, fly ash and sand combination airport pavement design and testing, discussing material structural and chemical properties, compressive strength, costs, etc  
p0017 A72-12023  
Spiralport design for maximum utilization of airport runways for landings and takeoffs  
p0125 A72-16693  
Anthropotechnical aspects of aircraft taxiing guidance in airfield runway areas, suggesting computerized operational system  
p0229 A72-22779  
Optimal high capacity runway systems for major airports, discussing multiple systems in

## SCATTERING CROSS SECTIONS

Atmospheric acoustic attenuation measurement on  
 sailplane, assessing turbulence backscattering  
 cross section

p0189 A72-20597

## SCHEDULES

Airline schedule keeping by Sud Lear all-weather  
 landing system, discussing crew training

p0064 A72-14688

Airline operational problems from traffic volume  
 increase, discussing flight safety, passenger  
 comfort, schedule adherence and economy aspects  
 [DGLR PAPER 72-037]

p0606 A72-44618

## SCHEDULING

## NT PREDICTION ANALYSIS TECHNIQUES

Automated scheduling algorithm for aircraft from  
 terminal area to touchdown, discussing system  
 features and STOL air traffic computerized  
 simulation

[AIAA PAPER 72-120] p0131 A72-16905

Decision diagrams use in logic analysis for  
 aircraft maintenance schedule testing relative  
 to operational reliability control

p0357 A72-30041

Federal legislation impact on airport and airway  
 system planning, considering budget and schedule  
 requirements

p0459 A72-36777

Factors to be considered in airline scheduling.

p0492 A72-37745

S-3A aircraft weight control program organization  
 and methods, considering cost and schedule  
 performance

[SAVE PAPER 906] p0595 A72-43453

Lockheed airline system simulation and aircraft  
 scheduling models.

p0604 A72-44579

Cost effective algorithm for optimal route  
 aircraft scheduling for airlines by mixed  
 integer multi-commodity flow technique and  
 Dantzig-Wolfe decomposition

p0604 A72-44582

Heuristic procedure solution for least cost  
 commercial airline crew scheduling, emphasizing  
 combinatorial space size reduction

p0604 A72-44584

Set covering algorithm for extracted small  
 matrices, applied to airline crew scheduling

[TR-320-3004] p0321 A72-20099

Semi-automatic methods for airlines crew scheduling  
 [TR-320-3006] p0322 A72-20100

Development of adaptive scheduling procedure for  
 aircraft maintenance and inspection planning  
 [AD-743284] p0586 A72-31029

## SCHLIEREN PHOTOGRAPHY

Flow visualization in supersonic axial compressor  
 by short exposure schlieren photography of shock  
 wave patterns in rotating annular cascade of  
 compressor blades

[ONERA, TP NO. 1026] p0136 A72-17192

Hypersonic boundary layer separation of delta wing  
 in shock tunnel using color and monochrome  
 schlieren photography

[NPL-AERO-NOTE-1097] p0029 A72-10022

## SCHOOLS

Procedures for training pilots in assessment of  
 flight systems during attendance at Empire Test  
 Pilot School, England

p0330 A72-20995

## SCRAMJET ENGINES

## U SUPERSONIC COMBUSTION RAMJET ENGINES

## SCRAMJETS

## U SUPERSONIC COMBUSTION RAMJET ENGINES

## SCREENS

Jet noise reduction by screen placed across jet  
 flow, investigating acoustic properties,  
 velocity and pressure in mixing zone  
 [AIAA PAPER 72-644] p0416 A72-34088

## SCREWS

Characteristics and advantages of flapping wing  
 engine over screw engine

p0423 A72-24118

## SEA LAUNCHING

Helicopter/ship dynamic interface testing for  
 launch and recovery capabilities under sea  
 environment conditions, discussing visual  
 landing aids, wind, visibility and ship motions  
 [AHS PREPRINT 650] p0447 A72-34505

## SEALANTS

## U SEALERS

## SEALERS

Aircraft power plants sealing materials,  
 emphasizing porous cernit seals heat resistance  
 under thermal cyclic loads

p0147 A72-18658

## SEALING

## NT SELF SEALING

## SEALS (STOPPERS)

## NT GLANDS (SEALS)

## NT PACKINGS (SEALS)

Friction coefficient, standard wear and surface  
 layer temperature of seal for dry friction pairs  
 in jet engines, investigating crystal lattice  
 parameters

p0185 A72-19768

Pipe joint flexible metal seal development and  
 testing for Concorde Olympus 593 under thermal  
 and pressure cycling

p0199 A72-21938

Clam seals comparison with elastomers, discussing  
 aircraft use, contamination, inspection,  
 corrosion and erosion, surface finish, service  
 life and cost

p0199 A72-21941

Pressure tight seal for superalloy used in  
 hypersonic aircraft fuel tank joints

[NASA-CASE-LAR-10170-1] p0338 A72-21471

Polyimide hydraulic actuator rod seals for  
 application in high performance aircraft

[NASA-CR-120878] p0425 A72-24530

Mathematical models for analyzing  
 quasi-one-dimensional flow across face seals and  
 narrow slots of turbine engines

[NASA-TN-D-6668] p0435 A72-25468

Gas seal designs for aircraft gas turbine engines  
 [AD-739922] p0521 A72-28518

## SEAPLANES

Potential usefulness of small, single seat  
 seaplane for civil police patrol

[AD-736187] p0369 A72-22032

## SEARCH RADAR

German monograph - A search procedure for  
 electronic radar.

p0568 A72-43054

Search radar monitoring of bird movements to  
 prevent aircraft collision accidents

[AD-732945] p0253 A72-18027

UTES multipurpose radar complex for air traffic  
 control

[AD-733273] p0256 A72-18173

## SEARCHING

Analysis of avionics system for helicopter search  
 and rescue mission and crew functions

[AD-728043] p0090 A72-11974

## SEASONS

## NT SUMMER

## SEAT BELTS

Crashworthy upper torso restraint systems for  
 general aviation, incorporating strap takeup  
 devices

p0195 A72-21578

Dynamic deceleration anthropomorphic dummy tests  
 of general aviation occupant lap belt/shoulder  
 harness restraint systems

[SAE PAPER 720325] p0291 A72-25588

Impact tests on anthropomorphic dummies for  
 protection effectiveness evaluation of lap belt,  
 Air Force shoulder harness-lap belt and  
 airbag-lap belt restraints

[AD-741530] p0309 A72-27471

Design of aircraft crash simulator for testing  
 dynamic responses of seats and passenger  
 restraint systems

p0214 A72-16793

## SEATS

## NT EJECTION SEATS

Energy absorbing seat design for light aircraft,  
 describing development and static and dynamic  
 testing

[SAE PAPER 720322] p0290 A72-25585

# SUBJECT INDEX

# SENSORY FEEDBACK

- Design of aircraft crash simulator for testing dynamic responses of seats and passenger restraint systems p0214 N72-16793

## SEPARATED FLOW

NT BOUNDARY LAYER SEPARATION

Symmetrically deformed delta wing in supersonic flow, considering leading edge flow separation induced vortices effects on downwash, pressure distribution and aerodynamic characteristics p0072 A72-15741

Increased Reynolds number simulation with roughness set on aircraft model in transonic flow, investigating flow separation by parietal visualization technique p0140 A72-17846

Wind tunnel diffuser design for separated region spread reduction based on egg box principle p0238 A72-23859

Supersonic flow around thin cruciform wing with antisymmetrical angle of attack distribution and horizontal plane with leading edge, considering flow separation at edges p0246 A72-25118

Critical lift and flow separation on helicopter rotor under dynamic loading as function of flow and blade characteristics p0285 A72-25285

Flow separation reduction by transverse jet blowing, illustrating flow patterns by water tunnel visualization on cylinders, perpendicular flat plates, contoured walls, steps, wings, etc [ONERA, TP NO. 1070] p0300 A72-25814

Flow separation effects on critical lift of helicopter rotor, using blade angle of attack criterion p0304 A72-26893

Calculation of an unsteady separation flow past a slender profile p0460 A72-36900

Flow separation at the edges of some types of tail sections used in supersonic aircraft and in rocket technology p0507 A72-39597

Experimental investigations of separated flows on wing-body combinations with very slender wings at free-stream Mach numbers from 0.5 to 2.2. [ICAS PAPER 72-25] p0554 A72-41150

Analysis and correlation of data on pressure fluctuations in separated flow. p0594 A72-43331

The sweepback effect in the subsonic region in the lower atmosphere and in the hypersonic region at high altitudes p0611 A72-44983

Three dimensional shock wave configurations in front of cylindrical body on supersonic wing or of fluid jet injected into main supersonic flow, examining high pressure gradient regions p0611 A72-45113

Scale effect in reattached, separated, and thin wake flow over swept wings at transonic speed [RAE-TR-71043] p0169 A72-15292

Mathematical model for effects of conical thickness distribution on separated flow past slender delta wings with small thickness/span ratios and sharp leading edges [ARC-CP-1189] p0267 A72-19006

Linearized solution for flow separation near tip and wake edge of lifting wing with trailing edge separation [AD-734791] p0277 A72-19347

Free streamline theory for determining pressure distribution on airfoil with flow separation [NAL-TR-247] p0371 A72-22333

Separated flow point determination on blown flap airfoil of STOL wing propulsion system p0483 A72-27286

## SEPARATION

Sand and dust particle filter tests for evaluation of separation efficiency and aerodynamic performance [AD-725593] p0051 A72-11713

## SEPARATORS

NT AIR FILTERS

NT FLUID FILTERS

C-54 A/B aircraft engine air particle separator antice system design features, manufacturing techniques and testing

Dual purpose filter-separators for dirt and water removal from fuel p0177 A72-18769

p0047 A72-11676

## SERVICE LIFE

Fatigue behavior of notched or cracked aircraft structure parts, examining service life prediction problem p0139 A72-17811

Lubrication system filtration effects on rolling element bearing life and extended mean time to failure of gas turbine engines p0175 A72-18754

Aircraft performance parameters in terms of effect on lifting system service and fatigue life and on design p0182 A72-19111

Wilga 3 aircraft structure service life from structural fatigue theory and tests, emphasizing operational load distribution measurement p0196 A72-21634

Clam seals comparison with elastomers, discussing aircraft use, contamination, inspection, corrosion and erosion, surface finish, service life and cost p0199 A72-21941

Thin wall airframe wire insulation relative thermal life and temperature rating evaluation procedure using Arrhenius plot p0233 A72-23270

Flutter analysis of propeller whirl flutter, twin boom aircraft, T tail configuration, servo tabs and all-moving tail, discussing structural variations effects on service life [SAE PAPER 720309] p0289 A72-25573

Russian book on aircraft engine reliability covering defects, fractures and failure analysis, service life prediction, production deficiencies and operational conditions p0301 A72-26068

Aircraft windscreen design, discussing high impact strength glass, electroconductive film, transparency service life and weight reduction p0305 A72-27006

Stress-service life relations for duralumin samples from impact and nonimpact tensile tests with cyclic axial loads, noting notch sensitivity p0352 A72-29147

Mathematical models for passenger aircraft market forecast, discussing stock measurement and life expectancies p0358 A72-30125

Environmental effects on aircraft structure operational reliability, discussing failure removal and protective coating lifetime p0359 A72-30285

Achieving fail safe design in rotors. [AHS PREPRINT 673] p0448 A72-34513

Concrete airport pavement thickness determination methods comparison, noting design life dependence on safety factors p0460 A72-36786

Effect of fuel on gas corrosion in jet engine combustion chambers p0495 A72-38091

Aircraft engine lifetime and turbine blade reliability p0509 A72-39916

Erosion effects on gas turbine engine compressor blades due to dust ingestion, discussing means for alleviating performance and service life losses [ICAS PAPER 72-02] p0552 A72-41127

Life estimation and prediction of fighter aircraft. p0568 A72-42972

Detection of structural deterioration and associated airline maintenance problems. [SAE PAPER 918] p0596 A72-43465

Agricultural aircraft flight loads - Typical spectra and some observations on airworthiness. p0608 A72-44734

Economic and operational aspects of fatigue - Figures of a Swiss ground attack/fighter aircraft. p0610 A72-44742

Statistical analysis of aircraft operations to show relationship of operational readiness, maintenance, scheduling, and life expectancy [AD-728656] p0089 A72-11970

- Development of procedures for conducting structural inspection program on DC-10 aircraft to reduce effects of crack propagation with increased service life  
p0252 N72-18019
- Fatigue tests of angular-contact ball bearings with tetraester and synthetic paraffinic oil at 492 K in air environment  
[NASA-TN-D-6771] p0372 N72-22496
- Development of methods for determining lifetime of helicopter components based on working stress and stress-time functions  
[NASA-TT-P-14280] p0425 N72-24531
- Analysis and evaluation of scatter factors used to determine safe service life of aircraft structures  
[ARL/SM-NOTE-373] p0525 N72-28903
- Quality control and reliability engineering procedures applied to aircraft engine parts  
[JPRS-56674] p0538 N72-29809
- Fatigue integrity program for Boeing 747 aircraft  
p0539 N72-29898
- Analysis of parameters affecting service life of jet powered civil transport aircraft  
p0541 N72-29911
- Inspection and maintenance schedules of commercial transport aircraft to detect structural deterioration and to prevent catastrophic failure  
p0541 N72-29913
- Equivalent testing of gas turbine engines for prolonged service life  
[AD-743145] p0591 N72-31789
- Load-life model for calculating fatigue life and reliability of helicopter spur gear mesh  
[AD-744504] p0629 N72-32507
- SERVICE MODULES**  
Aircraft hydraulic control systems modular design for maintainability, emphasizing component removal with minimum hydraulic fluid loss and air entrainment  
p0560 A72-42294

U SHEAR STRESS
- SHEAR FLOW**  
Complex perturbation potential of constant vortex shear flows around airfoil activated by motion in presence of rectilinear wall  
p0118 A72-16122
- Turbulent shear stress and kinetic energy characteristics of subsonic air flow in straight conical diffuser, using hot-wire anemometry measurements  
p0238 A72-23862
- Aerodynamic forces calculation for constant vortex shear flows around airfoil fixed between rectilinear walls, noting resultant perpendicularity to Ox axis  
p0240 A72-24115
- SHEAR LAYERS**  
Noise generation from turbulent supersonic shear layers, including low supersonic and transonic ranges for jet noise applications  
p0072 A72-15566
- Aviation hazards due to stably stratified shear and turbulence zones, discussing meteorological analysis of 747 jumbo jet turbulence incident  
p0349 A72-28865
- Supersonic jet exhaust noise radiation from turbulent shear layer instability waves, noting acoustic energy flux dependence on streamwise distance  
p0355 A72-29581
- Optimization of acoustic linings in presence of wall shear layers.  
p0548 A72-40334

# SHEAR PROPERTIES

# SUBJECT INDEX

## SHEAR PROPERTIES

### NT SHEAR STRENGTH

#### SHEAR STRAIN

Webbing joints stitching strain; considering nylon and flax yarns stretching properties and various stitching patterns strengths

p0008 A72-10315

Transverse shear loading on tapered spars noting stiffness matrix

[NLR-TB-70052-V] p0475 N72-26944

#### SHEAR STRENGTH

Ti alloys for aircraft structures, emphasizing weldability, tensile fatigue and residual strengths, shear-carrying qualities and fuselage shell design

p0058 A72-13616

#### SHEAR STRESS

##### NT TORSIONAL STRESS

Helicopter rotor boundary layer, comparing analytical shear stress and velocity distributions obtained by momentum integral techniques with hot wire probe experimental data

[AIAA PAPER 72-38] p0130 A72-16900

Shear and direct stresses on fuselage model cross section due to concentrated radial loads on frame comparing measurement with prediction by matrix force analysis

p0144 A72-18322

Rotational, centrifugal and Coriolis force effects on turbulent boundary layer development, discussing changes in structure and shear stress distribution

p0238 A72-23870

Aircraft windscreen reliability, discussing delamination, interface shear stress effects and analogy to metal fatigue

p0306 A72-27011

Pressure, shear stress and yaw angle measurements in flow through aircraft intake S-shaped ducts with turbulent boundary layer at entry, noting vortex generation

p0410 A72-33403

Buckling due to transient compressive stresses in aircraft panel during deceleration

[ESDU-70002] p0647 N72-33882

#### SHEARING STRESS

##### U SHEAR STRESS

##### SHEET METAL

##### U METAL SHEETS

##### SHELL STABILITY

Strength of a cylindrical shell of variable thickness located in a temperature field

p0597 A72-43653

#### SHELL THEORY

Papers on aerospace structure by N. J. Hoff: covering aircraft framework, stress analysis, structural stability, shell theories, bending, buckling, monocoque and sandwich structures, etc

p0070 A72-15238

#### SHELLS (STRUCTURAL FORMS)

##### NT ANISOTROPIC SHELLS

##### NT CIRCULAR SHELLS

##### NT CYLINDRICAL SHELLS

##### NT ORTHOTROPIC SHELLS

##### NT RADOMES

##### NT THIN WALLED SHELLS

Finite element method for current shell analysis capability

[AD-735726] p0341 N72-21941

#### SHIELDING

##### NT HEAT SHIELDING

Transparent aircraft polycarbonate glazing systems shielding properties for projectile and bird impacts

p0306 A72-27015

#### SHIP PROPULSION

##### U MARINE PROPULSION

##### SHIPS

##### NT AIRCRAFT CARRIERS

##### NT SUBMARINES

Helicopter landing on ships, discussing wind, visibility limitations and flight deck motions vs aircraft stability and handling characteristics

p0309 A72-27413

A comparison of voice communication techniques for aeronautical and marine applications.

p0442 A72-34267

Helicopter/ship dynamic interface testing for launch and recovery capabilities under sea

environment conditions, discussing visual landing aids, wind, visibility and ship motions

[AHS PREPRINT 650] p0447 A72-34505

Mathematical analysis of relative motions between ACV landing craft and different amphibious assault ships during cargo transfer

[AD-741245] p0535 N72-29539

Compendium of US ground, water, and air transportation statistics

p0634 N72-32966

#### SHOCK

Conference on effects of shock and vibration on various structural systems

[AD-723341] p0172 N72-15812

#### SHOCK ABSORBERS

Higher order forces effect on shock absorbing systems of masses interconnected by elastic and damping members of aircraft landing gears

p0231 A72-22861

Conference on mechanical shock and vibration damping of aerospace structures

[AD-723344] p0216 N72-16861

Variable tuning vibration absorber for control of rotor induced structural vibrations in CH-47 helicopter

p0216 N72-16874

Vibration isolation and shock attenuation properties of polyurethane foam isolator for avionic components

p0217 N72-16881

#### SHOCK DIFFUSERS

##### U DIFFUSERS

##### U SHOCK WAVE ATTENUATION

##### SHOCK DISCONTINUITY

Unsteady supersonic flow disturbance by slender bodies in strong contact discontinuities in shock tube studies

p0071 A72-15507

Triangular and conical wings in hypersonic flow with Mach reflection of shock waves from leading edge with optimal L/D ratio

p0460 A72-36893

#### SHOCK FRONTS

Detection of atmospheric gravity waves produced by focusing of shock front generated by supersonic aircraft, calculating flight trajectories

p0054 A72-12984

Analytical method of characteristics to determine front shock and sonic boom due to flat delta wing with supersonic leading edges

[DFVLR-SONDDR-205] p0410 A72-33401

#### SHOCK LAYERS

Thin shock layer theory of lifting properties of reentry caret and flat delta wings and waveriders at high incidence angles and Mach number

p0018 A72-12345

Raindrop breakup in the shock layer of a high-speed vehicle.

p0616 A72-45780

#### SHOCK LOADS

##### NT BLAST LOADS

Ribbon parachutes drop tests at Mach 0.57-1.70, measuring opening shock loads and functioning time sequence

p0007 A72-10312

Aircraft structures shock and blast loading characteristics from internal detonation, comparing computer program results with available data

p0605 A72-44610

Feasibility of transonic wind tunnel testing of large cord swept wing panel model for simulating wing shock location at flight Reynolds number

[NASA-TN-X-67414] p0075 N72-11870

#### SHOCK RESISTANCE

##### NT IMPACT RESISTANCE

Characteristic overpressure concept for sonic bangs effect on structures and dynamic magnification factor engineering formula

p0140 A72-17858

#### SHOCK SENSITIVITY

##### U SHOCK RESISTANCE

##### SHOCK SIMULATORS

Design of aircraft crash simulator for testing dynamic responses of seats and passenger restraint systems

p0214 N72-16793

**SHOCK TESTS**

Development of impact shock test criteria and shock spectrum simulation test for ejection mechanism used with externally carried ordnance on aircraft.

p0216 A72-16834

**SHOCK TUBES**

**NT SHOCK TUNNELS**

Sonic boom simulation devices and techniques, including wind tunnels, ballistic ranges, spark discharges and shock tubes

p0198 A72-21906

Generating high Reynolds-number flows.

p0501 A72-38222

**SHOCK TUNNELS**

Hypersonic boundary layer separation of delta wing in shock tunnel using color and monochrome schlieren photography

[NPL-AERO-NOTE-1097] p0029 A72-10022

Comparison between conventional blowdown and Ludvig tube driven transonic wind tunnels for high Reynolds number range

p0077 A72-11881

Performance and operational characteristics of high Reynolds number blowdown and shock wind tunnels for transonic model testing

p0078 A72-11884

Shock tunnel measurements of aerodynamic forces on thin delta wings for performance prediction of hypersonic vehicle cruising flight

[ARC-CP-1148] p0080 A72-11905

**SHOCK WAVE ATTENUATION**

Sonic boom generation, propagation and minimization, discussing atmospheric conditions and ground characteristics influence and means for boom signature reduction

p0066 A72-14815

Sonic boom generation, propagation and minimization, discussing atmospheric turbulence and temperature gradients and aircraft configuration effects

[AIAA PAPER 72-194] p0128 A72-16849

Flow quality improvements in a blowdown wind tunnel using a multiple shock entrance diffuser.

[AIAA PAPER 72-1002] p0557 A72-41587

**SHOCK WAVE GENERATORS**

**NT SHOCK TUBES**

**NT SHOCK TUNNELS**

**SHOCK WAVE INTERACTION**

Book on ideal and real compressible fluid dynamics covering supersonic flow past airfoils and shock wave interaction with laminar boundary layer.

p0233 A72-23045

**SHOCK WAVE PROFILES**

Three dimensional shock wave configurations in front of cylindrical body on supersonic wing or of fluid jet injected into main supersonic flow, examining high pressure gradient regions

p0611 A72-45113

**SHOCK WAVE PROPAGATION**

Sonic boom generation, propagation and minimization, discussing atmospheric conditions and ground characteristics influence and means for boom signature reduction

p0066 A72-14815

Sonic boom generation, propagation and minimization, discussing atmospheric turbulence and temperature gradients and aircraft configuration effects

[AIAA PAPER 72-194] p0128 A72-16849

Ground focus line location of sonic bang propagating in stratified atmosphere with wind for transonically accelerating aircraft

p0184 A72-19645

Maneuvering aircraft sonic boom propagation and signatures prediction in stratified atmosphere by geometric acoustic method

p0197 A72-21904

Sonic booms generation and propagation, discussing effects on animate and inanimate objects

p0233 A72-23316

Shocked flow and pressure loss computation for axial flow compressor cascades, using time dependent finite difference technique

[ASME PAPER 72-GT-31] p0295 A72-25627

Acoustic shock wave diffraction at moving or static plate immersed in ideal gas

p0357 A72-30011

Theoretical and experimental studies of the focus of sonic booms.

p0457 A72-36506

Problem of uniform-jet flow around an airfoil

p0560 A72-42271

**SHOCK WAVES**

**NT OBLIQUE SHOCK WAVES**

**NT SONIC BOOMS**

Real gas effects in atmosphere to make sonic bang shock wave full dispersion and thickness wide variations

p0016 A72-11972

Supersonic and hypersonic flows with attached shock waves over delta wing at angle of attack, deriving unified theory for flow field

p0017 A72-12030

Sonic boom effects on structures, discussing ground motion, direct excitation by shock waves and damages

p0234 A72-23318

Pressure jumps lower bounds across supersonic transports induced shock waves in homogeneous atmosphere, using Whitham function in terms of Riemann integral

p0244 A72-24846

Mathematical model for gas turbine engine inlet noise caused by shock wave impingement, noting dynamic wave system with overpressure and distortion

p0355 A72-29576

Noise measurements during shock free and underexpanded operation modes of supersonic cold model jet at moderate exit Mach number

p0395 A72-32017

Experimental study of flows in supersonic compressors

[ICAS PAPER 72-11] p0552 A72-41136

Closed form solution for the sonic boom in a polytropic atmosphere.

p0556 A72-41258

Book - A theory of supercritical wing sections, with computer programs and examples.

p0557 A72-41534

Jet noise generation theory /Lighthill-Pfowcs Williams/ verification by model tests, discussing means of reducing or eliminating shock cells

[ICAS PAPER 72-55] p0559 A72-41852

Conical caret wings supersonic characteristics, examining flow transition from weak to strong attached shock waves

p0611 A72-45114

Analysis of interaction of oblique shock with bow shock of blunt leading edge and application to design of hypersonic ramjet inlets

[AD-726111] p0045 A72-11312

Development of theory for predicting sonic boom pressure signatures emitted by nonlifting rectangular wings

[NASA-TN-D-6619] p0087 A72-11949

Development of methods for determining inlet shock position from wall static profiles in mixed compression supersonic inlet

[NASA-TM-X-2397] p0096 A72-12780

Second order solution of three dimensional, supersonic flow over smooth body with shock producing protuberance

[AD-728501] p0100 A72-12985

Shock and vibration studies conferences

[AD-723345] p0173 A72-15833

Airfoil configurations to eliminate undesirable shock boundary layer interactions

[AD-731566] p0250 A72-17998

Calculation of shock wave reflection in supersonic inlets using method of characteristics including Mach disc problem

[ONERA-NT-183] p0266 A72-19005

Lifting airfoils with supercritical shock-free flow

[NLR-MP-70015-U] p0327 A72-20972

Prediction of shock wave impact on aircraft resulting from underground nuclear explosions

[SC-RR-71-0612] p0388 A72-23257

Performance tests of fan-stages operating with oblique weak shocks in rotor blade tip region and analysis of damage in leading edge tip region

[NASA-TM-X-68027] p0428 A72-24813

Analysis of effects of aircraft maneuvers on characteristics of sonic boom and application of analysis method to various aircraft - Vol. 1

- [AD-735296] p0432 N72-25011  
Effect of fin-opening shock environment on guided modular dispenser weapons
- p0474 N72-26876  
Analysis of flow distribution near wing body configuration and determination of interference effects on another aircraft by incident shock [AD-741917] p0571 N72-29998  
Time dependent method to calculate supercritical flow over nozzle airfoil [ONERA-NT-189] p0576 N72-30280  
Analysis of sonic boom signatures produced by SR-71 aircraft at various altitudes and airspeeds [NASA-TN-D-6823] p0585 N72-31021  
Characteristics of sonic booms and damage caused to buildings due to supersonic overflights [NTID300.12] p0633 N72-32913
- SHORAN**  
Shoran systems with onboard computers for aircraft position and trajectory parameters, noting coordinate plotting for flight path recovery maneuvers p0346 A72-28785
- SHORT HAUL AIRCRAFT**  
Future aircraft design trends for transcontinental and short haul operation, considering traffic forecasts, current transport aircraft and potential derivatives and technology [SAE PAPER 710749] p0003 A72-10248  
Short haul air transport system need for future short takeoff and landing aircraft, considering airports, airways, economics and navigation and landing aids p0015 A72-11719  
Short haul operating systems in air transportation environments, discussing terminal vs cruise configurations, costs and noise abatement p0056 A72-13422  
VFW-614 short range twin jet passenger transport aircraft, analyzing service performance and economic efficiency requirements influence on design characteristics p0059 A72-13643  
Short-short haul STOL network economics for commuter ports in Detroit region, estimating service demand, aircraft number and maintenance costs p0059 A72-13696  
Civil aviation R and D policy study, showing priorities for aircraft noise and congestion abatement and short haul systems p0115 A72-15780  
Airbus A-300 B design and characteristics for passenger transport on short and medium haul routes p0125 A72-16694  
Single satellite angle system and multiple satellite ranging and range difference systems in short haul air navigation, comparing with VORTAC p0138 A72-17335  
STOL transport passenger market demand model selection based on estimation of traffic patterns between two population centers and service frequency and fare considerations p0139 A72-17586  
Mercury short haul transport aircraft, emphasizing lightweight structural design with extensive use of integral machined components for fatigue safety p0187 A72-20310  
V/STOL development for short haul air transportation, discussing requirements for quiet pollution-free operation, ATC systems, navigation and landing aids p0190 A72-21010  
Turbofan engine trends for short haul conventional and STOL aircraft, considering variable pitch fans, reduction gears, thrust reversal and noise and environmental pollution [ASME PAPER 72-GT-86] p0298 A72-25661  
Future short haul aircraft transportation systems, discussing aircraft forms, noise reduction technology and runway requirements p0311 A72-27660  
V/STOL aircraft potential for short haul civil air traffic, discussing present technology and investment costs in comparison with advanced ground transportation systems p0357 A72-30076
- Quiet RTOL /reduced takeoff and landing/ short haul aircraft cost comparison with Trident 3 aircraft up to design range stage length p0394 A72-31320  
Short haul airlines on-time operation, discussing ATC, weather, cargo and aircraft ground handling, cabin and flight services and aircraft reliability effects p0401 A72-32452  
Ultrashort haul common carrier air transportation system based on VTOL aircraft for suburban-to-city center trips, comparing with land based transport p0405 A72-33113  
Short haul air transportation system economic and political problems, noting community acceptance and passenger service standards p0408 A72-33310  
NASA R and D for STOL short haul transportation systems, discussing propulsive lift, blown flap and augmentor wing concepts, noise reduction, etc p0441 A72-34238  
All weather landing for a STOL system. [AIAA PAPER 72-788] p0495 A72-38105  
The DHC-7, first generation transport category STOL - Particular design challenges. [AIAA PAPER 72-809] p0497 A72-38115  
STOL-based short haul transportation feasibility for airport congestion alleviation from airline viewpoint, discussing system requirements, economic factors and safety [AIAA PAPER 72-807] p0497 A72-38120  
Safety in commuter airline operation. p0508 A72-39748  
Landing 'in the backyard' with quiet aircraft p0548 A72-40376  
Short haul intercity air transportation systems requirements for successful competition with lower cost ground modes [ICAS PAPER 72-16] p0553 A72-41141  
Prototype interurban IPR STOL transportation system demonstration project, considering area navigation, scanning beam microwave landing systems and STOLport planning. [ICAS PAPER 72-41] p0555 A72-41166  
German monograph - Model-analytical investigation of short-haul air traffic with VTOL aircraft in the Federal Republic of Germany. p0569 A72-43068  
An assessment of repeated loads on general aviation and transport aircraft. p0609 A72-44736  
Development of commercial transportation facilities using STOL and VTOL aircraft for short-haul operations p0174 N72-15925  
Analysis of short haul aircraft transportation system for San Francisco Bay area, California [NASA-CR-2006] p0268 N72-19021  
Rational evolutionary plan for developing future national short haul air transportation system [NASA-CR-126135] p0367 N72-22015  
Development of short haul air transportation systems based on short takeoff aircraft, port siting, route analysis, and airline service requirements [AD-742463] p0574 N72-30018  
Analysis of airlines operations for several small operators to determine reasons for economic problems and alternatives for profitable services - Part 1 p0584 N72-31016  
Analysis of short haul airlines operation to show history, operational problems, and economic aspects - Part 2 p0584 N72-31017  
Aircraft accident involving Beechcraft D185 aircraft air taxi near Honolulu, Hawaii on 22 Feb. 1972. [NTSB-AAR-72-23] p0585 N72-31019  
Development of performance criteria and operational margins for landing phase of commercial/short takeoff and landing aircraft [NASA-CR-114454] p0585 N72-31020  
Analysis of existing heliports and heliport requirements to support short haul and commuter requirements [PB-208395] p0586 N72-31032

# SUBJECT INDEX

# SHORT TAKEOFF AIRCRAFT

- Analysis of operational factors affecting implementation of short haul air transportation system using short takeoff and landing aircraft [AD-745283] p0641 N72-33040
- SHORT RANGE NAVIGATION
- U SHORAN
- SHORT TAKEOFF AIRCRAFT
- NT QUESTOL
- STOL transport aircraft technology assessment, analyzing airports growth problems [SAE PAPER 710751] p0004 A72-10250
- Augmentor wing jet STOL research aircraft development progress report covering design, engine tests, performance prediction, control simulation and stability augmentation [SAE PAPER 710757] p0004 A72-10254
- Industry assisted state of art assessment of high lift turbofan configurations for USAF STOL tactical transport technology program [SAE PAPER 710758] p0004 A72-10255
- Mach 0.80 quiet intercity STOL transport design comparison for turbofan, prop-fan and turboprop systems [SAE PAPER 710759] p0004 A72-10256
- STOL aircraft for solving noise reduction and land use problems in future transportation systems, discussing airport location and layout for growing air traffic p0013 A72-11153
- STOL and VTOL aircraft performance and efficiency, discussing landing and takeoff distances reduction p0014 A72-11258
- Handling qualities simulation program for augmentor wing jet STOL research aircraft considering control devices design p0015 A72-11654
- STOL aircraft roll moment control possibility for externally-blown jet flap due to engine failure p0015 A72-11700
- Short haul air transport system need for future short takeoff and landing aircraft, considering airports, airways, economics and navigation and landing aids p0015 A72-11719
- Q/STOL jet aircraft engines design for low noise levels, describing takeoff thrust, bypass ratio and turbine stages p0020 A72-12501
- Externally blown flaps for STOL characteristics in medium and heavy jet transport aircraft, demonstrating aerodynamic and flight mechanical feasibility p0020 A72-12502
- Aladin 2 noiseless STOL jet aircraft project, describing exhaust nozzle configuration, design and economics p0021 A72-12503
- STOL aircraft integrated landing approach flight control system with elevator and thrust control coupling to angle of attack, altitude and other state variables [DGLR PAPER 71-063] p0022 A72-12705
- Short-short haul STOL network economics for commuter ports in Detroit region, estimating service demand, aircraft number and maintenance costs p0059 A72-13696
- Prop-fan engine for quiet STOL propulsion, discussing noise characteristics, weight advantage, response and reduced fuel consumption p0059 A72-13697
- Canadian STOL design, development, production, airports and civil air transportation applications p0115 A72-15775
- Feedback gains for STOL aircraft display pilot interactive flight director design, using computerized approach-touchdown simulation and optimal control theory [ASME PAPER 71-WA/AUT-9] p0117 A72-15956
- Automated scheduling algorithm for aircraft from terminal area to touchdown, discussing system features and STOL air traffic computerized simulation [AIAA PAPER 72-120] p0131 A72-16905
- Low wing loading STOL transport with ride smoothing automatic control system, noting thrust-weight ratio [AIAA PAPER 72-64] p0133 A72-16942
- Aerodynamic characteristics of STOL aircraft with externally blown jet augmented flaps, predicting interference between lifting surfaces and turbofan engines [AIAA PAPER 72-63] p0133 A72-16953
- STOL transport passenger market demand model selection based on estimation of traffic patterns between two population centers and service frequency and fare considerations p0139 A72-17586
- Tail first /canard/ and tandem wing configurations for natural STOL, discussing low cost aerial work aircraft p0143 A72-18285
- Crashproof rotorcraft STOL aircraft for rescue operation, discussing orthodox rigid and special rotary wings design, air tunnel experiment and flight tests p0147 A72-18582
- Externally blown flap noise tests at various nozzle exhaust velocities for STOL aircraft noise reduction [AIAA PAPER 72-129] p0180 A72-18962
- Jet-STOL augmentor wing consisting of moderately thick airfoil with full span leading edge slat and double surface trailing edge flap p0197 A72-21899
- Future civil air transport trends, considering passenger and cargo growth, travel frequency per capita income and STOL market p0199 A72-22150
- Variable pitch fans for STOL aircraft thrust/shaft engine, noting short field capability and quietness p0234 A72-23447
- STOL and V/STOL transport aircraft design requirements consideration based on common propulsion and lift engine types use, noting fan lift solution superiority p0244 A72-24865
- STOL aircraft systems development coordination, considering vehicle design, airport facilities and related ground environment, transportation modes interface and airspace management p0285 A72-25255
- Variable pitch ultrahigh bypass ratio ducted fan engine design for STOL transport aircraft [ASME PAPER 72-GT-61] p0297 A72-25652
- Turbofan engine trends for short haul conventional and STOL aircraft, considering variable pitch fans, reduction gears, thrust reversal and noise and environmental pollution [ASME PAPER 72-GT-86] p0298 A72-25661
- STOL aircraft role in civil aviation, discussing short range operation, ATC, reduced noise and weather capability p0310 A72-27518
- STOL, VTOL and V/STOL air transportation systems development, characteristics and requirements, presenting economic forecast p0311 A72-27661
- Acoustic measurements for STOL turboprop transport aircraft propeller configurations under static, taxi and flyover conditions, discussing quiet propeller noise signature p0355 A72-29571
- Quiet RTOL /reduced takeoff and landing/ short haul aircraft cost comparison with Trident 3 aircraft up to design range stage length p0394 A72-31320
- Buoyancy systems and parawings application in short haul passenger transportation, discussing VTOL and STOL operations p0406 A72-33183
- STOL aircraft for civil transport applications, considering optimum design concepts, noise reduction and terminal facility requirements p0409 A72-33331
- STOL aircraft minimum noise takeoff trajectories determination, taking into account engine thrust and listeners distance from noise source [AIAA PAPER 72-665] p0414 A72-34072
- NASA R and D for STOL short haul transportation systems, discussing propulsive lift, blown flap and augmentor wing concepts, noise reduction, etc p0441 A72-34238
- STOL airports planning objectives, discussing ground and airspace congestion relief, terminal locations, flight safety and community acceptance

p0441 A72-34239  
The flight mechanics of STOL aircraft.  
p0442 A72-34241  
An experimental investigation of STOL longitudinal flying qualities in the landing approach using the variable stability X-22A aircraft.  
[AHS PREPRINT 642]. p0447 A72-34502  
NASA R and D programs for quiet STOL aircraft and engines development  
p0457 A72-36503  
Development of the Saab-Scania Viggen.  
p0492 A72-37749  
All weather landing for a STOL system.  
[AIAA PAPER 72-788] p0495 A72-38105  
STOL ride quality criteria - Passenger acceptance.  
[AIAA PAPER 72-790] p0496 A72-38107  
Noise generated by STOL core-jet thrust reversers.  
[AIAA PAPER 72-791] p0496 A72-38108  
Forward flight effects on mixer nozzle design and noise considerations for STOL externally blown flap systems.  
[AIAA PAPER 72-792] p0496 A72-38109  
Investigation of the commonality in development of military and commercial STOL transports.  
[AIAA PAPER 72-808] p0497 A72-38114  
The DHC-7, first generation transport category STOL - Particular design challenges.  
[AIAA PAPER 72-809] p0497 A72-38115  
STOL-based short haul transportation feasibility for airport congestion alleviation from airline viewpoint, discussing system requirements, economic factors and safety  
[AIAA PAPER 72-807] p0497 A72-38120  
Use of the flight simulator in the design of a STOL research aircraft.  
[AIAA PAPER 72-762] p0499 A72-38129  
Methodology for estimating STOL aircraft high lift systems characteristics.  
[AIAA PAPER 72-779] p0500 A72-38138  
STOL transport stability and control derivative prediction methods and accuracy requirements.  
[AIAA PAPER 72-780] p0500 A72-38139  
A method for increasing thrust reverser utilization on STOL aircraft.  
[AIAA PAPER 72-782] p0500 A72-38141  
4-D guidance system design with application to STOL air traffic control.  
p0501 A72-38252  
Test of direct lift control in the case of the experimental aircraft DFVLR-BFB 320  
p0509 A72-39934  
STOL performance criteria for military transport aircraft.  
[AIAA PAPER 72-806] p0510 A72-40055  
Design, operation and testing of integrated STOL flight control system, noting approach accuracy and passenger comfort improvement  
p0547 A72-40292  
Landing 'in the backyard' with quiet aircraft  
p0548 A72-40376  
Augmentor wing design for Buffalo STOL aircraft, discussing operational principle and wind tunnel test results  
p0550 A72-40684  
Prototype interurban IFR STOL transportation system demonstration project, considering area navigation, scanning beam microwave landing systems and STOLport planning  
[ICAS PAPER 72-41] p0555 A72-41166  
Noise control technology for jet-powered STOL vehicles.  
[ICAS PAPER 72-50] p0556 A72-41175  
Characteristics of an ejector-type engine simulator for STOL model testing.  
[AIAA PAPER 72-1028] p0558 A72-41607  
An investigation of parameters and factors governing manual control of STOL aircraft in landing approach.  
[AIAA PAPER 72-987] p0615 A72-45415  
Turbofans under wings to provide lift and thrust for STOL aircraft  
[NASA-CASE-LEW-11224-1] p0030 N72-10033  
Cost analysis and operational procedures of effective short range, high density computer transportation system for Metropolitan Detroit  
[NASA-CR-114340] p0036 N72-10984  
Flight simulator used to determine lateral and directional aerodynamic characteristics of STOL transport aircraft

[FAA-RD-71-81] p0041 N72-11037  
Ground noise measurements during landing, takeoff, and flyby operations of four-engine turboprop STOL aircraft  
[NASA-TN-D-6486] p0086 N72-11948  
Advanced technology applications for improving STOL transport aircraft aerodynamics, propulsion, structure, and flight dynamics  
p0105 N72-13016  
Analysis of noise abatement in military and commercial STOL transport aircraft  
[AD-729184] p0108 N72-13040  
Development and characteristics of microwave scanning beam instrument landing system for short takeoff and landing aircraft and airports  
[AD-725705] p0111 N72-13595  
Jet peak axial-velocity decay data for circular and noncircular single-element and double-element nozzles for STOL aircraft with externally blown flaps  
[NASA-TN-X-67979] p0158 N72-14302  
Update of STOL bibliography, including design, operation, guidance, air traffic control, and STOLports  
[UTIAS-176] p0165 N72-15002  
Variable deflection rocket engines for short takeoff aircraft flight control system  
[AD-730571] p0168 N72-15019  
Design and characteristics of lift fan engine system for application to V/STOL aircraft  
[NASA-CR-120838] p0172 N72-15716  
Human comfort measured from vibration ride environments of STOL aircraft and high speed train  
[NASA-TN-X-67586] p0174 N72-15841  
Measurement of externally blown flap noise for determining noise criteria of STOL aircraft  
[NASA-TN-X-67991] p0203 N72-15959  
Containment systems for aircraft landing on elevated STOLports  
[NASA-CR-125544] p0203 N72-15960  
Augmentor flap, wing ducting and augmentor nozzle, and noise reduction for jet-STOL aircraft  
[NASA-CR-125540] p0210 N72-16698  
Noise suppression capability of mixer nozzle used with externally blown flap augmentation system on STOL aircraft  
[NASA-TN-X-68021] p0252 N72-18014  
Computer simulation to determine capacity of air terminal for short takeoff and landing intra-urban air rapid transit system  
[AD-733185] p0262 N72-18660  
Evaluation of takeoff and landing performance of commercial STOL airplanes  
[NASA-TT-F-14166] p0269 N72-19023  
Noise data obtained with small scale model of externally blown flap of type being considered for STOL aircraft  
[NASA-TN-D-6636] p0269 N72-19025  
Linearized mathematical models with stability derivatives and equations of motion for two representative STOL aircraft  
[AD-733756] p0270 N72-19036  
Noise measurements of jet augmented lift systems for use on proposed STOL aircraft  
[NASA-TN-D-6710] p0319 N72-20011  
Aerodynamic characteristics of experimental aircraft PA-200XS  
[RAE-LIB-TRANS-1606] p0319 N72-20013  
Development of simulation models of two representative STOL aircraft using nonlinear equations to show gross changes in aircraft attitude, flight path, and power setting  
[DOT-TSC-FAA-71-14] p0320 N72-20018  
Steep approach control system for STOL aircraft based on rudder and thrust control  
p0321 N72-20027  
Survey of potential operational requirements for short takeoff aircraft in terminal area  
[DOT-TSC-FAA-71-9] p0323 N72-20255  
Path changing methods for large-scale commercial STOL aircraft to fly complex flight paths to maintain a time of arrival envelope  
[DOT-TSC-FAA-72-5] p0325 N72-20579  
Evaluation of instrument landing system for use with short takeoff and landing aircraft  
[FAA-RD-72-15] p0326 N72-20587  
Numerical analysis of aircraft noise created by externally blown flaps on STOL aircraft and methods for noise reduction

SHORT WAVE RADIATION  
NT MICROWAVES  
NT MILLIMETER WAVES  
NT SUBMILLIMETER WAVES  
SHOT PEENING  
Constraining U-shaped frames for blade edges protection during hydrojet shot blasting of compressor blades for gas turbine engines
- p0304 A72-26819  
Helicopter rotor blade spars shot peening in centrifugal vibrator, optimizing Cr-Mo-Ni steel surfaces work hardening
- p0304 A72-26820  
Shot peen contouring of Boeing 747 wing skins combined with incremental chip forming, noting principles and manufacturing process
- [ASM PAPER W 72-31,4] p0314 A72-28160  
Vibrational shot peening as a method of increasing the fatigue strength of critical aircraft elements
- p0508 A72-39802  
SHROUDED BODIES  
U SHROUDS  
SHROUDED PROPELLERS  
Surface vorticity theory for axisymmetric potential flow past annular aerofoils and bodies of revolution with application to ducted propellers and cowls.
- p0503 A72-38554  
SHROUDED TURBINES  
Design of duct turbine as drive system for 20 in. turbofan engine simulators
- [NASA-TM-X-68081] p0428 N72-24829

## SHROUDS

## SUBJECT INDEX

## SHROUDS

Jet turbine engine front fans with and without snubbers, estimating flow field by streamline curvature technique  
[ASME PAPER 72-GT-4] p0293 A72-25607

Small radial inflow turbines for space applications, considering blade-shroud clearance, blade loading and exit diffuser design  
[ASME PAPER 72-GT-42] p0295 A72-25636

Hub and shroud boundary layer growth in centrifugal compressor vaneless diffusers, comparing predicted and measured performance at high pressure ratio per stage  
[ASME PAPER 72-GT-54] p0296 A72-25645

## SHORTS

## U BYPASSES

## SHUTTLE ORBITERS

## U SPACE SHUTTLE ORBITERS

## SICKNESSES

## NT DECOMPRESSION SICKNESS

## SIDE-LOOKING RADAR

## NT RADAR IMAGERY

Side-looking radar for multispectral terrain imaging  
p0534 N72-29335

## SIDESLIP

Aircraft steering dynamics model with translational and rotational equations, considering zero sideslip and acceleration and lift bank angle transfer functions  
p0118 A72-16112

Flight initial spin testing, discussing aircraft autorotation due to stalled angle of attack and sideslip  
p0146 A72-18492

Airplane sideslip and yaw rate perturbations by continuous random vertical and side gusts, using low pass filtered white noise representation for mathematical modeling  
p0313 A72-28125

Special control of spiral flight curves with the neutral and maneuver points as ultimate positions of the indifference points  
p0461 A72-36942

A study of dedicated control surfaces for direct sideforce control.  
p0613 A72-45344

Equations for angles of attack and sideslip relative to rolling and nonrolling axis system  
[NASA-TM-X-2514] p0280 N72-19721

Effect of fin and rudder on rolling moments due to sideslip and yawing  
[ESDU-70006] p0617 N72-31992

## SIGHT

## U VISUAL PERCEPTION

## SIGNAL DETECTION

## NT CORRELATION DETECTION

ASW aircraft magnetic anomaly detection /MAD/ system range limitation due to residual maneuver noise, discussing real time compensation for geomagnetic gradient interference  
p0560 A72-42322

## SIGNAL DETECTORS

Stall warning system for general aviation aircraft, using signal discriminator for rough or gusting air  
[SAE PAPER 720331] p0291 A72-25592

## SIGNAL DISCRIMINATORS

## U SIGNAL DETECTORS

## SIGNAL GENERATORS

Instrument landing system simulator including special signal generator for environment simulation  
[RAE-TR-71145] p0436 N72-25607

## SIGNAL MEASUREMENT

Measuring technique importance for aircraft R and D, emphasizing quartz tensometer, digital control and signal processing  
p0359 A72-30286

## SIGNAL NOISE

## U SIGNAL TO NOISE RATIOS

## SIGNAL PROCESSING

Pulse coded processing system EMC performance measurement, considering CW and pulsed interference effects and application to ATC radar beacon system transponders  
p0061 A72-14033

ATC radar performance monitoring, considering advances in radar signal processing and digital display techniques

p0193 A72-21525

PAA airborne OMEGA development program covering signal monitoring, airborne data collection and system operational evaluation

p0352 A72-29195

Measuring technique importance for aircraft R and D, emphasizing quartz tensometer, digital control and signal processing

p0359 A72-30286

Avionics equipment for signal processing onboard civil aircraft to improve flight safety, discussing uses of OMEGA navigation system and digital computers

p0393 A72-31178

Surveillance radar for clutter rejection and signal loss reduction at airports, discussing system design features

p0461 A72-37046

ATC services configuration with secondary surveillance radar and primary radar data acquisition system, discussing signal processing by automated decoder

p0547 A72-40288

Signal data converter for multirunway visibility measuring system, using ground illuminance sensors  
[DOT-TSC-PAA-72-1] p0323 N72-20254

## SIGNAL RECEPTION

Received signal spectrum gravity center and effective antenna centers of airborne Doppler velocimeter in horizontal flight

p0303 A72-26730

## SIGNAL REFLECTION

Dual antenna method for suppressing reflections from underside of moving aircraft  
[JPRS-55908] p0386 N72-23126

## SIGNAL TO NOISE RATIOS

Preproduction OMEGA aircraft receivers and antennas development and flight testing, noting signal loss problems in high noise or precipitation static environments

p0353 A72-29198

ASW aircraft magnetic anomaly detection /MAD/ system range limitation due to residual maneuver noise, discussing real time compensation for geomagnetic gradient interference

p0560 A72-42322

## SIGNAL TRANSMISSION

## NT DATA TRANSMISSION

## NT IONOSPHERIC PROPAGATION

## NT MICROWAVE TRANSMISSION

## NT MULTIPATH TRANSMISSION

## NT RADIO TELEMETRY

## NT RADIO TRANSMISSION

## NT SATELLITE TRANSMISSION

## NT SINGLE SIDEBAND TRANSMISSION

## NT TELEMETRY

## NT TELEVISION TRANSMISSION

## SIGNATURE ANALYSIS

Sonic boom pressure signatures during F-104 overflights at Mach 1.3 and 30,000 ft, explaining variations by atmospheric turbulence  
p0013 A72-11158

Sonic boom signature by bicharacteristic method, correcting zeroth order /free stream/ characteristics to obtain solution to compressible fluid exact equations of motion  
[AIAA PAPER 72-195] p0131 A72-16907

SST operational maneuver effects on sonic boom, discussing steady flight and acceleration-to-cruise pressure signatures  
[AIAA PAPER 72-196] p0134 A72-16981

Maneuvering aircraft sonic boom propagation and signatures prediction in stratified atmosphere by geometric acoustic method

p0197 A72-21904

Modifying supersonic aircraft sonic boom signatures by means of altering flow fields  
[TR-760] p0102 N72-12993

## SIGNS AND SYMPTOMS

## NT VERTIGO

## SILENCERS

French jet aircraft noise reduction research facilities, discussing in-flight and overfly noise measurements, various silencer configurations, and Concorde engine tests

p0059 A72-13680

Annual report of Institute of Sound and Vibration Research including aircraft, engine, and turbomachinery noise, silencers, and human

- responses to noise p0112 N72-13614
- SILICON CARBIDES**  
Recrystallized silicon carbide and reaction bonded silicon nitride as construction materials for gas turbine engine components, describing thermal and mechanical properties [ASME PAPER 72-GT-20] p0294 A72-25619  
Silicon carbide rotating rectifier alternator with solid lubricated bearings for high altitude environments, noting applicability to supersonic aircraft p0453 A72-35565  
Fabrication and microstructure of high temperature silicon composites for turbine blades [NASA-CR-120966] p0590 N72-31780

NT SLENDER CONES

Multivortex model of vortex sheet development on slender axisymmetric bodies at angle of attack p0053 A72-12919

Unsteady supersonic flow disturbance by slender bodies in strong contact discontinuities in shock tube studies p0071 A72-15507

Slender body theory for flow calculation past low aspect ratio delta wing with straight trailing edge, noting lifting vortices distribution p0247 A72-25131

Three dimensional boundary layer separation on slender bodies, delta wings and propulsion intake systems, reviewing computing techniques for interfering inviscid flow fields p0404 A72-32826

Sonic boom induced flow field at supersonic/hypersonic speeds, using shock expansion method and hypersonic equivalence principle for sharp and blunt nosed bodies [AIAA PAPER 72-652] p0415 A72-34082

Uniformly exact solution of the problem of the flow past a slender profile p0509 A72-39904

Woodward panel method used to calculate loads on slender bodies with small aspect ratio wings for supersonic flow [PFA-AU-635-PT-1] p0317 N72-19995

Unsteady pressure distribution on harmonically oscillating slender wing fuselage configurations [AVA-FB-7126] p0317 N72-19997

**SLENDER CONES**

Magnetic balance measurements of aerodynamic forces on spheres and slender cones in hypersonic low density wind tunnels, noting sting effect p0243 A72-24771

Effect of wind tunnel disturbances on boundary layer transition process at hypersonic speed and development of low noise level wind tunnel [NASA-TN-X-2566] p0469 N72-26239

**SLENDER WINGS**

NT INFINITE SPAN WINGS

Finite element discrete model for large aspect ratio wing transverse vibrations, using inhomogeneous elements with various stiffness-length relations p0054 A72-13189

Nonlinear unsteady potential flow of incompressible fluid past slender wing, using linearized vortex distribution method p0119 A72-16214

Viscous incompressible flow past longitudinally cambered small aspect ratio slender wing near solid interface p0119 A72-16215

EP-115 slender wing research aircraft linear motion and undamped Dutch roll oscillations at high angles of attack [AIAA PAPER 72-62] p0132 A72-16932

Nonuniform propeller streams effects on aerodynamic characteristics of high aspect ratio wing, using airfoil theory [AD-745477] p0182 A72-19092

Static aerodynamic characteristics of bulbous based cone models and slender wings at subsonic speed, using magnetic suspension and balance system p0243 A72-24769

Inviscid incompressible flow past longitudinally curved small aspect ratio slender wing, investigating aerodynamic characteristics p0345 A72-28729

Aerodynamic center and center of pressure of slender small aspect ratio wing near solid or free surface, determining angle of attack effect p0351 A72-29131

Vortex sheet simulation method for slender wing-canard surface nonlinear interaction investigation p0413 A72-33695

Calculation of an unsteady separation flow past a slender profile p0460 A72-36900

Experimental investigations of separated flows on wing-body combinations with very slender wings at free-stream Mach numbers from 0.5 to 2.2 [ICAS PAPER 72-25] p0554 A72-41150

Wind tunnel measurements of Reynolds number effect on force and pressure coefficients for slender delta wing at transonic speed p0074 N72-11863

Correlation of transonic wind tunnel test data with flight test results on slender wing airplanes for double delta configuration development p0075 N72-11868

Aerodynamic forces and pressure distribution measured on isolated slender wings and slender wing-body combinations at supersonic speeds for use in missile configuration development [ARC-CP-1131] p0080 N72-11906

Ground effect on slender wing rolling moment during landing approach and its consequence on aircraft lateral control [ARC-CP-1152] p0088 N72-11961

Aerodynamics and flight stability of oblique wing-body combinations and application to supersonic transport aircraft p0105 N72-13018

Free flight stability testing at transonic speeds of Orion slender wing models with zero lift using terminal velocity technique [ARC-CP-1174] p0202 N72-15951

Low speed flight simulation of slender wing BAC 221 research aircraft and comparison with flight tests [RAE-TR-69257] p0204 N72-15971

Slender wings in roll noting dependence of rolling moment and roll damping on angular velocity and

# SOUND GENERATORS

Sonic boom research facilities and techniques, emphasizing applicability to other environmental problems p0233 A72-23317

Sonic boom effects on structures, discussing ground motion, direct excitation by shock waves and damages p0234 A72-23318

Field and laboratory sonic boom simulators, noting required characteristics p0234 A72-23323

Supersonic jet noise and sonic boom sources, Propagation and reduction, considering airport community disturbances, aircraft cabin noise and fatigue problems p0355 A72-29578

Maximum overpressures of supersonic aircraft maneuvering-produced sonic booms occurring at geometrical acoustic ray focus points/caustic cusps/ p0355 A72-29586

Far field sonic boom approach effects, describing Whitham theory extension for ultimate N wave deviations for body configurations with continuous or discontinuous tangent p0405 A72-33010

Analytical method of characteristics to determine front shock and sonic boom due to flat delta wing with supersonic leading edges [DFVLR-SONDDR-205] p0410 A72-33401

Sonic boom induced pressure wave propagation and attenuation in water, comparing ballistic range measurements with theoretical predictions [AIAA PAPER 72-654] p0415 A72-34080

Sonic boom alleviation by flow field alteration near supersonic aircraft, considering finite rise times, reduced overpressures and shock pressure rises [AIAA PAPER 72-653] p0415 A72-34081

Sonic boom induced flow field at supersonic/hypersonic speeds, using shock expansion method and hypersonic equivalence principle for sharp and blunt nosed bodies [AIAA PAPER 72-652] p0415 A72-34082

An estimate of sonic boom damage to large windows. p0441 A72-34234

Sonic boom duration effects on thin circular elastic plate transient axisymmetric vibration via Hankel and Laplace transforms p0457 A72-36409

Sonic jet noise pressure source model for radiated sound power and jet pressure frequency spectra ratio derivation with application to noise suppression p0457 A72-36414

Theoretical and experimental studies of the focus of sonic booms. p0457 A72-36506

Supersonic aircraft wing form influence on sonic boom, discussing supersonic wind tunnel tests for noise reduction p0509 A72-39931

Canadian sonic boom simulation facilities. [ICAS PAPER 72-26] p0554 A72-41151

Closed form solution for the sonic boom in a polytropic atmosphere. p0556 A72-41258

Supersonic aircraft focused sonic boom suppression by slowing down during turning flight, obtaining conditions for focus cut-off at ground by atmospheric refraction p0599 A72-44125

Sonic boom waveforms measured during exercise summer sky in southern Great Britain [ARC-R/M-3659] p0038 N72-11015

Development of theory for predicting sonic boom pressure signatures emitted by nonlifting rectangular wings [NASA-TN-D-6619] p0087 N72-11949

Modifying supersonic aircraft sonic boom signatures by means of altering flow fields [TR-760] p0102 N72-12993

Construction of sonic boom simulator using detonable gas mixture in slender, shaped Mylar balloons [NASA-CR-1844] p0150 N72-13991

Tropospheric and ground layer turbulence contribution to sonic boom magnification noting Oklahoma test

[FFA-121] p0321 N72-20023

Computer program for calculating sonic boom propagation during supersonic transport flight maneuvers [AD-735297] p0380 N72-22997

Numerical analysis of effect of atmospheric inhomogeneities on sonic boom and other weak waves p0380 N72-23004

Analysis of effects of aircraft maneuvers on characteristics of sonic boom and application of analysis method to various aircraft - Vol. 1 [AD-735296] p0432 N72-25011

Extrapolation of sonic boom pressure signatures by waveform parameter method and comparison with F-function method [NASA-TN-D-6832] p0463 N72-26004

Compilation of technical reports on theoretical aerodynamics, aircraft performance, sonic booms, aircraft stability, and turbulent boundary layers - Vol. 2 [SBN-11-470152-0] p0475 N72-26994

Simulation of vibrational and acoustical properties of sonic boom [NASA-CR-112117] p0532 N72-29207

Design and evaluation of aircraft configuration for reduction of sonic boom pressures by alteration of shock wave strengths [NASA-CR-2070] p0572 N72-30007

Effects of aircraft flight altitude and Mach number, wind and temperature gradients, and wind direction on width of sonic boom corridor [AD-740897] p0575 N72-30027

Analysis of sonic boom signatures produced by SR-71 aircraft at various altitudes and airspeeds [NASA-TN-D-6823] p0585 N72-31021

Characteristics of sonic booms and damage caused to buildings due to supersonic overflights [NTID300-12] p0633 N72-32913

**SONIC FLOW**

U TRANSONIC FLOW

**SONIC NOZZLES**

Velocity distribution measurement of subsonic axisymmetric inlet for compressor matching p0213 N72-16714

**SOOT**

Soot oxidation rate from diffusion flame measurements extrapolated for gas turbine combustion chambers p0119 A72-16368

Extrapolation of soot oxidation rates in laboratory flames to operating conditions of gas turbine combustion chambers [NASA-CR-125404] p0171 N72-15712

**SOUND**

U ACOUSTICS

**SOUND ABSORPTION**

# SPACECRAFT INSTRUMENTS

# SUBJECT INDEX

Fault isolation capabilities for general purpose digital computer used in guidance and control applications p0336 N72-21220

Attitude control and guidance mechanism for spacecraft and aircraft [NASA-CR-127268] p0485 N72-27679

**SPACECRAFT INSTRUMENTS**

**NT SATELLITE INSTRUMENTS**

**SPACECRAFT LANDING**

Navigation performance of high cross-range space shuttle orbiter during approach and landing using optimally augmented inertial navigation system [NASA-TM-X-62123] p0472 N72-26516

**SPACECRAFT LAUNCHING**

Booster launch vehicle guidance scheme for critical aborts from staging through burnout, minimizing aerodynamic phases for different landing sites p0397 A72-32182

**SPACECRAFT PRELAUNCH TESTS**

**U SPACE VEHICLE CHECKOUT PROGRAM**

**SPACECRAFT PROPULSION**

Metallurgical problems of metals used in spacecraft structures and propulsion systems [CRANFIELD-MAT-6] p0260 N72-18545

**SPACECRAFT RECOVERY**

Rotor and propeller wake calculation, recovery rotors, and rotor feedback control - conference [DLR-MITT-71-12] p0037 N72-11001

**SPACECRAFT REENTRY**

Ablation phase duration during spacecraft decelerated hypersonic reentry flight, using theoretical model based on quasi-steady assumptions p0300 A72-25815

**SPACECRAFT STRUCTURES**

Adhesive bonded components in aircraft and aerospace structures, discussing manufacturing, metal surface preparation, inspection and environmental exposure [SAE PAPER 720118] p0136 A72-17325

Combined spot weld-adhesive bonding to join sheet metal parts with applications to propellant tanks and spacecraft and aircraft structures [SME PAPER AD-72-710] p0458 A72-36526

Development and application of nonflammable and fire retardant materials for use with spacecraft and aircraft interiors p0208 N72-16419

Conference on shock and vibration effects on dynamic response of helicopter, aircraft, and spacecraft structures [AD-723349] p0215 N72-16802

Metallurgical problems of metals used in spacecraft structures and propulsion systems [CRANFIELD-MAT-6] p0260 N72-18545

**SPACECRAFT TELEVISION**

**NT SATELLITE TELEVISION**

**SPACING**

**NT AIRCRAFT APPROACH SPACING**

**SPARE PARTS**

Electronic data processing in airline materiel supplies operations, discussing procedural efficiency improvement through reduction of stochastic effects inherent in aircraft maintenance operations p0362 A72-30823

**SPARK DISCHARGES**

**U ELECTRIC SPARKS**

**SPARKS**

**NT ELECTRIC SPARKS**

**SPATIAL DISTRIBUTION**

High level Canberra flight for three dimensional picture of wind and temperature fields, showing CAT, gravity waves and smooth flight characteristics p0311 A72-27709

Estimated peak regional concentration of SST exhaust in stratosphere from expected flight operation levels p0346 A72-28837

**SPATIAL ISOTROPY**

**U SPATIAL DISTRIBUTION**

**SPATIAL ORIENTATION**

**U ATTITUDE (INCLINATION)**

**SPECIFICATIONS**

**NT AIRCRAFT SPECIFICATIONS**

**NT EQUIPMENT SPECIFICATIONS**

Proposed gas turbine procurement standards for gaseous and liquid fuel specifications emphasizing fuel contaminants [ASME PAPER 71-WA/GT-3] p0116 A72-15896

Conference papers on shock and vibration including specifications, mechanical impedance, and transportation and packaging [AD-739574] p0474 N72-26815

Survey of specifications and standards containing vibration test procedures in use by US Air Force p0474 N72-26817

**SPECTRA**

**NT EMISSION SPECTRA**

**NT ENERGY SPECTRA**

**NT INFRARED SPECTRA**

**NT MICROWAVE SPECTRA**

**NT NOISE SPECTRA**

**NT POWER SPECTRA**

**NT VIBRATIONAL SPECTRA**

**SPECTRAL ANALYSIS**

**U SPECTRUM ANALYSIS**

**SPECTRAL ENERGY DISTRIBUTION**

IR radiant energy emission from conical jet exhaust of turbojet aircraft p0400 A72-32399

**SPECTRAL NOISE**

**U WHITE NOISE**

**SPECTROPHOTOMETERS**

**NT INFRARED SPECTROPHOTOMETERS**

**SPECTROSCOPIC ANALYSIS**

Turbojet engine oil circuit contamination rate determination by spectrometric analysis, obtaining mathematical theory for data interpretation [SAE PAPER 720303] p0288 A72-25567

**SPECTROSCOPY**

**NT SPECTROSCOPIC ANALYSIS**

**SPECTRUM ANALYSIS**

Hybrid computer method of nonstationary spectrum analysis of aircraft noise, applying to flyover and jet aircraft noise abatement under operational conditions p0178 A72-18778

Circular jets sound generation analysis, using Lighthill equation and Michalke spectral method [DFVLR-SONDDE-179] p0186 A72-20100

Spectral analysis of transient data applied to auto-pilot parameter studies of coupler transfer function [AD-725068] p0035 N72-10501

**SPEED**

**U VELOCITY**

**SPEED BRAKES**

**U BRAKES (FOR ARRESTING MOTION)**

**SPEED CONTROL**

Aircraft turbo-alternator speed control for constant frequency power supply, presenting theoretical relationships for electrohydraulic or mechanohydraulic control loops p0071 A72-15462

Monitor and regulator for automatic speed control and flow velocity measurement in wind tunnel p0411 A72-33609

Optimal control of the speed of a two-shaft helicopter turbine p0600 A72-44278

**SPEED INDICATORS**

**NT ANEMOMETERS**

**NT HOT-WIRE ANEMOMETERS**

Doppler system with navigation radar device, computer unit and data transmitter for continuous recording of aircraft position and speed p0024 A72-12749

Received signal spectrum gravity center and effective antenna centers of airborne Doppler velocimeter in horizontal flight p0303 A72-26730

**SPEED REGULATION**

**U SPEED CONTROL**

**SPEEDOMETERS**

**U SPEED INDICATORS**

**SPHERES**

Magnetic balance measurements of aerodynamic forces on spheres and slender cones in hypersonic low density wind tunnels, noting sting effect p0243 A72-24771

# SPIKE ANTENNAS

## U MONOPOLE ANTENNAS

### SPIN

Summary of NASA research and experience related to spin and recovery characteristics of light general aviation aircraft  
[NASA-TN-D-6575] p0101 N72-12990

Literature survey of spin research and application to aircraft design  
[AD-734976] p0272 N72-19050

Development of equations of motion for rigid body in cylindrical coordinates by Lagrangian dynamics and application to motion of aircraft in spin  
[AD-742929] p0583 N72-31006

### SPIN DECOUPLING

#### NT SPIN

### SPIN DYNAMICS

#### NT SPIN

Aircraft spin characteristics due to superstall, comparing three stall types with respect to recovery, yaw damping and rate of rotation  
[DGLR PAPER 71-057] p0023 A72-12718

Dynamical equivalence between vehicles with motor-driven constant speed rotor under bearing friction and freely spinning torque free rotor, deriving equations of motion  
p0191 A72-21174

Analytic prediction of aircraft spin characteristics and analysis of spin recovery.  
[AIAA PAPER 72-985] p0561 A72-42329

Development of design criteria for predicting departure characteristics and spin susceptibility of fighter-type aircraft.  
[AIAA PAPER 72-984] p0561 A72-42330

### SPIN STABILIZATION

Effectiveness evaluation of automatic spin prevention system for fighter aircraft  
[NASA-TN-D-6670] p0252 N72-18012

### SPIN TESTS

Boeing 347 helicopter program, discussing simulation, wind tunnel, whirl tower, bench testing, flight test development and demonstration  
p0135 A72-16993

F-14 Tomcat test program for hydraulic systems, spinning, low speed performance, stalling, afterburning turbofan engines, in-flight refueling and automatic telemetry equipment  
p0138 A72-17582

Flight initial spin testing, discussing aircraft autorotation due to stalled angle of attack and sideslip  
p0146 A72-18492

Status of U.S. Navy stall/post-stall/spin flight testing.  
[AIAA PAPER 72-787] p0495 A72-38104

Tangential and radial stress data from spin tests of turbine rotor for M-1 engine oxidizer turbopump  
[NASA-CR-1967] p0324 N72-20452

Simulation of dynamic spin of F-4 aircraft under pilot control using human centrifuge facility  
[AD-739326] p0483 N72-27278

### SPINAL CORD

Seat cushion evaluation for behavior during helicopter crash or aircraft ejection and spinal injury probability  
p0194 A72-21577

### SPIRAL ANTENNAS

Experimental investigation regarding Archimedean spiral antennas for the L-band, and radiator groups constructed from them whose radiation directions are controlled by a conduction matrix  
p0549 A72-40510

### SPLINE FUNCTIONS

Calculation of potential flow about aerofoils using approximation by splines.  
p0566 A72-42849

### SPLIT FLAPS

Three dimensional wind tunnel investigation of vortex augmented unswept wing with leading edge cusp flap and split upper and lower trailing edge flaps  
[SAE PAPER 720321] p0290 A72-25584

### SPOILER SLOT AILERONS

Wind tunnel tests for slot spoiler direct lift control system  
[NASA-TN-D-6627] p0149 N72-13978

### SPOILERS

Aircraft flight characteristics for landing

approach by spoiler-elevator deflection coupling, considering pitch, flight path angle and speed  
p0410 A72-33423

Jaguar powered flight controls, discussing wing spoilers, slab tailplane, rudder, autostabilization system and integrated packaging of actuators  
p0417 A72-34144

Pressure distribution on 45 deg swept half wing including effectiveness of upper surface spoiler as roll control  
[ARC-CP-1184] p0270 N72-19032

Unsteady response of turbocompressor with inlet flow distorted by square wave and triangular spoilers  
[ARC-CP-1203] p0431 N72-25000

### SPONTANEOUS COMBUSTION

Fuel vapor spontaneous ignition in Concorde fuel tank for maximum oxygen concentration determination to limit ignition pressure  
[ARC-CP-1209] p0537 N72-29799

### SPONTANEOUS IGNITION TEMPERATURE

#### U IGNITION TEMPERATURE

#### U SPONTANEOUS COMBUSTION

### SPOT WELDS

Combined spot weld-adhesive bonding to join sheet metal parts with applications to propellant tanks and spacecraft and aircraft structures  
[SME PAPER AD 72-710] p0458 A72-36526

### SPRAYED PROTECTIVE COATINGS

#### U PROTECTIVE COATINGS

### SPREAD REFLECTION

#### U REFLECTION

### SPRINGS (ELASTIC)

Spring constants for shock analysis of aircraft carrier catapult installations  
[AD-729249] p0157 N72-14288

### SPUTTERING

Ion sputtering process used to deposit coating compounds on titanium alloy gear teeth.  
[AD-729839] p0160 N72-14504

### STABILITY

#### NT AERODYNAMIC STABILITY

#### NT AIRCRAFT STABILITY

#### NT ATTITUDE STABILITY

#### NT BOUNDARY LAYER STABILITY

#### NT COMBUSTION STABILITY

#### NT DIRECTIONAL STABILITY

#### NT FLAME STABILITY

#### NT FLOW STABILITY

#### NT GYROSCOPIC STABILITY

#### NT HOVERING STABILITY

#### NT LATERAL STABILITY

#### NT LONGITUDINAL STABILITY

#### NT LOW SPEED STABILITY

#### NT MOTION STABILITY

#### NT ROTARY STABILITY

#### NT SHELL STABILITY

#### NT STATIC STABILITY

#### NT STRUCTURAL STABILITY

#### NT SYSTEMS STABILITY

#### NT THERMAL STABILITY

Effects of additives on hydrocarbon jet fuel stability  
[AD-737833] p0427 N72-24806

### STABILITY AUGMENTATION

#### U FEEDBACK CONTROL

#### U STABILIZATION

### STABILITY DERIVATIVES

#### NT PITCHING MOMENTS

#### NT ROLLING MOMENTS

#### NT YAWING MOMENTS

Hypersonic vehicles lateral dynamics during great circle flight, using linearized equations of motion and Newtonian theory for stability derivatives estimation  
p0195 A72-21603

Aerodynamic force and moment measurements on model in magnetic wind tunnel balance system, using field equations  
p0243 A72-24765

Evaluation and comparison of several methods for estimating low speed stability derivatives of two unpowered aircraft configurations  
[NASA-TN-D-6531] p0079 N72-11896

Two and three dimensional wind tunnel tests on oscillatory control surface derivations noting

# STABILITY TESTS

# SUBJECT INDEX

Reynolds number and/or boundary layer transition variation on wing  
[ARC-CP-1151] p0088 N72-11960

Stability derivatives and transfer functions for YHC-1A and S-58 helicopters in steep approaches - Vol. 3  
[AD-730362] p0155 N72-14019

Stability derivatives and transfer functions for AH-56 compound helicopter during low altitude turbulent conditions - Vol. 4  
[AD-730363] p0155 N72-14020

Linearized mathematical models with stability derivatives and equations of motion for two representative STOL aircraft  
[AD-733756] p0270 N72-19036

Definition of longitudinal stability derivatives for elastic airplanes with allowances for perturbations in forward speed  
[NASA-TN-D-6629] p0318 N72-20006

Numerical analysis of factors affecting aerodynamic stability of aircraft and development of concept of dynamic derivatives [ARL/A-NOTE-330] p0365 N72-21996

Control and perturbation transfer function. coefficients as function of aircraft derivatives for uncontrolled longitudinal motion in turbulence [DLR-MITT-71-11] p0366 N72-22010

Numerical analysis of programmed control of flying vehicle motion  
p0384 N72-23028

Analysis of techniques and computer programs for extracting stability derivative information from flight test records  
[NASA-CR-2016] p0430 N72-24991

Application of state transition matrix for numerical analysis of stability and gust response of lifting rotor with rigid flapping blades and rigid hub  
p0431 N72-25001

Determination of limit cycle and structural resonance characteristics of aircraft stability augmentation systems by ground and flight tests [NASA-TN-D-6867] p0465 N72-26017

Oscillating balance system for stability derivation measurements in supersonic wind tunnels  
p0470 N72-26348

Application of regression analysis to determine stability derivative for vertical takeoff aircraft [AD-741486] p0531 N72-29023

Development of theories for speed, stability, maneuverability, and seaworthiness of ground effect machines  
[AD-742425] p0574 N72-30023

Analysis of factors in stall and post stall operating conditions and effect on aircraft configurations  
p0620 N72-32029

Full scale wind tunnel tests to determine dynamic stability derivatives of variable-sweep fighter configuration with twin vertical tails  
[NASA-TN-D-6909] p0622 N72-32044

Effects of variations in stability derivatives on performance of XV-4 aircraft  
[AD-744104] p0625 N72-32066

**STABILITY TESTS**

NT FLIGHT STABILITY TESTS

NT WIND TUNNEL STABILITY TESTS

Static and dynamic stability characteristics of finned bodies with cruciform, slotted fin configuration  
[AD-728016] p0027 N72-10003

**STABILIZATION**

NT SPIN STABILIZATION

Problems and solutions related to the design of a control augmentation system for a longitudinally unstable supersonic transport.  
[AIAA PAPER 72-871] p0505 A72-39128

Breakdown of automatic pilots or auxiliary stabilization systems on helicopters  
p0082 N72-11918

Design of stability augmentation system for WG13 rigid rotor helicopter  
p0084 N72-11930

System for increasing helicopter stability  
p0084 N72-11932

Flight test of three-axis hydrofluidic stability augmentation system in helicopter  
p0085 N72-11937

Development of computer program for predicting static, longitudinal aerodynamic characteristics of missile configurations for angles of attack from zero to 180 degrees  
[AD-729009] p0100 N72-12986

Operational evaluation of aircraft landing aid stabilization system installed on aircraft carrier [AD-732446] p0221 N72-17199

Determination of limit cycle and structural resonance characteristics of aircraft stability augmentation systems by ground and flight tests [NASA-TN-D-6867] p0465 N72-26017

Surface stabilization of snow on helicopter landing fields by chemical treatment  
[AD-738561] p0519 N72-28271

**STABILIZED PLATFORMS**

Tethered autostabilized rotor platform for military surveillance, target location and communication, discussing flight vehicle, tethering cable, ground station and guidance-control system  
p0357 A72-30078

Design, development, characteristics, and applications of gyroscopic devices  
[AD-733275] p0262 N72-18662

Flight tests of strapdown inertial navigation system in helicopter to determine feasibility for simulating systems using inertial navigation equipment  
[AD-733430] p0262 N72-18663

**STABILIZERS (FLUID DYNAMICS)**

NT HORIZONTAL TAIL SURFACES

Parachute designs and applications to escape systems, paratrooping, supply dropping, aircraft braking, weapons systems stabilization, flight testing aids and sport  
p0006 A72-10302

Development of an inflatable fabric structure for the early stabilization of the B-1 crew escape capsule.  
[AIAA PAPER 72-801] p0510 A72-40053

Flight test investigation of the aerodynamic behavior of various-sized stabilizers on a small helicopter.  
p0612 A72-45328

Flight test of three-axis fluidic stability augmentation system for UH-1 helicopter  
[AD-734343] p0271 N72-19043

Dual fuselage aircraft design with yawable wing and horizontal stabilizer  
[NASA-CASE-ARC-10470-1] p0332 N72-21010

**STAINLESS STEELS**

Design, fabrication, and ground tests of perforated stainless steel exhaust nozzle inserts for Boeing 707 aircraft noise reduction  
[NASA-CR-1853] p0031 N72-10043

**STALL**

U BOUNDARY LAYER SEPARATION

**STALLING**

Two dimensional airfoil unsteady stall in incompressible flow, comparing calculated loading during transient and sinusoidal pitching motions with measured values  
[AIAA PAPER 72-37] p0130 A72-16899

Vorticity and stall-inducing inlet distortion in turbocompressors  
[AD-743725] p0647 N72-33752

**STANDARDIZATION**

Aircraft high pressure oxygen cylinder system filler valve optimum standards, discussing automatic fill rate and pressure sensitive closing control, design, construction and performance  
[SAE AS 1225] p0008 A72-10385

Aeronautical navigation/guidance standardization in conjunction with OMEGA, covering sensor and computer equipment life cycles  
p0353 A72-29199

Airborne equipment electric power supply standards to provide characteristics limits for compatibility with ground support systems  
[SAE AS 1212] p0458 A72-36535

**STANDARDS**

Aerospace wire and cables testing methods standards for evaluating mechanical, electrical and chemical properties, coating thicknesses, continuity flaws, flammability, geometrical characteristics, etc  
[SAE AS 1198] p0008 A72-10384

- Pressure altimeter system minimum safe performance standards for subsonic aircraft operation, describing test procedures [SAE AS 942] p0008 A72-10386
- Thin wall airframe wire insulation relative thermal life and temperature rating evaluation procedure using Arrhenius plot p0233 A72-23270
- Airborne VHF omnirange (VOR) systems minimum operational standards for navigation and communication in air traffic control p0242 A72-24725
- General aviation equipment standards in light of air traffic system safety needs, emphasizing Technical Standard Order system [SAE PAPER 720307] p0288 A72-25571
- FAA policy in issuing civil airport operating certificates and establishing minimum safety standards p0409 A72-33330
- Acoustic pressure and sound intensity levels and noise annoyance international standards for civil aircraft noise reduction p0508 A72-39803
- Aviation safety measures for aircraft reliability and flight control p0252 A72-18017
- Survey of specifications and standards containing vibration test procedures in use by US Air Force p0474 A72-26817
- STARTERS**  
NT ENGINE STARTERS
- STATE EQUATIONS**  
U EQUATIONS OF STATE
- STATE VECTORS**  
Multiinput and multioutput linear and nonlinear dynamic system maximum likelihood identification based on state vector formulation and optimal filter use p0183 A72-19286
- STATIC AERODYNAMIC CHARACTERISTICS**  
All-moving tail plane parameters influence on glider static and dynamic characteristics, discussing lateral and longitudinal stability, maneuverability and pilot induced oscillations p0196 A72-21632
- Static aerodynamic characteristics of bulbous based cone models and slender wings at subsonic speed, using magnetic suspension and balance system p0243 A72-24769
- Static efficiency and penalties associated with cyclic pitch V/STOL propellers [DGLR-71-021] p0382 A72-23015
- STATIC ELECTRICITY**  
Static electricity in fueling of superjets. p0557 A72-41375
- Performance tests on static electricity dissipator used on fixed and rotary wing aircraft [AD-729534] p0156 A72-14247
- Static electrification, bonding, grounding, and lightning protection techniques applied to aircraft, spacecraft, and missiles [AD-739356] p0480 A72-27037
- STATIC INVERTERS**  
Feasibility analysis of variable speed constant frequency inverter system using dc link approach for aircraft use [AD-734067] p0273 A72-19065
- STATIC LOADS**  
Static compressive load tests on L-837 airport marker light bases [NBS-10453] p0096 A72-12586
- Development of numerical methods for analyzing structural properties of statically loaded wings using iteration process p0327 A72-20904
- STATIC PRESSURE**  
Flight test procedures for subsonic transport aircraft pitot static pressure system, recommending trailing cone calibration method [SAE ARP 921] p0008 A72-10389
- Static pressure tube calibration for surface pressure measurements in flow over flat plate and airfoil p0232 A72-22937
- Pressure, shear stress and yaw angle measurements in flow through aircraft intake S-shaped ducts with turbulent boundary layer at entry, noting vortex generation p0410 A72-33403
- Relationship between static pressure error /position error/ and measurable flight parameters for different aircraft weights and configurations p0412 A72-33637
- Pitot stem blockage corrections in uniform and nonuniform pipe flow determined by wind tunnel measurements [ARC-CP-1175] p0045 A72-11295
- Static pressure position error calibrations for compensated and uncompensated XB-70 nose boom pitot static tube [NASA-TN-D-6827] p0421 A72-24016
- Curves for use with total heat and static pressure sampling methods for gross thrust, mass flow, and choking pressure ratio of air breathing engines in flight [ESDU-69008] p0631 A72-32746
- STATIC STABILITY**

## STRESS (PHYSIOLOGY)

### NT CENTRIFUGING STRESS

Behavioral inaction under stress conditions similar to survivable aircraft accident, tabulating hesitation statistics

p0194 A72-21570

Effects of environmental stresses on attack helicopter crew task performance in NATO theater [AD-726949]

p0032 A72-10122

Crew compartment vibration environment in B-52 aircraft during low altitude, high speed flight [AD-727023]

p0033 A72-10127

Analysis of three commercial aircraft accidents to determine factors affecting survival of passengers under emergency conditions

p0150 A72-13989

Physiological effects of high altitude flight and development of life support systems for civil aircraft environmental control

p0322 A72-20107

[JPRS-55454]

## STRESS ANALYSIS

Structural sandwich panel design, establishing simple stress and deflection formulas under transverse loading based on tests evaluating balsa as laminate core

p0009 A72-10723

Papers on aerospace structure by N. J. Hoff covering aircraft framework, stress analysis, structural stability, shell theories, bending, buckling, monocoque and sandwich structures, etc

p0070 A72-15238

Stress levels and fatigue in aircraft structures subjected to jet noise, noting stress calculation for skin panels and control surfaces

p0355 A72-29579

Small transport aircraft horizontal tail surfaces flow characteristics determination for stress calculation during flight in turbulent atmosphere

p0359 A72-30284

Russian book on aircraft design covering flight conditions, structure and control characteristics, production and stress analysis

p0451 A72-35448

Russian book - Design principles in aircraft construction.

p0560 A72-42074

Stress and strain history at point of stress concentration to determine effects of spectrum block size in fatigue testing

p0098 A72-12928

Stress analysis of crack propagation in orthotropic strips with edge stiffeners and application to aerodynamic structures design

p0163 A72-14923

Structural creep tests of aircraft structures under constant load-constant temperature, and under variable conditions

p0224 A72-17927

Development of methods for determining lifetime of helicopter components based on working stress and stress-time functions

p0425 A72-24531

Computer program for determining natural frequencies and normal modes existing in helicopter rotary wings

p0513 A72-27999

Structural analysis of rotor system of hot gas-jet helicopter

p0513 A72-28001

Stress design data for U 700 for design optimization of LP 460 lift fan

p0535 A72-29564

Subsonic wind tunnel tests to determine aerodynamic forces and pressure distribution on parachute canopy of ring-slot parachute model

p0625 A72-32063

High pressure turbine blade stress analysis using NASTRAN

p0633 A72-32900

## STRESS CALCULATIONS

### U STRESS ANALYSIS

### STRESS CONCENTRATION

Unidirectional carbon fiber composites effects and use of stress envelopes in aircraft structure design

p0135 A72-16997

Shear and direct stresses on fuselage model cross section due to concentrated radial loads on frame comparing measurement with prediction by

## matrix force analysis

p0144 A72-18322

Rotational, centrifugal and Coriolis force effects on turbulent boundary layer development, discussing changes in structure and shear stress distribution

p0238 A72-23870

Ti alloys fatigue strength, stress concentration sensitivity and grain sizes effects at normal and high temperature under cyclic loads

p0304 A72-26821

Aircraft landing gear stress spectrum and design data during ground loading on airport runways, using linearized theory for model investigation

p0359 A72-30283

Analog simulation method for highly redundant structure optimization based on reproducing structure mechanical behavior in stabilized stress states

p0405 A72-32899

Analysis of a partially cracked panel.

p0458 A72-36771

Stress distribution and displacements in adhesive bonded lap-jointed aerospace structures, presenting approximate solution

p0462 A72-37214

Fatigue strength of overloaded stiffeners in cracked panels, evaluating stress intensity factor and overload coefficients for fatigue crack propagation via finite element method

p0555 A72-41165

A consistent approach for treating distributed loading in the matrix force method.

p0557 A72-41261

Optimum design of joints - The stress severity factor concept.

p0608 A72-44728

## STRESS CORROSION

Ti alloys hot salt stress corrosion during turbine engine operation, noting effects of alloy processing conditions, surface properties and cyclic exposures

p0397 A72-32136

Environmental tests to determine behavior of titanium alloys under hot salt, stress corrosion conditions existing in jet engines

p0259 A72-18541

Stress corrosion cracking in aircraft structures and various materials - historical review

p0341 A72-21901

Corrosion properties of aircraft structure fluid contaminants noting corrosion tests and microbiological action on Britannia Comet Aircraft

p0573 A72-30015

Susceptibility to stress corrosion cracking in NaCl solution of titanium alloy plates

p0645 A72-33554

## STRESS CYCLES

Dynamic strength of tangentially wound toothed blade roots

p0506 A72-39586

Survey and analysis of literature on fatigue damage accumulation in aircraft materials and structures

p0378 A72-22918

## STRESS DISTRIBUTION

### U STRESS CONCENTRATION

### STRESS MEASUREMENT

Airport apron surface pavement strain measurements under field loading conditions, considering static and dynamic loads with finite element method

p0002 A72-10192

## STRESS RELIEVING

Aircraft light alloy integral construction for stress concentration and fatigue failure avoidance, describing continuous casting process, stress relieving and ultrasonic flaw testing procedures

p0185 A72-19725

## STRESS RUPTURE STRENGTH

### U CREEP RUPTURE STRENGTH

### STRESS-STRAIN DIAGRAMS

Aircraft engine components fatigue life assessment under small cycle temperature conditions, including temperature field and stress-strain determination in critical spot

p0358 A72-30279

NT FLUTTER ANALYSIS

NT MATRIX METHODS

Building structures response to transient  
pressures caused by sonic booms, discussing  
three dimensional loading effects, air cavity  
coupling and nonlinearities influence  
p0198 A72-21908

Two dimensional elastoplastic finite element  
analysis of structural members under cyclic  
thermal-mechanical loadings  
[ASME PAPER 72-GT-1] p0292 A72-25604

Analog simulation method for highly redundant  
structure optimization based on reproducing  
structure mechanical behavior in stabilized  
stress states.  
p0405 A72-32899

Cost-saving techniques in helicopter structural  
test methods, suggesting system simulation,  
component replacement time calculation and  
computer techniques  
p0407 A72-33221

Stress distribution and displacements in adhesive  
bonded lap-jointed aerospace structures,  
presenting approximate solution  
p0462 A72-37214

Book - Contributions to the theory of aircraft  
structures.  
p0566 A72-42826

Development of structural optimization algorithm  
for obtaining near optimum distributions of  
material for structural idealizations  
[AD-726112] p0051 N72-11820

Full scale fatigue tests of YS-11A-500/600  
turbo-prop aircraft wing  
[NAL-TR-241] p0112 N72-13888

Static aeroelastic characteristics of thin  
cylindrical shells at subsonic speeds without  
use of boundary layer control or shell  
axial-force loading  
[AD-732291] p0202 N72-15954

Scale model tests to determine optimum  
configuration and characteristics of large jet  
transport aircraft during ditching  
[NASA-TN-X-2445] p0218 N72-17005

Evaluation of steady-state and nonsteady-state  
methods for measuring panel damping with  
emphasis on use of random process techniques and  
digital data reduction methods  
[NASA-CR-114423] p0264 N72-18909

Weight estimation and analysis of major structural  
components of hypersonic, liquid hydrogen fueled  
aircraft  
[NASA-TN-D-6692] p0264 N72-18911

Development of numerical methods for analyzing  
structural properties of statically loaded wings  
using iteration process  
p0327 N72-20904

Development of method for calculating fatigue  
strength of airframe structures and predicting  
rate of fatigue crack propagation  
[AD-736887] p0390 N72-23936

Conference on shock and vibration analysis of  
structural components of ships, flight vehicles,  
and ordnance items  
[AD-739578] p0475 N72-26904

Computer program for determining natural  
frequencies and normal modes existing in  
helicopter rotary wings  
[NASA-CR-112071] p0513 N72-27999

Structural analysis of rotor system of hot gas-jet  
helicopter  
[NASA-TT-P-14281] p0513 N72-28001

Analysis of effects of lifting rotor blade  
flexibility and rotor support flexibility on  
performance and structure of rotary wing assembly  
[NASA-CR-114480] p0516 N72-28018

Aerodynamic characteristics of progressing and  
regressing forced rotary wing flapping modes  
[NASA-CR-114481] p0516 N72-28019

Analysis of helicopter accidents to determine  
effectiveness of crash resistant fuel system  
installed in UH-1 helicopter  
[AD-739567] p0517 N72-28023

Survey of airfield pavement conditions at US Navy  
Landing Field, Crows Landing, California  
[AD-739316] p0518 N72-28265

Survey of pavement conditions at US Marine Corps  
Air Station, Yuma, Arizona  
[AD-739317] p0518 N72-28266

Survey to determine condition of airfield pavement  
at San Nicholas Island, California  
[AD-738824] p0518 N72-28269

Survey of pavement conditions at US Navy Airfield,  
Monterey, California  
[AD-739314] p0519 N72-28270

Analysis of acoustic fatigue life of structures  
subjected to jet noise and application to design  
of aircraft structures - Part 1  
[AGARD-AG-162-PT-1] p0539 N72-29893

Application of applied fracture mechanics in  
design analysis to provide improved aircraft  
structural integrity  
p0541 N72-29909

Fatigue and thermal static strength development  
tests performed on sections of Concorde  
supersonic transport aircraft  
p0542 N72-29915

Development of mathematical techniques for  
determining stresses, deformation, and stability  
of aerospace vehicle structures  
[AD-744114] p0625 N72-32067

NASTRAN applied to structural design analysis of  
airframe projects  
p0633 N72-32885

Static structural analysis of meridional tape  
forces, permeability, and change in model  
contours on aft half of inflatable decelerator  
device  
[NASA-TN-D-6929] p0633 N72-32911

Structural suitability and cost effectiveness of  
ferro-cement for large subsonic wind tunnel  
structures  
[NASA-CR-114501] p0648 N72-33916

Subsonic, transonic, and supersonic aerodynamics,  
fatigue and structural analysis, and related  
aircraft studies - bibliography  
p0648 N72-33961

## STRUCTURAL BEAMS

## U BEAMS (SUPPORTS)

## STRUCTURAL DESIGN

Aircraft design interactive computer graphics  
technique, using human decision input response  
to computer output information  
[DGLR PAPER 71-107] p0024 A72-12733

Carbon fiber resin composite characteristics for  
airframe component design, comparing with metal  
materials  
p0065 A72-14746

S-3A Viking land based antisubmarine warfare  
maritime and reconnaissance aircraft, describing  
flight controls, structural design, underslung  
podded engines and operational equipment  
p0139 A72-17583

Titanium-boron-epoxy composite materials selection  
and fracture mechanics criteria for B-1 bomber  
structural design  
p0228 A72-22477

Transport aircraft fuselage computerized design,  
determining optimal structural distribution for  
strength and displacement constraints

NT PANEL FLUTTER  
 NT SELF INDUCED VIBRATION  
 NT SUBSONIC FLUTTER  
 NT SUPERSONIC FLUTTER  
 NT TORSIONAL VIBRATION  
 NT TRANSONIC FLUTTER

Finite element method for determining transient response of box-type structure to traveling sonic pressure wave

p0003 A72-10219

Unpredicted structural vibration in Comet and Electra aircraft, Graf Zeppelin dirigible, missile antennas, etc

p0016 A72-12002

Finite element discrete model for large aspect ratio wing transverse vibrations, using inhomogeneous elements with various stiffness-length relations

p0054 A72-13189

Step-by-step perturbation method for calculating vibration modes of aerospace structure [ONERA, TP NO. 968]

p0071 A72-15552

Aerospace vehicle noise induced structural vibration, presenting propellers, turbojet engine exhausts and sonic boom waves

p0123 A72-16597

Thermoelastic effect on flutter and vibration of built up delta wings with solid, stiffened and honeycomb/corrugated sandwich skins

p0128 A72-16834

Aircraft design for acceptable vibration level, discussing flight vibration and runway response

p0183 A72-19269

Hovercraft noise and vibration source and reduction for improved crew and passenger comfort

p0184 A72-19648

Concorde sonic boom measurement, discussing structural vibrational response

p0198 A72-21911

Nonlinear dynamic motion response analysis of flight vehicles typified by continuously changing vibration damping and frequency

p0235 A72-23452

Runway unevenness and landing gear characteristics effects on SST vibration during taxiing, taking off and landing

p0235 A72-23459

Hydrodynamic forces in sinusoidal vibrations of disk in water channel with toroidal vorticity wake pattern, applying results to flapping wing mechanics

p0247 A72-25129

Aerodynamic damping of turbomachine blade vibrations under varied conditions of stagger angle, pressure ratio and relative velocity, using pure bending mode excitation

p0293 A72-25611

Random vibration statistics of lifting rotors with feedback controls, solving response variance matrix by random inputs shaping filters

p0351 A72-29096

Aileron vibration pressure measurement in plane-parallel transonic flow, evaluating damping characteristics with allowance for shock motion caused nonlinear effects

p0363 A72-31026

Natural frequencies and vibration modes of free glider, using symmetrical matrix to replace three dimensional structure by approximate model

p0410 A72-33409

Helicopters vibration reduction through fuselage modalization, discussing analysis method and dynamic scale model and full scale flight test results

p0444 A72-34487

Structural mode vibration control system design for B-1 aircraft to improve ride during atmospheric turbulence and terrain following

p0453 A72-35563

Vibration technology: Balancing flexible rotors; Conference, Technische Universitaet Berlin, Berlin, West Germany, March 23, 24, 1970, Summaries

p0456 A72-36064

Flat beam linear vibration analysis from mode measurement and moire technique, applying to prototype turbine compressor blade

p0457 A72-36375

Sonic boom duration effects on thin circular elastic plate transient axisymmetric vibration via Hankel and Laplace transforms

p0457 A72-36409

A flutter optimization program for aircraft structural design.

p0496 A72-38111

A new method of calculating the natural vibrations of a free aeroplane.

p0552 A72-41130

Vibration measurements of an airplane fuselage structure. I - Turbulent boundary layer excitation. II - Jet noise excitation.

p0567 A72-42912

Procedures for simple resonance testing of sailplanes

p0567 A72-42920

Method of measuring modal characteristics of a structure subjected to a random excitation

p0569 A72-43095

Effects of transport velocity of wake vortex on aerofoil oscillations.

p0603 A72-44494

Aerodynamic characteristics of turbine blade cascades in unsteady incompressible and compressible fluid flow, considering axial flow turbine blades vibration

p0615 A72-45524

Wind tunnel tests on prototype munitions dispenser designed for external carriage on tactical aircraft

p0173 N72-15835

Radar nose package shock and vibration experienced during carrier landings

p0173 N72-15837

Standard ARM captive carry life expectancy prediction and vibration qualification testing, resulting in airframe fatigue failure

p0173 N72-15839

Analysis of riding discomfort in aircraft resulting from mechanical vibration and swing motion

p0203 N72-15961

Structural response of AH-1G helicopter to minigu and 40mm grenade launcher fire

p0215 N72-16821

Conference on mechanical shock and vibration damping of aerospace structures

p0216 N72-16861

Two-degree-of-freedom flutter model for analyzing aerodynamic structural vibrations

p0216 N72-16877

Conference on shock and vibration analysis of structural components of ships, flight vehicles, and ordnance items

p0475 N72-26904

Destabilization effects of flap-lag coupling in hingeless rotor blade oscillations during hover

p0572 N72-30003

Linear elastic theory and matrix methods for calculating structural oscillations in pointed arrow wings

p0582 N72-30993

## STRUCTURAL WEIGHT

Atmospheric temperature and pressure altitude effects on runway lengths and aircraft takeoff weights

p0002 A72-10193

Carbon fiber laminates for helicopter components weight reduction

p0135 A72-16999

Rotary wing aircraft first flight and envelope expansion at design gross weight

p0146 A72-18493

Wing structural weight estimation for civil aircraft preliminary deriving generalized formula based on wing root bending moment for specified flight condition

p0232 A72-22909

Supercritical thick wing for structural weight reduction and increased cruise speeds flight tested on Navy T2-C aircraft

p0290 A72-25583

Composite materials, fabrication, emphasizing high strength/stiffness to weight ratio as critical performance requirements

p0312 A72-28082

Carbon-carbon composite material for high performance aircraft braking systems, noting

## SUBCARRIER WAVES

## SUBJECT INDEX

weight savings and thermal characteristics improvements  
p0312 A72-28093

General Dynamics model 401 air superiority single engine fighter design stressing light weight structure and maneuverability at high speeds and angles of attack  
p0344 A72-28575

Optimal design of thin walled minimum weight aircraft shell structures, using linear programming  
p0351 A72-29143

Relationship between static pressure error /position error/ and measurable flight parameters for different aircraft weights and configurations  
p0412 A72-33637

Flow and circulation diagrams formed by events involved in optimum aircraft design configuration and structural weight selection, outlining calculation methods  
p0490 A72-37452

Fast method for aircraft rebalance.  
p0490 A72-37453

Graphite-epoxy composites application to commercial transports for weight and cost reduction  
p0491 A72-37680

Active controls - Changing the rules of structural design.  
p0492 A72-37681

Aerodynamic design and development of the Lockheed S-3A Viking.  
[AIAA PAPER 72-746] p0498 A72-38122

B-52 test vehicle flight demonstration program for control configured vehicles /CCV/ technology concepts validation, noting gross weight reduction  
[AIAA PAPER 72-747] p0498 A72-38123

Weight saving, vibration proofing and heat dissipating techniques in avionics packaging, considering B-1 bomber electronic multiplexing system example  
p0508 A72-39768

Aircraft structures weight reduction through fiber-matrix composite materials, discussing anisotropic elastic and failure behavior of composite light shell structures  
[ICAS PAPER 72-38] p0555 A72-41163

Aeroelastic optimization of a panel in high Mach number supersonic flow.  
p0593 A72-43327

High strength bimetallic rivets produced by inertia welding Al-Ti alloy shank with pure Ti tail, noting weight and cost reduction for aerospace vehicle production  
[SAE PAPER 902] p0595 A72-43452

Engine selection for specific aircraft design and mission, considering bypass and pressure ratios and turbine temperature effects on performance and weight  
[SAE PAPER 910] p0595 A72-43457

Helicopter design figure of merit weight ratios definition in terms of rotor thrust coefficient, substituting pure airframe structure weight for conventionally used empty weight  
[SAE PAPER 916] p0596 A72-43463

Airline operational weighing and balancing of 747 aircraft, discussing accuracy and calibration procedures for electronic load cells, mobile platform scales and onboard aircraft weighing systems  
[SAE PAPER 917] p0596 A72-43464

Empty weight and cruise performance of very large subsonic jet transports.  
[SAE PAPER 919] p0596 A72-43466

Moment sampling method as selfvalidating aircraft weight and balance accounting procedure  
[SAE PAPER 920] p0596 A72-43467

Aircraft hydraulic secondary power system weight estimation, presenting components loads and weights breakdown in tables and charts  
[SAE PAPER 935] p0597 A72-43475

Aircraft design structural weight estimation based on post-design analysis of production aircraft, discussing weight factors application to new designs  
[SAE PAPER 936] p0597 A72-43476

SUBCARRIER WAVES  
U CARRIER WAVES

## SUBCRITICAL FLOW

Design programs for swept wings in subcritical, compressible, viscous flow  
[NPL-ABRO-NOTE-1100] p0029 N72-10018

Development of approximate method for calculating pressure distribution on thick cambered airfoil in subcritical viscous flow  
[PPA-AU-901] p0463 N72-26001

Computer program for airfoil pressure distribution for subcritical viscous attached flow  
[NAL-TR-248] p0484 N72-27317

## SUBMARINES

Optimal stochastic /Kalman/ filters application to integrated air and submarine navigation systems, discussing measurement errors modeling as bias and colored noise  
p0017 A72-12050

## SUBMERGED BODIES

Periodic wave of oscillating and stationary two dimensional bodies immersed in uniform incompressible stream, investigating semiinfinite vortex trails relationship to oscillating airfoils  
p0550 A72-40651

## SUBMILLIMETER WAVES

High resolution observation of stratospheric submillimeter thermal emission spectrum by helium-cooled InSb electron bolometer on board Comet 2E aircraft  
p0245 A72-25023

## SUBSETS (MATHEMATICS)

## U SET THEORY

## SUBSONIC AIRCRAFT

Flight test procedures for subsonic transport aircraft pitot static pressure system, recommending trailing cone calibration method  
[SAE ARP 921] p0008 A72-10389

Unsolved aerodynamic problems in sub- and transonic civil and military aircraft design, considering flow problems during transonic flight, takeoff and landing  
[DGLR PAPER 71-105] p0024 A72-12745

U.S.S.R. high-subsonic freight transport jet aircraft IL-76 for arctic areas, Siberia and Far East, noting independence of large airports availability  
p0056 A72-13471

Steady and oscillatory subsonic aerodynamic loads prediction based on Doublet-Lattice method and method of images, determining chord and spanwise loading on lifting surfaces  
[AIAA PAPER 72-26] p0131 A72-16917

NASA aerodynamic technology program, emphasizing airframe and engine development for next generation subsonic CTOL jet transport requirements  
[SAE PAPER 720319] p0290 A72-25582

NASA quiet engine program, discussing noise reduction technology for subsonic civil transport aircraft propulsion system  
[ASME PAPER 72-GT-96] p0298 A72-25667

Subsonic jet noise directivity prediction from acoustic pressure measurements  
p0301 A72-26041

Stratospheric subsonic and supersonic aircraft emission estimation for water vapor and nitrogen oxides  
p0346 A72-28838

Vortex-lattice method for subsonic aircraft aerodynamic coefficients calculation, verifying results with airbus lifting surface wind tunnel test data  
p0394 A72-31401

Advanced subsonic transport technology.  
p0491 A72-37677

Numerical study of the characteristic magnitudes of turbulence on the far sound field radiated by a subsonic jet  
[ONERA, TP NO. 1058] p0492 A72-37761

An exploratory study of flying qualities of very large subsonic transport aircraft in landing approach.  
[ICAS PAPER 72-07] p0552 A72-41132

NASA Quiet Engine program R and D on conventional takeoff and landing subsonic cruise aircraft engine noise  
[ICAS PAPER 72-48] p0556 A72-41173

Empty weight and cruise performance of very large subsonic jet transports.

## SUBJECT INDEX

## SUBSONIC SPEED

- [SAFE PAPER 919] p0596 A72-43466  
A systems analysis of subsonic versus supersonic jet travel.
- p0604 A72-44580  
Subsonic and transonic aerodynamic design characteristics of advanced civil aircraft technology
- p0102 N72-12998  
Advanced technologies for subsonic-transonic conventional takeoff and landing transport aircraft development
- p0105 N72-13017  
Observations of clear air turbulence in stratosphere by high altitude subsonic aircraft [NLL-M-22069-(5828.4P)] p0279 N72-19682
- Definition, analysis and identification of technical and economic sensitivities and interfaces for integrated SPS for advanced subsonic transports [NASA-CR-112103] p0575 N72-30031

## SUBSONIC WIND TUNNELS

thrust ratio and exhaust downwash characteristics  
[ASME PAPER 72-GT-73] p0297 A72-25655

Variable sweep wings aerodynamic characteristics  
in subsonic, transonic and supersonic flight,  
considering lift, drag, stability and control  
p0461 A72-36976

Full scale wind tunnel tests of small unpowered  
jet aircraft with T tail  
[NASA-TN-D-6573] p0030 N72-10031

Effects of Reynolds number and frequency  
parameters on buzz characteristics at subsonic  
speeds using free oscillation method  
[NPL-AERO-1312] p0045 N72-11291

Pressure plotting tests on swept wings for  
analyzing scale effect at high subsonic speeds  
p0075 N72-11867

Flow unsteadiness and model vibration in transonic  
and subsonic wind tunnels for dynamic tests  
[ARC-CP-1155] p0092 N72-12198

Structure of turbulence in noise-producing region  
of round subsonic jet  
[NASA-CR-126483] p0171 N72-15625

Effect of two types of helium circulators on  
performance of subsonic nuclear propelled aircraft  
[NASA-TN-X-2237] p0214 N72-16724

Numerical procedure for predicting interference of  
external stores on F-4 aircraft at subsonic  
speed - Part 1  
[NASA-CR-112065-1] p0466 N72-26021

Application of research and development  
advancements to design of long range transport  
aircraft operating at high subsonic speeds -  
Vol. 2  
[NASA-CR-112089] p0514 N72-28003

Computer program for calculating unsteady loadings  
caused by motions of lifting surfaces with  
trailing edge controls in subsonic compressible  
flow  
[NASA-CR-112015] p0533 N72-29229

Flight tests to determine effects of moderate  
deflections of wing leading and trailing edges  
of F-104 aircraft buffet characteristics at  
subsonic and transonic speeds  
[NASA-TN-D-6943] p0572 N72-30004

Pressure distribution on sweptback wing at  
subsonic speeds noting boundary layer transition  
[ARC-CP-1215] p0583 N72-31003

Analysis of three dimensional, unsteady  
aerodynamic forces with elastic deformations and  
surface deflections for aerodynamic structures  
in subsonic flow  
[AD-742996] p0583 N72-31009

Wind tunnel tests to determine damping  
characteristics of vanes and to calibrate flight  
path accelerometer at subsonic and supersonic  
speeds  
[AD-742994] p0589 N72-31480

Development of procedures for calculating pressure  
distribution on airfoil in sonic stream  
[ESDU-69013] p0617 N72-31989

**SUBSONIC WIND TUNNELS**

Subsonic wind tunnel investigation of aircraft  
wake far field structure, measuring trailing  
vortex decay by yawhead pressure probe  
[AIAA PAPER 72-40] p0130 A72-16902

Subsonic wind tunnel for pulsed flows with speed  
modulation as periodic function of time  
p0404 A72-32898

A new method for the evaluation of slotted wind  
tunnel interference parameters applicable to  
subsonic oscillatory tests.  
p0559 A72-41642

Numerical method for calculating wall-induced  
interference at subsonic speeds in slotted or  
perforated wind tunnels with rectangular cross  
sections  
[NASA-TN-R-379] p0073 N72-11853

Higher-order theory of two-dimensional subsonic  
wall interference effects on flow past airfoil  
between perforated wind tunnel walls  
[LR-553] p0207 N72-16205

Full scale wind tunnel investigation of advancing  
blade concept rotor system  
[AD-734338] p0271 N72-19038

Subsonic wind tunnel for testing full scale aircraft  
[NASA-TN-X-62106] p0276 N72-19291

Variable geometry wind tunnel for testing aircraft  
models at subsonic speeds  
[NASA-CASE-XLA-07430] p0371 N72-22246

## SUBJECT INDEX

Combination mechanical-electrical strain gage  
balances for subsonic wind tunnels  
p0470 N72-26342

Subsonic wind tunnel tests to determine  
aerodynamic forces and pressure distribution on  
parachute canopy of ring-slot parachute model  
[AD-744103] p0625 N72-32063

Requirements and design considerations for full  
scale subsonic wind tunnel capable of testing  
aircraft, rotor systems, and V/STOL aircraft  
propulsion systems  
[NASA-TN-X-62184] p0643 N72-33246

**SUBSTANCES**

**U MATERIALS**

**SUBTROPICAL REGIONS**

**U TEMPERATE REGIONS**

**SUCTION**

Computer program and numerical analysis of  
feasibility of using suction between and along  
runways to remove trailing edge vortex streets  
[IDA-LOG-HQ-69-10164] p0337 N72-21290

Boundary layer suction control for eliminating  
corner separation in airfoil cascade  
[ARC-R/H-3663] p0534 N72-29244

**SUP AVIATION AIRCRAFT**

**NT CONCORDE AIRCRAFT**

**SUITABILITY**

Suitability evaluation of fog simulator for  
weather conditions during flight approach  
[FAA-NA-71-44] p0033 N72-10233

**SULFUR**

JP-5 fuel sulfur content effect on aircraft engine  
turbine blades hot corrosion under marine  
environmental conditions  
p0175 A72-18752

Effect of sulfur in JP-5 fuel on hot corrosion of  
turbine blade materials operating in marine  
environment  
[AD-725619] p0050 N72-11706

**SULFUR COMPOUNDS**

**NT SULFUR FLUORIDES**

**SULFUR FLUORIDES**

Airborne gas chromatograph for real time diffusion  
analyses, describing flight test results with  
sulfur hexafluoride plumes  
p0228 A72-22451

**SUMMARIES**

**NT ABSTRACTS**

**SUMMER**

Sonic boom waveforms measured during exercise  
summer sky in southern Great Britain  
[ARC-R/H-3659] p0038 N72-11015

Physical models of clear air turbulence based on  
summertime observation of turbulent zones  
[AD-743691] p0646 N72-33623

**SUPERALLOYS**

**U HEAT RESISTANT ALLOYS**

**SUPERCAVITATING FLOW**

Integrodifferential equation for rigid tunnel  
walls effect on supercavitating flow past thin  
jet flapped airfoil, noting lift coefficient  
derivatives  
p0241 A72-24562

The lift coefficient of a supercavitating  
jet-flapped foil in a free jet.  
p0556 A72-41236

**SUPERCAVITATION**

**U SUPERCAVITATING FLOW**

**SUPERCONDUCTING MAGNETS**

Superconducting magnetic suspension and balance  
facility of supersonic wind tunnel for dynamic  
stability studies  
p0242 A72-24757

Data acquisition and reduction for model  
aerodynamics in superconducting magnetic  
suspension and balance of supersonic wind tunnel  
facility  
p0243 A72-24766

**SUPERCONDUCTORS**

Superconducting coil design for magnetic  
suspension of supersonic wind tunnel balance  
p0242 A72-24759

**SUPERCritical FLOW**

Supercritical aerodynamics technology, noting  
lifting surface cross sectional profile and  
structural weight reduction  
p0491 A72-37678

Drag of supercritical body of revolution in free  
flight at transonic speeds and comparison with

Design problems of inlets and nozzles used in  
supersonic and V/STOL propulsion systems  
[NASA-TN-X-67741] p0340 N72-21819

Singular optimal control and minimum time of  
ascent for supersonic aircraft p0419 N72-24006

Analysis of effects of aircraft maneuvers on  
characteristics of sonic boom and application of  
analysis method to various aircraft - Vol. 1  
[AD-735296] p0432 N72-25011

Design and tests of two insulation systems for  
liquid methane fuel tanks for supersonic cruise  
aircraft  
[NASA-CR-120930] p0473 N72-26545

Wind tunnel models for determining inlet  
interference and performance of inlet/airframe  
combination in supersonic aircraft design  
p0478 N72-27019

Comparison of flying quality criteria documents  
for United Kingdom and US aircraft to show areas  
of inadequacy in assessing acceptability of  
aircraft p0619 N72-32019

Analysis of criteria for evaluation of high  
performance aircraft and results obtained on  
aircraft equipped with control augmentation  
systems p0620 N72-32025

## SUPERSONIC AIRFOILS

Analytical method of characteristics to determine  
front shock and sonic boom due to flat delta  
wing with supersonic leading edges  
[DFVLR-SONDDR-205] p0410 A72-33401

Airfoil configurations to eliminate undesirable  
shock boundary layer interactions  
[AD-731566] p0250 N72-17998

## SUPERSONIC BOUNDARY LAYERS

Noise generation from turbulent supersonic shear  
layers, including low supersonic and transonic  
ranges for jet noise applications p0072 A72-15566

Three dimensional shock wave configurations in  
front of cylindrical body on supersonic wing or  
of fluid jet injected into main supersonic flow,  
examining high pressure gradient regions  
p0611 A72-45113

## SUPERSONIC COMBUSTION

Supersonic diffusion flame in duct configuration  
to study mixing with combustion of two parallel  
methane and air flows p0057 A72-13545

Supersonic combustion of liquid fuels, hydrogen  
and propane, discussing initiation and  
stabilization in supersonic flow p0311 A72-27686

Supersonic combustion research facility design for  
studying air-fuel mixing processes, shock wave  
induced temperature and pressure increments and  
flame holding devices p0395 A72-31815

Development of analytical flow configuration  
models for designing supersonic air breathing  
propulsion systems p0109 N72-13331

Analysis of oscillating relaxation time in  
combustion products of hydrocarbon fuel under  
supersonic nozzle flow conditions  
[AD-740193] p0542 N72-29960

Water vapor effect on ignition delay in gaseous  
hydrogen combustion airstream  
[AD-741581] p0542 N72-29962

## SUPERSONIC COMBUSTION RAMJET ENGINES

The S4MA hypersonic wind tunnel - Its use for  
tests of ramjet engines with supersonic  
combustion of hydrogen p0493 A72-37823

Theoretical and experimental study of a dual-mode  
ramjet /flight range from Mach 3.5 to 7/  
[ICAS PAPER 72-24] p0553 A72-41149

Development of scramjet with airbreathing engine  
for cruise application p0103 N72-13003

Trends in aerothermodynamic simulation at very  
high Reynold numbers for hypersonic  
aircraft-space shuttles and planetary entry  
p0387 N72-23221

Analysis of losses in scramjet exhaust expansion  
nozzles and evaluation of methods for design of  
exhaust expansion systems to maximize thrust and  
minimize sum of losses  
[AD-736465] p0388 N72-23263

Water vapor effect on ignition delay in gaseous  
hydrogen combustion airstream  
[AD-741581] p0542 N72-29962

Turbulent mixing of fuel and air in supersonic  
combustion ramjet engine  
[AD-740909] p0581 N72-30964

## SUPERSONIC COMBUSTION RAMJET MISSILE

## U SUPERSONIC COMBUSTION RAMJET ENGINES

## SUPERSONIC COMMERCIAL AIR TRANSPORT

A systems analysis of subsonic versus supersonic  
jet travel. p0604 A72-44580

Effects of upper atmosphere turbulence on  
operation of supersonic transport aircraft and  
methods for advance detection of atmospheric  
turbulence  
[NLL-M-22437-(5828.4F)] p0477 N72-27009

Analysis of terminal area flight procedures and  
air routes for supersonic transport aircraft on  
transatlantic flights from Kennedy International  
Airport, New York  
[NASA-TN-D-6801] p0477 N72-27010

Factors affecting optimum flight routes for  
supersonic transport aircraft operation  
[NLL-M-22436-(5828.4F)] p0484 N72-27672

Development of criteria specification for  
supersonic transport aircraft and application to  
safe handling qualities for all regimes of  
flight operations p0620 N72-32027

## SUPERSONIC COMPRESSORS

Supersonic axial flow shock-in-rotor type  
compressor performance tests, discussing factors  
responsible for low efficiency p0120 A72-16481

Flow visualization in supersonic axial compressor  
by short exposure schlieren photography of shock  
wave patterns in rotating annular cascade of  
compressor blades  
[ONERA, TP NO. 1026] p0136 A72-17192

Radial velocity distribution at supersonic  
compressor inlet from duct-cowl and wall  
pressure measurements  
[ONERA, TP NO. 975] p0230 A72-22812

Flow data reduction validity for supersonic axial  
compressors, presenting experimental results for  
rotating supersonic cascade  
[ASME PAPER 72-GT-100] p0299 A72-25669

# SUPERSONIC FLOW

- Experimental study of flows in supersonic compressors  
[ICAS PAPER 72-11] p0552 A72-41136
- Acoustic measurements of aerodynamic noise in low supersonic operation of axial flow compressor  
[NASA-CR-125811] p0282 A72-19849
- SUPERSONIC DIFFUSERS**
- Axisymmetric jet stretcher diffuser performance for ramjet engine inlet configurations, testing at angles of attack and supersonic flow velocities  
[AIAA PAPER 72-1024] p0558 A72-41602
- Performance of jet stretcher diffuser system  
[AD-738646] p0468 A72-26215
- Scale model tests to compare effectiveness of aerogrids and punched plates for smoothing flow from short annular diffusers between compressor and combustor of advanced aircraft engines  
[NASA-CR-120960] p0636 A72-32993
- SUPERSONIC DRAG**
- Experimental results regarding drag in supersonic flow without lift in the case of flight bodies with three in front pointed bodies  
[DFVLR-SONDDR-215] p0503 A72-38686
- SUPERSONIC FLIGHT**
- Book on heat and mass transfer, covering research results over 1953-1969 on supersonic aircraft and missiles cooling problems, rarefied gas dynamics boundary layer flow, etc.  
p0120 A72-16399
- Pitching moments effect on phugoid and height mode stability of aircraft in supersonic flight  
p0236 A72-23622
- Stratospheric meteorological characteristics effects on Concorde supersonic flight performance, fuel consumption, dynamic behavior and passenger comfort  
p0349 A72-28876
- Variable sweep wings aerodynamic characteristics in subsonic, transonic and supersonic flight, considering lift, drag, stability and control  
p0461 A72-36976
- Computer program for automated design of long haul transport aircraft, discussing cost effectiveness of composite materials for aircraft structure  
[AIAA PAPER 72-794] p0498 A72-38121
- Supersonic aircraft energy turns.  
p0599 A72-44196
- Raindrop breakup in the shock layer of a high-speed vehicle.  
p0616 A72-45780
- Design and evaluation of aircraft configuration for reduction of sonic boom pressures by alteration of shock wave strengths  
[NASA-CR-2070] p0572 A72-30007
- Influence of atmospheric structure and composition on supersonic flight  
[NASA-TT-F-693] p0578 A72-30551
- Analysis of heat transfer processes along external and internal surfaces of high speed modern aircraft  
[AD-744830] p0648 A72-33952
- SUPERSONIC FLOW**
- Supersonic and hypersonic flows with attached shock waves over delta wing at angle of attack, deriving unified theory for flow field  
p0017 A72-12030
- Unsteady supersonic flow disturbance by slender bodies in strong contact discontinuities in shock tube studies  
p0071 A72-15507
- Symmetrically deformed delta wing in supersonic flow, considering leading edge flow separation induced vortices effects on downwash, pressure distribution and aerodynamic characteristics  
p0072 A72-15741
- Three dimensional velocity field excitation by thin airfoil vibrations in supersonic flow, deriving function in semispace to satisfy boundary constrained wave equation  
p0141 A72-18111
- Supersonic flow patterns near yawed obstacles around flat plate sharp leading edge with high pressure regions in reversed separated flow zone  
p0142 A72-18122
- V-shaped wings supersonic characteristics at 0-15 deg angles of attack, investigating flow structure between wings by pitot tube rake  
p0142 A72-18129
- Book on ideal and real compressible fluid dynamics covering supersonic flow past airfoils and shock wave interaction with laminar boundary layer  
p0233 A72-23045
- Supersonic flow around thin cruciform wing with antisymmetrical angle of attack distribution and horizontal plane with leading edge, considering flow separation at edges  
p0246 A72-25118
- Linearized method of characteristics application to supersonic flow past oscillating flat plate cascades with supersonic leading edge locus  
[AIAA PAPER 72-377] p0287 A72-25401
- Unsteady aerodynamic loadings of flexible aircraft with nonplanar wings and wing-tail surfaces in supersonic flow  
[AIAA PAPER 72-378] p0287 A72-25402
- Subsonic and supersonic flow around nonaxisymmetric fuselages, deriving streamlines differential equations based on camber line distribution of source, dipole and quadrupole singularities  
[DFVLR-SONDDR-189] p0303 A72-26578
- Initial dihedral wing-body interaction for supersonic leading edges, determining expansion of velocity potential on root chord  
p0360 A72-30365
- Unified area rule for hypersonic and supersonic wing-bodies.  
p0450 A72-35251
- Near flow field and aerodynamic loading in subsonic and supersonic flow over body-wing configuration, surveying numerical, kernel function and image methods  
p0457 A72-36390
- Generating high Reynolds-number flows.  
p0501 A72-38222
- Jet aircraft noise sources in subsonic and supersonic exhaust mixing process, suppressing noise via turbofan exhaust speed reduction  
p0503 A72-38380
- Flow separation at the edges of some types of tail sections used in supersonic aircraft and in rocket technology  
p0507 A72-39597
- Unsteady aerodynamic and aeroelastic effects in turbomachine blade cascades supersonic flow, discussing trends in fan and compressor technology  
p0551 A72-40969
- Aeroelastic optimization of a panel in high Mach number supersonic flow.  
p0593 A72-43327
- Conical caret wings supersonic characteristics, examining flow transition from weak to strong attached shock waves  
p0611 A72-45114
- Development of methods for determining inlet shock position from wall static profiles in mixed compression supersonic inlet  
[NASA-TN-X-2397] p0096 A72-12780
- Second order solution of three dimensional, supersonic flow over smooth body with shock producing protuberance  
[AD-728501] p0100 A72-12985
- FORTRAN 4 computer program for calculating supersonic flow on windward side of conical delta wings by method of lines  
[NASA-TN-X-2438] p0109 A72-13271
- Theoretical pressure distributions on caret and plane delta wings for supersonic flow  
[ARC-CP-1178] p0202 A72-15952
- Drag of supersonic parachutes in dependence of Mach and Reynolds numbers  
p0204 A72-15967
- Inlet, engine, and exhaust nozzle tests for supersonic propulsion system  
[NASA-TN-X-67494] p0210 A72-16692
- Flow field analysis of aircraft configurations using finite difference technique for numerical solution to three dimensional, unified, supersonic/hypersonic, small disturbance equations  
[NASA-CR-1926] p0221 A72-17207
- Flow charts, subroutines, and computer program for solving unified supersonic/hypersonic, small disturbance equations for flow around aircraft configurations  
[NASA-CR-1927] p0222 A72-17208
- Jet noise suppression by splitting supersonic nozzle flow into separate jets by overexpansion

# SUPERSONIC FLOW INLETS

# SUBJECT INDEX

into multilobed divergent nozzle  
[NASA-TN-D-6667] p0249 N72-17990

Woodward panel method used to calculate loads on slender bodies with small aspect ratio wings for supersonic flow  
[PPA-AU-635-PT-1] p0317 N72-19995

Theoretical design of maximum thrust nozzles with nonequilibrium, chemically reacting, supersonic gas flows  
[AD-737378] p0390 N72-23947

Design and performance data of technique for generating nonuniform flow similar to discharge of impulse supersonic compressor flow  
[NASA-CR-112097] p0588 N72-31303

Lift curve slope and aerodynamic center position of wings in inviscid supersonic and subsonic flow  
[ESDU-70012] p0617 N72-31990

**SUPERSONIC FLOW INLETS**  
U SUPERSONIC INLETS  
SUPERSONIC FLUTTER

Automated optimization for preliminary design of supersonic aircraft wings, noting flutter, stresses and resonant frequency as dynamic constraints  
[AIAA PAPER 72-333] p0286 A72-25368

Kernel function procedure for determining aerodynamic forces of planforms using linearized oscillating supersonic surface theory  
[X-28-445] p0266 N72-18999

**SUPERSONIC HEAT TRANSFER**  
Surface patterns from ablating, melting and flowing materials in supersonic flow of wind tunnel, rocket motor and flight test environments, comparing with theory  
[AIAA PAPER 72-313] p0285 A72-25247

**SUPERSONIC INLETS**  
Mach 2.65 axisymmetric mixed-compression inlet system diffuser and boundary layer bleed system performance estimates confirmed by tests  
[AIAA PAPER 72-45] p0134 A72-16959

Combined viscous-inviscid analytical procedure for predicting boundary layer effects on supersonic inlet flow field  
[AIAA PAPER 72-44] p0134 A72-16975

Radial velocity distribution at supersonic compressor inlet from duct-cowl and wall pressure measurements  
[ONERA, TP NO. 975] p0230 A72-22812

Application of quadratic optimization to supersonic inlet control.  
p0599 A72-44195

Experiment of supersonic air intake buzz.  
p0603 A72-44496

Supersonic aircraft engine inlet performance in terms of pressure recovery, discussing oblique shock wave formation ahead of entrance to improve efficiency  
p0611 A72-44991

Tolerance of Mach 2.50 axisymmetric mixed-compression inlets to upstream flow variations causing changes in free stream Mach number and angle of attack  
[NASA-TN-X-2433] p0099 N72-12979

Controller, independent of other intake controllers and aircraft data systems, and wind tunnel testing of supersonic intake control system  
p0212 N72-16706

Forebody and forebody/wing configuration data for supersonic inlet performance and distortion during maneuvering flight  
p0212 N72-16710

Destabilizing factors affecting supersonic inlets and turbofan engines of propulsion system  
p0212 N72-16711

Velocity distribution at supersonic compressor inlet in wind tunnel tests  
p0213 N72-16713

Inlet design and thermodynamic cycle of turbojet engine at supersonic speeds with normal shock  
p0213 N72-16717

Low speed wind tunnel tests of supersonic air intake with various auxiliary intakes, using twin engine aircraft configuration  
p0213 N72-16718

Wind tunnel tests to determine performance of bicone inlet designed for Mach 2.5 with internal distributed compression and 40 percent internal contraction  
[NASA-TN-X-2416] p0214 N72-16723

Transonic and supersonic wind tunnel test data on intake performance of supersonic mixed compression inlet flow  
[NASA-CR-1977] p0264 N72-18786

Calculation of shock wave reflection in supersonic inlets using method of characteristics including Mach disc problem  
[ONERA-WT-183] p0266 N72-19005

**SUPERSONIC JET FLOW**  
High speed jet noise source physical properties interpretation by theory and scale-model experiments for supersonic transport aircraft noise suppression problem  
p0016 A72-11973

Supersonic and subsonic jet flows coexistence in constant section duct, analyzing pressure on walls and in fluid and schlieren visualization  
[ONERA, TP NO. 976] p0230 A72-22813

Aerodynamic noise generation mechanism of ideally expanded supersonic jet based on large scale flow instabilities, deriving mathematical model  
p0241 A72-24331

Supersonic jet exhaust noise radiation from turbulent shear layer instability waves, noting acoustic energy flux dependence on streamwise distance  
p0355 A72-29581

Noise measurements during shock free and underexpanded operation modes of supersonic cold model jet at moderate exit Mach number  
p0395 A72-32017

Acoustic attenuation and thrust loss incurred by shrouded multistage supersonic jet noise suppressor  
[AIAA PAPER 72-642] p0416 A72-34090

Supersonic jet noise mechanisms and scaling laws, studying acoustic fields for rectangular and axisymmetric nozzle configurations  
[AIAA PAPER 72-641] p0416 A72-34091

Effect on supersonic jet noise of nozzle plenum pressure fluctuations.  
p0450 A72-35243

Wall porosity and angle of attack effects on jet stretcher flow field for supersonic engine inlet testing, using three dimensional method of characteristics  
[AIAA PAPER 72-1025] p0558 A72-41603

Problem of uniform-jet flow around an airfoil  
p0560 A72-42271

Correlation of total sound power and peak sideline overall sound pressure level for subsonic and supersonic jets of aircraft engine exhaust  
[NASA-TN-X-68059] p0427 N72-24711

**SUPERSONIC NOZZLES**  
Analysis of losses in scramjet exhaust expansion nozzles and evaluation of methods for design of exhaust expansion systems to maximize thrust and minimize sum of losses  
[AD-736465] p0388 N72-23263

Theoretical design of maximum thrust nozzles with nonequilibrium, chemically reacting, supersonic gas flows  
[AD-737378] p0390 N72-23847

**SUPERSONIC PRESSURE DISTRIBUTION**  
U PRESSURE DISTRIBUTION  
U SUPERSONIC FLOW  
**SUPERSONIC SPEEDS**

Supersonic ribbon parachute testing by transonic wind tunnel, rocket sled and water channel simulator  
p0006 A72-10305

Supersonic aerodynamic influence coefficients matrices calculation for wings of arbitrary planform, constructing computer program  
p0314 A72-28142

Sonic boom induced flow field at supersonic/hypersonic speeds, using shock expansion method and hypersonic equivalence principle for sharp and blunt nosed bodies  
[AIAA PAPER 72-652] p0415 A72-34082

Quasi-homogeneous approximation for wing with curved subsonic leading edges at supersonic speeds.  
[ICAS PAPER 72-54] p0556 A72-41176

Application of linear stochastic optimal control theory to design of control system for air inlet of supersonic propulsion system  
[NASA-TN-X-67905] p0079 N72-11897

Aerodynamic forces and pressure distribution measured on isolated slender wings and slender

Problems and solutions related to the design of a control augmentation system for a longitudinally unstable supersonic transport. [AIAA PAPER 72-871] p0505 A72-39128

Economic and social aspects of commercial aviation at supersonic speeds. [ICAS PAPER 72-51] p0559 A72-41851

Wing flutter prevention in SST structural design, using finite element model and lifting surface aerodynamic theory p0565 A72-42760

Sound generation and scale model experiments to suppress noise in turbulent jet flow eddies of supersonic transport aircraft [ARC-32723] p0034 N72-10254

Supersonic transport aircraft and BAC 221 aircraft piloted flight simulation near zero rate climb velocity for determining aircraft maneuver controllability at low speed [ARC-CP-1165] p0043 N72-11048

Possible catalytic reduction of stratospheric ozone by nitrogen oxides emitted from SST aircraft [UCRL-20568] p0045 N72-11334

System and method for position locating for air traffic control involving supersonic transports [NASA-CASE-GSC-10087-3] p0091 N72-12080

Supersonic aerodynamic design technology for civil aircraft p0102 N72-12999

Aerodynamics and flight stability of oblique wing-body combinations and application to supersonic transport aircraft p0105 N72-13018

Technology advances for second generation supersonic transports p0105 N72-13019

Stratospheric turbulence and temperature gradient measurements for supersonic transport flights [NRC-12318] p0159 N72-14379

Performance criteria, including engine air flow matching requirements, of axisymmetric mixed compression intake for supersonic transport p0211 N72-16703

Galactic and solar cosmic radiation dosage to flying personnel and passengers onboard SST p0223 N72-17721

High altitude radiation instrumentation system for dose and linear energy transfer spectral measurements for supersonic transport program p0224 N72-17722

Flight safety standards and air traffic control problems of supersonic aircraft passenger service. [NASA-TT-P-13952] p0250 N72-18000

Computer program for calculating sonic boom propagation during supersonic transport flight maneuvers [AD-735297] p0380 N72-22997

Nitric oxide production in stratosphere from natural sources and SST operation [REPT-101] p0469 N72-26287

Fatigue tests of supersonic transport structures with emphasis on thermal cycle p0539 N72-29896

Method for checking fatigue resistance of structural design detail for SST p0541 N72-29905

## SUPERSONIC TURBINES

High tip speed low loading transonic fan rotor design for weak oblique shocks with improved efficiency and stall margin [AIAA PAPER 72-83] p0180 A72-18951

Supersonic turbine cascade flow properties and pressure distributions on blades, comparing calculated results with experimental data [ASME PAPER 72-GT-47] p0296 A72-25639

Optimal arrangement of conical nozzles in a segment of a partial supersonic turbine stage p0509 A72-39913

Analysis of lubricant system used in civil supersonic gas turbine engine p0050 N72-11697

Design and performance of supersonic stator and rotor blading [NASA-TM-X-67961] p0097 N72-12783

FORTRAN 4 computer program for design of two-dimensional supersonic turbine rotor blades with boundary layer correction [NASA-TM-X-2434] p0099 N72-12975

## SUBJECT INDEX

### SUPERSONIC WIND TUNNELS

Flat plate boundary layer transition equations for supersonic wind tunnels, taking into account free stream turbulence p0196 A72-21616

Laminar/turbulent boundary layer transition on parabolic wing profile in supersonic wind tunnel, noting critical Reynolds number increase with leading edge thickness p0227 A72-22407

Superconducting magnetic suspension and balance facility of supersonic wind tunnel for dynamic stability studies p0242 A72-24757

Superconducting coil design for magnetic suspension of supersonic wind tunnel balance p0242 A72-24759

Data acquisition and reduction for model aerodynamics in superconducting magnetic suspension and balance of supersonic wind tunnel facility p0243 A72-24766

Supersonic aircraft wing form influence on sonic boom, discussing supersonic wind tunnel tests for noise reduction p0509 A72-39931

Flow quality improvements in a blowdown wind tunnel using a multiple shock entrance diffuser. [AIAA PAPER 72-1002] p0557 A72-41587

Evaluation of transonic and supersonic wind-tunnel background noise and effects of surface pressure fluctuation measurements. [AIAA PAPER 72-1004] p0557 A72-41588

Single screw variable nozzle for varying Mach number in supersonic wind tunnels [RR-018] p0257 N72-18256

Supersonic wind tunnel extension for transonic profile measurements [DLR-MITT-72-02] p0468 N72-26213

### SUPPORT SYSTEMS

#### NT GROUND OPERATIONAL SUPPORT SYSTEM

#### NT GROUND SUPPORT SYSTEMS

#### SUPPORTS

#### NT PYLONS

#### SUPPRESSORS

Zener diode transient suppressors with electronic thermal switch for ground vehicle and aircraft applications [AD-741529] p0123 A72-16553

Large scale high aspect ratio multielement suppressor nozzle arrays testing for augmentor wings and internally blown flaps. [AIAA PAPER 72-131] p0130 A72-16888

Designs for future military aircraft crash sensors, ignition source suppression system, and automatic activation circuitry [AD-729870] p0153 N72-14006

Test methods for infrared suppressors to determine their effectiveness in masking aircraft infrared emissions [AD-729603] p0157 N72-14272

Dual antenna method for suppressing reflections from underside of moving aircraft [JPBS-55908] p0386 N72-23126

### SURFACE CHEMISTRY

#### U SURFACE REACTIONS

#### SURFACE CRACKS

The surface crack: Physical problems and computational solutions; Proceedings of the Winter Annual Meeting, New York, N.Y., November 26-30, 1972. p0600 A72-44226

The surface flaw in aircraft structures and related fracture mechanics analysis problems. p0600 A72-44228

### SURFACE DISTORTION

Conformal mapping procedure for numerical generation of airfoils with local curvature singularities, presenting test problem results for zero trailing edge angle p0556 A72-41259

### SURFACE EROSION

#### U EROSION

#### SURFACE FINISHING

Clam seals comparison with elastomers, discussing aircraft use, contamination, inspection, corrosion and erosion, surface finish, service life and cost p0199 A72-21941

# SUBJECT INDEX

# SURFACE WAVES

- Hardcoat anodizing of Al surfaces, discussing preparation, racking, equipment and post treatments [SAE PAPER 720341] p0292 A72-25598
- Polishes and corrosion removers for aluminum surfaces of Naval aircraft [AD-733403] p0260 N72-18602
- Scuff resistant properties of steel materials used to finish spur and helical gears [AD-742655] p0629 N72-32503
- SURFACE GEOMETRY**
- Computer algorithm to calculate surfaces formed by equidistant conic sections, using successive approximation method p0354 A72-29461
- Viscous interaction over concave and convex surfaces at hypersonic speeds. p0602 A72-44308
- SURFACE INTERACTIONS**
- U SURFACE REACTIONS**
- SURFACE LAYERS**
- Physicochemical processes in metal surface layers subjected to contact friction with aircraft fuels presence, noting secondary compounds and thermal oxidation acceleration p0315 A72-28183
- SURFACE NAVIGATION**
- Tethered flying rotor platform for reconnaissance, fire control and radio transmission assignments in naval missions, discussing system characteristics p0072 A72-15652
- OMEGA air and maritime navigation system development, test phase and application potential, discussing operational modes, propagation parameters, solar activity effects and signal loss p0493 A72-37796
- VHF ranging and position fixing techniques using ATS 1 and ATS 3 for ship and aircraft navigation. [NASA-CR-125538] p0209 N72-16510
- VHF ranging and position fixing techniques using ATS 1 and ATS 3 for ship and aircraft navigation - executive summary [NASA-CR-125537] p0209 N72-16511
- Development of plan for navigation systems improvements for civil aviation and maritime requirements [AD-741944] p0579 N72-30592
- SURFACE PRESSURE**
- U PRESSURE**
- SURFACE PROPERTIES**
- NT COEFFICIENT OF FRICTION**
- NT SURFACE CRACKS**
- NT SURFACE TEMPERATURE**
- Unsteady flow about two dimensional airfoils, determining surface pressure fluctuations induced by turbulent boundary layers p0003 A72-10217
- Wind tunnel tests to determine drag characteristics of airfoil covered with compliant coating of polyvinyl chloride membrane over polyurethane damping layer [AD-729921] p0160 N72-14607
- Measurement of runway and taxiway conditions at two international airports to determine effects of ground roughness on aircraft operations [NASA-TN-D-6680] p0368 N72-22023
- Surface properties and soil retention of aircraft painted with polyurethane paint, and requirements for aircraft cleaner [AD-736971] p0426 N72-24613
- Microstructural analysis to determine corrosion causes of rudder hub flanges [N72-07/18-REG/HT] p0517 N72-28132
- Survey of airfield pavement conditions at US Navy Landing Field, Crows Landing, California [AD-739316] p0518 N72-28265
- Survey of pavement conditions at US Marine Corps Air Station, Yuma, Arizona [AD-739317] p0518 N72-28266
- Survey of pavement conditions at US Navy Airfield, Monterey, California [AD-739314] p0519 N72-28270
- Scuff resistant properties of steel materials used to finish spur and helical gears [AD-742655] p0629 N72-32503
- SURFACE REACTIONS**
- Surface patterns from ablating, melting and flowing materials in supersonic flow of wind tunnel, rocket motor and flight test environments, comparing with theory [AIAA PAPER 72-313] p0285 A72-25247
- Pressure distribution on 45 deg swept half wing including effectiveness of upper surface spoiler as roll control [ARC-CP-1184] p0270 N72-19032
- SURFACE ROUGHNESS EFFECTS**
- Increased Reynolds number simulation with roughness set on aircraft model in transonic flow, investigating flow separation by parietal visualization technique p0140 A72-17846
- Runway unevenness and landing gear characteristics effects on SST vibration during taxiing, taking off and landing p0235 A72-23459
- Turbocompressor deceleration cascades blades surface roughness effects on boundary layer, noting pressure and velocity distributions [ASME PAPER 72-GT-48] p0296 A72-25640
- Wind tunnel drag measurement using ridges and gaps on airfoils [ARC-R/M-3698] p0583 N72-31002
- Measurement of three track runway and taxiway profiles for determining effect of surface conditions on airplane response to ground roughness [NASA-TN-D-69321] p0622 N72-32045
- SURFACE TEMPERATURE**
- Friction coefficient, standard wear and surface layer temperature of seal for dry friction pairs in jet engines, investigating crystal lattice parameters p0185 A72-19768
- Ice formation on helicopter rotor blades, discussing atmospheric moisture and temperature conditions, blade surface temperature, centrifugal and aerodynamic forces and preventive measures p0309 A72-27414
- Micrometeorologic measurements of earth surface temperature by airborne radiometers [NASA-TT-F-14139] p0260 N72-18621
- Infrared photographic apparatus and rotating systems, for measuring surface temperature of turbine vanes and blades [NASA-TM-X-681001] p0575 N72-30247
- Pyrometer for measuring surface temperature distribution on rotating turbine blade [NASA-TM-X-68113] p0629 N72-32459
- SURFACE TREATMENT**
- U SURFACE FINISHING**
- SURFACE VEHICLES**
- NT AIRCRAFT CARRIERS**
- NT AUTOMOBILES**
- NT LIFEBOATS**
- NT ROCKET PROPELLED SLEDS**
- NT TRUCKS**
- Zener diode transient suppressors with electronic thermal switch for ground vehicle and aircraft applications [AD-741529] p0123 A72-16553
- Twin-turboprop transport aircraft, helicopter and all-terrain ground vehicle simulators, discussing control load, visual attachment, cabin motion and sound subsystems p0362 A72-30845
- Arctic environment surface effect vehicle design, considering structures, drag, lift, propulsive power and range p0397 A72-32125
- Analysis of interrelationships of ground transportation systems and air terminal facilities in San Francisco, California area p0518 N72-28258
- Optimization model for designing surface and air intercity passenger transport systems, and application to STOL link between Toronto and Montreal [TR-72-1] p0634 N72-32972
- SURFACE WAVES**
- NT GRAVITY WAVES**
- Surface acoustic wave technology in communication systems, discussing analog and digital matched filters and navigation, ATC and collision avoidance applications p0245 A72-24940

## SURFACES

Steady and oscillatory subsonic aerodynamic loads prediction based on Doublet-Lattice method and method of images, determining chord and spanwise loading on lifting surfaces

[AIAA PAPER 72-26] p0131 A72-16917

Numerical analysis of transonic flow about thin lifting wings and analytic expressions for far field conditions

[NASA-TN-D-6530] p0045 N72-11289

Linearized lifting surface theory for determining pressure distribution on subsonic delta wing

p0379 N72-22992

## SURFACTANTS

Use of fluorocarbon surfactants to extinguish aircraft fuel fires

p0049 N72-11693

## SURGES

Zener diode transient suppressors with electronic thermal switch for ground vehicle and aircraft applications

[AD-741529] p0123 A72-16553

## SURVEILLANCE

## NT SPACE SURVEILLANCE (SPACEBORNE)

Air transportation system design for safety and efficiency, discussing navigation facilities and surveillance systems employment for blunder prevention

p0012 A72-11117

Synchronous satellite surveillance system for transoceanic ATC, using suboptimal /modified Kalman/ filter for aircraft position and velocity computation

p0191 A72-21091

Trends in civil ATC discussing plans to increase terminal capacity, surveillance system and use of multiple synchronous satellites for ocean travel efficiency improvement

p0307 A72-27103

ATC operational systems, discussing global surveillance and voice and data communication between aircraft and earth station

p0363 A72-31141

Use of multisensors in aerial reconnaissance/surveillance missions

[AD-733347] p0259 N72-18464

## SURVEILLANCE RADAR

Avionics contribution to airspace decision making problems, considering navigation, surveillance radar, collision avoidance and ATC techniques

p0002 A72-10180

Tactical ATC display system for airport surveillance, precision approach and landing and operator/aircraft/machine operations by using terminal Area Surveillance Radar

p0020 A72-12421

Air surveillance using satellite range-difference measurement from noninterrogated aircraft beacons for ATC

p0068 A72-14826

Airborne traffic display system using beacon and radar surveillance network and ground computer processing

p0137 A72-17329

Aircraft proximity control for ATC system using national secondary surveillance radar /SSR/ for CAS-PWI functions

p0137 A72-17330

Electronics and data processing technology effects on radar state of art, discussing automated air traffic control surveillance systems

p0241 A72-24490

Continuous wave Doppler radar with microwave oscillator for ATC measurements and surveillance

p0309 A72-27403

Secondary surveillance radar systems design and planning for ATC application

p0344 A72-28698

Surveillance radar for clutter rejection and signal loss reduction at airports, discussing system design features

p0461 A72-37046

Bearing azimuth measurement accuracy improvement by ATC beacon system/secondary surveillance radar using monopulse technique

p0461 A72-37047

ATC IC transponder used with secondary surveillance radar, discussing design features

p0461 A72-37048

ATC services configuration with secondary surveillance radar and primary radar data acquisition system, discussing signal processing by automated decoder

p0547 A72-40288

Air traffic density effect on secondary surveillance radar operation in ATC for aircraft identification and position determination; proposing selective address system

p0547 A72-40289

Discrete address beacon system /DABS/ development for surveillance and ground-air communications in support of ATC automation

p0569 A72-43151

## SURVIVAL

High performance aircraft takeoff and landing accidents, investigating survival rates

p0193 A72-21563

Survival rates in USAF accidents during 1965-69, noting visual sighting as primary rescue factor

p0194 A72-21564

Analysis of three commercial aircraft accidents to determine factors affecting survival of passengers under emergency conditions

[PAA-AM-70-16] p0150 N72-13989

Analysis of conditions and circumstances involving survival of passengers and crew following ditching of DC-9 aircraft

[NTSB-AAS-72-2] p0465 N72-26015

Analysis of survival following crashes of military aircraft and identification of areas for improvement in structural design

[AD-739370] p0481 N72-27044

## SURVIVAL EQUIPMENT

Survival and flight equipment - Conference, Las Vegas, September 1971

p0193 A72-21560

Emergency systems for helicopter crew and passenger survivability improvement, discussing use of ejection seats, extraction systems parachute bail-out and shaped explosive charges

p0195 A72-21581

Emergency Life Saving Instant Exit system in aircraft fuselage for use after crash landing, discussing design and ground testing

p0195 A72-21583

## SUSPENDING (HANGING)

## NT MAGNETIC SUSPENSION

Stability and control dynamics of helicopter hovering with heavy sling load, analyzing maneuvers for minimal excitation of pendulous motion

[AHS PREPRINT 630] p0445 A72-34488

## SUSPENSION SYSTEMS (VEHICLES)

Deterministic optimization of aircraft undercarriage suspension characteristics for taxiing induced vibration minimization, discussing damping and stiffness functions and hybrid computer solution

p0235 A72-23458

Air cushion and secondary suspension for support and guidance of linear induction motor on tracked research vehicle

[PB-204440] p0219 N72-17010

## SWEAT COOLING

Analytical method to predict coolant pressure and airflow distribution in strut-supported transpiration cooled vane for gas turbine engine

[NASA-TN-D-6916] p0528 N72-29003

## SWEEP ANGLE

## NT LEADING EDGE SWEEP

Velocities induced by distributions of infinite kinked sources and vortex lines representing wings with sweep and dihedral in incompressible flow

[ARC-R/M-3667] p0277 N72-19332

## SWEEP EFFECT

Laminar three dimensional boundary layer nonequilibrium effects at hypersonic wing swept leading edge with intensively cooled surface, considering sweep induced crossflow effect

[VPI-E-71-23] p0020 A72-12422

## SWEEPBACK

## NT LEADING EDGE SWEEP

## SWEEP WINGS

## NT ARROW WINGS

## NT DELTA WINGS

## NT SWEEPBACK WINGS

# SUBJECT INDEX

# SYMMETRICAL BODIES

Subsonic linearized theory for symmetrical cranked wings at zero incidence, presenting corrected formulas for streamwise and spanwise perturbation velocity components due to wing thickness p0013 A72-11154

Increasing lift and Reynolds number effects on displacement and skin friction of three dimensional turbulent boundary layer on infinite swept wing p0014 A72-11395

Laminar three dimensional boundary layer nonequilibrium effects at hypersonic wing swept leading edge with intensively cooled surface, considering sweep induced crossflow effect [VPI-E-71-23] p0020 A72-12422

A-300B European Airbus cantilever wing design and manufacture, discussing skin forming, skin-stringer and torsion-box assembly, automatic riveting and root-end profile machining procedures p0062 A72-14301

Incompressible boundary layer velocity profile on swept wings, comparing critical Reynolds number to straight wing value p0356 A72-29639

Elliptic-hyperbolic relaxation algorithms for solution to three dimensional nonlinear transonic small disturbance potential equation for flow about swept wings [AIAA PAPER 72-677] p0414 A72-34063

Aerodynamic test facility data on swept wings, peaky airfoils, aircraft flutter and transonic flow, discussing shock tubes and wind tunnels development p0509 A72-39846

Jet interference and lift drag ratio of swept wing aircraft with turbofan above wing [RAE-TM-AERO-1271] p0028 A72-10009

Influence of jet interference on aerodynamic coefficients of rectangular and swept wings mounted above the engine p0028 A72-10010

Design programs for swept wings in subcritical, compressible, viscous flow [NPL-AERO-NOTE-1100] p0029 A72-10018

Scale effects in flows past swept wings at transonic speeds p0073 A72-11855

Reynolds number effects in viscous-inviscid interactions on transonic swept wings p0073 A72-11856

Method for estimating transonic buffet boundary and Reynolds number effects for straight and swept wings p0073 A72-11857

Transonic wind tunnel tests of effectiveness of high lift devices on swept and straight wings in controlling flow separation p0074 A72-11860

Pressure plotting tests on swept wings for analyzing scale effect at high subsonic speeds p0075 A72-11867

Feasibility of transonic wind tunnel testing of large cord swept wing panel model for simulating wing shock location at flight Reynolds number [NASA-TN-X-67414] p0075 A72-11870

Specifications for high Reynolds number wind tunnel design for flow simulation in swept wing aircraft development tests p0077 A72-11883

Transonic wind tunnel model measurements of buffet loads and boundaries at various sweep and aspect ratio wing roots p0078 A72-11886

Wind tunnel tests of large scale swept augmentor wing model with and without horizontal tail [NASA-TN-X-62029] p0080 A72-11901

Scale effect in reattached, separated, and thin wake flow over swept wings at transonic speed [RAE-TR-71043] p0169 A72-15292

Pressure distribution on swept wing-body junction at supersonic speeds [ARC-R/H-3661] p0202 A72-15949

Pressure measurements on harmonically oscillating wing-tail configurations in incompressible speed range [DLR-PB-71-54] p0269 A72-19024

Pressure distribution on 45 deg swept half wing including effectiveness of upper surface spoiler as roll control [ARC-CP-1184] p0270 A72-19032

Nonequilibrium boundary layer flow at leading edge of highly swept hypersonic infinite span wing [PB-204710] p0328 A72-20975

Wind tunnel determination of lift induced on swept wing by two-dimensional partial-span deflected jet at Mach numbers from 0.20 to 1.30 [NASA-TN-X-2529] p0365 A72-21997

Wind tunnel tests to determine low speed aerodynamic characteristics of large scale model of advanced fixed wing fighter aircraft with thin, cranked leading edge wing [NASA-TN-D-6919] p0513 A72-27998

Vortex drag factor of untapered swept wing with part span flap, noting spanwise loading [ARC-R/H-3695] p0527 A72-28997

Wing loading theory with wings at rest in subsonic flow and control surface oscillating with small amplitude [ARC-R/H-3676] p0582 A72-30994

**SWEPTBACK TAIL SURFACES**  
Wind tunnel tests of large scale swept augmentor wing model with and without horizontal tail [NASA-TN-X-62029] p0080 A72-11901

**SWEPTBACK WINGS**  
NT ARROW WINGS  
NT DELTA WINGS  
Flutter analysis and unsteady pressure fields induced by pitching motions of wall mounted sweptback wing, verifying experimentally lifting surface theory in high subsonic range p0569 A72-43094

The sweepback effect in the subsonic region in the lower atmosphere and in the hypersonic region at high altitudes p0611 A72-44983

Effect of wing tip shape on vortex sheet rolling up applied to study of straight or moderately sweptback wings [NASA-TT-F-14111] p0169 A72-15273

Shallow parallel-edge sandwich shell buckling load calculation using Rayleigh-Ritz method, with application to sweptback wing panels [DLR-PB-71-30] p0174 A72-15879

Pressure distribution on sweptback wing at subsonic speeds noting boundary layer transition [ARC-CP-1215] p0583 A72-31003

Aerodynamic characteristics and performance of Russian M-4 supersonic long range aircraft [AD-744159] p0623 A72-32051

**SWIRLING**  
Swirling flows vortex breakdown in nozzles, diffusers and combustion chambers, considering analogy to boundary layer separation p0457 A72-36385

Swirl can, full-annulus combustion chambers for high performance gas turbine engines [NASA-CASE-LEW-11326-1] p0172 A72-15714

**SWIRLING WAKES**  
U TURBULENT WAKES

**SWITCHES**  
NT ELECTRIC RELAYS  
NT SWITCHING CIRCUITS

**SWITCHING**  
NT BEAM SWITCHING  
SWITCHING CIRCUITS  
Ferrite component for waveguide commutator used as microwave switching element and modulator, noting application in navigation instruments and avionics p0598 A72-43768

Eight position, solid state, rotary switch [AD-734758] p0275 A72-19277

**SWITCHING ELEMENTS**  
U SWITCHING CIRCUITS

**SYMBOLIC PROGRAMMING**  
NT COMPUTER PROGRAMMING

**SYMMETRICAL BODIES**  
NT AXISYMMETRIC BODIES  
NT BODIES OF REVOLUTION

## SYNCHRONISM

## SUBJECT INDEX

## SYNCHRONISM

## NT FREQUENCY SYNCHRONIZATION

## SYNCHRONOUS SATELLITES

Synchronous satellite surveillance system for transoceanic ATC, using suboptimal /modified Kalman/ filter for aircraft position and velocity computation

p0191 A72-21091

Aerosat program for ATC and communications via four geostationary satellites over Atlantic and Pacific Oceans, discussing technical and financial international provisions

p0191 A72-21203

Aircraft and water vehicles mobile communications via stationary satellite, discussing optimum multiple access and repeater configuration [AIAA PAPER 72-565]

p0308 A72-27376

Geostationary satellite system for air navigation via voice and data communication, discussing ground facilities and avionics

p0546 A72-40284

## SYNCHROTRON NOISE

## U ELECTROMAGNETIC NOISE

## SYNOPTIC METEOROLOGY

Thunderstorm-associated aircraft mishaps relation to surrounding synoptic scale meteorological conditions, discussing storm interior condition contribution to flight stability upset

p0347 A72-28851

Synoptic meteorological parameters vs CAT encountered in stratosphere by XB-70 airplane, presenting frequency distributions and probability tables

p0349 A72-28867

Persistent intense CAT in upper level frontal zone, discussing synoptic features, vertical wind shears, radar echoes and turbulence intensity

p0356 A72-29622

Russian book - Aviation meteorology

p0560 A72-42024

## SYNTHESIS

Synthesis and properties of aliphatic ester for turbine lubrication in jet aircraft

p0050 N72-11696

## SYNTHETIC ARRAYS

Linear HF radar antenna array aperture synthesis for ionospherically propagated signal reception in airplane for achievement of ideal directivity without ionospheric compensation

p0551 A72-41080

## SYNTHETIC FIBERS

## NT GLASS FIBERS

## NT NYLON (TRADEMARK)

## SYNTHETIC RESINS

## NT ACRYLIC RESINS

## NT EPOXY RESINS

## NT NYLON (TRADEMARK)

## NT THERMOPLASTIC RESINS

## NT THERMOSETTING RESINS

## SYNTHETIC RUBBERS

## NT ELASTOMERS

Evaluation of experimental membranes, nonskid compounds, adhesives, and earth anchors used in constructing assault type runways for military aircraft

p0157 N72-14286

## SYSTEM FAILURES

Self organizing adaptive aircraft control system with C criterion pitch axis performance and failure compensation

p0053 A72-12920

Reliability program for SAAB 37 Viggen airborne computer, discussing prototype and components operating tests and failure rates

p0239 A72-23984

Aircraft industry product support role in time delays minimization for aircraft operators, discussing malfunction report, minimum equipment decision and fault diagnosis

p0401 A72-32456

Avionics effects on airline operations timekeeping, considering gains due to all-weather capability and engine monitoring vs possible losses due to equipment failures

p0402 A72-32461

Breakdown of automatic pilots or auxiliary stabilization systems on helicopters

p0082 N72-11918

Fault isolation capabilities for general purpose digital computer used in guidance and control applications

p0336 N72-21220

## SYSTEMIZATION

## U SYSTEMS ENGINEERING

## SYSTEMS ANALYSIS

Conventional open and closed loop servo analysis methods applied to Naval aircraft approach power compensator systems, using pilot model concepts [AIAA PAPER 72-124]

p0131 A72-16922

Collisional avoidance system operation evaluation, noting protected airspace volume requirement

p0179 A72-18835

Two-variable second order system for multivariable systems predictive control, deriving algorithm for near time optimal control

p0185 A72-19709

Airfield surface system fast-time computer simulation model for airport planning systems analysis

p0187 A72-20341

Ground based ATC information processing systems analysis, considering controllers work load

p0229 A72-22778

ATC systems analysis by computerized real time environmental simulation, taking into account new aircraft types, navigation and supervision aids

p0230 A72-22782

ATC system, discussing flight data and radar processing functions and terminal automation program

p0300 A72-25875

Complete aircraft systems reliability and maintainability, discussing extraordinary variances causes, faulty data inferences and operational testing for equipment specifications validation

p0343 A72-28358

Optimally sensitive adaptive control techniques for systems with unknown time-varying parameters, suggesting applicability to ATC

p0490 A72-37289

Synthesis and analysis of a fly-by-wire flight control system for an F-4 aircraft [AIAA PAPER 72-880]

p0505 A72-39119

System analysis and synthesis for B-52 Control Configured Vehicle program, discussing flutter mode and maneuver load control and augmented stability configurations [AIAA PAPER 72-869]

p0506 A72-39130

System analysis for an airline operational environment through a computerized network simulation model

p0551 A72-41077

A systems analysis of subsonic versus supersonic jet travel

p0604 A72-44580

The heavy lift helicopter - An operations research/technology/performance blend

p0604 A72-44581

Evaluation of airway operations systems in Indonesia, Laos, Malaysia, and Thailand with proposed courses of action, equipment requirements, and economic factors in aeronautical telecommunications

p0033 N72-10171

Procedures for predicting pilot-vehicle-flight control system performance

p0153 N72-14007

Evaluation of thrust magnitude control for bomber defense missiles

p0264 N72-18788

Applying systems analysis techniques to aircraft maintenance to achieve aviation safety

p0268 N72-19017

Main methods of fuel flow measurement and factors for consideration in deciding on type of meter to use for various requirements [AGARDOGRAPH-160-VOL-3]

p0434 N72-25420

Basic turbine concepts including flow, energy transfer, and performance characteristics

p0473 N72-26687

Systems analysis of analog and digital voice coding techniques for use with satellite based air traffic control system

p0485 N72-27701

- Design and development of electric power supplies for use with transport aircraft in 1980 to 1985 time period  
[NASA-CR-120939] p0517 N72-28028
- Design analysis of rotating plate drive for 2500 horse power helicopter rotor gearbox  
[NASA-TM-X-68117] p0521 N72-28504
- General problems of layout and operation of equipment in aircraft power systems

- Six-component strain gage sting balance for small wind tunnel models  
[ARL/A-NOTE-331] p0159 A72-14462
- Analysis of wiring weight, conductor weight, and conductor losses as function of system voltage in aircraft electrical power systems  
[AD-732001] p0207 A72-16164
- Water-glycol convective cooling system for Mach 6 hypersonic transport airframe  
[NASA-CR-1918] p0251 A72-18011
- Effectiveness evaluation of automatic spin prevention system for fighter aircraft  
[NASA-TN-D-6670] p0252 A72-18012
- Feasibility analysis of variable speed constant frequency inverter system using dc link approach for aircraft use  
[AD-734067] p0273 A72-19065
- Management planning and operation of test facilities for effective application to development of systems and equipment for aerospace vehicles  
[AD-731548] p0276 A72-19307
- Application of fluidic pneumatic elements and systems for control of aircraft, missiles, and spacecraft  
[AD-734715] p0277 A72-19343
- Evaluation program for frequency separated display principle in aircraft instrument panels  
[AD-735915] p0334 A72-21027
- Tests to determine design feasibility of unsurfaced soil facilities for operations of C-5A aircraft  
[AD-735344] p0337 A72-21398
- Design of optimal feedback controller for multivariate linear systems having subsystem sensitivity constraints  
[NASA-TN-X-68041] p0367 A72-23195
- Design of duct turbine as drive system for 20 in. turbofan engine simulators  
[NASA-TN-X-68081] p0428 A72-24829
- Development of thrust control system for application to control of aircraft and spacecraft  
[NASA-CASE-MSC-13397-1] p0436 A72-25595
- System design and flight test evaluation of range only multiple aircraft navigation system  
[AD-738696] p0472 A72-26527
- Design, development, and evaluation of three-axis hydrofluidic stability augmentation system for UH-1 helicopter  
[AD-739559] p0481 A72-27045
- Analysis of secondary power system for use with advanced rotary wing aircraft for reliable production of electric power  
[AD-739480] p0482 A72-27069
- Gas seal designs for aircraft gas turbine engines  
[AD-739922] p0521 A72-28518
- Design of security system for civil aviation cargo transportation  
p0526 A72-28985
- Performance tests of manual control displays and formats to evaluate effectiveness in performing precision tracking tasks  
[AD-742127] p0532 A72-29031
- Design and evaluation of automatic pilot to reduce excursions in altitude of jet transport aircraft during atmospheric turbulence  
[NASA-TN-D-6869] p0572 A72-30009
- Design of single stage fan with tip speed of 1800 ft/sec and hub/tip ratio of 0.5 for producing pressure ratio of 2.285 to 1  
[NASA-CR-120907] p0580 A72-30774
- Design of height control test equipment for VTOL aircraft  
[NAL-TR-275] p0588 A72-31451
- SYSTEMS MANAGEMENT**
- Pilots in aircraft systems management involving machine and air traffic environment  
p0055 A72-13419
- SYSTEMS STABILITY**
- Pod-mounted jet engine follower force instability, analyzing two degrees of freedom system dynamics  
p0232 A72-22938
- Liapunov functional stability analysis in structural dynamics problems including wave equations with nonlinear damping  
p0235 A72-23457
- T**
- T TAIL SURFACES**
- Dynamic aspects of Fokker F-28 aircraft design.  
p0566 A72-42831

## SUBJECT INDEX

TAKEOFF

- Full scale wind tunnel tests of small unpowered jet aircraft with T tail  
[NASA-TN-D-6573] p0030 N72-10031
- Development of technique for measuring steady state lift loads on aircraft with T-tail configuration and determination of flutter speed  
[RAE-TR-71035] p0249 N72-17991
- T-2 AIRCRAFT**  
Mitsubishi T-2 two-place supersonic trainer, describing prototype airframe and propulsion system design and operational features  
p0187 A72-20306
- Supercritical thick wing for structural weight reduction and increased cruise speeds flight tested on Navy T2-C aircraft  
[SAE PAPER 720320] p0290 A72-25583
- T-33 AIRCRAFT**  
Flight test of direct side force control by rudder deflection and asymmetrical drag on T-33 airplane, noting use in dive bombing  
p0310 A72-27520
- Flight experiments to determine horizontal visual restriction effects on T-33 aircraft front cockpit during approaches and landings  
p0395 A72-31697
- Development of direct side force control on aircraft during flight and application to improved bombing accuracy  
[AD-735294] p0334 N72-21030
- T-38 AIRCRAFT**  
Effect of high temperature hydraulic fluid on operation of control surface servovalves installed on T-38 aircraft  
[AD-734259] p0271 N72-19042
- Evaluation of modified instrument lighting system installed in T-38 aircraft  
[AD-737121] p0385 N72-23043
- T-53 ENGINE**  
Portable self contained ultrasonic field inspection equipment for nondestructive crack detection in T53 gas turbine compressor disks  
p0009 A72-10814
- Metallographic and fractographic analyses of cracking in T53-L13 gas turbine engine compressor disks  
p0010 A72-10816
- T-63 ENGINE**  
T63/250 engine program current status, covering turboshaft helicopter engine and fixed wing aircraft powerplant models and applications  
[SAE PAPER 720350] p0292 A72-25601
- TABLES (DATA)**  
Graphs and tables of service cost for intraurban transportation system  
[NASA-CR-114341] p0036 N72-10985
- Documentation of data used in intraurban transportation analysis appendix  
[NASA-CR-114343] p0036 N72-10987
- Prediction tables of air carrier operations at large and medium hubs  
[EC-200] p0105 N72-13021
- Tables and graphs of canopy geometry effects on drag coefficients in cross parachutes  
[AD-731023] p0167 N72-15017
- Analysis of emissions from aircraft piston and gas turbine engines - tables  
[PB-207107] p0435 N72-25589
- Tables on ranking air carrier passenger enplanements for fiscal year 1971  
p0526 N72-28981
- TACAN**  
Tactical ATC display system for airport surveillance, precision approach and landing, and operator/aircraft/machine operations by using terminal Area Surveillance Radar  
p0020 A72-12421
- VOR, Direct Measuring Equipment and TACAN polar coordinate radio navigation systems history, improvements and future development  
p0022 A72-12646
- Operational requirements for VORTAC system improvements, including precision VOR, navigation broadcast, DME capacity and CAS signals synchronization  
p0138 A72-17336
- Integrated inertial-VOR-DME or inertial-TACAN navigation system, presenting slant range and bearing adjustment procedure via least squares method  
p0416 A72-34136
- Digital computers for navigation and guidance systems and fire control systems in tactical aircraft  
p0336 N72-21227
- Development of method for determining distance measuring equipment traffic at Tacan sites under saturated and non-saturated conditions  
[AD-737038] p0377 N72-22663
- TACTICAL AIR NAVIGATION**  
**U TACAN**  
**TACTICS**  
Game theoretical modeling of fighter aircraft turning tactics competition in pursuit combat, using minimax technique  
[AIAA PAPER 72-950] p0563 A72-42359
- TAGGING**  
**U MARKING**  
**TAIL ASSEMBLIES**  
Antitorque devices to replace tail rotor on single rotor shaft-driven helicopters  
[AD-729860] p0152 N72-14001
- Pressure measurements on harmonically oscillating wing-tail configurations in incompressible speed range  
[DLR-FB-71-54] p0269 N72-19024
- TAIL MOUNTINGS**  
**U TAIL ASSEMBLIES**  
**TAIL PLANES**  
**U HORIZONTAL TAIL SURFACES**  
**TAIL SURFACES**  
**NT HORIZONTAL TAIL SURFACES**  
**NT SWEPTBACK TAIL SURFACES**  
**NT T TAIL SURFACES**  
Unsteady aerodynamic loadings of flexible aircraft with nonplanar wings and wing-tail surfaces in supersonic flow  
[AIAA PAPER 72-378] p0287 A72-25402
- Small transport aircraft horizontal tail surfaces flow characteristics determination for stress calculation during flight in turbulent atmosphere  
p0359 A72-30284
- Problems of interference between oscillating surfaces in subsonic flow  
p0598 A72-43809
- Dynamic elastic stability of finned beam streamlined by supersonic gas flow with application to aircraft empennage  
[AD-736487] p0369 N72-22033
- TAILS (ASSEMBLIES)**  
**U TAIL ASSEMBLIES**  
**TAKEOFF**  
**NT VERTICAL TAKEOFF**  
Aircraft copilot assistance to pilot in flight phases, emphasizing takeoff and landing and man machine system reliability  
p0361 A72-30815
- U.S.S.R. civil aviation regulations on takeoff and landing minimum conditions for cloud ceilings and visibility range for various aircraft characteristics and equipment  
p0361 A72-30820
- Meteorological and takeoff and landing information transmission by proposed automated meteorological and information service, discussing air-ground data link  
p0547 A72-40287
- Noise reduction for climbing takeoff and V/STOL aircraft affecting stability  
[DLR-FB-71-10] p0042 N72-11040
- Helicopter lift margin system to aid in determining power requirements for takeoff and landing  
[AD-725207] p0043 N72-11053
- Lift devices for improved takeoff and landing performance of civil transport aircraft  
p0102 N72-12997
- Force survival model for analysis of strategic bomber basing concepts in prelaunch survival mode  
[AD-732193] p0217 N72-16991
- Evaluation of takeoff and landing performance of commercial STOL airplanes  
[NASA-TT-P-14166] p0269 N72-19023
- Aircraft accident involving Boeing 747 aircraft during takeoff from San Francisco International Airport on 30 July 1971  
[NTSB-AAR-72-17] p0573 N72-30012
- Aircraft accident involving Boeing 737 aircraft during takeoff from Philadelphia, Pennsylvania

airport on 19 Jul. 70  
[PB-208664] p0641 N72-33042

**TAKEOFF RUNS**

Atmospheric temperature and pressure altitude effects on runway lengths and aircraft takeoff weights  
[ASCE PREPRINT 1242] p0002 A72-10193

TU-154 lift and drag augmenting devices for takeoff and landing characteristics improvement  
p0056 A72-13472

High performance aircraft takeoff and landing accidents, investigating survival rates  
p0193 A72-21563

Buccaneer Mk 2 and F-4K Phantom takeoff and landing performance improvement due to boundary layer control by leading and trailing edge blowing  
p0233 A72-22973

Turbulent jets effectiveness in protection of aircraft surfaces from rain, describing wind tunnel simulation of takeoff and landing  
p0247 A72-25137

Propulsion system flexibility in V/STOL aircraft with one lift-cruise engine, discussing takeoff thrust requirements and cruise fuel consumption efficiency  
[ASME PAPER 72-GT-105] p0299 A72-25670

Application of electronic data processing airport analysis in airlines operations and for manufacturers.  
p0489 A72-37277

Change in aircraft congestion due to introduction of STOL aircraft into airport operation  
p0476 N72-27007

Development of thrust augmentor device to assist in takeoff of jet aircraft  
p0538 N72-29810

Development of mathematical models for estimating takeoff distance over barriers between thirty and fifty feet high  
[EG-5/1-AMEND-A] p0619 N72-32014

Properties of atmospheric turbulence at low altitudes and effect on aircraft during landing approach and takeoff  
p0621 N72-32030

Analysis of factors affecting lateral-directional handling qualities of aircraft during short takeoff flight  
p0621 N72-32033

Analysis of aircraft noise generation and optimization of flight paths to minimize effects of aircraft noise during takeoff  
[NASA-TT-F-14468] p0622 N72-32042

**TAKEOFF SYSTEMS**

**U AIRCRAFT LAUNCHING DEVICES**

**TANDEM WING AIRCRAFT**

Tail first /canard/ and tandem wing configurations for natural STOL, discussing low cost aerial work aircraft  
p0143 A72-18285

Interference induced unsteady aerodynamic forces on tandem airfoils in subsonic flow, using two dimensional model  
p0186 A72-20101

**TANKER AIRCRAFT**

Development of training program for RF-4C aircraft aerial refueling training based on computer systems data  
[AD-736409] p0370 N72-22037

**TANKERS**

Electrical discharge-produced explosions aboard supertankers during cleaning operation and electrostatic charging of supersonic aircraft during passage through heavy rain, noting water drop disintegration  
p0611 A72-44979

**TANKS (CONTAINERS)**

**NT FUEL TANKS**

**NT PROPELLANT TANKS**

**NT WING TANKS**

**TAPE MERGING**

**U DATA PROCESSING**

**U MAGNETIC TAPES**

**TAPE RECORDERS**

The use of airborne magnetic tape recorders for fatigue life monitoring.  
p0449 A72-34812

Methods for analysis of oscillatory pressure measurements with magnetic tape recording and digital transfer function analyzer

[ARC-CP-1205] p0534 N72-29248

**TAPERED WINGS**

**U SWEEP WINGS**

**TARE (DATA REDUCTION)**

**U DATA REDUCTION**

**TARGET ACQUISITION**

Stochastic optimization of airborne laser seeker system design parameters to maximize target acquisition probability through regression analysis of data from computerized model  
p0242 A72-24682

Passive detection radar system for bombers, calculating target distance during horizontal flight  
p0302 A72-26316

Tactical aircraft weapon system development, describing navigation, target acquisition, release point guidance and delivery modes  
[AIAA PAPER 72-896] p0505 A72-39107

**TARGET DRONE AIRCRAFT**

**NT JINDIVIK TARGET AIRCRAFT**

BQM-34A and E/P target drone aircraft versatile automatic flight control system flight test program and results for basic and advanced flight modes  
p0125 A72-16663

Resonance tests of target aircraft fitted with wing tip pods using multipoint excitation method  
[ARL/SM-371] p0465 N72-26012

**TARGET PENETRATION**

**U TERMINAL BALLISTICS**

**TARGETS**

**NT JINDIVIK TARGET AIRCRAFT**

Effects of differential target velocity, horizontal or vertical plane conditions, and air traffic controller experience on intersection time estimation accuracy of converging targets  
[AD-745119] p0630 N72-32649

**TASK COMPLEXITY**

Aircraft electronic display for pilot precise control in complex tasks, discussing clarity, stability and readability of CRT images  
p0403 A72-32632

**TASK SEQUENCERS**

**U CONTROL EQUIPMENT**

**TAXIING**

Anthropotechnical aspects of aircraft taxiing guidance in airfield runway areas, suggesting computerized operational system  
p0229 A72-22779

Deterministic optimization of aircraft undercarriage suspension characteristics for taxiing induced vibration minimization, discussing damping and stiffness functions and hybrid computer solution  
p0235 A72-23458

ICAO standardized taxiing guidance and airports surface traffic control procedures  
p0240 A72-24171

Measurement of three track runway and taxiway profiles at two international airports  
[NASA-TN-D-65671] p0041 N72-11038

Feasibility analysis of active vibration isolation in landing gear system of aircraft to reduce wing fatigue from ground induced vibration during taxiing  
[AD-730141] p0155 N72-14016

Operational evaluation of device for measuring aircraft taxi speed and distance to determine accuracy and limitations  
[AD-730096] p0219 N72-17009

Measurement of three track runway and taxiway profiles for determining effect of surface conditions on airplane response to ground roughness  
[NASA-TN-D-6932] p0622 N72-32045

TECHNIQUES

U METHODOLOGY

TECHNOLOGICAL FORECASTING

Commercial transport market and technology forecasting, considering all-cargo, STOL, SST and CTOL aircraft  
[SAE PAPER 710750] p0003 A72-10249  
Technological forecasting method evaluation for R and D planning, fitting trend curves to sets of technological data p0186 A72-20268

Technology forecasting and risk assessment in V/STOL transport area, examining mission issues and selection criteria p0228 A72-22473

Technological forecasting and long range planning in transportation, considering roles of expert opinion, trend extrapolation, normative models and social impact p0302 A72-26285

Air transport development between the UK and Europe - The next twenty years. p0462 A72-37092

Economic impact of applying advanced technologies to transport airplanes. [AIAA PAPER 72-758] p0499 A72-38128

German monograph - Model-analytical investigation of short-haul air traffic with VTOL aircraft in the Federal Republic of Germany. p0569 A72-43068

Conference on technological concepts for future transport aircraft developments in civil aviation [NASA-SP-292] p0102 A72-12995

Advanced technologies for future transport aircraft concepts in civil aviation p0102 A72-12996

Lift devices for improved takeoff and landing performance of civil transport aircraft p0102 A72-12997

Subsonic and transonic aerodynamic design characteristics of advanced civil aircraft technology p0102 A72-12998

Supersonic aerodynamic design technology for civil aircraft p0102 A72-12999

Aerodynamic technology for developing hypersonic cruise aircraft p0103 A72-13000

Forecasting trends in subsonic and supersonic propulsion aircraft technology p0103 A72-13002

Development of scramjet with airbreathing engine for cruise application p0103 A72-13003

Forecasting technology of aircraft structural components for hypersonic cruise flight p0103 A72-13004

Forecasting of structural materials usage in future aircraft designs p0103 A72-13005

Choice of materials, configurations, and load factor in aircraft design against fatigue and fracture p0103 A72-13006

Computerized structural analysis and integrated design of future aircraft p0104 A72-13007

Advanced control technology for future civil aircraft configurations p0104 A72-13008

Technological forecasting for advanced airport-airplane interface transportation systems p0104 A72-13009

Technological forecasting of future pilot-aircraft interface requirements p0104 A72-13010

Technologies of computerized flight management and control systems, automated communications systems, and navigation and surveillance systems in future avionics p0104 A72-13011

Technological and operational methods in aircraft noise abatement p0104 A72-13012

Technology assessments for advanced aircraft performance, utility, safety, and public acceptance p0104 A72-13013

Advanced technologies for improved direct lift jet V/STOL transport structure, propulsion, and performance p0104 A72-13014

Technological developments for improved helicopter design and operational capabilities p0105 A72-13015

Advanced technology applications for improving STOL transport aircraft aerodynamics, propulsion, structure, and flight dynamics p0105 A72-13016

Advanced technologies for subsonic-transonic conventional takeoff and landing transport aircraft development p0105 A72-13017

Technology advances for second generation supersonic transports p0105 A72-13019

Technological forecasting for development of hypersonic transports p0105 A72-13020

Research and development of advanced technologies for future air transportation needs [EVENT-118] p0111 A72-13584

European unity and cooperation for development of advanced aerospace technology [NASA-TT-P-14354] p0526 A72-28980

Definition, analysis and identification of technical and economic sensitivities and interfaces for integrated SPS for advanced subsonic transports [NASA-CR-112103] p0575 A72-30031

Nondestructive tests of fuel filters and other  
turbine parts, using thermography  
[AD-743081] p0591 N72-31787

**TEMPERATURE PHOTOMETERS**  
U TEMPERATURE MEASURING INSTRUMENTS

**TEMPERATURE PROFILES**  
High level Canberra flight for three dimensional  
picture of wind and temperature fields, showing  
CAT, gravity waves and smooth flight

characteristics p0311 A72-27709

**TEMPERATURE SENSORS**  
NT THERMISTORS  
Turbine inlet temperature sensor for gas turbine  
engines, using noble metal thermoelements with  
high signal level p0136 A72-17322

[SAE PAPER 720160]

Turbine engine sensors for high temperature  
applications. p0495 A72-38048

Fluidic heat sensors for measuring fuel  
temperature in jet engines p0600 A72-44280

**TEMPERATURE TRANSDUCERS**  
U TEMPERATURE MEASURING INSTRUMENTS  
U TEMPERATURE SENSORS

**TENNESSEE**  
Community reaction to aircraft noise in vicinity  
of airports in Chattanooga, Tennessee, and Reno,  
Nevada [NASA-CR-2104] p0573 N72-30011

**TENSILE CREEP**  
Statistical analysis of tensile strength and creep  
data on gas turbine engine alloys [JPRS-56002] p0428 N72-24824

**TENSILE PROPERTIES**  
Stress and strain history at point of stress  
concentration to determine effects of spectrum  
block size in fatigue testing [AD-726164] p0098 N72-12928

Thermal, tensile, and creep rupture properties of  
nickel based alloys for airfoils [NASA-TM-X-68051] p0425 N72-24585

**TENSILE STRENGTH**  
Ti alloys for aircraft structures, emphasizing  
weldability, tensile fatigue and residual  
strengths, shear-carrying qualities and fuselage  
shell design p0058 A72-13616

Statistical analysis of tensile strength and creep  
data on gas turbine engine alloys [JPRS-56002] p0428 N72-24824

**TENSILE STRESS**  
Welding airframe structures in titanium using  
tensile loading to overcome distortion. p0611 A72-45000

**TENSILE TESTERS**  
U TENSILE TESTS

**TENSILE TESTS**  
Constant high tensile stress and rapid aerodynamic  
heating effect on maraging steels and Ti and Al  
alloys, evaluating test and simulation  
procedures for design data development p0009 A72-10749

Statistical evaluation for forged jet engine parts  
tensile tests cost reduction, using regression  
analysis p0184 A72-19484

**TENSION TESTERS**  
U TENSILE TESTS

**TENSOMETERS**  
Measuring technique importance for aircraft R and  
D, emphasizing quartz tensometer, digital  
control and signal processing p0359 A72-30286

**TENSOR ANALYSIS**  
Perturbation methods in atmospheric flight  
mechanics. p0614 A72-45350

**TERMINAL BALLISTICS**  
Theoretical analysis of fuel ignition by hot  
projectile and ignition delay time as function  
of temperature and width of hot gas region p0048 N72-11683

Analysis of response of textiles, wood, and earth  
materials to fragment impact as basis for  
designing fragment protection devices [AD-730673] p0163 N72-14931

**TERMINAL FACILITIES**  
Airport efficiency improvement measures,  
considering boarding gates, parking space,  
baggage handling, fire protection, monitoring  
and central control p0015 A72-11717

Airport terminal flow and interface transportation  
systems, discussing access, passenger traffic  
and cargo handling and government controls p0055 A72-13414

## SUBJECT INDEX

## TERMINAL FACILITIES CONTD

- Automated meteorological telemetry and interrogation response system with terminal extensions for Paris airport  
p0064 A72-14695
- Statistical characteristics of range-guard intrusions and airspace collision conflicts in terminal area  
p0118 A72-16110
- Newark airport program, discussing land preparation, public facilities, terminal area, building design, support systems, organization and scheduling  
p0126 A72-16696
- FAA air traffic control automation program, describing enroute and terminal ATC systems implementation  
p0137 A72-17327
- Lounge planning model for airport terminal design simulation, taking into account scheduled arrivals and departures, aircraft types, passenger number, gate assignments, etc  
p0141 A72-17979
- British regional airports development, discussing terminal facilities for scheduled and nonscheduled air carriers on domestic and international routes  
p0240 A72-24170
- STOL aircraft systems development coordination, considering vehicle design, airport facilities and related ground environment, transportation modes interface and airspace management  
p0285 A72-25255
- ATC system, discussing flight data and radar processing functions and terminal automation program  
p0300 A72-25875
- Trends in civil ATC discussing plans to increase terminal capacity, surveillance system and use of multiple synchronous satellites for ocean travel efficiency improvement  
p0307 A72-27103
- Hierarchical system of helicopter service terminals, calculating passenger lots for single and multiloop arrangements under given stochastic input conditions  
p0394 A72-31498
- Airline maintenance program and facilities for Boeing 747 aircraft based on optimized service concept  
p0401 A72-32430
- Terminal handling environment and air cargo requirements for noncontainerized freight  
p0406 A72-33175
- Major civil airport development plan, discussing traffic forecasts, runways, noise, airspace capacity, access systems, freight installations, maintenance facilities, navigation aids, buildings, etc  
p0409 A72-33328
- Major civil airport passenger and cargo terminal complex design and layout planning, discussing various facilities and equipment requirements  
p0409 A72-33329
- STOL aircraft for civil transport applications, considering optimum design concepts, noise reduction and terminal facility requirements  
p0409 A72-33331
- Passenger transfer in airports with total separation between aircraft and permanent buildings for independent functioning, noting Dulles Airport mobile lounges

- Numerical analysis of flight planning and air traffic control procedures for civil aviation [AD-734881]  
p0281 N72-19728
- Survey of potential operational requirements for short takeoff aircraft in terminal area [DOT-TSC-FAA-71-9]  
p0323 N72-20255
- Development of active and passive techniques for detecting and measuring presence and intensity of wingtip vortices generated in airport areas [DOT-TSC-FAA-72-13]  
p0330 N72-20999
- Bibliography of reports and simulation models describing air traffic control procedures for all phases of aircraft operation [DOT-TSC-FAA-71-7]  
p0339 N72-21626

## TERMINAL GUIDANCE

Development of discrete address beacon system to improve operation of microwave landing system for high density terminal area surveillance [DOT-TSC-PAA-71-26] p0339 N72-21628

Development of model of airport airside system to simulate aircraft operations and controller functions in terminal area [PB-204802] p0339 N72-21634

Tables on economic benefits of fog dispersal as related to air traffic operations [AD-735214] p0372 N72-22603

Forecasts of instrument flight rules air traffic controlled by PAA control centers for determining requirements for manpower, facilities, and equipment [REPT-72-00186] p0376 N72-22646

Development of computer-oriented algorithms for application to solution of air traffic control and terminal area guidance problems [NASA-TN-D-6773] p0382 N72-23017

Criteria for installation of instrument landing systems and effects of siting on operation of system [DOT-PAA-6750.16] p0423 N72-24338

Requirements for channel splitting to accommodate increased VHF omnirange navigation instrument landing systems, and distance measuring equipment facilities [PAPER-54-71/SC122-3] p0436 N72-25602

Simulation study of airspace control corridor for Boston terminal area [AD-739130] p0472 N72-26526

Analysis of terminal area flight procedures and air routes for supersonic transport aircraft on transatlantic flights from Kennedy International Airport, New York [NASA-TN-D-6801] p0477 N72-27010

Transportation planning for airports and other intercity terminals [PB-207529] p0483 N72-27280

Characteristics and operation of air traffic control radar system installed at USSR airports [JPERS-56463] p0486 N72-27705

Mathematical models for determining effects of voice communication constraints on air traffic control in terminal control sector p0517 N72-28171

Analysis of interrelationships of ground transportation systems and air terminal facilities in San Francisco, California area p0518 N72-28258

Evaluation of visual approach system to determine improvements resulting from change in color density and hue of transition zone [PAA-ARD-72-91] p0590 N72-31654

Design of automatic ground control system for controlling aircraft arriving in random fashion at terminal areas [NASA-CR-128298] p0630 N72-32639

Development and evaluation of equipment and automation proposed for air traffic control systems for late 1970 and 1980 time period [AD-743635] p0630 N72-32645

Analysis of operational factors affecting implementation of short haul air transportation system using short takeoff and landing aircraft [AD-745283] p0641 N72-33040

## TERMINAL GUIDANCE

Terrain clearance during descent and approach of aircraft under radar control, discussing optimum profile, ATC, nav aids and rules p0002 A72-10183

Operational requirements of instrument landing systems, interferometers, correlation protected instruments, landing guidance systems and navigation aids p0056 A72-13421

Terminal area air traffic guidance and control, discussing automation, all-weather precision approach and landing and failure detection p0066 A72-14817

Aircraft optimal terminal guidance nonlinear feedback control law, deriving maximum principle by digital computer program p0183 A72-19287

Hybrid area navigation and microwave instrument landing system, discussing approach control and terminal guidance p0398 A72-32206

## SUBJECT INDEX

Microwave landing system effect on the flight guidance and control system. [AIAA PAPER 72-755] p0510 A72-40057

Characteristics and prospects for a new landing guidance system. p0547 A72-40293

Terminal airspace navigation and aircraft ground handling control, discussing air traffic controllers and pilots functions in context of workload and automation p0549 A72-40546

Automatic landing and microwave guidance system potential. p0551 A72-41072

Terminal guidance system for guiding aircraft into preselected altitude and/or heading at terminal point [NASA-CASE-FRC-10049-1] p0339 N72-21632

**TERRAIN SYSTEMS (DIGITAL)**

**U DIGITAL SYSTEMS**

**TERRAIN**

Terrain clearance during descent and approach of aircraft under radar control, discussing optimum profile, ATC, nav aids and rules p0002 A72-10183

**TERRAIN ANALYSIS**

Sensors for data acquisition systems for earth observations by spacecraft or aircraft [NASA-TN-X-62107] p0257 N72-18199

Side-looking radar for multispectral terrain imaging p0534 N72-29335

**TERRAIN FOLLOWING AIRCRAFT**

Flight testing of Army helicopters terrain following and/or avoidance systems concepts for operational capability, performance and cost evaluation p0124 A72-16658

Flight test evaluation of a forward looking radar system for search and rescue applications. [AHS PREPRINT 633] p0446 A72-34499

Automatic structural mode control system with aerodynamic vanes for B-1 strategic bomber turbulence excitation during low altitude terrain following missions [AIAA PAPER 72-772] p0499 A72-38132

Terrain avoidance radar for US Army rotary wing aircraft p0083 N72-11927

**TERRESTRIAL MAGNETISM**

**U GEOMAGNETISM**

**TEST BEDS**

**U TEST EQUIPMENT**

**TEST CHAMBERS**

**NT ANECHOIC CHAMBERS**

Low temperature environmental chamber for F-111 proof load testing, describing components of cold air forced convection recirculation system with liquid nitrogen injection p0402 A72-32612

**TEST EQUIPMENT**

Metal fatigue damage nondestructive detection, discussing inspection methods, equipment, advantages, limitations and test results [AD-741977] p0020 A72-12498

Surface active agent detection by device using ultrasonic vibrating mechanism to emulsify water with fuel, determining water retention or turbidity by photoelectric cell p0062 A72-14419

Arnold Engineering Development Center turbine engine testing facilities and techniques for flight conditions and environment simulation, air/fuel flow and thrust measurement, etc [ASME PAPER 71-WA/GT-8] p0116 A72-15901

Computer controlled production test system for airborne phased array modules, describing various measurement capabilities p0120 A72-16417

Hydraulic tank application to internal flow visualization in turbomachinery, describing test equipment and methods used for axial flow model p0241 A72-24654

Test facility design for aircraft crashworthiness evaluation and improvement, considering survivable accident surrounding conditions, equipment and testing methods [SAE PAPER 720323] p0290 A72-25586

VFW 614 twin jet transport aircraft flight test program, detailing general task plan, test

# TEST FACILITIES

- equipment installations and test schedule  
p0360 A72-30679
- Airborne external instrumentation pod containing  
IR scanner and associated test equipment for  
land and water surveys  
p0412 A72-33635
- International Aerospace Instrumentation Symposium,  
18th, Miami, Fla., May 15-17, 1972, Proceedings.  
p0563 A72-42676
- Analysis of facilities, equipment, and tools to  
maintain large commercial aircraft  
p0040 N72-11023
- Design, construction, and capabilities of wind  
tunnels used for aeronautical research by  
private and governmental agencies in US - Vol. 1  
[NASA-CR-1874] p0092 N72-12182
- Implementation of instrumentation techniques for  
service testing of aircraft and airborne  
equipment to meet military requirements  
[AD-734306] p0276 N72-19300
- Development and evaluation of built-in test  
equipment for aircraft systems  
[AD-734853] p0321 N72-20028
- Method for evaluating liquid pump operational and  
functional performance characteristics  
[AD-737713] p0425 N72-24541
- Proceedings of conference on applications of laser  
technology for aerodynamic measurements  
[AGARD-LS-49] p0435 N72-25493
- DAMIEN 3 - numerical PCM recording system for use  
in aircraft flight tests  
[RAE-LIB-TRANS-1638] p0517 N72-28175
- Characteristics of wind tunnels at Naval research  
center and associated test support equipment and  
facilities  
[AD-741213] p0533 N72-29221
- Design of height control test equipment for VTOL  
aircraft  
[NAL-TR-275] p0588 N72-31451
- TEST FACILITIES**
- NT ANECHOIC CHAMBERS
- NT BALLISTIC RANGES
- NT BLOWDOWN WIND TUNNELS
- NT CASCADE WIND TUNNELS
- NT ENGINE TESTING LABORATORIES

- NT TRANSONIC WIND TUNNELS
- NT WIND TUNNELS
- Wind tunnel model instrumentation and captive  
trajectory facilities for aircraft stability,  
control and metric wing-pylon store tests for  
performance and structural predictions  
p0053 A72-12921
- Automated jet engine development facility,  
discussing assembly and test area and computer  
controlled operation  
[ASME PAPER 71-WA/GT-6] p0116 A72-15899
- USAF small gas turbine test complex, discussing  
machinery, equipment, simulated testing,  
altitude chambers and instrumentation  
[ASME PAPER 71-WA/GT-7] p0116 A72-15900
- Arnold Engineering Development Center turbine  
engine testing facilities and techniques for  
flight conditions and environment simulation,  
air/fuel flow and thrust measurement, etc  
[ASME PAPER 71-WA/GT-8] p0116 A72-15901
- Jet engine test facilities for JT9D experimental  
and production models  
[ASME PAPER 71-WA/GT-12] p0117 A72-15904
- Cascading turbomachine blades vibration  
measurement in subsonic and sonic high  
temperature gas flows, describing test facility  
p0147 A72-18689
- Multiple swept stroke flash technique to test  
lightning effects on aircraft  
p0177 A72-18768
- Lightning simulation laboratory for aircraft  
strike testing, using high energy generators  
p0178 A72-18774
- Test facility design for aircraft crashworthiness  
evaluation and improvement, considering  
survivable accident surrounding conditions,  
equipment and testing methods  
[SAE PAPER 720323] p0290 A72-25586
- Test facility for aircraft and spacecraft antennas  
radiation patterns and optimal installation  
determination  
p0309 A72-27412
- Rotating airfoil experimental test program for  
verification of Himmelskamp and Dwyer-McCroskey  
theoretical analysis, presenting graphs of lift  
coefficient vs angle of attack  
p0313 A72-28124
- Inclined wind tunnel test section for free gliding  
investigation and aerodynamic design of flexible  
wing two body system  
p0394 A72-31403
- Aircraft flight test facilities deficiencies and  
modernization impediments, recommending  
integrated facility research program establishment  
p0491 A72-37676
- Advanced fighter controls flight simulator for  
all-systems compatibility testing.  
[AIAA PAPER 72-837] p0505 A72-39090
- Aerodynamic test facility data on swept wings,  
peaky airfoils, aircraft flutter and transonic  
flow, discussing shock tubes and wind tunnels  
development  
p0509 A72-39846
- Some results from tests in the NAE 'high' Reynolds  
number two-dimensional test facility on  
'shockless' and other airfoils.  
[ICAS PAPER 72-33] p0554 A72-41158
- National aerospace R and D facilities  
requirements, establishing priority order for  
V/STOL, aeropropulsion systems, high Reynolds  
number, large transonic and true-temperature  
hypersonic test facilities  
[AIAA PAPER 72-1033] p0559 A72-41608
- High Reynolds number transonic wind tunnel  
facility /HIRT/ for improved aerodynamic testing  
of modern combat and commercial aircraft  
performance, maneuverability and handling  
qualities  
[AIAA PAPER 72-1035] p0559 A72-41609
- Digital computer equipped facility for training  
simulators environmental simulation capability  
testing, describing electronics interface,  
control and display equipment  
p0567 A72-42928
- Test facilities for aeropropulsion systems,  
emphasizing utilization, cost and technical  
advantages, aircraft inlet-engine systems  
compatibility and test types  
[AIAA PAPER 72-1034] p0615 A72-45401
- Conference on theoretical methods and wind tunnel  
facilities for transonic aerodynamic testing of  
aircraft at high Reynolds numbers  
[AGARD-CP-83-71] p0073 N72-11854
- Minimum level of Reynolds number for reliable flow  
simulation in transonic test facilities  
[NASA-TM-X-67412] p0074 N72-11859
- High Reynolds number aerodynamic ground testing by  
moving test specimens on rocket sleds  
p0078 N72-11885
- System to obtain on-line graphic displays for time  
sharing computer in aerodynamic test facility  
[NASA-TM-X-67968] p0092 N72-12112
- Inventory of facilities for conducting  
acceleration, environmental, impact, structural  
shock, heat, vibration, and noise tests - Vol. 3  
[NASA-CR-1876] p0092 N72-12183
- Inventory of aeronautical test facilities for air  
breathing engines  
[NASA-CR-1875] p0108 N72-13233
- Test methods for infrared suppressors to determine  
their effectiveness in masking aircraft infrared  
emissions  
[AD-729603] p0157 N72-14272
- Tabulation and description of facilities available  
in government and industry for real time  
engineering flight simulation  
[NASA-CR-1877] p0157 N72-14274
- Modification of turbine engine test cell to  
provide simulated altitude icing conditions and  
1200 pound per second air flow  
[AD-729205] p0157 N72-14279
- Development of methods for conducting climatic  
tests with emphasis on design, construction, and  
operation of climatic hangar  
[AD-733299] p0257 N72-18268

## TEST PILOTS

Turbojet engine test facility with digital system for advanced control and performance studies  
[AD-73353] p0259 N72-18469

Development of magnetic artificial gravity test facility for use in wind tunnel tests to simulate separation of external stores from aircraft in flight  
[NASA-CR-1955] p0266 N72-19000

Slush drag, wheel spray, and hydroplaning research using pneumatic wheels and moving runway and water layer model test facilities  
[ARC-R/M-3682] p0270 N72-19035

History of aircraft crash injury studies and facilities for simulation  
p0274 N72-19150

Management planning and operation of test facilities for effective application to development of systems and equipment for aerospace vehicles  
[AD-731548] p0276 N72-19307

Development of techniques and equipment for determining moment of inertia of aircraft as applied to A-37 and P-1127 aircraft  
[FTC-TM-71-1001] p0331 N72-21007

Flight simulator facility emphasizing lateral-directional control  
[NASA-TM-X-62155] p0423 N72-24335

Development and characteristics of support system and data reduction capability for free flight test facility  
[ISAS-477-VOL-37-NO-3] p0424 N72-24343

Design, development, and fabrication of total inflight simulator facility  
[AD-739230] p0483 N72-27279

Characteristics of wind tunnels at Naval research center and associated test support equipment and facilities  
[AD-741213] p0533 N72-29221

Evaluation of time division multiplexing system for helicopter rotor tests  
[AD-740773] p0534 N72-29480

French/German ISL test facilities for aeronautical applications  
[ISL-32/71] p0587 N72-31292

Research projects conducted by National Research Council of Canada from 1 Apr. to 30 Jun. 1972  
[DNE/NAE-1972(2)] p0649 N72-33964

### TEST PILOTS

Procedures followed by test pilot on first flight of new aircraft design  
p0145 A72-18488

Aircraft launch envelope investigation for minimum catapult end airspeed determination at carrier bow, discussing optimum test pilot launch technique  
p0146 A72-18498

Test pilots 1971 reports - Conference, Beverly Hills, California, September 1971  
p0190 A72-21001

Test pilot role in attack aircraft avionics systems integration consisting of head-up display, projected map, digital computer, inertial platform, radar and Doppler systems, etc  
p0190 A72-21012

Development and application of pilot rating to determining performance and handling criteria of aircraft  
p0620 N72-32028

### TEST RANGES

#### NT BALLISTIC RANGES

### TEST STANDS

Open-air jet engine test stand for flame stabilization, jet and compressor noise studies, noting provisions for rapid installation changes  
p0309 A72-27416

Thrust stand for evaluation of thrust vectoring nozzle performance.  
[AIAA PAPER 72-1029] p0615 A72-45406

Vibration measurements on walls of turbojet test facility  
[TL-1971-11] p0437 N72-25898

### TEST VEHICLES

#### NT FLIGHT TEST VEHICLES

### TESTERS

#### U TEST EQUIPMENT

### TESTING MACHINES

#### U TEST EQUIPMENT

### TESTING TIME

F-14A fighter accelerated flight test program with

## SUBJECT INDEX

18-month saving and 3600 flight time hours before 1973 operability  
p0063 A72-14591

Automated telemetry system providing real time analytical capability and reduction of flight test time for F-14  
p0063 A72-14592

Gas turbine engine hot part equivalent tests duration determination by analytical method based on Larson-Hiller parametric description of stress rupture strength  
p0315 A72-28243

### TETHERED BALLOONS

A stability analysis for tethered aerodynamically shaped balloons.  
p0594 A72-43332

Stability and damping characteristics of tethered balloon systems, using computer programs for IBM 360  
[AD-731570] p0255 N72-18044

### TETHERING

Tethered flying rotor platform for reconnaissance, fire control and radio transmission assignments in naval missions, discussing system characteristics  
p0072 A72-15652

### TETHERLINES

Tethered autostabilized rotor platform for military surveillance, target location and communication, discussing flight vehicle, tethering cable, ground station and guidance-control system  
p0357 A72-30078

### TEXAS

Environmental impact statement on proposed construction of Hemphill Municipal Airport, Hemphill, Texas  
[PB-206262-F] p0627 N72-32277

### TEXTILES

Materials and design for textile mechanical elements in aerospace parachute systems  
p0471 N72-26382

### TF-30 ENGINE

Gas generator performance shifts involving military trim level variations by TF-30 engines in high relative humidity environment caused by condensation in inlet duct  
p0176 A72-18759

Afterburning steady state performance and operational limits of TF-30 turbofan engine  
[NASA-TN-D-6839] p0477 N72-27014

Inlet random pressure fluctuation effects on turbojet engine stall characteristics  
p0478 N72-27022

### TF-34 ENGINE

Designing TF-34 mixer exhaust nozzle to reduce noise generated by impingement of exhaust on STOL wing flap  
[NASA-CR-120916] p0465 N72-26014

Quiet nacelle for suppressing noise in TF-34 turbofan engine  
[NASA-CR-120915] p0473 N72-26692

High bypass turbofan engines, based on TF-34, in heavily sound-suppressed nacelles studied for STOL commercial aircraft  
[NASA-CR-120914] p0647 N72-33743

### TH-55 HELICOPTER

Flight test investigation of the aerodynamic behavior of various-sized stabilizers on a small helicopter.  
p0612 A72-45328

### THEOREMS

#### NT BAYES THEOREM

#### NT BERNOULLI THEOREM

#### NT SIMILARITY THEOREM

### THEORETICAL PHYSICS

#### NT NEWTON THEORY

### THERMAL CONTROL COATINGS

Low conductivity insulating coating /graded thermal barrier/ to cool gas turbine engine with high pressure ratio and inlet temperature  
[AIAA PAPER 72-361] p0286 A72-25389

Development and evaluation of cooling systems and materials for controlling structural temperature of turbine engines  
[REPT-21-C-71F] p0428 N72-24822

### THERMAL CURRENTS

#### U CONVECTIVE FLOW

# SUBJECT INDEX

# THERMOCHEMICAL PROPERTIES

## THERMAL CYCLING TESTS

Aircraft power plants sealing materials, emphasizing porous cermet seals heat resistance under thermal cyclic loads

p0147 A72-18658

Pipe joint flexible metal seal development and testing for Concorde Olympus 593 under thermal and pressure cycling

p0199 A72-21938

Two dimensional elastoplastic finite element analysis of structural members under cyclic thermal-mechanical loadings [ASME PAPER 72-GT-1]

p0292 A72-25604

Aircraft engine components fatigue life assessment under small cycle temperature conditions, including temperature field and stress-strain determination in critical spot

p0358 A72-30279

Investigating failure of gas turbine vanes under influence of thermal cycles in simulated modes of engine start-up and shut down

p0428 N72-24815

Fatigue tests of supersonic transport structures with emphasis on thermal cycle

p0539 N72-29896

## THERMAL DECOMPOSITION

### U PYROLYSIS

## THERMAL EFFECTS

### U TEMPERATURE EFFECTS

## THERMAL EFFICIENCY

### U THERMODYNAMIC EFFICIENCY

## THERMAL EMISSION

High resolution observation of stratospheric submillimeter thermal emission spectrum by helium-cooled InSb electron bolometer on board Comet 2E aircraft

p0245 A72-25023

## THERMAL EXPANSION

Coefficient of linear thermal expansion and curing shrinkage of epoxy resin mortars for airfield pavements

[AD-742212]

p0576 N72-30257

## THERMAL FATIGUE

Thermal shock fatigue tests on aircraft gas turbine engine inlet nozzles, showing cracks as function of material

p0014 A72-11373

## THERMAL INSULATION

Development of sprayable urethane sealant for protection of heated areas on aircraft structures [AD-727592]

p0035 N72-10489

Design and tests of two insulation systems for liquid methane fuel tanks for supersonic cruise aircraft

[NASA-CR-120930]

p0473 N72-26545

Flight recorder insulation and thermal protection for record tapes from crash fires

[FAA-NA-72-49]

p0633 N72-32937

## THERMAL NOISE

Motion dynamics of aircraft-autopilot closed loop system under influence of atmospheric turbulence and electric circuitry thermal noise

p0181 A72-18990

## THERMAL POLLUTION

Heat transfer research review, discussing gas turbines, aeronautics, astronautics, nuclear power, thermal pollution and controlled fusion challenges

p0236 A72-23684

Environment pollution of turbine engine aircraft

p0270 N72-19030

## THERMAL POWER

### U TURBOGENERATORS

## THERMAL PROPERTIES

### U THERMODYNAMIC PROPERTIES

## THERMAL PROTECTION

Thin wall airframe wire insulation relative thermal life and temperature rating evaluation procedure using Arrhenius plot

p0233 A72-23270

Lightweight fire resistant plastic foam for thermal protection of reentry vehicles and aircraft structures

[NASA-CASE-ARC-10180-1]

p0326 N72-20767

Thermal aspects of using filamentary composite materials for airframes on atmospheric entry spacecraft

[SD-72-SH-0015]

p0435 N72-25542

## THERMAL RADIATION

Aircraft gas turbine engines environmental effects, considering thermal radiation, acoustic emissions and exhaust gases in relation to propulsion system design parameters

p0602 A72-44296

## THERMAL RADIO EMISSION

### U THERMAL EMISSION

## THERMAL REACTORS

Transoceanic helium cooled thermal reactor powered air cushion freighter of gross weight 4500 metric tons, discussing design and performance characteristics

p0062 A72-14431

## THERMAL RESISTANCE

Aircraft power plants sealing materials, emphasizing porous cermet seals heat resistance under thermal cyclic loads

p0147 A72-18658

## THERMAL SHIELDING

### U HEAT SHIELDING

## THERMAL SHOCK

Thermal shock fatigue tests on aircraft gas turbine engine inlet nozzles, showing cracks as function of material

p0014 A72-11373

## THERMAL SIMULATION

Concorde airframe testing for thermal effects on structural strength and fatigue life, discussing facilities for flight conditions simulation

p0136 A72-17197

Thermal simulation tests for kinetic heating of aerospace structures and materials, describing facilities for supersonic flight and atmospheric reentry

p0404 A72-32897

## THERMAL STABILITY

Jet fuels hydrocarbon composition effect on thermal stability, considering nonaromatic components influence on aromatic hydrocarbons oxidation products coagulation

p0024 A72-12800

Aircraft gas turbine engines synthetic lubricants thermal stability characteristics, describing coke deposition test apparatus and results

[ASLE PREPRINT 72AM 141]

p0350 A72-28971

Assessment of high temperature stability of synthetic lubricants for aircraft gas turbines

p0050 N72-11695

Thermal stability of trimethyl propane ester based lubricating oil for aircraft engines

p0050 N72-11699

Thermally stable laminating resins based on addition-type pyrolytic polymerization

[NASA-CR-72984]

p0260 N72-18584

Trace amounts of fuel-soluble metal compounds affecting thermal stability of JP-7 fuel

[AD-736475]

p0340 N72-21813

## THERMAL STRESSES

Thermal radial stresses in axial compressor disk-to-drum transition areas of operating AM-3 aircraft engine

p0014 A72-11374

Aircraft gas turbine rotating disks thermal and mechanical stresses under variable thermal conditions, describing test assembly

p0014 A72-11637

Three dimensional photothermoelastic method of refrigeration with composite model to study transient thermal stresses in wing rib

p0362 A72-30907

Temperature dependent elastoplastic wing assemblies and continua analysis via matrix displacement method

p0413 A72-33791

Strength of a cylindrical shell of variable thickness located in a temperature field

p0597 A72-43653

## THERMIONIC REACTORS

## U NUCLEAR ROCKET ENGINES

## THERMISTORS

Application of thermistor mass flow rate sensor to aircraft meteorological instruments

[AD-736152]

p0338 N72-21622

## THERMOAEROELASTICITY

### U AEROELASTICITY

### U THERMOELASTICITY

## THERMOCHEMICAL PROPERTIES

Corrosion of high temperature gas turbine blade

## THERMOCOUPLES

## SUBJECT INDEX

alloys caused by increase in turbine inlet temperatures and reduction in chromium content in blade metal  
[AD-745474] p0645 N72-33557

**THERMOCOUPLES**  
Turbine inlet temperature sensor for gas turbine engines, using noble metal thermoelements with high signal level  
[SAE PAPER 720160] p0136 A72-17322  
Performance tests of aspirating thermocouple probes designed to measure gas temperature in two-phase gas-liquid system similar to that encountered in jet engine exhaust gas spray cooler  
[AD-744513] p0629 N72-32484

**THERMODYNAMIC CYCLES**  
Russian book - Optimization of thermal circuits of complex gas-turbine power plants  
p0490 A72-37450  
Thermodynamic cycle parameter effects on bypass turbofan jet engine fuel consumption and performance under various flight conditions and engine ratings  
p0600 A72-44281

**THERMODYNAMIC EFFICIENCY**  
Elements of the theory of gas-turbine-unit designs  
p0559 A72-41700  
Cold air performance of single stage axial flow turbine  
[NAL-TR-273] p0487 N72-27822

**THERMODYNAMIC EQUILIBRIUM**  
Method for estimating equilibrium temperature distribution on flat plates, wedges, cylinders, and cones in constant velocity flight in air  
[ESDU-69012] p0648 N72-33938

**THERMODYNAMIC PROPERTIES**  
NT CRITICAL POINT  
NT MELTING POINTS  
NT THERMAL EXPANSION  
NT THERMAL STABILITY  
NT THERMOCHEMICAL PROPERTIES  
NT VAPOR PRESSURE  
Carbon-carbon composite material for high performance aircraft braking systems, noting weight savings and thermal characteristics improvements  
p0312 A72-28093  
Heat transfer design analysis of air-cooled plug-nozzle system for supersonic cruise aircraft engine  
[NASA-TN-X-2475] p0174 N72-15892  
Inlet design and thermodynamic cycle of turbojet engine at supersonic speeds with normal shock  
p0213 N72-16717  
Thermodynamic and chemical properties of JP-4 jet fuel for 1970  
[AD-733352] p0263 N72-18764  
Analysis of wettabilities and heat transfer rates of microfog jets impinging on heated rotating disc operating in inert nitrogen atmosphere  
[NASA-CR-120843] p0535 N72-29533

**THERMODYNAMICS**  
NT AEROTHERMODYNAMICS  
NT COMBUSTION PHYSICS  
Thermodynamic and geometric characteristics of pulsejet engines  
[REPT-891] p0326 N72-20765  
Aerothermodynamic integration model, including flow paths, leading edges, and ducts  
[NASA-CR-112059] p0437 N72-25714  
Kinetic model for describing thermodynamic and fluid dynamic processes in high temperature exhaust gas coolers  
[AD-744514] p0632 N72-32769  
Analysis of operation conditions for gas turbine rotor bearings from results of computer calculations of their thermal regimes  
[AD-744297] p0632 N72-32772

**THERMOELASTICITY**  
Thermoelastic effect on flutter and vibration of built up delta wings with solid, stiffened and honeycomb/corrugated sandwich skins  
[AIAA PAPER 72-174] p0128 A72-16834  
Three dimensional photothermoelastic method of refrigeration with composite model to study transient thermal stresses in wing rib  
p0362 A72-30907

**THERMOGRAMS**  
U RECORDING INSTRUMENTS  
U TEMPERATURE MEASURING INSTRUMENTS

**THERMOGRAPHS**  
U RECORDING INSTRUMENTS  
U TEMPERATURE MEASURING INSTRUMENTS

**THERMOECHANICS**  
U THERMODYNAMICS  
U THERMOMETRY  
U TEMPERATURE MEASUREMENT

**THERMONUCLEAR PROPULSION**  
U NUCLEAR PROPULSION

**THERMOPHYSICAL PROPERTIES**  
NT CRITICAL POINT  
NT MELTING POINTS  
NT THERMAL STABILITY  
NT VAPOR PRESSURE

**THERMOPHYSICS**  
U THERMODYNAMICS

**THERMOPLASTIC FILMS**  
U POLYMERIC FILMS

**THERMOPLASTIC RESINS**  
Ethylene terpolymer material used as thermoplastic transparent adhesive for bonding polycarbonate to glass  
[AD-728174] p0094 N72-12520

**THERMOSETTING RESINS**  
NT EPOXY RESINS  
NT NYLON (TRADEMARK)  
Dynamic properties of thermosetting plastic composites unidirectionally reinforced by high elastic moduli boron and carbon fiber for aircraft structural applications  
p0308 A72-27343

**THERMOSTABILITY**  
U THERMAL STABILITY

**THERMOTROPISM**  
U TEMPERATURE EFFECTS

**THICKENED LEADING EDGES**  
U LEADING EDGES

**THICKNESS RATIO**  
Hypersonic flow past final thickness delta wing, presenting conical flow equations with boundary value solution  
p0142 A72-18128  
Effect of thickness on subsonic longitudinal stability characteristics of 70 deg sweepback delta wings  
[ARC-R/M-3673] p0202 N72-15950

**THIN AIRFOILS**  
NT INFINITE SPAN WINGS  
NT THIN WINGS  
Three dimensional velocity field excitation by thin airfoil vibrations in supersonic flow, deriving function in semispace to satisfy boundary constrained wave equation  
p0141 A72-18111  
General solution for thin airfoil rectilinear motion in ideal incompressible gas, applying to rotor blade lift calculation  
p0231 A72-22860  
Integrodifferential equation for rigid tunnel walls effect on supercavitating flow past thin jet flapped airfoil, noting lift coefficient derivatives  
p0241 A72-24562  
Aerodynamic properties prediction procedure for thin jet-flapped airfoil in incompressible inviscid flow bounded by different types of boundaries  
p0397 A72-32147  
The inviscid flowfield of an unsteady airfoil.  
[AIAA PAPER 72-681] p0452 A72-35481  
Calculation of an unsteady separation flow past a slender profile  
p0460 A72-36900  
Effects of transport velocity of wake vortex on aerofoil oscillations.  
p0603 A72-44494  
Numerical solution for potential transonic flow past lifting airfoil  
p0469 N72-26217

**THIN FILMS**  
Dry ultra thin film, water displacing corrosion preventive compounds for aircraft finishes  
[AD-728779] p0095 N72-12523  
Use of polyethylene thin films for ice prevention and ice-shedding on helicopter rotary wings  
[RAE-TR-71238] p0640 N72-33032

**THIN PLATES**  
Evaluation of steady-state and nonsteady-state methods for measuring panel damping with

# SUBJECT INDEX

# THREE DIMENSIONAL MOTION

- emphasis on use of random process techniques and digital data reduction methods  
[NASA-CR-114423] p0264 N72-18909
- THIN WALLED SHELLS**  
Optimal design of thin walled minimum weight aircraft shell structures, using linear programming p0351 A72-29143  
Adhesive bonding of L-1011 body shell panels for improved fatigue strength and corrosion resistance p0400 A72-32429
- THIN WALLS**  
Calculation of a thin-walled small-aspect-ratio wing beyond the limit of proportionality p0598 A72-43654  
Estimating aeroelastic stability and forced response characteristics of thin walled, circular cylindrical shells [AD-733370] p0250 N72-17996
- THIN WINGS**  
**NT INFINITE SPAN WINGS**  
Circular jet discharging perpendicular to solid surface into transverse flow, discussing effects on infinitely thin circular wing aerodynamic characteristics p0060 A72-13915  
Heat transfer coefficients to both sides of finite one dimensional slab subject to phase change coating technique boundary conditions, deriving thin wing correction factors p0060 A72-13956  
Symmetrically deformed delta wing in supersonic flow, considering leading edge flow separation induced vortices effects on downwash, pressure distribution and aerodynamic characteristics p0072 A72-15741  
Thin wing harmonic oscillation in subsonic flow, developing analytical form of kernel function in generalized Possio integral equation p0126 A72-16707  
Supersonic flow around thin cruciform wing with antisymmetrical angle of attack distribution and horizontal plane with leading edge, considering flow separation at edges p0246 A72-25118  
Iterative methods for the aerodynamic calculation of thin wings in a subsonic flow p0614 A72-45378  
Three component shock tunnel strain gage balance for measuring aerodynamic forces on thin delta wings [ARC-R/M-3664] p0046 N72-11375  
Calculation of aerodynamic forces on thin wing oscillating harmonically in subsonic flow using collocation method [RAE-TR-69073] p0081 N72-11910  
Induced drag of thin delta wings with different leading edge spanwise distribution [PB-202358] p0203 N72-15957  
Analysis of transition fixing and Reynolds number variation on aerodynamic forces produced by thin delta wings [NASA-CR-112016] p0463 N72-25996  
Wind tunnel tests to determine low speed aerodynamic characteristics of large scale model of advanced fixed wing fighter aircraft with thin, cranked leading edge wing [NASA-TN-D-6919] p0513 N72-27998
- THREE DIMENSIONAL BOUNDARY LAYER**  
Increasing lift and Reynolds number effects on displacement and skin friction of three dimensional turbulent boundary layer on infinite swept wing p0014 A72-11395  
Laminar three dimensional boundary layer nonequilibrium effects at hypersonic wing swept leading edge with intensively cooled surface, considering sweep induced crossflow effect [VPI-E-71-23] p0020 A72-12422  
Numerical solution method for laminar, time dependent and three dimensional boundary layer equations, applying to rotating flat plate in forward flight [AIAA PAPER 72-109] p0133 A72-16944  
Equations of motion of steady viscous fluid flow in three dimensional boundary layer on walls of axial flow compressors and turbines, obtaining velocity field p0246 A72-25120
- Three dimensional boundary layer separation on slender bodies, delta wings and propulsion intake systems, reviewing computing techniques for interfering inviscid flow fields p0404 A72-32826  
Velocity profiles for three dimensional turbulent boundary layer on end wall of axial flow compressor cascade passage under adverse pressure gradients p0405 A72-32901  
Mixing length flow model for two- and three-dimensional turbulent boundary layers in compressible and incompressible flows using similarity equations p0276 N72-19327
- THREE DIMENSIONAL FLOW**  
**NT SECONDARY FLOW**  
Nonlinear calculation of three dimensional flow of perfect incompressible fluid around wing of finite span with arbitrary form p0071 A72-15558  
Difference equations and relaxation method for three dimensional transonic flow field about wings in terms of velocity potential [AIAA PAPER 72-189] p0128 A72-16843  
Three dimensional velocity field excitation by thin airfoil vibrations in supersonic flow, deriving function in semispace to satisfy boundary constrained wave equation p0141 A72-18111  
Subsonic three dimensional potential flow computational method lifting aerodynamic configurations analysis and design [AIAA PAPER 72-188] p0180 A72-18958  
Two and three dimensional turbulent boundary layers integral calculation method, presenting similarity solutions based on extended mixing length model p0241 A72-24653  
French monograph on flow near rotor blade tips, discussing three dimensional circulation and boundary layer effects, energy losses, velocity and pressure distributions, etc p0363 A72-30950  
Elliptic-hyperbolic relaxation algorithm for solution to three dimensional nonlinear transonic small disturbance potential equation for flow about swept wings [AIAA PAPER 72-677] p0414 A72-34063  
Three-dimensional structure and equivalence rule of transonic flows p0507 A72-39631  
Three dimensional shock wave configurations in front of cylindrical body on supersonic wing or of fluid jet injected into main supersonic flow, examining high pressure gradient regions p0611 A72-45113  
Transonic wind tunnel tests on three dimensional flow distribution during stall development on rotary wing profiles [ARC-CP-1146] p0080 N72-11904  
Extension of turbulent boundary layer computer program to include compressible adiabatic flow, heat transfer, three dimensional flow, and ducted flow [IC-AERO-71-24] p0158 N72-14308  
Computerized design of axial compressor stage using radial three dimensional equilibrium flow equations [AD-733437] p0259 N72-18507  
Analysis of pressure field generated by passage of three dimensional disturbance over airfoil shape p0463 N72-25994  
Three basic types of two dimensional calculations for approximating velocities in turbomachine blade flow [NASA-TM-X-67959] p0631 N72-32759
- THREE DIMENSIONAL MOTION**  
**NT SECONDARY FLOW**  
**NT THREE DIMENSIONAL FLOW**  
Three dimensional roll-controlled missile trajectory model for simple time-sharing digital or analog simulation, using wind-to-inertial axis transformation p0011 A72-10964  
Differential game solution to practical two aircraft pursuit-evasion problem in three dimensional space [AD-729777] p0156 N72-14224

## THRESHOLD LOGIC

## THRESHOLD LOGIC

Multiplex electrohydraulic system for aircraft fly by wire actuators with majority voting and pressure logic, discussing frequency response and environmental tests

p0199 A72-22152

## THROTTLING

Aerodynamic throttling effect due to air jet flow interaction in throat region of mainstream two dimensional nozzle flow

p0244 A72-24845

Military jet engines centrifugal fuel pumps power requirements for throttled operation, noting pressure stability improvement at low flow rates

p0456 A72-36041

Inlet throttle centrifugal fuel pumps for jet engine augmentation, discussing design features, performance, noise, life and reliability characteristics

p0456 A72-36044

Development and evaluation of an energy-oriented guidance logic for air combat models.

[AIAA PAPER 72-949]

p0562 A72-42354

Contribution to the determination of the characteristics of a gas turbine engine for a helicopter and to the choice of the throttling law

p0600 A72-44277

Automatic throttle control system for transport aircraft engines which limits maximum throttle level position by pressure ratio

[AD-743314]

p0647 A72-33753

## THRUST

## NT JET THRUST

## NT STATIC THRUST

## NT VARIABLE THRUST

Turbofans under wings to provide lift and thrust for STOL aircraft

[NASA-CASE-LEW-11224-1]

p0030 A72-10033

Engine-aircraft interference, thrust, inlets, nozzles, and propulsion systems - conference

[AGARD-CP-91-71]

p0209 A72-16685

Full scale thrust performance tests of prototype dual stream propelling nozzle

p0209 A72-16691

Thrust measurement interpretation for V/STOL models and transition performance of lift fan configurations

p0210 A72-16693

Determination of thrust and drag characteristics for integrated aircraft engine design optimization

p0478 A72-27023

Curves for use with total heat and static pressure sampling methods for gross thrust, mass flow, and choking pressure ratio of air breathing engines in flight

[ESDU-69008]

p0631 A72-32746

Gross thrust and nozzle mass flow measurements for air breathing, ducted flow engines

[ESDU-69007]

p0631 A72-32747

Intrinsic thrust and drag for air breathing ducted flow engines in flight

[ESDU-69006]

p0631 A72-32748

## THRUST AUGMENTATION

Rolling vertical takeoff and landing procedure for VTOL aircraft using thrust augmentation by afterburning

[BMVG-FBWT-71-13]

p0030 A72-10034

Variable geometry aft-fan for takeoff quieting or thrust augmentation of turbojet engine

[E-6714]

p0162 A72-14794

Augmentor flap, wing ducting and augmentor nozzle, and noise reduction for jet-STOL aircraft

[NASA-CR-125540]

p0210 A72-16698

Rapid mixing nozzles, thrust vector control, and thrust augmentation for V/STOL aircraft

p0211 A72-16699

Thrust lift augmentation and noise reduction characteristics of compact ejectors with applications to V/STOL aircraft

[AD-732842]

p0220 A72-17025

Thrust performance characteristics of augmentor nozzle with rectangular ejector for vertical takeoff planes

[AD-739863]

p0524 A72-28798

Development of thrust augmentor device to assist in takeoff of jet aircraft

p0538 A72-29810

## THRUST BEARINGS

X ray measurement of elastohydrodynamic film

## SUBJECT INDEX

thickness to determine lubrication of turbine engine thrust bearings at high temperatures

[NASA-TN-D-6608]

p0093 A72-12420

## THRUST CONTROL

## NT THRUST VECTOR CONTROL

STOL aircraft integrated landing approach flight control system with elevator and thrust control coupling to angle of attack, altitude and other state variables

[DGLR PAPER 71-063]

p0022 A72-12705

V/STOL weapon system VJ-101 design, discussing one axis rocking device, suspension structure and hovering flight thrust control

p0405 A72-33049

Evaluation of thrust magnitude control for bomber defense missiles

[AD-731812]

p0264 A72-18788

## THRUST LOADS

Tube flight vehicle system thrust and power requirements prediction by aerodynamic analysis with division of near and far flow fields

p0195 A72-21608

## THRUST MEASUREMENT

The development of dynamic flight test techniques for the extraction of aircraft performance.

[AIAA PAPER 72-785]

p0495 A72-38102

Assessments of aircraft engine net thrust measurement using drag chutes

[ARC-CP-1169]

p0089 A72-11964

Afterbody thrust measurement in wind tunnel

[ONERA-TP-978]

p0221 A72-17206

Methods for thrust determination in aircraft

[RAE-LIB-TRANS-1650]

p0631 A72-32755

Wind tunnel tests of multiple vertical takeoff aircraft propulsion fans to determine effects of aircraft components on thrust development

[NASA-TN-X-68138]

p0640 A72-33031

## THRUST POWER

## U THRUST

## THRUST REVERSAL

Optimal reversion coefficient determination for passenger aircraft engine thrust reversal

p0135 A72-17060

Optimal thrust reversing in pursuit evasion games between two aircraft in horizontal plane, considering cost functions and termination criteria

p0183 A72-19282

Noise generated by STOL core-jet thrust reversers.

[AIAA PAPER 72-791]

p0496 A72-38108

A method for increasing thrust reverser utilization on STOL aircraft.

[AIAA PAPER 72-782]

p0500 A72-38141

Design and aerodynamic performance of clamshell target thrust reverser

p0210 A72-16695

Noise generated by model V-gutter and semicylindrical target-type thrust reversers

[NASA-TN-X-2553]

p0390 A72-23838

Wind tunnel tests to determine effects of in-flight thrust reverser on stability and control characteristics of single-engine fighter aircraft model

[NASA-TN-D-6886]

p0573 A72-30010

## THRUST VECTOR CONTROL

Air to air maneuverability of aircraft capable of in-flight thrust vectoring, indicating improved deceleration, normal acceleration g-force, and turn rate

p0060 A72-13877

Propulsion system/airframe matching in hybrid V/STOL airplanes, stressing thrust vector management, lift engine bypass ratio and power plant packaging design

[ASME PAPER 72-GT-106]

p0299 A72-25671

STOL transport stability and control derivative prediction methods and accuracy requirements.

[AIAA PAPER 72-780]

p0500 A72-38139

Barrier two seat aircraft design, performance, weapon systems, thrust vectoring and combat characteristics comparison with GR.1

p0603 A72-44391

Lateral flight path control during aircraft landing in gusty cross-winds by lateral thrust deflection, discussing design optimization

p0613 A72-45330

Thrust stand for evaluation of thrust vectoring nozzle performance.

[AIAA PAPER 72-1029]

p0615 A72-45406

## TRAILING EDGES

### TRAILING EDGES

Axial and tangential velocity distributions within trailing line vortex to large distance downstreams of generating wing extended from available data  
[AD-743599] p0012 A72-11135

Drag and lift experimental determination for low aspect ratio rectangular wings with blunt trailing edges at Mach numbers 0.5-2.2  
[DGLR PAPER 71-114] p0023 A72-12712

Base pressure drag reduction on rectangular wings with blunt trailing edges from low speed wind tunnel measurements  
[DPVLR-SOWDDR-219] p0244 A72-24842

Slender body theory for flow calculation past low aspect ratio delta wing with straight trailing edge, noting lifting vortices distribution  
p0247 A72-25131

Rotary wings lift and efficiency increase by circulation control via tangential blowing about bluff trailing edge airfoils  
[AHS PREPRINT 603] p0445 A72-34492

Visualization study of flow near the trailing edge of an oscillating airfoil.  
p0511 A72-40067

Conformal mapping procedure for numerical generation of airfoils with local curvature singularities, presenting test problem results for zero trailing edge angle  
p0556 A72-41259

Application of a time-dependent boundary-layer analysis to the problem of dynamic stall.  
p0599 A72-44058

Cascade calculations and tests of blunt trailing edge blades used in advanced axial compressor concepts  
[AD-725789] p0045 A72-11308

Transonic wind tunnel determination of blunt trailing edge effects on drag and lift characteristics of wing profile  
p0074 A72-11862

Effect of trailing edge geometry and thickness on performance of certain turbine stator blading  
[NASA-TN-D-6637] p0163 A72-14986

Flow measurements in trailing vortex with smoke from ground-based generator, using Lockheed Hercules  
[AFN-7104] p0519 A72-28277

### TRAILING-EDGE FLAPS

Wind tunnel investigation of unswept rectangular wing with externally blown single slotted flap, determining optimum slot width as function of momentum coefficient and flap deflection  
p0070 A72-15461

Jet-STOL augmentor wing consisting of moderately thick airfoil with full span leading edge slot and double surface trailing edge flap  
p0197 A72-21899

Three dimensional wind tunnel investigation of vortex augmented unswept wing with leading edge cusp flap and split upper and lower trailing edge flaps  
[SAE PAPER 720321] p0290 A72-25584

Rarefied hypersonic flow characteristics of delta wings and trailing edge spoilers.  
p0450 A72-35229

Lift and control augmentation by spanwise blowing over trailing edge flaps and control surfaces.  
[AIAA PAPER 72-781] p0500 A72-38140

Aerodynamic characteristics of delta wings with or without trailing-edge flap in rarefied hypersonic gas flow  
[REPT-71-2] p0149 A72-13980

Noise data obtained with small scale model of externally blown flap of type being considered for STOL aircraft  
[NASA-TN-D-6636] p0269 A72-19025

Method for using lifting-surface theory to obtain pressure distribution on wing with trailing-edge flap or control surface  
[NASA-TN-D-6798] p0366 A72-22007

Intermittent jet blowing for controlling flow separation on trailing edge flap  
[AD-742085] p0577 A72-30291

### TRAINERS

#### U TRAINING DEVICES

#### TRAINING

#### U EDUCATION

## SUBJECT INDEX

### TRAINING AIRCRAFT

#### BT JAGUAR AIRCRAFT

Trainer-combat turbojet or turbofan aircraft characteristics, comparing flight, weight, size, maintenance and development costs  
p0119 A72-16178

Mitsubishi XF-2 jet trainer aircraft, presenting design, structural and performance data  
p0246 A72-25107

Case report of rapid decompression in supersonic trainer aircraft pressurized cabin, discussing physical and blast effects, pressurization safety, decompression sickness and hypoxia  
p0301 A72-26020

Cost effectiveness determination for different levels of reliability and maintainability of training aircraft, using computer simulation  
p0343 A72-28355

HR 200 training and acrobatic two seater low wing metal aircraft series production, dimensions and maximum takeoff weight performances  
p0357 A72-30039

Wind tunnel testing of Dassault-Breguet-Dornier Alpha Jet twin engine trainer, emphasizing tests for wing-empenage flutter and jet induced interference effects  
p0357 A72-30077

Canadian Armed Forces air navigation training program, noting emphasis on training flights  
p0398 A72-32209

Normal acceleration data for jet aircraft and trainers  
[AD-725840] p0089 A72-11968

Acoustic measurements of T-41 trainer aircraft during ground and airborne operation  
[AD-731128] p0167 A72-15014

### TRAINING DEVICES

#### BT TEACHING MACHINES

Training cockpit TL-29 mean time of failure-free operation from measurement data during development tests and two year guarantee, calculating avionic devices reliability  
p0358 A72-30281

Digital computer controlled flight simulators for undergraduate pilot, electronic warfare, air-to-air combat and helicopter training  
p0443 A72-34393

Simulated blind approach trainer for general aviation aircraft pilot training, discussing design concept and instrumentation with emphasis on components simplicity and economy  
p0450 A72-35325

Application of Apollo Project data and training concepts to maintenance of large commercial aircraft  
p0040 A72-11026

Design, development, and fabrication of total inflight simulator facility  
[AD-739230] p0483 A72-27279

### TRAINING SIMULATORS

#### BT COCKPIT SIMULATORS

#### BT FLIGHT SIMULATORS

Fighter pilots training by simulators, determining learning effectiveness by mathematical model based on renewal theory  
[AIAA PAPER 72-161] p0128 A72-16827

Aircraft safety enhancement by computer controlled flight simulator training of air crews, discussing Boeing 747 program  
p0179 A72-18839

Night Carrier Landing Trainer flight and carrier environment simulator for A-7 aircraft pilot training, discussing performance predictions from computer data analysis  
p0182 A72-19137

Aircraft and other vehicle simulators for training crews, discussing evolution of needs, digital techniques, and visual and physiological experiences  
p0362 A72-30844

ATC procedures training by digital radar simulators, taking into account geographic terrain, radar, wind and aircraft characteristics and flight plans  
p0397 A72-32098

Computerized navigator training simulator for complete array of air navigation instruments, discussing design and human factors  
p0398 A72-32208

- Digital computer controlled flight simulators for undergraduate pilot, electronic warfare, air-to-air combat and helicopter training  
p0443 A72-34393
- Simulated blind approach trainer for general aviation aircraft pilot training, discussing design concept and instrumentation with emphasis on components simplicity and economy  
p0450 A72-35325
- Use of fixed and moving base flight simulators for the aerodynamic design and development of the S-3A airplane.  
[AIAA PAPER 72-764] p0510 A72-40052
- Digital computer equipped facility for training simulators environmental simulation capability testing, describing electronics interface, control and display equipment  
p0567 A72-42928
- TRAJECTORIES**  
NT ASCENT TRAJECTORIES  
NT DESCENT TRAJECTORIES  
NT MISSILE TRAJECTORIES  
NT PARTICLE TRAJECTORIES  
NT REENTRY TRAJECTORIES
- TRAJECTORY ANALYSIS**  
Three dimensional roll-controlled missile trajectory model for simple time-sharing digital or analog simulation, using wind-to-inertial axis transformation  
p0011 A72-10964
- Computerized error function method of wreckage trajectory analysis in aircraft accident investigation, using fundamental equations of motion  
p0054 A72-13250
- Russian book on flight dynamics covering horizontal flight, takeoff, climb and landing characteristics, meteorological conditions, helicopters, trajectory problems, stability and controllability analysis, etc  
p0413 A72-33874
- STOL aircraft minimum noise takeoff trajectories determination, taking into account engine thrust and listeners distance from noise source  
[AIAA PAPER 72-665] p0414 A72-34072
- Special control of spiral flight curves with the neutral and maneuver points as ultimate positions of the indifference points  
p0461 A72-36942
- Allowable region of approach height and desirable approach path of aircraft for safe landing, presenting optimal control trajectories  
p0603 A72-44497
- Effects of aerodynamic coefficients, launch velocity, and burning rate on trajectory of self-suspended parachute flare  
[AD-731683] p0217 N72-16955
- TRAJECTORY CONTROL**  
NT TRAJECTORY OPTIMIZATION  
Optimization algorithms for jet transport aircraft inertially based flight trajectory control in turbulent atmosphere, comparing with ILS  
p0120 A72-16472
- A versatile Kalman technique for aircraft or missile state estimation and error analysis using radar tracking data.  
[AIAA PAPER 72-838] p0505 A72-39089
- TRAJECTORY OPTIMIZATION**  
Hybrid simulation of F-4 aircraft for evaluating display devices and pilot performance in manual fuel consumption optimization  
[AD-731713] p0208 N72-16315
- Computerized simulation used to obtain time optimal trajectories for P-3C ASW aircraft  
[AD-734167] p0272 N72-19046
- Mathematical determination of optimal range and maximum range for supersonic aircraft based on initial and final mass and altitude  
[NASA-TN-D-6707] p0319 N72-20008
- TRANSCIEVERS**  
U TRANSMITTER RECEIVERS
- TRANSCENDENTAL FUNCTIONS**  
NT PERIODIC FUNCTIONS
- TRANSDUCERS**  
NT PRESSURE SENSORS  
Variable impedance transducer measuring instruments for in-flight aircraft performance tests under environmental thermal effects  
p0565 A72-42711
- Evaluation of time division multiplexing system for helicopter rotor tests  
[AD-740773] p0534 N72-29480
- TRANSFER FUNCTIONS**  
Aircraft steering dynamics model with translational and rotational equations, considering zero sideslip and acceleration and lift bank angle transfer functions  
p0118 A72-16112
- Pilot trainer transfer function identification for man-machine and on-line adaptive control system using analog/hybrid computer  
p0361 A72-30721
- Determination of the operational transfer functions of a gas turbine engine on a digital computer  
p0602 A72-44292
- Spectral analysis of transient data applied to auto-pilot parameter studies of coupler transfer function  
[AD-725068] p0035 N72-10501
- Numerical and experimental calculations of jet engine transfer functions  
[NAL-TR-238] p0112 N72-13747
- Control and perturbation transfer function coefficients as function of aircraft derivatives for uncontrolled longitudinal motion in turbulence  
[DLR-MITT-71-11] p0366 N72-22010
- Procedures for evaluating effect of transfer function zeros on transient response of aircraft and determining desirable regions of pole-zero locations  
[NASA-TM-X-2585] p0478 N72-27024
- Importance of advanced information given to pilots considered as element in automatic control system  
[REPT-64] p0480 N72-27034
- TRANSFORMATIONS (MATHEMATICS)**  
NT COORDINATE TRANSFORMATIONS  
NT LAPLACE TRANSFORMATION  
Flight mechanics derivative transformations by matrix methods for changing coordinate or independent variable systems  
[DFVLR-SONDDR-175] p0126 A72-16706
- Nonlinear algebraic transformation to determine straight line and second order curve intersection point in aircraft lofting problem  
p0345 A72-28742
- Basic formulations for developing coordinate transformations and equations of motion used with free flight and wind tunnel data reduction  
[NASA-SP-3070] p0472 N72-26475
- TRANSFORMERS**  
NT INSTRUMENT TRANSFORMERS  
Microelectronics and rotary transformers for obtaining reliable data channels in rotating shaft system  
[NASA-TM-X-68112] p0580 N72-30776
- TRANSFORMS**  
U TRANSFORMATIONS (MATHEMATICS)
- TRANSIENT HEATING**  
Three dimensional photothermoelastic method of refrigeration with composite model to study transient thermal stresses in wing rib  
p0362 A72-30907
- TRANSIENT LOADS**  
NT BLAST LOADS  
NT GUST LOADS  
NT IMPACT LOADS  
NT LANDING LOADS  
NT SHOCK LOADS  
Effect of transient winds on flow quality of open-circuit wind tunnel model  
[NASA-TM-X-2538] p0379 N72-22993
- TRANSIENT RESPONSE**  
Finite element method for determining transient response of box-type structure to traveling sonic pressure wave  
p0003 A72-10219
- Zero velocity lag servomechanism transient response sensitivity from intuitive approach to convolution problem, noting feedback compensation advantages in sensitivity reduction  
p0189 A72-20593
- Building structures response to transient pressures caused by sonic booms, discussing three dimensional loading effects, air cavity coupling and nonlinearities influence  
p0198 A72-21908

## TRANSIENTS (SURGES)

Transient characteristics and steady state off-design operation of mixed and unmixed type turbofan engines, noting peculiarities in control characteristics

p0228 A72-22626

Turboprop engines dynamic parameters experimental determination by rpm transient response to instantaneous fuel supply changes

p0351 A72-29137

Aircraft instrumentation system accuracy relation to aerodynamic derivatives evaluated from flight data, proposing input and transient response measurement system

p0412 A72-33640

Sonic boom duration effects on thin circular elastic plate transient axisymmetric vibration via Hankel and Laplace transforms

p0457 A72-36409

## TRANSIENTS (SURGES)

## U SURGES

## TRANSISTOR AMPLIFIERS

Single and dual gate GaAs FET integrated amplifiers in C band.

p0489 A72-37270

## TRANSISTORS

## NT FIELD EFFECT TRANSISTORS

## TRANSITION FLOW

Influence of engine design and thrust vector control on transition characteristics of VTOL transport aircraft

[NASA-TT-P-14059] p0151 N72-13993

Thrust measurement interpretation for V/STOL models and transition performance of lift fan configurations

p0210 N72-16693

## TRANSITION METALS

## NT GOLD

## NT IRON

## NT REFRACTORY METALS

## NT TUNGSTEN

## TRANSITION TEMPERATURE

Aircraft paint film mechanical property changes caused by artificial weathering noting glass transition temperature and flexibility measurements

[D-MAT-165] p0324 N72-20519

## TRANSLATIONAL MOTION

## NT SECONDARY FLOW

## NT THREE DIMENSIONAL FLOW

## NT THREE DIMENSIONAL MOTION

## TRANSMISSION

## NT AERODYNAMIC HEAT TRANSFER

## NT CONDUCTIVE HEAT TRANSFER

## NT CONVECTIVE HEAT TRANSFER

## NT TURBULENT HEAT TRANSFER

## NT WAVE PROPAGATION

## TRANSMISSION LINES

## NT COMMUNICATION CABLES

## NT WAVEGUIDES

## TRANSMITTER RECEIVERS

An all solid-state MIC transmit-receive module.

p0489 A72-37268

Location identification system with ground based transmitter and aircraft borne receiver/decoder

[NASA-CASE-ERC-10324] p0433 N72-25173

Test and evaluation of VHF and UHF air/ground communication transceivers at long range radar sites

p0517 N72-28177

## TRANSMITTERS

## NT INSTRUMENT TRANSMITTERS

## SUBJECT INDEX

## NT RADIO BEACONS

## NT RADIO TRANSMITTERS

## NT RADARSONDES

## NT REPEATERS

## NT TRANSMITTER RECEIVERS

Minimum frequency separation between avionics receivers and transmitters for acceptable interference level

p0189 A72-20929

Radiation patterns and transmitter power needed for two-bay antenna used with VOR approach marker beacon

[FAA-RD-72-33] p0261 N72-18659

Battery powered aircraft crash locator transmitter

[NASA-CASE-HPS-16609] p0338 N72-21431

## TRANSOCEANIC COMMUNICATION

Airline air/ground radio communications and data link service implementation for San Francisco-Hawaii center

p0138 A72-17337

## TRANSOCEANIC SYSTEMS

## NT TRANSOCEANIC COMMUNICATION

Synchronous satellite surveillance system for transoceanic ATC, using suboptimal /modified Kalman/ filter for aircraft position and velocity computation

p0191 A72-21091

## TRANSONIC AIRCRAFT

## U SUPERSONIC AIRCRAFT

## TRANSONIC COMPRESSORS

Transonic compressor design for minimum number of stages and hub/tip ratio and maximum inlet axial velocity, assuming axisymmetric flow

p0121 A72-16482

Design and experimental performance of 20-inch diameter, tandem bladed, axial flow, transonic compressor rotor for advanced air breathing engines

[NASA-TN-X-2484] p0263 N72-18773

Comparison of flow characteristics of two transonic compressors

p0282 N72-19852

Performance and distortion tolerance of 1500 ft/sec tip speed transonic fan stage with variable geometry inlet guide vanes and variable stagger stator

[NASA-CR-72880] p0487 N72-27818

Design of single stage fan with tip speed of 1800 ft/sec and hub/tip ratio of 0.5 for producing pressure ratio of 2.285 to 1

[NASA-CR-120907] p0580 N72-30774

## TRANSONIC FLIGHT

Unsolved aerodynamic problems in sub- and transonic civil and military aircraft design, considering flow problems during transonic flight, takeoff and landing

[DGLR PAPER 71-105] p0024 A72-12745

Transonic air transport design, discussing wind tunnel tests, supercritical flow technology, sonic boom avoidance, cruising speed, operating costs and transport family development

p0057 A72-13487

Ground focus line location of sonic bang propagating in stratified atmosphere with wind for transonically accelerating aircraft

p0184 A72-19645

Wind tunnel tests of full-scale flight path accelerometer to determine transonic aerodynamic characteristics and to eliminate interaction effects between angle of attack and sideslip vanes

[AD-736456] p0371 N72-22328

Aerodynamic analysis of airfoils and wings at transonic flight conditions

[AD-737293] p0380 N72-23002

## TRANSONIC FLOW

Velocity field of sonic flow about aircraft wing profile, solving mixed Cauchy problem

p0013 A72-11178

Noise generation from turbulent supersonic shear layers, including low supersonic and transonic ranges for jet noise applications

p0072 A72-15566

Difference equations and relaxation method for three dimensional transonic flow field about wings in terms of velocity potential

[AIAA PAPER 72-189] p0128 A72-16843

Subsonic and transonic compressible potential flow over nonlifting hovering helicopter rotor blades, calculating flow field by

[NASA-TM-X-67416]

Wind tunnel longitudinal stability tests of AVRO 720 scale model with determination of up-elevon and leading edge notch effects  
[ARC-CP-1140] p0088 N72-11962

Flow unsteadiness and model vibration in transonic and subsonic wind tunnels for dynamic tests  
[ARC-CP-1155] p0092 N72-12198

Scale effect in reattached, separated, and thin wake flow over swept wings at transonic speed  
[RAE-TR-71043] p0169 N72-15292

Free flight stability testing at transonic speeds of Orion slender wing models with zero lift using terminal velocity technique  
[ARC-CP-1174] p0202 N72-15951

Noise pollution, structural failure, transonic speed engineering, and aircraft design  
p0214 N72-16766

Aerodynamic characteristics and flow phenomena of supercritical wings near Mach one conditions  
[NASA-TT-F-14242] p0317 N72-19994

Aerodynamic forces, pitching moments, and pressure distributions measurements on delta wing-body combinations at transonic speed in compressible flow  
[AVA-FB-7129] p0317 N72-19998

Wind tunnel tests of M2-F2 lifting body entry configuration at transonic and supersonic speeds and selected Reynolds numbers  
[NASA-TM-X-2511] p0331 N72-21005

Methods for simulating high level Reynolds number for wind tunnel model testing at transonic speed  
[NASA-TT-F-14290] p0463 N72-26000

Analysis of performance and economic factors involved in operation of commercial transport aircraft designed to cruise at transonic speeds  
[NASA-TM-X-62156] p0464 N72-26009

Structural and aerodynamic characteristics of transonic transport aircraft with supercritical wings and fuselage area ruling  
[NASA-TM-X-62157] p0465 N72-26016

Economic analysis of transport aircraft operating in transonic region with consideration of materials, aerodynamic configuration, and cruise speed  
[NASA-TM-X-62159] p0477 N72-27015

Development of local linearization and transonic equivalence rule for predicting properties of transonic flows about wing-body combinations  
[NASA-CR-2103] p0526 N72-28994

Flight tests to determine effects of moderate deflections of wing leading and trailing edges of F-104 aircraft buffet characteristics at subsonic and transonic speeds  
[NASA-TN-D-6943] p0572 N72-30004

**TRANSONIC TURBINES**

**U SUPERSONIC TURBINES**

**TRANSONIC WIND TUNNELS**

Transonic air transport design, discussing wind tunnel tests, supercritical flow technology, sonic boom avoidance, cruising speed, operating costs and transport family development  
p0057 A72-13487

Two dimensional airfoil pressure distribution measurements at high subsonic speeds, comparing normal force coefficients corrected for wind tunnel interference effects with theoretical calculations  
[DFVLR-SONDDR-168] p0058 A72-13609

Correction factors for Aerodynamic Research Institute Goettingen transonic wind tunnel, comparing calculated values with AGARD calibration models test results  
[DFVLR-SONDDR-167] p0058 A72-13610

Two dimensional transonic airfoil section testing at ONERA S3MA wind tunnel, comparing results with helicopter rotor blades test data  
[ONERA, TP NO. 1028] p0059 A72-13642

Flow quality improvements in a blowdown wind tunnel using a multiple shock entrance diffuser.  
[AIAA PAPER 72-1002] p0557 A72-41587

Evaluation of transonic and supersonic wind-tunnel background noise and effects of surface pressure fluctuation measurements.  
[AIAA PAPER 72-1004] p0557 A72-41588

Application of wall corrections to transonic wind tunnel data.  
[AIAA PAPER 72-1009] p0558 A72-41591

High Reynolds number transonic wind tunnel facility /HIRT/ for improved aerodynamic testing

of modern combat and commercial aircraft performance, maneuverability and handling qualities  
[AIAA PAPER 72-1035] p0559 A72-41609

Design of flexible steel liners for adjustable transonic wind tunnel nozzle  
[NPL-AERO-NOTE-1098] p0030 N72-10023

Conference on theoretical methods and wind tunnel facilities for transonic aerodynamic testing of aircraft at high Reynolds numbers  
[AGARD-CP-83-71] p0073 N72-11854

Transonic wind tunnel testing for predicting flight performance characteristics of aircraft  
p0075 N72-11865

Comparison of performance predictions and flight data for optimizing transonic wind tunnel design  
p0076 N72-11871

Measurement accuracy and flow simulation for transonic testing in wind tunnels  
[NASA-TM-X-67415] p0076 N72-11872

Transonic wind tunnel testing requirements for simulating transonic aerodynamic data at flight Reynolds numbers  
p0076 N72-11873

Methods for solving engine airplane interference and wall corrections in transonic wind tunnel tests for predicting aerodynamic performance of airplane design  
p0076 N72-11877

Hydraulic equipment for high Reynolds number testing in transonic wind tunnel  
[NASA-TM-X-67418] p0077 N72-11880

Comparison between conventional blowdown and Ludwig tube driven transonic wind tunnels for high Reynolds number range  
p0077 N72-11881

Performance and operational characteristics of high Reynolds number blowdown and shock wind tunnels for transonic model testing  
p0078 N72-11884

Transonic wind tunnel design for model testing at high Reynolds number  
p0078 N72-11887

Transonic wind tunnel tests on three dimensional flow distribution during stall development on rotary wing profiles  
[ARC-CP-1146] p0080 N72-11904

Aerodynamic testing at high Reynolds numbers and transonic speeds in NATO  
[AGARD-R-588-71] p0099 N72-12978

Time sharing system for teleprocessing of wind tunnel measurements with IBM 7040 computer as central processor  
[DLR-FB-70-68] p0168 N72-15186

Data and recommendations for transonic tests of inlets  
p0209 N72-16687

Wind tunnel test section for simulating high Reynolds number over transonic speed range  
[NASA-CASE-MFS-20509] p0221 N72-17183

Transonic and blowdown-wind tunnels for high Reynolds number testing  
[AD-734648] p0276 N72-19306

Transonic wind tunnel calibration of dual system gust measuring probe  
[ARL/A-NOTE-334] p0484 N72-27426

Wind tunnel wall corrections for two-dimensional flow applied to pressure distribution measurements in transonic wind tunnel  
[NASA-TT-F-14316] p0626 N72-32264

**TRANSONICS**

**U TRANSONIC FLOW**

**TRANSPARENCY**

Optical transparencies - Conference, London, June 1971  
p0304 A72-27001

Structural design and optical problems of external vision and cockpit transparencies in military aircraft  
p0305 A72-27002

Optical quality requirements for aircraft transparencies, considering resolution, haze, halation, light transmission, distortion, binocular deviation, double images, scratches and inclusions  
p0305 A72-27003

Aircraft transparencies from civil operator viewpoint, considering replacement cost of flight deck and cabin windows

# SUBJECT INDEX

# TRANSPORT AIRCRAFT

- p0305 A72-27005  
Acrylics and polycarbonates properties in aircraft transparencies design, emphasizing cost and optical, mechanical, thermal and chemical properties
- p0305 A72-27009  
Polycarbonates applications in aircraft transparencies, discussing chemical, heat, impact and abrasion resistance, toughness and weathering
- p0305 A72-27010  
Transparent aircraft polycarbonate glazing systems shielding properties for projectile and bird impacts

Propulsion system optimization for commercial transport aircraft design under Advanced Transport Technology study, considering impact on aircraft gross weight
- p0005 A72-10257  
[SAE PAPER 710760]  
Advanced technology air transports propulsion system requirements, considering design, engine performance and reliability, maintenance, airline problems, noise and pollution control
- p0005 A72-10258  
[SAE PAPER 710761]  
Propulsion system optimization in transonic transport aircraft design, considering nacelle integration, engine choice, noise attenuation and technology utilization
- p0005 A72-10259  
[SAE PAPER 710762]  
Flight test procedures for subsonic transport aircraft pitot static pressure system, recommending trailing cone calibration method
- p0008 A72-10389  
[SAE ARP 921]  
Externally blown flaps for STOL characteristics in medium and heavy jet transport aircraft, demonstrating aerodynamic and flight mechanical feasibility
- p0020 A72-12502  
U.S.S.R. high-subsonic freight transport jet aircraft IL-76 for arctic areas, Siberia and Far East, noting independence of large airports availability
- p0056 A72-13471  
Transonic air transport design, discussing wind tunnel tests, supercritical flow technology, sonic boom avoidance, cruising speed, operating costs and transport family development
- p0057 A72-13487  
Le Bourget Exposition data for displayed civil transport aircraft
- p0059 A72-13638  
VFW-614 short range twin jet passenger transport aircraft, analyzing service performance and economic efficiency requirements influence on design characteristics
- p0059 A72-13643  
American civil aviation future development, discussing passenger and freight markets growth, aircraft types and FAA role
- p0066 A72-14811  
Air transport maintenance regulation as part of National Aviation System program, discussing airworthiness, safety and reliability in relation to design requirements
- p0066 A72-14814  
Civil aircraft technological constraints and requirements, discussing noise, congestion and performance characteristics of rotorcraft, STOL, VTOL, hypersonic and supersonic transports
- p0115 A72-15774  
VTOL transport aircraft use in densely populated urban areas, discussing travel time, airport requirements, noise and design problems
- p0126 A72-16733  
Soviet air traffic service productivity increase and manpower saving by introduction of new airliner types
- p0127 A72-16779  
Low wing loading STOL transport with ride smoothing automatic control system, noting thrust-weight ratio
- p0133 A72-16942  
[AIAA PAPER 72-64]  
French civil aircraft displayed at 1971 Le Bourget Air Show, discussing design and performance characteristics of Airbus, Concorde, Caravelle, Corvette, Falcon, Pégase, STOL-A-904 and Mercure
- p0136 A72-17193  
STOL transport passenger market demand model selection based on estimation of traffic patterns between two population centers and service frequency and fare considerations
- p0139 A72-17586  
Federal Air Regulations procedures for civil transport aircraft flight testing under natural and/or simulated icing conditions
- p0147 A72-18501  
Cockpit instrumentation for jet transport aircraft flight path management, emphasizing dependability, safety and economy
- p0193 A72-21524  
Physiological evaluation of modified jet transport passenger oxygen mask from altitude chamber experiments
- p0194 A72-21571  
Future civil air transport trends, considering passenger and cargo growth, travel frequency per capita income and STOL market
- p0199 A72-22150  
Technology forecasting and risk assessment in V/STOL transport area, examining mission issues and selection criteria
- p0228 A72-22473  
Aerodynamic efficiency of plane slotted blade cascades of adjustable nozzle diaphragms in transport aircraft axial flow gas turbine engines
- p0233 A72-23186

STOL and V/STOL transport aircraft design requirements consideration based on common propulsion and lift engine types use, noting fan lift solution superiority  
p0244 A72-24865

Transport aircraft fuselage computerized design, determining optimal structural distribution for strength and displacement constraints  
[AIAA PAPER 72-330] p0285 A72-25366

Convective cooling system design for Mach 6 hypersonic transport Al alloy airframe, using water glycol loop network  
[AIAA PAPER 72-334] p0286 A72-25369

NASA aerodynamic technology program, emphasizing airframe and engine development for next generation subsonic CTOL jet transport requirements  
[SAE PAPER 720319] p0290 A72-25582

Integral and remote powered lift fan engines design for large civilian VTOL transports  
[ASME PAPER 72-GT-65] p0297 A72-25654

NASA quiet engine program, discussing noise reduction technology for subsonic civil transport aircraft propulsion system  
[ASME PAPER 72-GT-96] p0298 A72-25667

LOX supply systems installation for civil transport aircraft crew and/or passenger breathing oxygen  
[SAE AIR 1223] p0301 A72-26030

Near ground pressure differentials caused by large transport aircraft induced wake vortices, comparing measured data with Bernoulli formula theoretical values  
p0313 A72-28122

Russian book on An-12 turboprop transport aircraft structural and aerodynamic characteristics covering engine operation, piloting, stability, controllability, etc  
p0315 A72-28343

High cruise altitude operational advantages for commercial transport aircraft utilizing technological innovations in structures, propulsion, controls, avionics and aerodynamics  
p0349 A72-28875

Long range transport aircraft structures and composite materials technology for airframe and engine systems  
[AIAA PAPER 72-362] p0350 A72-28955

Acoustic measurements for STOL turboprop transport aircraft propeller configurations under static, taxi and flyover conditions, discussing quiet propeller noise signature  
p0355 A72-29571

Small transport aircraft horizontal tail surfaces flow characteristics determination for stress calculation during flight in turbulent atmosphere  
p0359 A72-30284

VFW 614 twin jet transport aircraft flight test program, detailing general task plan, test equipment installations and test schedule  
p0360 A72-30679

Twin-turboprop transport aircraft, helicopter and all-terrain ground vehicle simulators, discussing control load, visual attachment, cabin motion and sound subsystems  
p0362 A72-30845

Fokker VTOL transport aircraft designs, considering payload, range, runway conditions, noise, military capabilities and operational costs  
p0405 A72-33048

Commercial transport aircraft engine technology contribution to world air transportation, considering social and ecological compatibility with community  
p0408 A72-33314

Military transport helicopter optimum secondary power system, considering onboard auxiliary power unit, electric or hydraulic engine start system, environmental control, etc  
[AHS PREPRINT 664] p0444 A72-34480

New VTOL transport aircraft designs by VFW-Fokker. II  
p0452 A72-35477

Internal engine generator application to commercial transport aircraft.  
p0453 A72-35566

Computer control of aircraft landing.  
p0455 A72-35950

V/STOL - Selection and problems of the new medium  
p0462 A72-37215

Advanced subsonic transport technology.  
p0491 A72-37677

Graphite-epoxy composites application to commercial transports for weight and cost reduction  
p0491 A72-37680

Investigation of the commonality in development of military and commercial STOL transports.  
[AIAA PAPER 72-808] p0497 A72-38114

Advanced technology transport /ATT/ aircraft configurations design parameters analysis, considering cruise speed, passenger capacities, ranges, noise level and economics  
[AIAA PAPER 72-757] p0498 A72-38127

Economic impact of applying advanced technologies to transport airplanes.  
[AIAA PAPER 72-758] p0499 A72-38128

Advanced technology applications to present and future transport aircraft.  
[AIAA PAPER 72-759] p0510 A72-40051

STOL performance criteria for military transport aircraft.  
[AIAA PAPER 72-806] p0510 A72-40055

High subsonic transport aircraft design development based on supercritical aerodynamic configuration and advanced structural, flight control and propulsion system technologies  
[AIAA PAPER 72-756] p0510 A72-40056

An exploratory study of flying qualities of very large subsonic transport aircraft in landing approach.  
[ICAS PAPER 72-07] p0552 A72-41132

Hypersonic transports commercial applications, examining economic and noise and air pollution aspects.  
[ICAS PAPER 72-32] p0554 A72-41157

Reliability analysis in the estimation of transport-type aircraft fatigue performance.  
[NASA-TN-D-6573] p0568 A72-42971

Empty weight and cruise performance of very large subsonic jet transports.  
[SAE PAPER 919] p0596 A72-43466

Observations on designing to combat fatigue and its effects on the economics of civil transport aircraft.  
p0610 A72-44745

Full scale wind tunnel tests of small unpowered jet aircraft with T tail  
[NASA-TN-D-6573] p0030 N72-10031

Description of maintenance procedures used on Beechcraft Hawker 125 commercial jet aircraft  
p0041 N72-11032

Predictions of aircraft maintenance procedures to be employed during 1970 to 1980 time period  
p0041 N72-11033

Flight simulator used to determine lateral and directional aerodynamic characteristics of STOL transport aircraft  
[FAA-RD-71-81] p0041 N72-11037

Aerodynamic suitability of Freon 12 for wind tunnel testing of transport aircraft models at increasing Reynolds numbers and subcritical and supercritical Mach numbers  
[NASA-TN-X-67417] p0077 N72-11879

Advanced Doppler-inertial navigation system for transport helicopters  
p0084 N72-11935

Development of digital autopilot for transport aircraft and evaluation of system performance on simulator  
[NASA-TN-X-62094] p0086 N72-11942

Conference on technological concepts for future transport aircraft developments in civil aviation  
[NASA-SP-292] p0102 N72-12995

Advanced technologies for future transport aircraft concepts in civil aviation  
p0102 N72-12996

Lift devices for improved takeoff and landing performance of civil transport aircraft  
p0102 N72-12997

Advanced technologies for improved direct lift jet V/STOL transport structure, propulsion, and performance  
p0104 N72-13014

Technological developments for improved helicopter design and operational capabilities  
p0105 N72-13015

## SUBJECT INDEX

## TRANSPORT AIRCRAFT CONTD

- Advanced technology applications for improving  
STOL transport aircraft aerodynamics,  
propulsion, structure, and flight dynamics  
p0105 N72-13016
- Advanced technologies for subsonic-transonic  
conventional takeoff and landing transport  
aircraft development  
p0105 N72-13017
- Technological forecasting for development of  
hypersonic transports  
p0105 N72-13020
- Analysis of noise abatement in military and  
commercial STOL transport aircraft  
[AD-729184] p0108 N72-13040
- Full scale fatigue tests of YS-11A-500/600  
turboprop aircraft wing  
[NAL-TR-241] p0112 N72-13888
- Flight tests of heavy jet transport aircraft to  
determine characteristics of vortex systems  
generated within ground effect and vortex  
systems descending into ground effect  
p0166 N72-15006
- Long time-history characteristics of vortex  
systems of four engine jet transport aircraft in  
terminal area-type operations  
p0166 N72-15007
- Scale model tests to determine optimum  
configuration and characteristics of large jet  
transport aircraft during ditching  
[NASA-TN-X-2445] p0218 N72-17005
- Flight test investigation of effect of wing tip  
vortices generated by large jet transport  
aircraft when intersected by smaller general  
aviation type aircraft  
[NASA-TN-D-6655] p0250 N72-18003
- Water-glycol convective cooling system for Mach 6  
hypersonic transport airframe  
[NASA-CR-1918] p0251 N72-18011
- Analysis of short haul aircraft transportation  
system for San Francisco Bay area, California  
[NASA-CR-2006] p0268 N72-19021
- Technique for predicting etiology of decompression  
sickness in unpressurized aircraft above 20,000  
feet  
[AD-731118] p0273 N72-19106
- Detail design of turbotip lift fan for use with  
YJ97-GE-100 turbojet gas generator to V/STOL  
transport research aircraft  
[NASA-CR-120787] p0282 N72-19842
- Aerodynamic characteristics of Dornier DO-31 VTOL  
transport under visual and simulated instrument  
flight conditions  
[NASA-TN-D-6754] p0319 N72-20012
- Survey of potential operational requirements for  
short takeoff aircraft in terminal area  
[DOT-TSC-PAA-71-9] p0323 N72-20255
- Aircraft accident involving FH-227-B commercial  
transport during landing approach at Albany  
County Airport, New York, on March 3, 1972  
[SB-72-23] p0368 N72-22021
- Design, development, and evaluation of active  
cooling systems for Mach six hypersonic  
transport aircraft  
[NASA-CR-1917] p0368 N72-22024
- Pilot evaluations of flight characteristics of  
CV-990 aircraft for providing baseline data for  
transport aircraft  
[NASA-TN-D-6811] p0368 N72-22026
- Aerodynamic research and development trend for  
transport and military aircraft  
p0369 N72-22029
- Potential foreign market for surplus U.S. airlines  
jet transports  
[REPT-72-00185] p0378 N72-22968
- Report of aircraft accident involving Aero  
Commander aircraft at Aspen, Colorado on 22  
January, 1970  
[PB-206562] p0386 N72-23044
- Application of explosives for development of  
instantaneous activation of emergency exit  
systems aboard military and civilian transport  
aircraft  
[AD-736056] p0386 N72-23046
- Wind tunnel tests to determine aerodynamic  
characteristics of V/STOL transport aircraft  
with tip-turbine driven lift fans  
[NASA-TN-X-62151] p0420 N72-24010
- Design, development, and characteristics of  
aircraft for air bus operations  
[NASA-TT-F-14240] p0420 N72-24013
- Effects of gusts, maneuvers, and landing impacts  
on four-engine cargo aircraft during commercial  
airlines operation  
[NASA-TN-D-6790] p0421 N72-24015
- Aircraft accidents involving corporate executive  
aircraft in US general aviation for calendar  
year 1970  
[NTSB-AMM-72-5] p0421 N72-24017
- Aircraft accidents involving air taxi operations  
in US general aviation for calendar year 1970  
[NTSB-AMM-72-4] p0421 N72-24018
- Wind tunnel tests to determine aerodynamic  
interference and jet-wake interference produced  
by components of high wing, logistics transport  
type aircraft  
[NASA-TN-X-2530] p0421 N72-24020
- Recommendations for advanced technology program to  
develop long range transport aircraft to meet  
noise reduction standards - Vol. 2  
[NASA-CR-112093] p0464 N72-26007
- Structural and aerodynamic characteristics of  
transonic transport aircraft with supercritical  
wings and fuselage area ruling  
[NASA-TN-X-62157] p0465 N72-26016
- Systems analysis to define technical, economic,  
and operational characteristics of aircraft  
transportation system for short-range, intercity  
commuter operations  
[NASA-CR-1991] p0467 N72-26024
- Economic analysis of transport aircraft operating  
in transonic region with consideration of  
materials, aerodynamic configuration, and cruise  
speed  
[NASA-TN-X-62159] p0477 N72-27015
- Statistical analysis of flight time, takeoff and  
landing weight, fuel weight at takeoff and  
landing for transport jet aircraft  
[TB-88] p0480 N72-27035
- Application of research and development  
advancements to design of long range transport  
aircraft operating at high subsonic speeds -  
Vol. 2  
[NASA-CR-112089] p0514 N72-28003
- Wind tunnel determination of aerodynamic  
characteristics for large scale 35 deg swept  
wing jet transport model with external blowing  
triple-slotted flap  
[NASA-TN-X-2600] p0514 N72-28009
- Design and development of electric power supplies  
for use with transport aircraft in 1980 to 1985  
time period  
[NASA-CR-120939] p0517 N72-28028
- Two stage fan engine for low noise and low  
emission operation of advanced technology  
transport aircraft  
[NASA-CR-120950] p0523 N72-28786
- Analysis of US air carrier accidents during 1964  
to 1969  
[NTSB-AAS-72-5] p0528 N72-29007
- Statistical analysis of maintenance policies on  
utilization rate of transport aircraft  
[AD-741410] p0529 N72-29015
- Design and development of longitudinal flight  
control system for short takeoff transport  
aircraft based on control of flight path  
[AD-742314] p0531 N72-29030
- Aircraft trailing vortex formation and persistence  
behind large transport aircraft  
[NASA-TN-X-68566] p0533 N72-29228
- Analysis of parameters affecting service life of  
jet powered civil transport aircraft  
p0541 N72-29911
- Problems of producing transport aircraft  
p0543 N72-29982
- Design and evaluation of automatic pilot to reduce  
excursions in altitude of jet transport aircraft  
during atmospheric turbulence  
[NASA-TN-D-6869] p0572 N72-30009
- Engine design studies for subsonic commercial  
transport aircraft  
[NASA-TN-X-2625] p0580 N72-30778
- Optimization methods for determining aerodynamic  
shapes of hypersonic transport vehicles  
p0617 N72-31996
- Analysis of gust loads on transport aircraft under  
various flight conditions  
[ESDU-69023-AMEND-B] p0619 N72-32015

# TRANSPORT COEFFICIENTS

# SUBJECT INDEX

Analysis of design and functioning characteristics of flying control systems and effect on flight qualities of transport aircraft p0621 N72-32032

Specifications, aerodynamic characteristics, and predicted performance of vertical takeoff transport aircraft with fans mounted in wing [CRANFIELD-AERO-10] p0637 N72-33012

Definition and assessment of advanced technology for production of high subsonic and sonic conventional takeoff and landing transport aircraft [NASA-CR-112181] p0638 N72-33013

General purpose airborne simulator evaluation of roll characteristics of transport aircraft during landing approach [NASA-TN-D-7062] p0638 N72-33019

Economic analysis of hypersonic transport aircraft to show projected operating costs and return on investment [NASA-TN-X-62193] p0639 N72-33025

Simulator analysis of aerodynamic characteristics of short takeoff and landing transport aircraft during approach and landing [NASA-TN-D-6898] p0640 N72-33030

- Design and development of turbotip lift fan for use with turbojet gas generator installed on V/STOL transport research aircraft  
[NASA-CR-120909] p0428 N72-24828
- Mathematical models for analyzing quasi-one-dimensional flow across face seals and narrow slots of turbine engines  
[NASA-TN-D-6668] p0435 N72-25468
- Analytical measurements of exhaust emissions from aircraft turbine engines using Jet A fuel  
[BN-RI-7634] p0435 N72-25584
- Design and development of movable turbine inlet guide vanes to provide aerodynamic choking for jet engine  
[NASA-CASE-LAR-10642-1] p0487 N72-27820
- Analysis of wettabilities and heat transfer rates of microfog jets impinging on heated rotating disc operating in inert nitrogen atmosphere  
[NASA-CR-120843] p0535 N72-29533
- Performance test of three stage turbine engine with tandem blading to determine steady state stresses and vibration effects  
[NASA-CR-2097] p0538 N72-29806
- Development of method for calculating exhaust smoke transmission for turbine engines, number of plume paths, and viewing angles  
[FAA-RD-71-23] p0572 N72-30005
- Development and characteristics of core turbine for driving single and two stage fans in turbopan engine simulator  
[NASA-TN-X-68130] p0632 N72-32762
- Development of nondimensional graphical method for analyzing performance of turbine powered aircraft  
[ESDU-70022] p0637 N72-33006

## SUBJECT INDEX

## TURBOCOMPRESSORS

- High temperature tests of aircraft turbine engine lubricants  
[AD-744841] p0644 N72-33498
- Oxidation-corrosion-deposition characteristics of aircraft turbine engine lubricants employing glassware-type apparatus  
[AD-744840] p0644 N72-33499
- TURBINE EXHAUST NOZZLES**
- Aladin 2 noiseless STOL jet aircraft project, describing exhaust nozzle configuration, design and economics  
p0021 A72-12503
- Two dimensional cascade test of air-cooled turbine nozzle, describing aerodynamic characteristics and heat transfer properties  
p0122 A72-16489
- Cascade nozzle gas particle flow properties, discussing flow pressure experiments and theory at different streamlines  
p0122 A72-16490
- TURBINE INSTRUMENTS**
- Capacitive electret pressure sensors calibration for interior measurements in turbine engines, jets and exhaust nozzles  
[ONERA, TP NO. 982] p0231 A72-22815
- Pressure transmitter for flow parameter measurements of aerodynamic nozzles and static pressure taps rotating on turbine rotor blades  
p0560 A72-42250
- Flow and heat transfer for air cooled turbine vane  
[NASA-TM-X-2376] p0098 N72-12947
- Infrared photographic apparatus and rotating systems, for measuring surface temperature of turbine vanes and blades  
[NASA-TM-X-68100] p0575 N72-30247
- Nondestructive tests of fuel filters and other turbine parts, using thermography  
[AD-743081] p0591 N72-31787
- TURBINE PUMPS**
- Gas turbine pumps; Proceedings of the Joint Conference, San Francisco, Calif., March 26, 27, 1972.  
p0456 A72-36040
- Optimal arrangement of conical nozzles in a segment of a partial supersonic turbine stage  
p0509 A72-39913
- Tangential and radial stress data from spin tests of turbine rotor for M-1 engine oxidizer turbopump  
[NASA-CR-1967] p0324 N72-20452
- TURBINE WHEELS**
- Mechanical properties of high temperature steels and alloys for gas turbine rotors, disks and blades  
p0395 A72-31703
- Influence of the structural format on the range of critical rotational speeds of rotors in aircraft engines  
p0508 A72-39801
- Optimal modes of operation of a centripetal-compressor wheel with preswirling of the flow  
p0616 A72-45622
- Development of nickel base superalloys for powder metallurgy application as compressor and turbine discs in jet engines  
[NASA-CR-72968] p0110 N72-13468
- Applying dimensional analysis techniques to containment/deflection problem of bursting high-rpm rotating parts of turbojet engines  
[NASA-CR-120841] p0172 N72-15713
- Effect of slots and vortex generators on efficiency and stable operation of highly loaded compressor stages  
[NASA-CR-72793] p0377 N72-22791
- Performance of 20 inch diameter axial-flow transonic compressor rotor with small dampers and comparison with performance of rotor with large dampers  
[NASA-TM-X-2536] p0378 N72-22799
- TURBINES**
- NT AXIAL FLOW TURBINES
- NT GAS TURBINES
- NT SHROUDED TURBINES
- NT SUPERSONIC TURBINES
- NT TWO STAGE TURBINES
- Synthesis and properties of aliphatic ester for turbine lubrication in jet aircraft  
p0050 N72-11696
- Performance tests of single-stage turbine with low solidity jet flap rotor blade assembly using various cavity pressure ratios, equivalent speeds, and expansion ratios  
[NASA-CR-1968] p0265 N72-18994
- Explosive compaction and welding for low cost production of helicopter and turbine structural components  
[AD-737719] p0425 N72-24542
- Basic turbine concepts including flow, energy transfer, and performance characteristics  
p0473 N72-26687
- Turbine research and technology including aerodynamic effect of turbine coolant, high work-factor turbines, and computer programs for design and performance  
[NASA-TM-X-68115] p0524 N72-28795
- TURBOALTERNATORS**
- U AC GENERATORS
- U TURBOGENERATORS
- TURBOCHARGERS**
- U TURBOCOMPRESSORS
- TURBOCOMPRESSORS**
- Jet aircraft turboprop engine fan compressor noise reduction by acoustic linings, giving R and D results  
[BAS PAPER 71 SA6] p0003 A72-10223
- Thermal radial stresses in axial-compressor disk-to-drum transition areas of operating AM-3 aircraft engine  
p0014 A72-11374
- Through flow analysis of low speed axial flow compressor, deriving blades deviations and losses  
p0118 A72-16114
- Supersonic axial flow shock-in-rotor type compressor performance tests, discussing factors responsible for low efficiency  
p0120 A72-16481
- Transonic compressor design for minimum number of stages and hub/tip ratio and maximum inlet axial velocity, assuming axisymmetric flow  
p0121 A72-16482
- Axial flow multistage compressor design, discussing high speed flow measurements and Reynolds number and blade airfoil shape effect on aerodynamic performance  
p0121 A72-16483
- Two dimensional cascade performance data correction for rotating blade row stream surface inclination in axial flow turbines  
p0121 A72-16486
- Stalled blade rows dynamic performance in terms of blade channel fluid inertia and surface boundary layer-caused time delay  
p0121 A72-16487
- Bleed air type gas turbine compressor development, presenting reliability improvement program  
p0122 A72-16500
- Cascade wind tunnel and water table determination for trajectories and velocities of suspended particles in fluid flow through axial compressor stage  
p0175 A72-18756
- Circumferential inlet pressure distortion index derivation for high hub-tip ratio multistage axial flow compressor from one dimensional isentropic flow expressions  
p0176 A72-18762
- Turbojet engine compressor efficiency relationship to cascade characteristics diagram, using influence coefficients  
p0181 A72-18995
- Partial load computation for axial flow compressor stages, describing computer method limitations  
p0229 A72-22632
- Secondary losses reduction procedure in axial flow turbine stages, using boundary layer fences on blades profile suction side  
p0229 A72-22634
- Two spool gas turbine engine characteristics with speed reduction, determining time dependence of turbocompressor rpm, gas temperature and engine power  
p0233 A72-23185
- Equations of motion of steady viscous fluid flow in three dimensional boundary layer on walls of axial flow compressors and turbines, obtaining velocity field  
p0246 A72-25120

- Finite difference method application to axial flow compressors rotating stall nonlinear analysis, taking into account blade row characteristics [ASME PAPER 72-GT-3] p0292 A72-25606
- Noise reduction effects of wake interaction between rotor blade rows in axial flow compressor, cancelling velocity defect at stator position [ASME PAPER 72-GT-15] p0293 A72-25614
- Axial flow compressor and turbine loss coefficients, correlating blade rows geometric and aerodynamic variables effects [ASME PAPER 72-GT-18] p0294 A72-25617
- Shocked flow and pressure loss computation for axial flow compressor cascades, using time dependent finite difference technique [ASME PAPER 72-GT-31] p0295 A72-25627
- Turbocompressor deceleration cascades blades surface roughness effects on boundary layer, noting pressure and velocity distributions [ASME PAPER 72-GT-48] p0296 A72-25640
- Flow measurement instrumentation for turbomachine rotors, noting telemetry type data transmission system with strain gage pressure transducers for turbocompressor [ASME PAPER 72-GT-55] p0296 A72-25646
- Flow data reduction validity for supersonic axial compressors, presenting experimental results for rotating supersonic cascade [ASME PAPER 72-GT-100] p0299 A72-25669
- Steady state radial inlet pressure distortion index for axial flow compressor, examining radial velocity, continuity equation and mathematical model [ASME PAPER 72-GT-109] p0299 A72-25673
- Measurement of spatially coherent and incoherent structure of axial compressor-generated noise modes propagating in duct [ONERA, TP NO. 1045] p0311 A72-28049
- Computer program in ALGOL 60 language for calculation of long blades twist in axial flow turbines and compressors p0346 A72-28782
- Subsonic and supersonic heavily loaded axial flow rotors noise, discussing helicopter blade slap effect and compressor rotor-stator interaction p0355 A72-29570
- Linear mathematical model for twin shaft gas turbine with isolated turbocompressor, calculating dynamic constants as function of operational modes p0360 A72-30581
- Stage removal and addition effect on multistage axial compressor for application in engine design p0395 A72-31706
- Velocity profiles for three dimensional turbulent boundary layer on end wall of axial flow compressor cascade passage under adverse pressure gradients p0405 A72-32901
- Pressurized air assisted gas turbine fuel system, describing single stage centrifugal turbocompressor and rotary-lobe compressor designs and performance characteristics p0456 A72-36043
- Interaction effects between blade rows in turbomachines. p0489 A72-37275
- German monograph - Computational and experimental investigations regarding the operational characteristics of a three-stage axial-flow compressor with high performance per stage p0490 A72-37490
- Effect of the slope and curvature of meridional current lines on the long-blade twist in axial turbomachines p0507 A72-39588
- Iterative solution to aerodynamic design of axial flow compressors used in turbojet engines, calculating meridional velocity distribution p0550 A72-40930
- Engine inlet total pressure distortion effects on multistage axial compressor and turbojet/turbofan engine performance and stability, considering inlet-engine compatibility [ICAS PAPER 72-19] p0553 A72-41144
- The development of inlet flow distortions in multi-stage axial compressors of high hub-tip ratio. [ICAS PAPER 72-20] p0553 A72-41145
- Digital computer controlled testing equipment for separately driven coaxial gas turbine low and high pressure compressors, emphasizing reliability and flexibility in system design p0564 A72-42682
- Measurement, in a duct, of the space-structure of the discrete-frequency noise generated by an axial compressor. p0567 A72-42913
- Analysis by hydraulic analogy of rotating separation in compressors p0569 A72-43091
- Flow analysis in the axial-flow compressor impeller with meridional stream acceleration. p0614 A72-45371
- Optimal modes of operation of a centripetal-compressor wheel with preswirling of the flow p0616 A72-45622
- Performance of axial flow compressor rotor with different casing treatment configuration [NASA-TN-D-6538] p0030 N72-10025
- Cascade calculations and tests of blunt trailing edge blades used in advanced axial compressor concepts [AD-725789] p0045 N72-11308
- Length and weight estimates of powerplant components for V/STOL propulsion systems [NASA-TN-X-2406] p0097 N72-12785
- Performance of redesigned single stage axial compressor stator for gas turbine engine [AD-877209] p0097 N72-12795
- Simulation and analysis of trajectories and velocities of solid particles suspended in fluid passing through axial flow compressor stage [AD-725596] p0097 N72-12798
- Boundary layer behavior of turbocompressor in free stream turbulence [CUED/A-TURBO/TR-26] p0109 N72-13266
- Effect of grooved casing treatment on flow range capability of single-stage axial flow compressor [NASA-TN-X-2459] p0163 N72-14985
- Effect of Reynolds number on overall performance of 3.7-inch diameter, six stage axial flow compressor [NASA-TN-D-6628] p0201 N72-15945
- Computerized design of axial compressor stage using radial three dimensional equilibrium flow equations [AD-733437] p0259 N72-18507
- Aerodynamic design and performance of axial flow compressor rotor with tip speed of 1380 feet per second and 1.1 blade tip solidity [NASA-TN-X-2449] p0266 N72-18998
- Experimental study of effect of blade aspect ratio on performance of axial flow compressors [ARC-CP-1179] p0277 N72-19331
- Acoustic measurements of aerodynamic noise in low supersonic operation of axial flow compressor [NASA-CR-125811] p0282 N72-19849
- Fuel flow control by sensing airflow conditions at discharge of engine compressor [AD-734542] p0282 N72-19857
- Performance of 20 inch diameter axial-flow transonic compressor rotor with small dampers and comparison with performance of rotor with large dampers [NASA-TN-X-2536] p0378 N72-22799
- Analysis of effect of aerodynamically-induced fluctuation forces on sound produced by axial flow compressor rotor and stator combinations [NASA-CR-2012] p0419 N72-23991
- Unsteady response of turbocompressor with inlet flow distorted by square wave and triangular spoilers [ARC-CP-1203] p0431 N72-25000
- Retrodiffusion holographic interferometry visualizing turbocompressor flow [ONERA-NT-190] p0471 N72-26358
- Computer program for flow analysis through axial flow turbines and compressors [ARC-R/M-3687] p0588 N72-31306
- Computer programs for analyzing axial compressor aerodynamic test data [AD-744503] p0631 N72-32756
- Vorticity and stall-inducing inlet distortion in turbocompressors [AD-743725] p0647 N72-33752

## TURBOCONVERTERS

## U TURBOGENERATORS

## TURBOELECTRIC CONVERSION

## U TURBOGENERATORS

## TURBOFAN AIRCRAFT

## NT CONCORDE AIRCRAFT

Industry assisted state of art assessment of high lift turbofan configurations for USAF STOL tactical transport technology program  
[SAE PAPER 710758] p0004 A72-10255

Mach 0.80 quiet intercity STOL transport design comparison for turbofan, prop-fan and turboprop systems  
[SAE PAPER 710759] p0004 A72-10256

Trainer-combat turbojet or turbofan aircraft characteristics, comparing flight, weight, size, maintenance and development costs  
p0119 A72-16178

Eight-place turbofan powered business jet aircraft design, discussing structure, fuel system, engines crew station and safety features  
p0194 A72-21572

Application of advanced methods to the determination of design loads of the Lockheed L-1011 TriStar  
[AIAA PAPER 72-775] p0499 A72-38134

Fan jet Falcon design and certification tests.  
p0608 A72-44731

Two stage fan engine for low noise and low emission operation of advanced technology transport aircraft  
[NASA-CR-120950] p0523 N72-28786

## TURBOFAN ENGINES

Jet aircraft turbofan engine fan compressor noise reduction by acoustic linings, giving R and D results  
[BAS PAPER 71 SA6] p0003 A72-10223

Graphite fiber composite fan blade design for subsonic turbofan engines, discussing weight and fatigue sensitivity reductions and performance test results  
[SAE PAPER 710771] p0005 A72-10265

Small three spool, reverse and mixed flow turbofan engine for business jets, discussing fuel consumption reduction, thermodynamic performance, efficiency and maintainability  
[SAE PAPER 710776] p0005 A72-10268

CF6 high bypass ratio turbofan engine design improvements for fuel consumption, thrust/weight ratio, starting, noise level, smoke emission, maintenance, monitoring and accessory replacement  
[SAE PAPER 710779] p0006 A72-10271

GE CF6-50 high-bypass two-spool engine development, discussing configuration, installation, endurance tests and various failures  
p0059 A72-13681

National Aviation System technology, discussing wide body jets, smokeless turbofans, all-weather operational capability, collision avoidance and noise reduction  
p0067 A72-14824

Aerodynamic characteristics of STOL aircraft with externally blown jet augmented flaps, predicting interference between lifting surfaces and turbofan engines  
[AIAA PAPER 72-63] p0133 A72-16953

F-14 Tomcat test program for hydraulic systems, spinning, low speed performance, stalling, afterburning turbofan engines, in-flight refueling and automatic telemetry equipment  
p0138 A72-17582

Fighter/attack aircraft turbojet and turbofan engines testing with/without afterburners  
p0146 A72-18495

Catapult steam ingestion test of turbofan engines in A-7 aircraft, correlating compressor stall occurrences with temperature increase rate in distorted region  
p0176 A72-18760

Inlet duct and turbofan engine compatibility without stalling and surge conditions obtained by design optimization and wind tunnel testing  
p0176 A72-18761

JT15D turbofan engine antiicing system development, discussing icing test program and results  
p0176 A72-18765

Astafan turbofan engine with variable pitch fan rotor blades for thrust variation, discussing

gearbox and core engine design

p0188 A72-20459

Commercially available aircraft turbofan engines specifications, describing design features and performance characteristics  
p0189 A72-20625

Transient characteristics and steady state off-design operation of mixed and unmixed type turbofan engines, noting peculiarities in control characteristics  
p0228 A72-22626

Dynamic model of high bypass ratio turbofan engines for L-1011 wind tunnel flutter test program  
[AIAA PAPER 72-376] p0286 A72-25400

Two spool geared fan jet engine design and development for general aviation, discussing performance, reliability and ecological aspects  
[SAE PAPER 720351] p0292 A72-25602

High bypass ratio JT15D-1 turbofan engine design and development testing  
[SAE PAPER 720352] p0292 A72-25603

Variable pitch ultrahigh bypass ratio ducted fan engine design for STOL transport aircraft  
[ASME PAPER 72-GT-61] p0297 A72-25652

Turbofan engine trends for short haul conventional and STOL aircraft, considering variable pitch fans, reduction gears, thrust reversal and noise and environmental pollution  
[ASME PAPER 72-GT-86] p0298 A72-25661

Turbomeca Astafan geared fan engine with axial centrifugal compressor design, specifications and performance  
p0311 A72-27748

Composite turbofan blades for high temperature applications, discussing weight reduction and design procedure  
p0313 A72-28102

Low noise aircraft-engine configuration feasibility, discussing turbofan engine noise reduction  
p0400 A72-32322

RB 211 three-shaft turbofan engine for L-1011 airliner, describing design for noise reduction  
p0400 A72-32428

F-100 and F-401 turbofan engine design and development for F-15 and F-14, discussing impingement cooling, Ti alloys, powder metallurgy and metal composites, etc  
p0442 A72-34390

Specific fuel consumption and specific thrust optimization methods in turbofan cycles, noting optimum fan pressure ratio increase with turbine inlet temperature  
p0492 A72-37746

Thermodynamic cycle parameter effects on bypass turbofan jet engine fuel consumption and performance under various flight conditions and engine ratings  
p0600 A72-44281

Jet interference and lift drag ratio of swept wing aircraft with turbofan above wing  
[RAE-TH-AERO-1271] p0028 N72-10009

Analysis of gear reduction concepts for power train systems used with low bypass ratio, single spool, geared turbofan engine for aircraft propulsion  
[NASA-CR-72735] p0093 N72-12413

Modification of turbine engine test cell to provide simulated altitude icing conditions and 1200 pound per second air flow  
[AD-729205] p0157 N72-14279

Destabilizing factors affecting supersonic inlets and turbofan engines of propulsion system  
p0212 N72-16711

Computer program for steady state turbojet and turbofan engine cycle calculations  
[NASA-TN-D-6552] p0264 N72-18783

Macelle cowling of high bypass ratio turbofan engines  
[AD-733738] p0264 N72-18789

Transonic propulsion fan for turbofan engine with rotor blade spacing designed to minimize noise emission  
[NASA-CASE-LEW-11402-1] p0327 N72-20770

Characteristics of aircraft using supercritical aerodynamics and analysis of turbofan engine performance with single and double stage configurations

- [NASA-TM-X-68031] p0340 N72-21816  
Acoustic measurements to determine aerodynamic noise characteristics of single stage fan with 1.5 pressure ratio and 1160 feet per second tip speed
- [NASA-CR-120789] p0365 N72-21994  
Development and characteristics of short length, double-annular, ram-induction combustor for turbofan engine operating at Mach 3
- [NASA-CR-120908] p0377 N72-22792  
Development of procedure for calculating off-design-point performance of turbojet and turbofan engines
- [LR-555] p0378 N72-22798

## URBAN TRANSPORTATION

### NT RAIL TRANSPORTATION

Mach 0.80 quiet intercity STOL transport design comparison for turbofan, prop-fan and turboprop systems

[SAE PAPER 710759] p0004 A72-10256

Airport terminal flow and interface transportation systems, discussing access, passenger traffic and cargo handling and government controls

p0055 A72-13414

VTOL transport aircraft use in densely populated urban areas, discussing travel time, airport requirements, noise and design problems

p0126 A72-16733

Rotorcraft based on VTOL concept for aircraft noise reduction in urban transportation

p0143 A72-18248

Ultrashort haul common carrier air transportation system based on VTOL aircraft for suburban-to-city center trips, comparing with land based transport

p0405 A72-33113

Helicopters and turbotrains as space conserving alternatives for automobile urban transportation, emphasizing comfort and convenience

p0452 A72-35505

Short haul intercity air transportation systems requirements for successful competition with lower cost ground modes

[ICAS PAPER 72-16] p0553 A72-41141

Prototype interurban IFR STOL transportation system demonstration project, considering area navigation, scanning beam microwave landing systems and STOLport planning

[ICAS PAPER 72-41] p0555 A72-41166

Propulsion systems for low emission urban vehicles and analysis of exhaust emissions from fossil-fueled heat engines

[PB-200144] p0036 N72-10830

Graphs and tables of service cost for intraurban transportation system

[NASA-CR-114341] p0036 N72-10985

Aircraft design concepts for intraurban transportation system

[NASA-CR-114342] p0036 N72-10986

Documentation of data used in intraurban transportation analysis appendix

[NASA-CR-114343] p0036 N72-10987

Supplement to intercity air transportation effectiveness model

[PB-200470] p0106 N72-13024

Computer program and subprogram descriptions for intercity air transportation effectiveness

[PB-200471] p0106 N72-13025

Model subprogram design for intercity air transportation effectiveness analysis by computer

[PB-200472] p0106 N72-13026

Subprogram design specification for intercity air transportation effectiveness model

[PB-200475] p0106 N72-13029

Acceptance tests for intercity air transportation effectiveness computer programs

[PB-200476] p0106 N72-13030

Computer program for intercity air transportation effectiveness model

[PB-200477] p0107 N72-13031

Computer operators manual for intercity air transportation effectiveness programs

[PB-200478] p0107 N72-13032

Manual for programmers for intercity air transportation effectiveness computer programs

[PB-200479] p0107 N72-13033

Manual for programming intercity air transportation effectiveness model

[PB-200482] p0107 N72-13036

Intercity air transportation effectiveness model

[PB-200469] p0108 N72-13246

Intraurban STOL travel demand and modal split model incorporating commuter preference variables, and aircraft network and operating cost estimates for San Francisco

[NASA-CR-114418] p0378 N72-22980

Air and highway systems analysis and environmental predictions for Northeast Corridor

[PB-205243] p0379 N72-22986

Analysis of interrelationships of ground transportation systems and air terminal facilities in San Francisco, California area

Analysis of accomplishments in public transportation developments and predictions of future requirements

p0518 N72-28258

General description of, and information on 1974 National Transportation Study for State and local governments and work programs for each State

[ONB-04-S72004] p0634 N72-32982

USA (UNITED STATES)

UNITED STATES OF AMERICA

UTAH

Environmental impact survey on consolidation of all Air Force advanced helicopter training at Hill AFB, Utah

[PB-198764-F] p0221 N72-17203

Environmental impact statement on proposed improvements to Manti-Ephraim Airport, Ephraim, Utah

[PB-207064-F] p0626 N72-32270

UTILITY AIRCRAFT

Marchetti SV-20-A twin engine winged commercial/utility helicopter, describing design details, onboard systems and payload accommodations

p0232 A72-22907

Fixed wing agricultural aircraft, comparing different designs in terms of performance, safety, handling and economic efficiency

p0232 A72-22940

German Bo 105 five/six seat light utility helicopter with rigid glass-fiber reinforced plastic rotor blades, presenting design and performance

p0360 A72-30678

Flying crane helicopters utilization in construction industry for materials transport and structural erection work, discussing technical and economic aspects

p0597 A72-43637

Agricultural aircraft flight loads - Typical spectra and some observations on airworthiness.

p0608 A72-44734

Briefs of US general aviation accidents involving aerial application operations during 1969

[PB-204811] p0333 N72-21025

Aircraft accident investigations of crashes of agricultural aircraft and effectiveness of protective equipment in preventing injuries and fatalities

[FAA-AM-72-15] p0477 N72-27011

p0232 A72-22947

Deterministic optimization of aircraft undercarriage suspension characteristics for taxiing induced vibration minimization, discussing damping and stiffness functions and hybrid computer solution  
p0235 A72-23458

Random vibration of linearly elastic lumped mass systems containing, nonlinear damping to ideal stationary Gaussian white noise excitation  
p0235 A72-23460

Rectangular skin panel vibration modes aerodynamic damping dependence on Mach number, dynamic pressure, mode shape and turbulent boundary layer thickness  
[AIAA PAPER 72-402] p0287 A72-25423

Aerodynamic damping of turbomachine blade vibrations under varied conditions of stagger angle, pressure ratio and relative velocity, using pure bending mode excitation  
[ASME PAPER 72-GT-8] p0293 A72-25611

Silicone based elastomers acoustic excitation damping properties at 213-423 K, discussing testing technique and results at 200-1000 Hz  
p0351 A72-29090

Aileron vibration pressure measurement in plane-parallel transonic flow, evaluating damping characteristics with allowance for shock motion caused nonlinear effects  
p0363 A72-31026

Weight saving, vibration proofing and heat dissipating techniques in avionics packaging, considering B-1 bomber electronic multiplexing system example  
p0508 A72-39768

A new method for the evaluation of slotted wind tunnel interference parameters applicable to subsonic oscillatory tests.  
p0559 A72-41642

Method of measuring modal characteristics of a structure subjected to a random excitation  
p0569 A72-43095

## VIBRATION PROTECTION

### U VIBRATION ISOLATORS

### VIBRATION SIMULATORS

Shock and vibration studies conferences  
[AD-723345] p0173 N72-15833  
Problems encountered in reproducing captive flight  
environment by means of shakers and shock test  
machines, emphasizing partial and complete  
weapon structures p0173 N72-15838

### VIBRATION TESTING MACHINES

### U VIBRATION SIMULATORS

### VIBRATION TESTS

### NT DAMPING TESTS

Flight vibration testing methods for ascertaining  
flutter stability of high speed aircraft  
[DGLR PAPER 71-083] p0023 A72-12725  
Olympus engine flight testing for relighting and  
antiicing, engine control and noise and  
vibration assessments in support of Concorde  
aircraft development p0197 A72-21898

Helicopter noise and vibration testing and cabin  
soundproofing for improved comfort p0199 A72-22141

Dynamic input to cargo in turbojet aircraft  
studied during C141 and C5A flights, discussing  
instrumentation, test procedures, data reduction  
processes and results p0403 A72-32625

Procedures for simple resonance testing of  
sailplanes p0567 A72-42920

Design of vibration test facility and equipment  
for simulating ground transportation and  
aircraft environments p0214 A72-16792

Development of impact shock test criteria and  
shock spectrum simulation test for ejection  
mechanism used with externally carried ordnance  
on aircraft p0216 A72-16834

Bending response of rotary wing blades when  
subjected to random input velocities for both  
hinged and unhinged cases of root end fixity  
[AD-732395] p0253 N72-18028

Conference papers on shock and vibration including  
specifications, mechanical impedance, and  
transportation and packaging [AD-739574] p0474 N72-26815

Survey of specifications and standards containing  
vibration test procedures in use by US Air Force  
p0474 N72-26817

Dynamic input to cargo from floor of cargo space  
in selected military helicopters p0474 N72-26828

Performance tests to determine problems associated  
with hovering, vertical takeoff, and landing of  
VTOL aircraft with emphasis on attitude control  
[NAL-TR-276] p0479 N72-27027

### VIBRATIONAL FREQUENCIES

### U VIBRATIONAL SPECTRA

### VIBRATIONAL SPECTRA

Simulation of vibrational and acoustical  
properties of sonic boom [NASA-CR-112117] p0532 N72-29207

### VIBRATIONAL STRESS

Dynamic strength of tangentially wound toothed  
blade roots p0506 A72-39586

### VIBRATORY LOADS

Endurance tests of D16AlO alloy sheets under high  
intensity acoustic, harmonic and electrodynamic  
vibrator loading p0056 A72-13470

Endurance tests of D16AlO alloy sheets under high  
intensity acoustic, harmonic and electrodynamic  
vibrator loading p0610 A72-44945

### VIRTUAL PROPERTIES

Galerkin method application to nonconservative  
nonself-adjoint aeroelasticity problems based on  
interpretation as mathematical formulation of  
virtual work principle p0178 A72-18788

### VISCOELASTIC DAMPING

### U ELASTIC DAMPING

### VISCOELASTIC FLOW

### U VISCOELASTICITY

## VISCOELASTICITY

Conference on mechanical shock and vibration  
damping of aerospace structures [AD-723344] p0216 N72-16861

Viscoelastic materials for additive damping in  
aircraft structural vibration problems p0216 N72-16862

Vibration damping and acoustic fatigue resistance  
of aircraft structural composites with  
viscoelastic core p0216 N72-16865

## VISCOSITY

Viscosity and additive effects on jet engine fuel  
antiwear properties improvement p0016 A72-11968

Hydraulic fluids behavior under extreme  
temperature, pressure and filtration conditions,  
considering viscosity, wear and corrosion  
resistance p0135 A72-17084

## VISCOMOUNT AIRCRAFT

Investigation of fire aboard Vickers Viscount  
aircraft following landing at Honolulu, Hawaii  
on 8 August, 1971 [NTSB-AAR-72-2] p0331 N72-21003

Ultrasonic inspection of wing spar joints on  
Viscount aircraft [TR-7105.512] p0434 N72-25461

## VISCOUS DRAG

Reynolds number effects in viscous-inviscid  
interactions on transonic swept wings p0073 N72-11856

## VISCOUS FLOW

### NT BOUNDARY LAYER FLOW

### NT BOUNDARY LAYER SEPARATION

### NT REATTACHED FLOW

### NT SECONDARY FLOW

### NT SEPARATED FLOW

Navier-Stokes equations solution for unsteady  
viscous flow around oscillating elliptic airfoil  
in turbomachinery flutter analysis, obtaining  
pressure and shear stress distributions p0117 A72-16002

Viscous incompressible flow past longitudinally  
cambered small aspect ratio slender wing near  
solid interface p0119 A72-16215

Computerized analytical model of two dimensional  
multicomponent airfoil in viscous subsonic flow  
[AIAA PAPER 72-2] p0129 A72-16861

Turbulent boundary layer development for airfoil  
at high transonic speeds, discussing  
viscous-inviscid flow interaction [AIAA PAPER 72-5] p0129 A72-16863

Combined viscous-inviscid analytical procedure for  
predicting boundary layer effects on supersonic  
inlet flow field [AIAA PAPER 72-44] p0134 A72-16975

Viscous flow through movable and immovable  
cascades of blades, determining velocity field  
by airfoil center line vortex distribution p0142 A72-18131

Unsteady viscous flow effects on aerodynamic  
forces exerted on oscillating elliptic airfoil  
for various Reynolds numbers, angles of attack  
and frequencies p0400 A72-32344

Transonic viscous flow around lifting  
two-dimensional airfoils. [AIAA PAPER 72-678] p0452 A72-35479

Viscous interaction over concave and convex  
surfaces at hypersonic speeds. p0602 A72-44308

Design programs for swept wings in subcritical,  
compressible, viscous flow [NPL-AERO-NOTE-1100] p0029 N72-10018

Customer utilization and program listing for  
computer program on two dimensional  
multicomponent airfoils in viscous flow [NASA-CR-1843-SUPPL.] p0038 N72-11010

Development of approximate method for calculating  
pressure distribution on thick cambered airfoil  
in subcritical viscous flow [FFA-AU-901] p0463 N72-26001

## VISCOUS FLUIDS

Book on fluid dynamics covering theories of  
perfect, viscous and compressible fluids,  
infinite and finite span wings, boundary layer  
flow, etc

# SUBJECT INDEX

# VISUALIZATION OF FLOW

- Equations of motion of steady viscous fluid flow in three dimensional boundary layer on walls of axial flow compressors and turbines, obtaining velocity field p0070 A72-15357
- Turbulent flow between rotating disk and turbine engine body calculated from equations of axisymmetric viscous incompressible fluid flow p0246 A72-25120
- axisymmetric viscous incompressible fluid flow p0395 A72-31702
- ## VISIBILITY
- ### NT LOW VISIBILITY
- Aircraft engine exhaust geometry effects on smoke plume visibility, describing carbon particles light absorption characteristics by Beer-Lambert law [ASME PAPER 71-WA/GT-10] p0116 A72-15903
- FAA airport fog dispersal program, discussing techniques effectiveness evaluation vs defined goals p0347 A72-28843
- Human and instrumental observations of aviation visibility, discussing measurements of extinction coefficient and light scatter and sensors testing p0347 A72-28845
- Sensor measurements correlation to human visibility via sensor equivalent visibility /SEV/ concept, discussing data processing scheme p0347 A72-28846
- Slant range visibility measurements by lidar for aircraft landing operations under low clouds and fog at coastal region p0347 A72-28847
- Airport lighting for pilot guidance during approach and landing under category I-III, visibility conditions, discussing runway layouts and power requirements p0360 A72-30621
- U.S.S.R. civil aviation regulations on takeoff and landing minimum conditions for cloud ceilings and visibility range for various aircraft characteristics and equipment p0361 A72-30820
- Flight experiments to determine horizontal visual restriction effects on T-33 aircraft front cockpit during approaches and landings p0395 A72-31697
- Head-up display performance in Falcon fan-jet aircraft during taxiing, takeoff, cruise, descent and landing approach, noting low-visibility hazards reduction during landing phase p0508 A72-39744
- Suitability evaluation of fog simulator for weather conditions during flight approach [FAA-NA-71-44] p0033 N72-10233
- Evaluation of bisphenol polyether, styrene acrylate, and chlorinated rubber alkyd as coatings for airfield runway marking [AD-734320] p0279 N72-19644
- Signal data converter for multirunway visibility measuring system, using ground illuminance sensors [DOT-TSC-FAA-72-1] p0323 N72-20254
- Techniques for measuring and monitoring slant visibility of pilots landing aircraft in fog and haze [DOT-TSC-FAA-71-25] p0330 N72-20998
- Development of method for identifying visibility conditions on runway during takeoff and landing and comparison with visual perception of pilot [NLL-M-22355-(5828.4F)] p0522 N72-28661
- Painting schemes for improving rotating propeller and tail rotor visibility of military aircraft [AD-744453] p0629 N72-32579
- ## VISION
- ### NT NIGHT VISION
- ### VISIOPLASTICITY
- ### U FLOW VISUALIZATION
- ## VISORS
- Glass-vinyl retractable windshield visor development for Concorde aircraft, considering rain, hail and icing effects, strength and stiffness under aerodynamic loading and heating p0231 A72-22900
- ## VISUAL AIDS
- Airport lighting for pilot guidance during approach and landing under category I-III visibility conditions, discussing runway layouts and power requirements p0360 A72-30621
- ## VISUAL CONTROL
- Noise measurements obtained during visual approach monitor evaluation in 747 aircraft [NASA-CR-114478] p0515 N72-28010
- ## VISUAL CUES
- ### U VISUAL PERCEPTION
- ## VISUAL DISPLAYS
- ### U DISPLAY DEVICES
- ## VISUAL FIELDS
- Structural design and optical problems of external vision and cockpit transparencies in military aircraft p0305 A72-27002
- Optical qualities of aircraft windshields and direct vision windows, considering color, light transmission, faults, heating, distortion, inside reflections and double images p0305 A72-27004
- ## VISUAL FLIGHT RULES
- German Federal Republic territorial air traffic regulations covering general, VFR and IFR rules, equipment and personnel examination and certification, safety, takeoff and landing, accidents, etc p0021 A72-12621
- Aircraft collision near misses under IFR and VFR conditions, discussing ATC coordination, equipment failure and personal and planning problems p0233 A72-22972
- Development of criteria for evaluating airport traffic levels to determine eligibility for installation of visual flight rules towers [AD-729443] p0161 N72-14679
- Planning and management of air traffic control system based on random sample of flight plans filed at flight service stations during calendar year 1970 p0339 N72-21641
- Analysis of collision hazards involved in VFR flight near clouds and effect of safe vertical clearance from clouds to reduce aircraft accidents [AD-737804] p0427 N72-24682
- ## VISUAL OBSERVATION
- Human and instrumental observations of aviation visibility, discussing measurements of extinction coefficient and light scatter and sensors testing p0347 A72-28845
- Aircraft and other vehicle simulators for training crews, discussing evolution of needs, digital techniques, and visual and physiological experiences p0362 A72-30844
- ## VISUAL PERCEPTION
- ### NT SPACE PERCEPTION
- Dynamic manned vehicle cockpit simulator for visual and aural effects and acceleration changes, discussing STOL and VTOL characteristics p0143 A72-18246
- Sensor measurements correlation to human visibility via sensor equivalent visibility /SEV/ concept, discussing data processing scheme p0347 A72-28846
- Analysis of aircraft exterior lighting and marking configurations to provide visual detection at maximum range [FAA-NA-72-29] p0368 N72-22025
- Human perceptual characteristic data relating to individual electronic flight display design p0373 N72-22622
- Analysis of pilot performance in establishing specific glide path by reference to oblong diamond marks on runway [FAA-NA-72-57] p0485 N72-27702
- Development of method for identifying visibility conditions on runway during takeoff and landing and comparison with visual perception of pilot [NLL-M-22355-(5828.4F)] p0522 N72-28661
- ## VISUAL SIGNALS
- Development, testing, and evaluation of visual landing aids [NBS-10606] p0095 N72-12583
- ## VISUAL TRACKING
- ### U OPTICAL TRACKING
- ## VISUALIZATION OF FLOW
- ### U FLOW VISUALIZATION

## VJ-101 AIRCRAFT

VJ-101 V/STOL aircraft design, development and flight testing, discussing takeoff and landing, hovering and transition flight and associated control problems

p0494 A72-38032

Analysis of aerodynamic characteristics of VJ-101C and DO 31E V/STOL aircraft and comparison with criteria contained in handling requirements documents

p0620 N72-32024

## VOICE COMMUNICATION

Satellite navigational aid system technical and operational characteristics, emphasizing voice communications links in L band

p0053 A72-12972

ATC operational systems, discussing global surveillance and voice and data communication between aircraft and earth station

p0363 A72-31141

A comparison of voice communication techniques for aeronautical and marine applications.

p0442 A72-34267

Geostationary satellite system for air navigation via voice and data communication, discussing ground facilities and avionics

p0546 A72-40284

Simulation and analysis of characteristics of air traffic control voice communication channels [FAA-RD-71-78]

p0095 N72-12578

Improving intelligibility of voice communication in high acoustic noise environments as exists inside helicopters

p0256 N72-18171

Adaptive narrow band, frequency modulation, voice communication system

p0437 N72-25783

Systems analysis of analog and digital voice coding techniques for use with satellite based air traffic control system

p0485 N72-27701

Mathematical models for determining effects of voice communication constraints on air traffic control in terminal control sector

p0517 N72-28171

## VOLTAGE BREAKDOWN

## U ELECTRICAL FAULTS

## VOLTERRA EQUATIONS

Application of the Volterra series to the analysis and design of an angle track loop.

p0489 A72-37283

## VOR SYSTEMS

## U VHF OMNIRANGE NAVIGATION

## VORTEX BREAKDOWN

Effect of air injection on the torque produced by a trailing vortex.

p0594 A72-43333

Effect of several wing tip modifications on a trailing vortex.

p0594 A72-43334

The dissipation of tip vortices by mass injection with application to rotor systems.

p0612 A72-45329

Vortex breakdown studied by flow visualization noting pressure gradient effect and analogy with boundary layer separation and wake bursting [ONERA-NT-175]

p0277 N72-19328

Vortex dissipation in jet mixing flow

p0588 N72-31316

## VORTEX COLUMNS

## U VORTICES

## VORTEX DISTURBANCES

## U VORTICES

## VORTEX FLOW

## U VORTICES

## VORTEX GENERATION

## U VORTEX GENERATORS

## VORTEX GENERATORS

Pressure, shear stress and yaw angle measurements in flow through aircraft intake S-shaped ducts with turbulent boundary layer at entry, noting vortex generation

p0410 A72-33403

Investigation of the stability of the tip vortex generated by hovering propellers and rotors.

p0612 A72-45327

Effect of slots and vortex generators on efficiency and stable operation of highly loaded compressor stages

[NASA-CR-72793]

p0377 N72-22791

## VORTEX INJECTORS

The dissipation of tip vortices by mass injection with application to rotor systems.

p0612 A72-45329

Wind tunnel tests to predict aircraft wake

turbulence due to tip trailing vortex

[NASA-CR-62078]

p0534 N72-29237

## VORTEX RINGS

Analytical prediction of vortex-ring boundaries for helicopters in steep descents.

p0503 A72-38949

Flight test studies of the formation of trailing vortices and a method to accelerate vortex dissipation.

[AIAA PAPER 72-988]

p0561 A72-42327

Application of ring vortex method for determining aerodynamic characteristics of rotary wings and design of lifting rotor systems

[AD-735018]

p0267 N72-19013

Vortex ring method used for calculations of aerodynamic characteristics of helicopter lifting rotors at any angle of attack in flow with comparatively high velocity

[AD-735439]

p0327 N72-20973

## VORTEX SHEETS

Multivortex model of vortex sheet development on slender axisymmetric bodies at angle of attack

p0053 A72-12919

Wing tip shape effects on vortex sheet rolling calculation by Belotserkovskii method

p0140 A72-17850

Dynamic pressure distribution and propulsive contours of trailing vortex wake downwind of external flow jet flap, using five-hole probe measurements

p0245 A72-25070

Incompressible potential flow model of porous parachute canopy flow field, using Stokes stream function for axisymmetric vortex sheet in uniform steady stream

p0313 A72-28123

Vortex sheet simulation method for slender wing-canard surface nonlinear interaction investigation

p0413 A72-33695

Radiation properties of the semi-infinite vortex sheet.

p0610 A72-44918

Flight tests of heavy jet transport aircraft to determine characteristics of vortex systems generated within ground effect and vortex systems descending into ground effect

p0166 N72-15006

Effect of wing tip shape on vortex sheet rolling up applied to study of straight or moderately sweptback wings

[NASA-TT-F-14111]

p0169 N72-15273

Lifting potential flow in terms of doublet distribution over body surface and trailing vortex sheet

[NAL-TR-243]

p0258 N72-18281

Rolling-up process of discontinuity surface resulting from unstable vortex layer behind aircraft wing

[NASA-TT-F-14230]

p0320 N72-20015

Development of equipment and techniques for remote sensing of wing tip vortices generated by large commercial and military aircraft

[DOT-TSC-FAA-72-2]

p0320 N72-20017

Effect of wing span loading on development of fully rolled up wing trailing vortices

[AD-744860]

p0636 N72-32998

## VORTEX STREETS

## NT KARMAN VORTEX STREET

Periodic wave of oscillating and stationary two dimensional bodies immersed in uniform incompressible stream, investigating semiinfinite vortex trails relationship to oscillating airfoils

p0550 A72-40651

Slipstream vortex street geometry influence on velocity and load distribution of VTOL propellers

p0037 N72-11004

Development of active and passive techniques for detecting and measuring presence and intensity of wingtip vortices generated in airport areas [DOT-TSC-FAA-72-13]

p0330 N72-20999

## SUBJECT INDEX

## VORTICES

- Computer program and numerical analysis of feasibility of using suction between and along runways to remove trailing edge vortex streets [IDA-LOG-HQ-69-10164] p0337 N72-21290
- VORTEX TUBES**
- U VORTICES**
- VORTICES**
- Axial and tangential velocity distributions within trailing line vortex to large distance downstreams of generating wing extended from available data [AD-743599] p0012 A72-11135
- Vortex flow structure in axial gas turbines near inlet and outlet of blade row p0057 A72-13538
- Symmetrically deformed delta wing in supersonic flow, considering leading edge flow separation induced vortices effects on downwash, pressure distribution and aerodynamic characteristics p0072 A72-15741
- Complex perturbation potential of constant vortex shear flows around airfoil activated by motion in presence of rectilinear wall p0118 A72-16122
- Elliptic wing-vortex interaction for various aspect ratios p0123 A72-16542
- Subsonic wind tunnel investigation of aircraft wake far field structure, measuring trailing vortex decay by yawhead pressure probe [AIAA PAPER 72-40] p0130 A72-16902
- Turbulent boundary layer analogy mathematical model for turbulent mixing and buoyancy effects on aircraft trailing vortex wake motion and persistency [AIAA PAPER 72-42] p0130 A72-16903
- Viscous flow through movable and immovable cascades of blades, determining velocity field by airfoil center line vortex distribution p0142 A72-18131
- Numerical analysis of computing velocity distribution in vortex row cascade profiles by method of singularities p0178 A72-18787
- Durando model overprediction of deflected jet vortex strength in subsonic cross flow p0196 A72-21631
- Turbulent boundary layer growth measurement on annular diffuser containing free vortex swirl p0237 A72-23857
- Aerodynamic forces calculation for constant vortex shear flows around airfoil fixed between rectilinear walls, noting resultant perpendicularity to O<sub>x</sub> axis p0240 A72-24115
- Three dimensional wind tunnel investigation of vortex augmented unswept wing with leading edge cusp flap and split upper and lower trailing edge flaps [SAE PAPER 720321] p0290 A72-25584
- Near ground pressure differentials caused by large transport aircraft induced wake vortices, comparing measured data with Bernoulli formula theoretical values p0313 A72-28122
- Vortex-lattice method for subsonic aircraft aerodynamic coefficients calculation, verifying results with airbus lifting surface wind tunnel test data p0394 A72-31401
- Contracting or diverging stream flow mean velocity change effects on airfoil pressure distribution, circulation and lift, deriving vortex distribution expression p0396 A72-32023
- Airfoil vortex shedding noise in low-turbulence flow at helicopter blade Reynolds numbers, obtaining correlation coefficients for far field noise and surface pressure fluctuations [AIAA PAPER 72-656] p0415 A72-34078
- Rotating flow introduction effects on jet noise levels, combustion and turbulent mixing processes and flame stability [AIAA PAPER 72-645] p0416 A72-34087
- Wind tunnel simulation of full scale vortices. [AHS PREPRINT 623] p0443 A72-34477
- Linear air mass flow injection at helicopter rotor blade tips, considering effects on trailing vortex circulation strength

# SUBJECT INDEX

[AD-731156] p0167 N72-15015  
Flight tests to determine feasibility of detecting vortices from low flying aircraft with acoustic radar  
[TR-7] p0168 N72-15140  
Flight test investigation of effect of wing tip vortices generated by large jet transport aircraft when intersected by smaller general aviation type aircraft  
[NASA-TN-D-6655] p0250 N72-18003  
Radial vane array for controlling wing tip vortices  
[ATN-7102] p0253 N72-18026  
Vortex shredding noise characteristics of isolated airfoils in Reynolds number range applicable to full scale helicopter rotors  
[AD-734433] p0272 N72-19048  
Linearized solution for flow separation near tip and wake edge of lifting wing with trailing edge separation  
[AD-734791] p0277 N72-19347  
Vortex distribution technique applied to three-dimensional bodies moving through incompressible fluid  
[AD-732953] p0324 N72-20333  
Wind tunnel analysis of factors affecting wing tip vortex  
[NASA-TM-X-2516] p0327 N72-20970  
Higher-order theory used for solution of two dimensional subsonic wall interference due to source and vortex between perforated wind tunnel walls  
[AD-735967] p0337 N72-21307  
Vortex model for calculating airstream at rotor blade of helicopter  
[NASA-TT-F-14228] p0430 N72-24990  
Numerical analysis of finite amplitude waves generated by aircraft trailing vortices to indicate growth of waves on pair of parallel infinite vortices  
[AD-737859] p0432 N72-25012  
Air vortex wakes of B-747 aircraft  
[NASA-TT-F-14286] p0469 N72-26233  
Analysis of helicopter rotor wake patterns using water tunnel test facility  
[AD-739946] p0482 N72-27052  
Vortex drag factor of untapered swept wing with part span flap, noting spanwise loading  
[ARC-R/M-3695] p0527 N72-28997  
Experimental pressure-differential measurements made at 10 percent chord of airfoil-vortex interaction  
[NASA-CR-112129] p0533 N72-29226  
Aircraft trailing vortex formation and persistence behind large transport aircraft  
[NASA-TM-X-68566] p0533 N72-29228  
Wind tunnel tests to predict aircraft wake turbulence due to tip trailing vortex  
[NASA-CR-62078] p0534 N72-29237  
Computer program to analyze wing tip vortex as function of wing tip shape  
[NASA-TT-F-14538] p0576 N72-30264  
Analytical and experimental determination of influence of atmospheric environment on transport and decay of trailing vortex wake  
[AD-742305] p0576 N72-30284  
Numerical analysis of axial velocity of wing tip vortex and comparison with free stream velocity  
[AD-742311] p0577 N72-30285  
Nonlinear theory of lifting surfaces applied to problem of forces acting on rectangular wing in stream of incompressible fluid  
p0618 N72-32008  
Wind tunnel tests to determine path of vortex moving from each rotor blade tip of helicopter rotor to establish effect on aerodynamic forces and pressure distribution  
[NASA-TT-F-14462] p0618 N72-32012  
Application of leading-edge-suction analogy to prediction of longitudinal load distribution of vortex lift for delta wings  
[NASA-TN-D-6994] p0636 N72-32997

**VORTICITY**  
A vortex model for the study of the flow at the rotor blade of a helicopter  
p0461 A72-36975  
Vorticity and stall-inducing inlet distortion in turbocompressors  
[AD-743725] p0647 N72-33752

U FIGHTER AIRCRAFT  
U VERTICAL TAKEOFF AIRCRAFT  
**VTOL**  
U VERTICAL LANDING  
U VERTICAL TAKEOFF  
**VTOL AIRCRAFT**  
U VERTICAL TAKEOFF AIRCRAFT  
**VULNERABILITY**  
Unique features of the B-1 flight control systems.  
[AIAA PAPER 72-872] p0511 A72-40062  
Ballistic impact tests to determine vulnerability of boron/epoxy double-wall drive shafts for helicopter rotors  
[AD-737285] p0388 N72-23509  
Gradient technique for determining improved aircraft flight paths to reduce kill probability by antiaircraft gunfire  
[AD-741373] p0530 N72-29018

## W

**W WINGS**  
U VARIABLE SWEEP WINGS  
**WAKES**  
NT AIRCRAFT WAKES  
NT HELICOPTER WAKES  
NT PROPELLER SLIPSTREAMS  
NT SLIPSTREAMS  
NT TURBULENT WAKES  
Noise reduction effects of wake interaction between rotor blade rows in axial flow compressor, cancelling velocity defect at stator position  
[ASME PAPER 72-GT-15] p0293 A72-25614  
Near ground pressure differentials caused by large transport aircraft induced wake vortices, comparing measured data with Bernoulli formula theoretical values  
p0313 A72-28122  
Effects of transport velocity of wake vortex on aerofoil oscillations  
p0603 A72-44494  
Computer programs for wake geometry, and blade loads and responses  
[NASA-CR-1912] p0149 N72-13977  
Hot-wire analysis of wake in hypersonic helium wind tunnel  
[AD-729881] p0159 N72-14325  
Wake and clear air turbulence, wind shear, upsets, thunderstorms, and turbulence mapping  
[AD-732117] p0222 N72-17579  
Catalog of devices and techniques for boundary layer and wake measurements on flight vehicles  
[NASA-CR-116776] p0258 N72-18424

**WALL FLOW**  
Complex perturbation potential of constant vortex shear flows around airfoil activated by motion in presence of rectilinear wall  
p0118 A72-16122  
Integrodifferential equation for rigid tunnel walls effect on supercavitating flow past thin jet flapped airfoil, noting lift coefficient derivatives  
p0241 A72-24562  
Optimization of acoustic linings in presence of wall shear layers.  
p0548 A72-40334  
Numerical method for calculating wall-induced interference at subsonic speeds in slotted or perforated wind tunnels with rectangular cross sections  
[NASA-TN-R-379] p0073 N72-11853  
Higher-order theory of two-dimensional subsonic wall interference effects on flow past airfoil between perforated wind tunnel walls  
[LR-553] p0207 N72-16205

**WALL JETS**  
Flow separation reduction by transverse jet blowing, illustrating flow patterns by water tunnel visualization on cylinders, perpendicular flat plates, contoured walls, steps, wings, etc  
[ONERA, TP NO. 1070] p0300 A72-25814

**WALL PRESSURE**  
Supersonic and subsonic jet flows coexistence in constant section duct, analyzing pressure on walls and in fluid and schlieren visualization  
[ONERA, TP NO. 976] p0230 A72-22813

## WALL TEMPERATURE DISTRIBUTION

## U TEMPERATURE DISTRIBUTION

## WALLS

## NT BULKHEADS

## NT NOZZLE WALLS

## NT POROUS WALLS

## NT THIN WALLS

## NT WIND TUNNEL WALLS

Vibration measurements on walls of turbojet test facility

[TL-1971-11]

p0437 A72-25898

## WANKEL ENGINES

Comparison of Wankel engine characteristics with small reciprocating and jet engines used as power plants in light aircraft

[REPT-908]

p0326 A72-20764

## WAR GAMES

Differential game solution to practical two aircraft pursuit-evasion problem in three dimensional space

[AD-729777]

p0156 A72-14224

Force survival model for analysis of strategic bomber basing concepts in prelaunch survival mode

[AD-732193]

p0217 A72-16991

Application of Markov game approach to planar air combat problems

[NASA-CR-1979]

p0218 A72-17006

## WARFARE

## NT ANTISUBMARINE WARFARE

## NT COMBAT

## NT NUCLEAR WARFARE

Remotely manned vehicles /RMV/ application in aerial warfare, considering antiaircraft defenses lethality increase, equipment costs and role of man during combat mission

p0344 A72-28451

## WARNING DEVICES

## U WARNING SYSTEMS

## WARNING SIGNALS

## U WARNING SYSTEMS

## WARNING SYSTEMS

Pilot collision warning indicator performance in terminal area traffic, using computer fast-time simulation for traffic model

p0012 A72-11134

FAA activity in collision avoidance system and pilot warning instrument areas

p0019 A72-12379

Flight display systems current state and future developments, discussing dual attitude indicators and automatic chart systems CRTs, engine displays and malfunction warning systems

p0056 A72-13423

Collision avoidance systems and pilot warning instruments, minimizing cost by pilot detection, evaluation and avoidance execution

p0067 A72-14823

Incipient wing stall detection by unsteady pressure monitoring via flush-mounted microphones, discussing flow patterns on models

p0182 A72-19093

Aircraft midair collision prevention in dense air traffic environments, suggesting problem solution based on proximity warning system

p0191 A72-21090

Aircraft hazard detection and warning system selection criteria

p0193 A72-21561

Automation in planning and execution of flights, considering navigation, communication, flight instruments monitoring, control/stabilization and warning systems

p0230 A72-22780

Collision avoidance systems requirements and criteria, evaluating Bros time frequency and Secant interrogation-and-reply systems

p0231 A72-22822

C-band pulse beacon ranging system for collision avoidance, detailing interrogation, response and system test modes

p0232 A72-22908

Pilot warning systems for visual midair collision avoidance, noting reaction to imminent threats, scanning patterns and display sector size effects

[SAE PAPER 720312]

p0289 A72-25576

Stall warning system for general aviation aircraft, using signal discriminator for rough or gusting air

[SAE PAPER 720331]

p0291 A72-25592

Pulse operated multichannel annunciator system for pilot warning of aircraft systems malfunctions, describing circuit design

[SAE PAPER 720333]

p0291 A72-25593

Altitude information warning devices and systems, discussing requirements and performance and qualification tests

[SAE ARP 1061]

p0301 A72-26032

Worldwide distress alarm, identification and position location system for downed aircraft, discussing GRAN feasibility tests

p0399 A72-32214

SECANT collision avoidance system, describing operational principles and flight test results

p0417 A72-34137

Altimeters development history from Wright brothers to Boeing 747, discussing altitude alert systems providing aural and visual warnings to pilot

p0508 A72-39747

Midair collision prevention independent of ATC, discussing aircraft lighting, collision avoidance systems and proximity warning indicator

p0548 A72-40297

Boeing aircraft altitude alerting systems development and design to meet FAR 91-51 requirements, discussing retrofit programs and altimeter encoding

p0564 A72-42689

Midair collision prevention for Army aircraft.

p0606 A72-44645

SECANT midair collision avoidance system based on nonsynchronous microsec pulse transmission and receiving via randomly selected frequency, describing modular components and operating principles

p0606 A72-44647

Air traffic control radar beacon systems and laser warning systems

[AD-725743]

p0035 A72-10543

Laboratory evaluation of electro-optical IR pilot warning indicator systems

[NASA-CR-124721]

p0109 A72-13351

Human factors engineering to determine effectiveness of auditory display for aircraft collision warning and avoidance system

[AD-729765]

p0153 A72-14005

Capabilities and limitations of current aircraft fire detection systems

[AD-730179]

p0219 A72-17008

Mass reduction of moderator and neutron flux response for in-flight radiation warning system for SST

p0223 A72-17719

System studies, equipment simulation, hardware development, and flight tests of aircraft collision hazard warning system using

cooperative, continuous wave radar principle

[NASA-CR-2020]

p0318 A72-20007

Development of computer program to analyze effectiveness of pilot warning indicator systems in avoiding aircraft collisions

[NASA-CR-126669]

p0427 A72-24672

Design and development of collision avoidance system for use with air traffic control system

[ONERA-TP-1091]

p0472 A72-26523

Congressional hearing concerning penetration of US defense system by Cuban aircraft on flight from Havana, Cuba to New Orleans, Louisiana, 26 October 1971

p0475 A72-26986

Development and characteristics of electronic signalling system and data processing equipment for warning system to avoid midair collisions between aircraft

[NASA-CASE-LAR-10717-1]

p0485 A72-27703

Design and development of airborne traffic control system for aircraft collision warning and avoidance

p0522 A72-28671

Design of security system for civil aviation cargo transportation

p0526 A72-28985

Effectiveness of airborne electronic aircraft warning and control system for nuclear warfare

[AD-742233]

p0575 A72-30168

## WARPAGE

Warpage control of large Al alloy forgings machining of jumbo jet components, using packing

## WASTE DISPOSAL

## SUBJECT INDEX

and storage methods  
[SAE PAPER 710801] p0006 A72-102801

Wing load distribution and induced drag control by  
warping, summarizing linear theory and wind  
tunnel test results p0240 A72-24218

**WASTE DISPOSAL**  
Reliability design for airborne ecological system  
for jumbo jets, discussing toilet flushing and  
multiple server queueing model p0239 A72-23999

**WATCHES**  
U CLOCKS

**WATER**  
Chromate rinse for aircraft exposed to corrosive  
salt water environments [AD-732762] p0259 A72-18503

**WATER CONTENT**  
U MOISTURE CONTENT

**WATER INJECTION**  
Aircraft gas turbine engine emission reduction,  
showing nitrogen oxide control with water  
injection [ASME PAPER 71-WA/GT-9] p0116 A72-15902  
Helicopter payload gains utilizing water injection  
for hot day power augmentation [NASA-TN-X-62195] p0639 A72-33027

**WATER LANDING**  
NT DITCHING (LANDING)

**WATER POLLUTION**  
New York-New Jersey megalopolis offshore jetport  
feasibility, considering noise, air-water  
pollution, land conservation, cost, etc p0346 A72-28792  
Chemical analysis of materials used in maintenance  
of naval aircraft to determine possible  
contribution to water pollution [AD-730473] p0168 A72-15138  
Fraunhofer line discriminator as remote sensor of  
fluorescent dyes used in pollution detection  
[NASA-CR-125643] p0258 A72-18448

**WATER PRESSURE**  
Sonic boom induced pressure wave propagation and  
attenuation in water, comparing ballistic range  
measurements with theoretical predictions [AIAA PAPER 72-654] p0415 A72-34080

**WATER TAKEOFF AND LANDING AIRCRAFT**  
NT SEAPLANES

**WATER TUNNELS**  
U HYDRAULIC TEST TUNNELS

**WATER VAPOR**  
Stratospheric subsonic and supersonic aircraft  
emission estimation for water vapor and nitrogen  
oxides p0346 A72-28838  
Stratospheric pollution by SST exhaust gases,  
discussing water vapor and nitrogen oxides  
effects on ozone concentration p0451 A72-35327  
Water vapor effect on ignition delay in gaseous  
hydrogen combustion airstream [AD-741581] p0542 A72-29962

**WATER VEHICLES**  
NT AIRCRAFT CARRIERS  
NT LIFEBOATS  
NT SHIPS  
NT SUBMARINES  
Physical principles, design and operation of air  
cushion vehicles for passenger transportation  
over water p0188 A72-20371  
Aircraft and water vehicles mobile communications  
via stationary satellite, discussing optimum  
multiple access and repeater configuration  
[AIAA PAPER 72-565] p0308 A72-27376

**WAVE ATTENUATION**  
NT ACOUSTIC ATTENUATION  
NT SHOCK WAVE ATTENUATION  
Sonic boom induced pressure wave propagation and  
attenuation in water, comparing ballistic range  
measurements with theoretical predictions [AIAA PAPER 72-654] p0415 A72-34080

**WAVE DIFFRACTION**  
Acoustic shock wave diffraction at moving or  
static plate immersed in ideal gas p0357 A72-30011

**WAVE DISPERSION**  
Real gas effects in atmosphere to make sonic bang  
shock wave full dispersion and thickness wide

variations p0016 A72-11972

**WAVE DRAG**  
NT INTERFERENCE DRAG  
Wave drag reduction by antisymmetric wing and body  
arrangement, discussing application to transport  
aircraft at supersonic speeds p0122 A72-16534

**WAVE EXCITATION**  
NT ACOUSTIC EXCITATION  
NT HARMONIC EXCITATION  
Sonic boom effects on structures, discussing  
ground motion, direct excitation by shock waves  
and damages p0234 A72-23318

**WAVE FRONTS**  
NT SHOCK FRONTS

**WAVE GENERATION**  
Detection of atmospheric gravity waves produced by  
focusing of shock front generated by supersonic  
aircraft, calculating flight trajectories p0054 A72-12984  
Sonic booms generation and propagation, discussing  
effects on animate and inanimate objects p0233 A72-23316

**WAVE INTERACTION**  
NT SHOCK WAVE INTERACTION

**WAVE PROPAGATION**  
NT IONOSPHERIC PROPAGATION  
NT LIGHT SCATTERING  
NT MICROWAVE TRANSMISSION  
NT MULTIPATH TRANSMISSION  
NT SHOCK WAVE PROPAGATION  
Storm effects on SST operations, discussing wave  
initiation at storm top and tropospheric  
propagation p0064 A72-14683  
Sonic boom induced pressure wave propagation and  
attenuation in water, comparing ballistic range  
measurements with theoretical predictions  
[AIAA PAPER 72-654] p0415 A72-34080  
Aircraft flights in stratosphere over western USA  
investigating mountain wave propagation for  
stratospheric turbulence forecasting [ARC-CP-1159] p0095 A72-12554  
Development of mathematical model to illustrate  
multipath transmission of instrument landing  
system [DOT-TSC-FAA-72-7] p0376 A72-22653  
Numerical analysis of effect of atmospheric  
inhomogeneities on sonic boom and other weak waves  
p0380 A72-23004

**WAVE RADIATION**  
U ELECTROMAGNETIC RADIATION

**WAVE REFLECTION**  
Calculation of shock wave reflection in supersonic  
inlets using method of characteristics including  
Mach disc problem [ONERA-WT-183] p0266 A72-19005

**WAVE SCATTERING**  
NT ACOUSTIC SCATTERING  
NT LIGHT SCATTERING  
NT TROPOSPHERIC SCATTERING  
Spatial Fourier transform for wave scattering from  
rough surfaces [AD-734044] p0278 A72-19576

**WAVE SUPERHEATERS**  
U HYPERVELOCITY WIND TUNNELS  
U SHOCK TUBES

**WAVEFORMS**  
N-wave dynamic magnification factors for sonic  
bangs response on complicated structures p0069 A72-14849  
Sonic boom waveforms measured during exercise  
summer sky in southern Great Britain  
[ARC-R/M-3659] p0038 A72-11015  
Extrapolation of sonic boom pressure signatures by  
waveform parameter method and comparison with  
P-function method [NASA-TN-D-6832] p0463 A72-26004

**WAVEGUIDE ANTENNAS**  
A metallized channel guide antenna for use over a  
cylindrical ground screen. p0548 A72-40372  
Ground-based Doppler navigation waveguide slot  
antenna design for optimal directional multilobe  
reception from aircraft p0549 A72-40509

## WAVEGUIDES

Ferrite component for waveguide commutator used as microwave switching element and modulator, noting application in navigation instruments and avionics

p0598 A72-43768

## WEAPON SYSTEMS

## NT GROUND OPERATIONAL SUPPORT SYSTEM

## NT MISSILE SYSTEMS

Variable speed constant frequency power generation equipment influence weapon system effectiveness, considering weight and cost

p0011 A72-11067

A-7 D/E navigation/weapon delivery system flight testing, using photogrammetric technique

p0124 A72-16656

Weapon firing and external store separation tests by flight test methods for determining safe weapon release envelope

p0146 A72-18499

VJ-101A and B V/STOL weapon system design, describing various propulsion system configurations

p0183 A72-19250

V/STOL weapon system VJ-101, describing Be-231 design development from tailsitter concept to canard configuration with tilting wing-tip engines

p0183 A72-19251

Fighter aircraft maneuverability, range and armament requirements, discussing canard vs delta configurations

p0303 A72-26657

Man computer weapons effectiveness and system test environment, WESTE/ instrumentation system with Decca navigation for simulated combat environmental flight tests

p0310 A72-27515

Reliability requirements and optimization for complex systems, discussing method to improve component reliability of aircraft weapon system

p0343 A72-28353

Weapon systems reliability assessment based on limited prototype flight test results

p0343 A72-28359

Time parameter in military air operations, discussing weapon systems R and D, all-weather capability, communications, reliability and maintainability, manpower training, etc

p0401 A72-32453

Electronic displays with weapon aiming sensors in aircraft navigator-attack systems

p0403 A72-32634

V/STOL weapon system VJ-101 design, discussing one axis rocking device, suspension structure and hovering flight thrust control

p0405 A72-33049

Fighter bomber Loran-inertial data processing with digital computer to combine navigation, guidance and weapon delivery into fully integrated system

p0407 A72-33246

Multinode flight control for precision weapon delivery

p0453 A72-35561

Tactical aircraft weapon system development, describing navigation, target acquisition, release point guidance and delivery modes [AIAA PAPER 72-896]

p0505 A72-39107

Defense systems development based on balance between theoretical studies and hardware prototyping for uncertainty reduction in performance and cost

p0551 A72-40971

The INAS device of Ferranti as integrated weapon system for the HS Harrier

p0559 A72-41846

Harrier two seat aircraft design, performance, weapon systems, thrust vectoring and combat characteristics comparison with GR.1

p0603 A72-44391

Development of model to determine effects of pilot performance and aircraft dynamics on accuracy of tactical weapon delivery

[AD-728324] p0091 A72-12037

Effects of weather and meteorological parameters on cost, performance, development, and operation of military aircraft

[AD-731749] p0217 A72-16993

Effect of fin-opening shock environment on guided modular dispenser weapons

## WEAPONS

## NT GUNS (ORDNANCE)

Problems encountered in reproducing captive flight environment by means of shakers and shock test machines, emphasizing partial and complete weapon structures

p0474 A72-26876

## WEAPONS DEVELOPMENT

F-14A fighter accelerated flight test program with 18-month saving and 3600 flight time hours before 1973 operability

p0063 A72-14591

Time parameter in military air operations, discussing weapon systems R and D, all-weather capability, communications, reliability and maintainability, manpower training, etc

p0401 A72-32453

VJ-101 V/STOL aircraft design, development and flight testing, discussing takeoff and landing, hovering and transition flight and associated control problems

p0494 A72-38032

Tactical aircraft weapon system development, describing navigation, target acquisition, release point guidance and delivery modes [AIAA PAPER 72-896]

p0505 A72-39107

Defense systems development based on balance between theoretical studies and hardware prototyping for uncertainty reduction in performance and cost

p0551 A72-40971

## WEAR

Scuff resistant properties of steel materials used to finish spur and helical gears [AD-742655]

p0629 A72-32503

## WEAR INHIBITORS

Fuel lubricity effects on aircraft engine fuel pump wear, discussing remedial use of corrosion inhibitors and change to noncorroding pump construction materials

p0191 A72-21450

Influence of test time and contact stresses on antiwear properties of jet fuels under rolling friction [AD-738883]

p0471 A72-26471

## WEAR TESTS

Viscosity and additive effects on jet engine fuel antiwear properties improvement

p0016 A72-11968

Hydraulic fluids behavior under extreme temperature, pressure and filtration conditions, considering viscosity, wear and corrosion resistance

p0135 A72-17084

Friction coefficient, standard wear and surface layer temperature of seal for dry friction pairs in jet engines, investigating crystal lattice parameters

p0185 A72-19768

Jet fuel hydrocarbon group chemical composition effects on antiwear characteristics in sliding friction and rolling simulation experiments

p0350 A72-29073

Chafing characteristics of wire braided military helicopter hoses [AD-738842]

p0471 A72-26409

## WEATHER

Aircraft accidents during nonprecision approaches under adverse weather conditions, discussing landing aids use for corporate jet aircraft

p0508 A72-39745

Statistical analysis of weather effects in aircraft accidents [PB-201437]

p0031 A72-10039

Suitability evaluation of fog simulator for weather conditions during flight approach [FAA-WA-71-44]

p0033 A72-10233

Radar observation of weather conditions for aircraft flight [OHA-264-TP-148]

p0044 A72-11147

Aircraft accident report of Aero Commander aircraft at Aspen, Colorado on January 22, 1970 [NTSR-AAR-72-1]

p0254 A72-18029

Compilation of United States general aviation accidents involving weather as cause or cause related factor year 1969 [PB-204926]

p0334 A72-21026

## WEATHER CONDITIONS

### WEATHER CONDITIONS

#### U WEATHER

#### WEATHER CONTROL

#### U WEATHER MODIFICATION

#### WEATHER DATA RECORDERS

Aircraft and airports weather instrumentation for all-weather landing and takeoff, discussing application of laser technology and digital presentation

p0193 A72-21522

Equipment for automatic recording and rebroadcast of pilot reports on weather conditions [FAA-NA-72-62]

p0643 N72-33153

#### WEATHER FORECASTING

##### NT NUMERICAL WEATHER FORECASTING

Terminal aerodrome forecasts usefulness and accuracy assessment

p0010 A72-10864

Environmental research with instrumented aircraft, discussing application to operational forecasting and weather modification experiments in hurricanes and tropical convective clouds

p0064 A72-14682

Gliding flight atmospheric energy utilization through aerology, discussing value of weather forecasts to glider pilots

p0064 A72-14684

Aviation weather forecasting improvements due to radar, computer, satellites and high speed communications contributions

p0179 A72-18838

Prediction of weather induced airline operating delays, discussing fog, snow, freezing rain, thunderstorms, crosswind, headwinds, CAT, wind shear, wet runways and tail winds

p0184 A72-19597

Real time pilot reports via digital ground-air-ground data link, discussing encoding and processing equipment, meteorological codes and automatic real time weather forecasts

p0246 A72-25079

Military weather forecasting requirements by 1980, discussing decision making, data processing, satellite data, mission and terminal forecasts, display and computer flight planning

p0246 A72-25096

Interdiction bombing mission effectiveness model for bad and good weather aircraft type selection depending on weather conditions at target site

p0344 A72-28400

Aeronautical requirements for meteorological reporting and instruments at aerodromes, discussing surface wind, visibility, runway range, weather, temperature and pressure observations

p0349 A72-28868

Cost effectiveness model for evaluating general aviation weather dissemination techniques, stressing design variables and time periods

p0349 A72-28871

Russian book - Aviation meteorology.

p0560 A72-42024

Techniques for forecasting turbulent weather conditions below 10,000 feet for light aircraft operating in Hawaiian Islands

p0046 N72-11525

Development of method for predicting occurrence of fog and stratus formations at Eglin Air Force Base, Florida

p0208 N72-16501

Terminal forecast reference file for Columbus AFB, Miss.

p0280 N72-19713

Terminal forecast reference file for McClellan Air Force Base

p0280 N72-19714

Automated forecasting of clear air turbulence by multidimensional contingency tables

p0338 N72-21604

Weather predictions for Concorde test flights and problems of forecasting stratospheric temperature and clear air turbulence

p0484 N72-27638

Fog regime over international airport in Sofia plain, and multifactor discriminant analysis method for fog forecasting

p0522 N72-28610

#### WEATHER FRONTS

##### U FRONTS (METEOROLOGY)

## SUBJECT INDEX

### WEATHER MODIFICATION

#### NT CLOUD SEEDING

Environmental research with instrumented aircraft, discussing application to operational forecasting and weather modification experiments in hurricanes and tropical convective clouds

p0064 A72-14682

Warm fog dissipation by helicopter downwash mixing, heat, hygroscopic particle and polyelectrolytes seeding

p0064 A72-14694

Airport fog dispersion methods review, noting seeding and hot air injection techniques

p0198 A72-21920

FAA airport fog dispersal program, discussing techniques effectiveness evaluation vs defined goals

p0347 A72-28843

Warm fog modification by seeding with hygroscopic materials

p0260 N72-18636

Tables on economic benefits of fog dispersal as related to air traffic operations

p0372 N72-22603

#### WEATHER RADAR

##### U METEOROLOGICAL RADAR

#### WEATHERING

Aircraft paint film mechanical property changes caused by artificial weathering noting glass transition temperature and flexibility measurements

p0324 N72-20519

#### WEBS

Webbing joints stitching strain, considering nylon and flax yarns stretching properties and various stitching patterns strengths

p0008 A72-10315

#### WEBS (SUPPORTS)

Transverse shear loading on tapered spars noting stiffness matrix

p0475 N72-26944

#### WEIGHT (MASS)

##### NT STRUCTURAL WEIGHT

Natural inertia moment effect of balance weight at wing tip on critical flutter rate

p0191 A72-21092

Length and weight estimates of powerplant components for V/STOL propulsion systems

p0097 N72-12785

Statistical analysis of flight time, takeoff and landing weight, fuel weight at takeoff and landing for transport jet aircraft

p0480 N72-27035

Gravitational and velocity effects of aircraft weight and performance in cruising flight emphasizing Concorde

p0585 N72-31024

#### WEIGHT ANALYSIS

Variable speed constant frequency power generation equipment influence weapon system effectiveness, considering weight and cost

p0011 A72-11067

Wing structural weight estimation for civil aircraft preliminary deriving generalized formula based on wing root bending moment for specified flight condition

p0232 A72-22909

Fast method for aircraft rebalance.

p0490 A72-37453

Aircraft structures weight reduction through fiber-matrix composite materials, discussing anisotropic elastic and failure behavior of composite light shell structures

p0555 A72-41163

[ICAS PAPER 72-38]

Russian book - Design principles in aircraft construction.

p0560 A72-42074

S-3A aircraft weight control program organization and methods, considering cost and schedule performance

p0595 A72-43453

[SAWE PAPER 906]

The weight module - A keystone in the aircraft synthesis program.

p0595 A72-43459

[SAWE PAPER 912]

Computerized airframe manufacturing cost and weight analysis, using technique for detailed parts list generation from configuration concept as input

p0596 A72-43460

[SAWE PAPER 913]

# SUBJECT INDEX

# WIND (METEOROLOGY)

- Rotary wing head weight estimation for helicopter preliminary design and parametric studies, deriving semiempirical trend formula  
[SAFE PAPER 914] p0596 A72-43461
- Helicopter design figure of merit weight ratios definition in terms of rotor thrust coefficient, substituting pure airframe structure weight for conventionally used empty weight  
[SAFE PAPER 916] p0596 A72-43463
- Moment sampling method as selfvalidating aircraft weight and balance accounting procedure  
[SAFE PAPER 920] p0596 A72-43467
- L-1011 computerized weight reporting system present and future capabilities.  
[SAFE PAPER 932] p0596 A72-43472
- Computerized weight data storage, recording and information system to aid in aerospace vehicle design  
[SAFE PAPER 933] p0596 A72-43473
- Aircraft hydraulic secondary power system weight estimation, presenting components loads and weights breakdown in tables and charts  
[SAFE PAPER 935] p0597 A72-43475
- Aircraft design structural weight estimation based on post-design analysis of production aircraft, discussing weight factors application to new designs  
[SAFE PAPER 936] p0597 A72-43476
- Weight estimation and analysis of major structural components of hypersonic, liquid hydrogen fueled aircraft  
[NASA-TN-D-6692] p0264 A72-18911
- Feasibility of direct current 200 V commercial aircraft electrical power system noting weight comparison with alternating current system  
[ARC-CP-1186] p0273 A72-19062
- WEIGHT FACTORS**  
U WEIGHT (MASS)
- WEIGHT INDICATORS**  
NT STRAIN GAGE BALANCES  
Superconducting magnetic suspension and balance facility of supersonic wind tunnel for dynamic stability studies  
p0242 A72-24757
- Superconducting coil design for magnetic suspension of supersonic wind tunnel balance  
p0242 A72-24759
- Aerodynamic force and moment measurements on model in magnetic wind tunnel balance system, using field equations  
p0243 A72-24765
- WEIGHT MEASUREMENT**  
Airline operational weighing and balancing of 747 aircraft, discussing accuracy and calibration procedures for electronic load cells, mobile platform scales and onboard aircraft weighing systems  
[SAFE PAPER 917] p0596 A72-43464
- WEIGHTING FUNCTIONS**  
Aircraft applications of composite signal OMEGA configuration with phase data combined at separate carrier with weighting coefficients, discussing advantages over uncompensated navigation systems  
p0352 A72-29192
- Homogeneous linear partial differential equation for optimal control with boundary condition formed by terminal component, noting weighting functions for linear plant  
p0494 A72-37989
- WELD STRENGTH**  
Distortion and residual stresses in welded aluminum structures.  
p0506 A72-39204
- WELDABILITY**  
Ti alloys for aircraft structures, emphasizing weldability, tensile fatigue and residual strengths, shear-carrying qualities and fuselage shell design  
p0058 A72-13616
- WELDED JOINTS**  
NT SPOT WELDS  
Nondestructive tests and their application for inspection of adhesive bonded structures, welded joints, and riveted or bolted joints  
p0278 A72-19542
- Magnetic force welding to form T joints between jet engine parts of dissimilar thickness  
[NASA-CASE-LEW-10533-2] p0435 A72-25479
- WELDED STRUCTURES**  
NT STEEL STRUCTURES  
Statistical evaluation of welded airframe component fatigue damage increment during cyclic loading with constant force amplitude  
p0245 A72-24922
- Welded steel airframe residual fatigue life tests by nonstationary random loading, applying to jet trainer aircraft landing gear  
p0358 A72-30277
- Distortion and residual stresses in welded aluminum structures.  
p0506 A72-39204
- WELDING**  
NT BRAZING  
NT DIFFUSION WELDING  
NT EXPLOSIVE WELDING  
NT FUSION WELDING  
NT PLASMA ARC WELDING  
Jet engine component overhaul procedures for fatigue damage repair, detailing distressed metal removal, replacement and welding techniques  
p0020 A72-12499
- WELDING MACHINES**  
Welding airframe structures in titanium using tensile loading to overcome distortion.  
p0611 A72-45000
- WEST GERMANY**  
U GERMANY
- WEST INDIES**  
Aircraft accident involving Boeing 727 aircraft during landing at Harry S. Truman Airport, Charlotte Amalie, St. Thomas, Virgin Islands on 28 Dec. 1970  
[PB-208675] p0642 A72-33044
- WEST VIRGINIA**  
Congressional legislation concerning safety improvements for airports in Appalachian area  
p0113 A72-13927
- WESTLAND AIRCRAFT**  
Lynx helicopter RS 360 turboshaft engine, describing modular design for maintainability  
p0449 A72-34927
- WETNESS**  
U MOISTURE CONTENT
- WHEEL BRAKES**  
Carbon/epoxy composite reinforced plastic materials feasibility for application to aircraft landing gear wheel fabrication  
p0196 A72-21686
- Aircraft wheel mechanics, discussing freely turning and braked wheels, tire drift and antiskid braking systems for landing gear  
p0285 A72-25287
- WHEELS**  
NT NOSE WHEELS  
NT TURBINE WHEELS  
NT VEHICLE WHEELS  
Aluminum aircraft wheels ultrasonic inspection, noting reliability, simplicity and time economy as compared to eddy current or fluorescent penetrant methods  
p0357 A72-30037
- Slush drag, wheel spray, and hydroplaning research using pneumatic wheels and moving runway and water layer model test facilities  
[ARC-R/M-3682] p0270 A72-19035
- WHIRL INSTABILITY**  
U ROTARY STABILITY
- WHIRLING**  
U ROTATION
- WHIRLING TESTS**  
U SPIN TESTS
- WHITE NOISE**  
NT THERMAL NOISE  
Random vibration of linearly elastic lumped mass systems containing nonlinear damping to ideal stationary Gaussian white noise excitation  
p0235 A72-23460
- Design requirements for a quiet helicopter.  
[AHS PREPRINT 604] p0444 A72-34484
- Extended Kalman filter with fictitious noise input for tracking time-variant parameters for vertical takeoff aircraft  
[AD-739694] p0517 A72-28024
- WIND (METEOROLOGY)**  
NT GROUND WIND  
NT GUSTS  
NT JET STREAMS (METEOROLOGY)

## WIND CIRCULATION

## SUBJECT INDEX

## NT WINDS ALOFT

## WIND CIRCULATION

## U ATMOSPHERIC CIRCULATION

## WIND DIRECTION

Periodic variations of wind velocity and direction measured at Bedford Airfield (Great Britain) from 1962 to 1966

[ARC-CP-1158] p0095 N72-12553

## WIND EFFECTS

Direct side force control by rudder deflection and asymmetrical drag utilization to cancel yawing moment, discussing variable stability T-33 flight tests

[AIAA PAPER 72-94] p0133 A72-16946

Crosswind landing under adverse runway conditions, illustrating technique with sketches

p0179 A72-18833

Wind shear, turbulence, precipitation, temperature, visibility and ceiling effects on airport capacity, suggesting weather data integration into ATC system for pilots information

p0192 A72-21521

A method for increasing thrust reverser

utilization on STOL aircraft.

[AIAA PAPER 72-782] p0500 A72-38141

Lateral flight path control during aircraft landing in gusty crosswinds by lateral thrust deflection, discussing design optimization

p0613 A72-45330

Effect of transient winds on flow quality of open-circuit wind tunnel model

[NASA-TN-X-2538] p0379 N72-22993

Development of method for determining orientation of runway to minimize probability of certain critical crosswinds

[NASA-TN-D-6930] p0576 N72-30250

## WIND MEASUREMENT

## NT WIND VELOCITY MEASUREMENT

Mountain stations wind measurement usefulness for small aircraft traffic guidance

p0072 A72-15625

Vanes for sensing incidence angles of airstream with respect to aircraft, noting correlation coefficient

p0145 A72-18450

Probability distribution of vertical longitudinal shear fluctuations.

p0599 A72-44146

Periodic variations of wind velocity and direction measured at Bedford Airfield (Great Britain) from 1962 to 1966

[ARC-CP-1158] p0095 N72-12553

## WIND PRESSURE

Analysis and comparison of gust load models based on either discrete gust concept or continuous gust concept

[NLR-TR-71025-U] p0037 N72-10998

Effects of Q forces on injuries during ejection/extraction escape in USAF

p0274 N72-19144

Performance tests of protective clothing to determine effectiveness against air blast during high speed ejection

p0274 N72-19147

## WIND PROFILES

High level Canberra flight for three dimensional picture of wind and temperature fields, showing CAT, gravity waves and smooth flight characteristics

p0311 A72-27709

## WIND SHEAR

Wind shear, turbulence, precipitation, temperature, visibility and ceiling effects on airport capacity, suggesting weather data integration into ATC system for pilots information

p0192 A72-21521

Low level vertical wind shear effect on aircraft control, considering runway selection with respect to surface wind conditions

p0348 A72-28862

Persistent intense CAT in upper level frontal zone, discussing synoptic features, vertical wind shears, radar echoes and turbulence intensity

p0356 A72-29622

Effect of ground wind shear on aircraft trailing vortices.

p0507 A72-39630

Probability distribution of vertical longitudinal shear fluctuations.

p0599 A72-44146

Wake and clear air turbulence, wind shear, upsets, thunderstorms, and turbulence mapping

[AD-732117] p0222 N72-17579

Development of techniques and equipment for conducting programs to identify presence of clear air turbulence and warn high altitude, high speed aircraft

[DOT-TSC-FAA-71-19] p0325 N72-20554

Analysis of clear air turbulence and related atmospheric structure based on data from Jindivik aircraft operating close to Woomera aerological station

[METEOROL-STUDY-20] p0372 N72-22599

## WIND TUNNEL APPARATUS

## NT WIND TUNNEL NOZZLES

Wind tunnels measuring equipment and procedures and data acquisition and processing systems electronics, describing computerized real time data processing system

[DFVLR-SONDDR-156] p0024 A72-12898

German monograph on shaft and wall effect in aerodynamic measurements with three orifice pressure probes in wind tunnels

p0227 A72-22320

Wind tunnel diffuser design for separated region spread reduction based on egg box principle

p0238 A72-23859

Superconducting magnetic suspension and balance facility of supersonic wind tunnel for dynamic stability studies

p0242 A72-24757

Superconducting coil design for magnetic suspension of supersonic wind tunnel balance

p0242 A72-24759

Aerodynamic force and moment measurements on model in magnetic wind tunnel balance system, using field equations

p0243 A72-24765

Performance characteristics of high Reynolds number tube wind tunnel

[NASA-TN-X-67419] p0077 N72-11882

Development of magnetic artificial gravity test facility for use in wind tunnel tests to simulate separation of external stores from aircraft in flight

[NASA-CR-1955] p0266 N72-19000

Design, fabrication, and test of full scale angle of attack and sideslip vanes used with flight path accelerometer in high speed wind tunnel

[AD-736819] p0388 N72-23490

Static performance of tip-turbine-driven fan used in wind tunnel tests of VTOL lift fan models

[NASA-CR-2051] p0390 N72-23836

Development of algorithm based on matrix methods for solution of wind tunnel force-balance equations and iterative solution using automatic computer reduction

[NASA-TN-D-6860] p0476 N72-27002

## WIND TUNNEL BALANCES

## U WEIGHT INDICATORS

## U WIND TUNNEL APPARATUS

## WIND TUNNEL CALIBRATION

Correction factors for Aerodynamic Research Institute Goettingen transonic wind tunnel, comparing calculated values with AGARD calibration models test results

[DFVLR-SONDDR-167] p0058 A72-13610

Three component shock tunnel strain gage balance for measuring aerodynamic forces on thin delta wings

[ARC-R/M-3664] p0046 N72-11375

Low speed wind tunnel calibration of SC-1 aircraft pitot and static pressure sensors and wind vanes for flight test recording of airspeed and flight altitude

[ARC-CP-1162] p0093 N72-12392

## WIND TUNNEL MODELS

Nonporous rigid parachute models three component measurements, using low speed wind tunnel for testing skirt length effects on aerodynamic characteristics

p0006 A72-10303

Wind tunnel and rocket sled results with ribbon parachutes for supersonic release, discussing aerodynamic, structural flutter and inflation time characteristics.

p0007 A72-10308

- Wing-fuselage combination aerodynamic coefficients, comparing experimental data with subsonic linear and nonlinear theoretical results [DGLR PAPER 71-115] p0023 A72-12723
- Wind tunnel model instrumentation and captive trajectory facilities for aircraft stability, control and metric wing-pylon store tests for performance and structural predictions p0053 A72-12921
- Correction factors for Aerodynamic Research Institute Goettingen transonic wind tunnel, comparing calculated values with AGARD calibration models test results [DFVLR-SONDDR-167] p0058 A72-13610
- Flat plate wing autorotation experiments about spanwise axis in low speed wind tunnel p0070 A72-15117
- Wind tunnel investigation of unswept rectangular wing with externally blown single slotted flap, determining optimum slot width as function of momentum coefficient and flap deflection p0070 A72-15117
- Inlet duct and turbofan engine compatibility without stalling and surge conditions obtained by design optimization and wind tunnel testing p0176 A72-18761
- Wind tunnel investigation of Reynolds number effects on boundary layer separation incidence and maximum lift coefficient of high-lift device equipped aircraft model p0242 A72-24657
- Aerodynamic force and moment measurements on model in magnetic wind tunnel balance system, using field equations p0243 A72-24765
- Data acquisition and reduction for model aerodynamics in superconducting magnetic suspension and balance of supersonic wind tunnel facility p0243 A72-24766
- Static aerodynamic characteristics of bulbous based cone models and slender wings at subsonic speed, using magnetic suspension and balance system p0243 A72-24769
- Aerodynamic data acquisition with magnetic balance on wind tunnel model delta and AGARD G wing planforms and body of revolution p0243 A72-24770
- Magnetic simulation of gravity for wind tunnel investigations of aircraft jettison processes, considering Froude number and relationships between model and full scale aircraft p0243 A72-24775
- Iron rotational hysteresis effect in cold magnetic balance wind tunnel system for spinning aircraft configurations and subsonic flow regimes p0244 A72-24776
- Dynamic model of high bypass ratio turbofan engines for L-1011 wind tunnel flutter test program [AIAA PAPER 72-376] p0286 A72-25400
- Subsonic powered nacelle wind tunnel model for investigation of geometric variables effect on pressure drag [ASME PAPER 72-GT-14] p0293 A72-25613
- Low pressure ratio Q-PAN propulsor noise reduction tests on wind tunnel model, discussing source components and design configurations [ASME PAPER 72-GT-40] p0295 A72-25634
- Dynamically similar wind tunnel models for transonic aeroelastic studies of aircraft failures or structural damage and flutter margins [ONERA, TP NO. 1082] p0356 A72-29672
- Wind tunnel simulation of full scale vortices. [AHS PREPRINT 623] p0443 A72-34477
- Wind tunnel experiments on aerodynamic superstall, describing stability tests and models p0451 A72-35374
- Design studies and model tests of the stowed tilt-rotor concept. [AIAA PAPER 72-804] p0497 A72-38113
- Dynamic pressure, downwash and pressure gradient corrections of wind tunnel model measurements, discussing displacement limit for adequate accuracy [DFVLR-SONDDR-214] p0503 A72-38687
- Augmentor wing design for Buffalo STOL aircraft, discussing operational principle and wind tunnel test results p0550 A72-40684
- Potential flow calculations to support two-dimensional wind tunnel tests on high-lift devices. [ICAS PAPER 72-13] p0553 A72-41138
- Application of wall corrections to transonic wind tunnel data. [AIAA PAPER 72-1009] p0558 A72-41591
- Characteristics of an ejector-type engine simulator for STOL model testing. [AIAA PAPER 72-1028] p0558 A72-41607
- Flow distortion and performance measurements on a 12-inch fan-in-wing model for a range of forward speeds and angle of attack settings. p0560 A72-42323
- Trailing vortex effects on wing pressure distribution from low speed wind tunnel tests, discussing effect of wing-vortex distance p0613 A72-45331
- Conference papers on jet and slipstream influence on aerodynamic coefficients using aircraft models [DLR-MITT-70-28] p0027 N72-10004
- Jet engine simulation with low speed wind tunnel models for interference drag measurement p0027 N72-10005
- Vertical takeoff aircraft wind tunnel model with high pressure ejectors to determine jet interference on aerodynamic coefficients p0028 N72-10007
- Aerodynamic characteristics of wind tunnel model of hypersonic aircraft [NASA-TN-D-6577] p0032 N72-10045
- Prediction of flight penetration of wing buffeting from wind tunnel model dynamic tests [ARC-CP-1171] p0042 N72-11044
- Conference on theoretical methods and wind tunnel facilities for transonic aerodynamic testing of aircraft at high Reynolds numbers [AGARD-CP-83-71] p0073 N72-11854
- Flow model for shock induced leading edge transonic flow turbulence and rear separation in low speed stall of airfoil p0073 N72-11858
- Feasibility of transonic wind tunnel testing of large cord swept wing panel model for simulating wing shock location at flight Reynolds number [NASA-TN-X-67414] p0075 N72-11870
- Wind tunnel model boundary layer reduction through suction for accurate simulation of high Reynolds number full scale aircraft characteristics p0076 N72-11875
- Methods for solving engine airplane interference and wall corrections in transonic wind tunnel tests for predicting aerodynamic performance of airplane design p0076 N72-11877
- Specifications for high Reynolds number wind tunnel design for flow simulation in swept wing aircraft development tests p0077 N72-11883
- Transonic wind tunnel model measurements of buffet loads and boundaries at various sweep and aspect ratio wing roots p0078 N72-11886
- Transonic wind tunnel design for model testing at high Reynolds number p0078 N72-11887
- Wind tunnel tests of large scale swept augmentor wing model with and without horizontal tail [NASA-TN-X-62029] p0080 N72-11901
- Wind tunnel tests to determine aerodynamic characteristics of semispan wing with externally blown jet flap [NASA-TN-X-62079] p0080 N72-11902
- Wind tunnel tuft grid study of trailing vortex downstream of straight wing [NASA-CR-62077] p0087 N72-11950
- Flow unsteadiness and model vibration in transonic and subsonic wind tunnels for dynamic tests [ARC-CP-1155] p0092 N72-12198
- Six-component strain gage sting balance for small wind tunnel models [ARI/A-NOTE-331] p0159 N72-14462
- High-pressure ratio turbojet engine simulator with common exit nozzle and wind tunnel test results at Mach 0.6 to 1.27 [NASA-TN-X-67973] p0162 N72-14792

Hypersonic wind tunnel tests to determine surface pressures and flow distribution on orbiter space shuttle  
[NASA-CR-120037-VOL-1] p0201 N72-15942

Wind tunnel model tests of DH 121 aircraft and comparison with drag estimates and full scale flight data  
[ARC-CP-1170] p0205 N72-15974

Jet engine model for simulating inlet and exhaust flow fields in supersonic aircraft wind tunnel model  
[AD-731238] p0207 N72-16200

Wind tunnel tests to determine performance of bicone inlet designed for Mach 2.5 with internal distributed compression and 40 percent internal contraction  
[NASA-TM-X-2416] p0214 N72-16723

Afterbody thrust measurement in wind tunnel  
[ONERA-TP-978] p0221 N72-17206

Wind tunnel aerodynamic characteristics of V/STOL transport model with outboard pod mounted front fans and rear fans located in wing-fuselage junction  
[NASA-TM-X-62102] p0249 N72-17987

Wind tunnel tests of models of helicopter rotary wings to determine blade element airloads in unstalled and stalled flight regimes  
[NASA-CR-114424] p0251 N72-18005

Wind tunnel tests to determine aerodynamic characteristics of vertical takeoff jet fighter aircraft with six jet engines in transition speed range  
[NASA-TM-X-2060] p0251 N72-18007

Wind tunnel tests to determine effects of ground proximity on aerodynamic characteristics of V/STOL aircraft model  
[NASA-TM-X-2212] p0251 N72-18008

Wind tunnel tests to determine dynamic characteristics of hingeless rotors with hub moment feedback controls and rotor frequency response - Vol. 1  
[NASA-CR-114427] p0253 N72-18024

Compilation of data obtained from wind tunnel tests of hingeless rotors with hub moment feedback controls and rotor frequency response - Vol. 2  
[NASA-CR-114428] p0253 N72-18025

Wind tunnel study of aerodynamic drag for engine pod and its elements including air intake and afterbody  
[NASA-TT-F-14154] p0265 N72-18997

Wind tunnel tests to determine effectiveness of cyclic pitch control on V/STOL aircraft for longitudinal control during hover and transition  
[AD-734237] p0271 N72-19039

Wind tunnel tests to determine longitudinal control capability of four propeller, tilt wing aerodynamic configuration with cyclic pitch propellers  
[AD-734236] p0271 N72-19040

Wind tunnel analysis of factors affecting wing tip vortex  
[NASA-TM-X-2516] p0327 N72-20970

Wind tunnel tests of M2-F2 lifting body entry configuration at transonic and supersonic speeds and selected Reynolds numbers  
[NASA-TM-X-2511] p0331 N72-21005

Blade stress analysis, wind tunnel models, and test procedures for investigating conversion process of folding tilt-rotor aircraft - Vol. 4  
[AD-735733] p0334 N72-21028

Wind tunnel determination of lift induced on swept wing by two-dimensional partial-span deflected jet at Mach numbers from 0.20 to 1.30  
[NASA-TM-X-2529] p0365 N72-21997

Wind tunnel tests to determine Magnus force on canted fin or self rotating aerodynamic configurations  
[AD-736369] p0366 N72-22012

Wind tunnel measurements of aerodynamic damping and oscillatory stability in pitch and yaw for scale model of carrier based variable-sweep fighter aircraft with twin vertical tails  
[NASA-TM-X-2555] p0369 N72-22027

Wind tunnel tests of full-scale flight path accelerometer to determine transonic aerodynamic characteristics and to eliminate interaction effects between angle of attack and sideslip vanes  
[AD-736456] p0371 N72-22328

Effect of transient winds on flow quality of open-circuit wind tunnel model  
[NASA-TM-X-2538] p0379 N72-22993

Wind tunnel tests to determine aerodynamic characteristics of nonarticulated folding tilt rotor mounted on semispan wing - Vol. 4  
[AD-735632] p0380 N72-22999

Wind tunnel tests to determine aerodynamic characteristics of tilt rotor aircraft with simulation of free flight conditions - Vol. 6  
[AD-735633] p0380 N72-23000

Wind tunnel test data of velocity measurements with hot wire anemometer in wake of CV-990 aircraft model  
[NASA-TM-X-62148] p0419 N72-23994

Wind tunnel tests to determine aerodynamic characteristics of powered tilt-rotor aircraft under conditions of hover, transition, and cruise - Vol. 5  
[AD-736824] p0419 N72-24001

Wind tunnel tests to determine aerodynamic effects created by rotor spinup, stopping, and folding on semispan tilt-rotor model - Vol. 7  
[AD-736825] p0419 N72-24002

Wind tunnel tests to determine aerodynamic characteristics of V/STOL transport aircraft with tip-turbine driven lift fans  
[NASA-TM-X-62151] p0420 N72-24010

Large-scale wind tunnel investigation of noise characteristics of semispan wing equipped with externally blown jet flaps  
[NASA-TM-X-62154] p0420 N72-24011

Wind tunnel tests to determine aerodynamic interference and jet-wake interference produced by components of high wing, logistics transport type aircraft  
[NASA-TM-X-2530] p0421 N72-24020

Development and characteristics of support system and data reduction capability for free flight test facility  
[ISAS-477-VOL-37-NO-3] p0424 N72-24343

Methods for simulating high level Reynolds number for wind tunnel model testing at transonic speed  
[NASA-TT-F-14290] p0463 N72-26000

Wind tunnel investigation of acoustic characteristics of STOL aircraft  
[NASA-TM-X-62164] p0464 N72-26008

Wind tunnel and flight tests of dynamic stall of airfoils and helicopter blades  
[AD-738610] p0469 N72-26251

Basic formulations for developing coordinate transformations and equations of motion used with free flight and wind tunnel data reduction  
[NASA-SP-3070] p0472 N72-26475

Engine airplane interference corrections in calculating model aircraft performance from wind tunnel test data  
p0478 N72-27017

Wind tunnel test requirements for simulating nozzle parameters and nozzle airframe interference characteristics  
p0478 N72-27021

Method for designing wind tunnel model airfoil with integrally formed pressure measurement orifices  
[NASA-CASE-LAR-10812-1] p0482 N72-27272

Wind tunnel tests to determine aerodynamic characteristics of rectangular shaped containers carried as external stores on helicopters  
[NASA-TM-X-62169] p0513 N72-27995

Wind tunnel determination of aerodynamic characteristics for large scale 35 deg swept wing jet transport model with external blowing triple-slotted flap  
[NASA-TM-X-2600] p0514 N72-28009

Wind tunnel tests to determine aerodynamic characteristics of VTOL fighter aircraft model with external swiveling lift engines  
[NASA-TM-X-62167] p0515 N72-28012

Wind tunnel tests of forward-mounted overwing turbofan engine model with determination of jet interference effects and lift-dependent drag  
[ARC-CP-1207] p0527 N72-28998

Momentum loss measured for determination of drag in wind tunnel model of advanced manned interceptor with engine package containing twin internal airflow passages  
[AD-741744] p0539 N72-29817

# SUBJECT INDEX

# WIND TUNNEL STABILITY TESTS

- Wind tunnel tests to determine aerodynamic effects of leading edge serrations on two dimensional airfoil  
[NASA-TM-X-2643] p0581 N72-30992
- Effect of ground proximity in wind tunnel using fixed board noting boundary layer influence  
[ARC-R/M-3689] p0582 N72-30997
- Low velocity wind tunnel investigation of laminar boundary layer development downstream of suction slot  
[AD-742937] p0583 N72-31005
- Wind tunnel tests to determine performance of fan in wing model at various angles of attack and airspeeds  
p0649 N72-33966
- WIND TUNNEL NOZZLES**
- Design of flexible steel liners for adjustable transonic wind tunnel nozzle  
[NPL-AERO-NOTE-1098] p0030 N72-10023
- Single screw variable nozzle for varying Mach number in supersonic wind tunnels  
[RR-018] p0257 N72-18256
- WIND TUNNEL STABILITY TESTS**
- Wind tunnel model instrumentation and captive trajectory facilities for aircraft stability, control and metric wing-pylon store tests for performance and structural predictions.  
p0053 A72-12921
- Wind tunnel stability tests of aerodynamic pitch damping of aircraft model oscillating in two degrees of freedom  
p0057 A72-13539
- Dynamic model of high bypass ratio turbofan engines for L-1011 wind tunnel flutter test program  
[AIAA PAPER 72-376] p0286 A72-25400
- Wind tunnel testing of Dassault-Breguet-Dornier Alpha Jet twin engine trainer, emphasizing tests for wing-empennage flutter and jet induced interference effects  
p0357 A72-30077
- Results of preliminary studies of a bearingless helicopter rotor concept.  
[AHS PREPRINT 600] p0445 A72-34490
- Wind tunnel experiments on aerodynamic superstall, describing stability tests and models  
p0451 A72-35374
- F-111A inlet nozzle dynamic distortion diagnostics for airframe-propulsion integration based on flight and transonic wind tunnel tests.  
[ICAS PAPER 72-18] p0553 A72-41143
- Aerodynamic characteristics of the slotted fin.  
p0557 A72-41262
- A new method for the evaluation of slotted wind tunnel interference parameters applicable to subsonic oscillatory tests.  
p0559 A72-41642
- Full scale wind tunnel tests of small unpowered jet aircraft with T tail  
[NASA-TM-D-6573] p0030 N72-10031
- Transonic wind tunnel tests of effectiveness of high lift devices on swept and straight wings in controlling flow separation  
p0074 N72-11860
- Transonic wind tunnel testing for predicting flight performance characteristics of aircraft  
p0075 N72-11865
- Correlation of transonic wind tunnel test data with flight test results on slender wing airplanes for double delta configuration development  
p0075 N72-11868
- Comparison of wind tunnel and theoretical techniques for determining full scale aerodynamic flight drag factors  
[NASA-TM-X-67413] p0075 N72-11869
- Methods for solving engine airplane interference and wall corrections in transonic wind tunnel tests for predicting aerodynamic performance of airplane design  
p0076 N72-11877
- Aerodynamic suitability of Freon 12 for wind tunnel testing of transport aircraft models at increasing Reynolds numbers and subcritical and supercritical Mach numbers  
[NASA-TM-X-67417] p0077 N72-11879
- Hydraulic equipment for high Reynolds number testing in transonic wind tunnel.  
[NASA-TM-X-67418] p0077 N72-11880
- Low speed wind tunnel longitudinal stability tests on cambered wings of mild gothic planform of 1/4 aspect ratio  
[ARC-CP-1163] p0081 N72-11907
- Wind tunnel longitudinal stability tests of AVRO 720 scale model with determination of up-elevon and leading edge notch effects  
[ARC-CP-1140] p0088 N72-11962
- Wind tunnel tests on prototype munitions dispenser designed for external carriage on tactical aircraft  
p0173 N72-15835
- Low speed wind tunnel measurement of oscillatory lateral stability derivatives of slender variable sweep wing aircraft model and comparison with Concorde and HP-115  
[BAE-TR-70095] p0204 N72-15972
- Flow distortion and performance measurements on 12 in. fan-in-wing model for range of forward speeds and angle of attack settings in closed wind tunnel.  
p0211 N72-16702
- Controller, independent of other intake controllers and aircraft data systems, and wind tunnel testing of supersonic intake control system  
p0212 N72-16706
- External drag characteristics of jet engine exhaust nozzles, using wind tunnel tests  
p0212 N72-16707
- Velocity distribution at supersonic compressor inlet in wind tunnel tests  
p0213 N72-16713
- Wind tunnel tests to determine static stability and control characteristics of flexible aircraft  
[NASA-TM-D-6656] p0266 N72-19001
- Low speed wind tunnel test on low-drag airfoil at half a million Reynolds number, noting aerodynamic coefficients  
[ARC-CP-1187] p0270 N72-19033
- Comparison of flight test and wind tunnel data to determine areas of agreement when nonlinearities appear in aerodynamic coefficients of slender wing aircraft  
p0330 N72-20990
- Wind tunnel tests to determine Magnus force on canted fin or self rotating aerodynamic configurations  
[AD-736369] p0366 N72-22012
- Wind tunnel tests to determine effects of variations in body shape on aerodynamic characteristics of all-body hypersonic aircraft configuration  
[NASA-TM-D-6821] p0419 N72-23996
- Strain gage balances for measuring aerodynamic coefficients in wind tunnel model test - conference  
[DLR-MITT-72-06] p0469 N72-26341
- Combination mechanical-electrical strain gage balances for subsonic wind tunnels  
p0470 N72-26342
- Multiple component strain gage balance for measuring aerodynamic loads and forces in wind tunnel model stability tests  
p0470 N72-26343
- External strain gage balance for wing stability measurements in supersonic wind tunnel  
p0470 N72-26344
- Strain gage bridges for wind tunnel balance systems  
p0470 N72-26345
- Error analysis on wind tunnel effects in strain gage balance measurements  
p0470 N72-26346
- Instationary dynamic load measurements on twin bridge gage in wind tunnel tests  
p0470 N72-26347
- Oscillating balance system for stability derivation measurements in supersonic wind tunnels  
p0470 N72-26348
- Hypersonic wind tunnel tests on delta wing models at high incidence for pressure distribution determination  
[ARC-CP-1198] p0476 N72-27004
- Wind tunnel tests to determine low speed aerodynamic characteristics of large scale model of advanced fixed wing fighter aircraft with thin, cranked leading edge wing.  
[NASA-TM-D-6919] p0513 N72-27998
- Wind tunnel stability tests of XV-6A vectored thrust vertical takeoff aircraft model in and

out of ground effect at low speed  
[NASA-TN-D-6826] p0572 N72-30008

Wind tunnel tests to determine effects of  
in-flight thrust reverser on stability and  
control characteristics of single-engine fighter  
aircraft model  
[NASA-TN-D-6886] p0573 N72-30010

Low Mach number wind tunnel study of advanced  
manned interceptor in blended body shape  
[AD-741745] p0574 N72-30021

Aerodynamic testing of wing sections, using laser  
Doppler velocimeter and conventional pressure  
measuring techniques  
[AD-740901] p0577 N72-30418

Full scale wind tunnel tests to determine dynamic  
stability derivatives of variable-sweep fighter  
configuration with twin vertical tails  
[NASA-TN-D-6909] p0622 N72-32044

**WIND TUNNEL WALLS**

Application of wall corrections to transonic wind  
tunnel data  
[AIAA PAPER 72-1009] p0558 A72-41591

Researches on the two-dimensional retarded  
cascade. I, II.  
p0560 A72-41944

Numerical method for calculating wall-induced  
interference at subsonic speeds in slotted or  
perforated wind tunnels with rectangular cross  
sections  
[NASA-TR-R-379] p0073 N72-11853

Higher-order theory used for solution of two  
dimensional subsonic wall interference due to  
source and vortex between perforated wind tunnel  
walls  
[AD-735967] p0337 N72-21307

Wind tunnel wall corrections for two-dimensional  
flow applied to pressure distribution  
measurements in transonic wind tunnel  
[NASA-TT-F-14316] p0626 N72-32264

**WIND TUNNELS**

NT BLOWDOWN WIND TUNNELS

NT CASCADE WIND TUNNELS

NT HYPERVELOCITY WIND TUNNELS

NT LOW DENSITY WIND TUNNELS

NT LOW SPEED WIND TUNNELS

NT SHOCK TUNNELS

NT SLOTTED WIND TUNNELS

NT SUBSONIC WIND TUNNELS

NT SUPERSONIC WIND TUNNELS

NT TRANSONIC WIND TUNNELS

Wind tunnel measurements for near flow field  
velocity distribution in rectangular wing wake  
turbulence, comparing with flight measurements  
[AIAA PAPER 72-41] p0133 A72-16948

Low turbulence wind tunnel with closed circuit  
design and pressure gradient adjustment  
capability for turbulent boundary layer studies  
p0139 A72-17713

Sonic boom simulation devices and techniques,  
including wind tunnels, ballistic ranges, spark  
discharges and shock tubes  
p0198 A72-21906

Electromagnetic position sensor for magnetically  
supported model in wind tunnel, discussing  
design, operation principles and performance  
p0243 A72-24773

Inclined wind tunnel test section for free gliding  
investigation and aerodynamic design of flexible  
wing two body system  
p0394 A72-31403

Monitor and regulator for automatic speed control  
and flow velocity measurement in wind tunnel  
p0411 A72-33609

Design and development of the United Aircraft  
Research Laboratories acoustic research tunnel.  
[AIAA PAPER 72-1005] p0558 A72-41589

Laser Doppler velocimeter operating in forward-  
and back-scatter modes for supplementing wind  
tunnel flow field measurements in subsonic,  
transonic and supersonic regimes  
p0563 A72-42678

A near real time data acquisition/reduction  
facility for the Boeing wind tunnels.  
p0564 A72-42699

Experience with the NRC 10 ft. x 20 ft. V/STOL  
propulsion tunnel - Some practical aspects of  
V/STOL engine model testing.  
p0600 A72-44247

On-line digital computer for wind tunnel,  
operating systems, and real time operation  
[NPL-AERO-1326] p0033 N72-10184

Pitot stem blockage corrections in uniform and  
nonuniform pipe flow determined by wind tunnel  
measurements  
[ARC-CP-1175] p0045 N72-11295

Design, construction, and capabilities of wind  
tunnels used for aeronautical research by  
private and governmental agencies in US - Vol. 1  
[NASA-CR-1874] p0092 N72-12182

Wind tunnel tests for slot spoiler direct lift  
control system  
[NASA-TN-D-6627] p0149 N72-13978

Survey of wind tunnel testing procedures for  
nozzles and exhausts  
p0209 N72-16688

Development and characteristics of support system  
and data reduction capability for free flight  
test facility  
[ISAS-477-VOL-37-NO-3] p0424 N72-24343

Development and characteristics of dual scatter  
laser Doppler velocimeter for flow distribution  
measurement in wind tunnels, helicopter  
downwash, and across high lift wing sections  
p0435 N72-25506

Installation of structures assembly model and wind  
tunnel systems  
[NASA-CR-112056] p0437 N72-25712

Design and performance of low turbulence wind  
tunnels driven by centrifugal blowers  
[IC-AERO-72-10] p0468 N72-26208

Electrofluid dynamic energy conversion for wind  
tunnel augmentation  
p0468 N72-26210

Compilation of technical reports on missile  
design, missile guidance, helicopter stability,  
VTOL aircraft, and wind tunnel design - Vol. 3  
[SBN-11-470153-9] p0475 N72-26995

Development of algorithm based on matrix methods  
for solution of wind tunnel force-balance  
equations and iterative solution using automatic  
computer reduction  
[NASA-TN-D-6860] p0476 N72-27002

Characteristics of wind tunnels at Naval research  
center and associated test support equipment and  
facilities  
[AD-741213] p0533 N72-29221

Wind tunnel tests to predict aircraft wake  
turbulence due to tip trailing vortex  
[NASA-CR-62078] p0534 N72-29237

Measurement of wind tunnel background pressure  
fluctuations for application to design of  
aerospace vehicles  
[NASA-CR-123810] p0575 N72-30245

Miniature capacitive accelerometer for use in free  
flight wind tunnel telemetry  
[NASA-TN-X-2644] p0589 N72-31460

Wind tunnel tests to determine damping  
characteristics of vanes and to calibrate flight  
path accelerometer at subsonic and supersonic  
speeds  
[AD-742994] p0589 N72-31480

Activities of ONERA for 1971  
p0592 N72-31962

Structural suitability and cost effectiveness of  
ferro-cement for large subsonic wind tunnel  
structures  
[NASA-CR-114501] p0648 N72-33916

**WIND VANES**

Vaness for sensing incidence angles of airstream  
with respect to aircraft, noting correlation  
coefficient  
p0145 A72-18450

Low speed wind tunnel calibration of SC-1 aircraft  
pitot and static pressure sensors and wind vanes  
for flight test recording of airspeed and flight  
altitude  
[ARC-CP-1162] p0093 N72-12392

Effect of limited amplitude and rate of flap  
motion on vane controlled gust alleviation system  
[NASA-TN-D-6733] p0265 N72-18995

**WIND VARIATIONS**

Probability distribution of vertical longitudinal  
shear fluctuations.  
p0599 A72-44146

**WIND VELOCITY**

Periodic variations of wind velocity and direction  
measured at Bedford Airfield (Great Britain)

- from 1962 to 1966  
[ARC-CP-1158] p0095 N72-12553
- Measuring air velocity and temperature for  
inertial navigation using DBC 5 aircraft  
[NCAR-TN/EDD-74] p0523 N72-28675
- WIND VELOCITY MEASUREMENT**  
Corrected wind measurement and dust velocity for  
airplane motion - LO-LOCAT project  
[AD-739875] p0522 N72-28659
- WINDING**  
NT FILAMENT WINDING
- WINDMILLING**  
U AUTOROTATION
- WINDOWS (APERTURES)**  
Optical qualities of aircraft windshields and  
direct vision windows, considering color, light  
transmission, faults, heating, distortion,  
inside reflections and double images  
p0305 A72-27004
- Aircraft transparencies from civil operator  
viewpoint, considering replacement cost of  
flight deck and cabin windows  
p0305 A72-27005
- Aircraft fuselage acrylic glazing design, covering  
passenger cabin window, cockpit windscreen and  
various surface coatings  
p0305 A72-27008
- Concorde aircraft optical transparency components  
design characteristics and reliability tests,  
noting visor, pilot forward windshield, flight  
deck side windows and cabin windows  
p0306 A72-27012
- An estimate of sonic boom damage to large windows.  
p0441 A72-34234
- Light transmission, reflection and environment  
problems of hydrophilic coatings for fog and  
frost protection in aviation instrument window  
design  
p0563 A72-42519
- WINDS ALOFT**  
NT JET STREAMS (METEOROLOGY)  
Winds aloft forecast use to predict southwestern  
mountain lee wave behavior for general aviation  
cross country flights  
p0348 A72-28863
- Wind, temperature, and clear air turbulence in  
middle and upper stratosphere  
[NLI-M-22438-(5828.4P)] p0520 N72-28304
- WINDSCREENS**  
U WINDSHIELDS
- WINDSHIELDS**  
Glass-vinyl retractable windshield visor  
development for Concorde aircraft, considering  
rain, hail and icing effects, strength and  
stiffness under aerodynamic loading and heating  
p0231 A72-22900
- Optical qualities of aircraft windshields and  
direct vision windows, considering color, light  
transmission, faults, heating, distortion,  
inside reflections and double images  
p0305 A72-27004
- Aircraft windscreen design, discussing high impact  
strength glass, electroconductive film,  
transparency service life and weight reduction  
p0305 A72-27006
- Aircraft fuselage acrylic glazing design, covering  
passenger cabin window, cockpit windscreen and  
various surface coatings  
p0305 A72-27008
- Aircraft windscreen reliability, discussing  
delamination, interface shear stress effects and  
analogy to metal fatigue  
p0306 A72-27011
- Concorde aircraft optical transparency components  
design characteristics and reliability tests,  
noting visor, pilot forward windshield, flight  
deck side windows and cabin windows  
p0306 A72-27012
- Concorde aircraft windshield panels bird impact  
resistance, noting effects of edge clamping  
width, ply thickness, composition and temperature  
p0306 A72-27013
- Aircraft windshield bird impact resistance, noting  
weight, speed, angle and window geometry effects  
p0306 A72-27014
- High light transmission electrically conducting  
Myviz and gold film laminates for aircraft  
windshields and window heating applications  
p0357 A72-30038
- Computer technique to analyse aircraft windshields  
for multiple imaging  
[AD-744044] p0586 N72-31034
- WING CAMBER**  
Viscous incompressible flow past longitudinally  
cambered small aspect ratio slender wing near  
solid interface  
p0119 A72-16215
- Airfoil contour design as envelope of family of  
circles with centers lying on mean camber line  
p0227 A72-22298
- Hughes 500 and OH-6 helicopter tail rotor cambered  
blades, comparing thrust and stall  
characteristics with symmetrical blades  
p0359 A72-30290
- WING FLAPS**  
NT LEADING EDGE SLATS  
NT TRAILING-EDGE FLAPS
- Externally blown flap noise tests at various  
nozzle exhaust velocities for STOL aircraft  
noise reduction  
[AIAA PAPER 72-129] p0180 A72-18962
- Externally blown flap impingement noise.  
[AIAA PAPER 72-664] p0455 A72-35961

 Calculation of aerodynamic forces on thin wing oscillating harmonically in subsonic flow using collocation method p0081 N72-11910  
 [RAE-TR-69073] p0081 N72-11910  
 Two and three dimensional wind tunnel tests on oscillatory control surface derivations noting Reynolds number and/or boundary layer transition variation on wing p0088 N72-11960  
 [ARC-CP-1151] p0088 N72-11960  
 Rotational loading and flutter tests on straight wing space shuttle to establish damping requirements p0201 N72-15940  
 [NASA-TM-X-62110] p0201 N72-15940  
 Kernel function solution for pressure distribution over wing with oscillating control surfaces in subsonic flow p0424 N72-24368  
 [NLR-TR-70123-U] p0424 N72-24368  
 External strain gage balance for wing stability measurements in supersonic wind tunnel p0470 N72-26344  
 Strain gage measurements of buffeting properties on wing-body combinations p0470 N72-26349

**WING PANELS**

Prediction of the stalling of a wing section in incompressible flow p0492 A72-37760  
 [ONERA, TP NO. 1088] p0492 A72-37760  
 Transport aircraft wing compression panel failure in bending test due to stringer interruptions, analyzing structural deficiency via column and beam bending theories p0566 A72-42827  
 A crack stopper concept for filamentary composite laminates. p0597 A72-43498  
 Formulae for components of perturbation velocity in linearized subsonic theory for symmetrical cranked wing panels at zero angle of attack p0029 N72-10021  
 [NPL-AERO-NOTE-1090] p0029 N72-10021  
 Rolling-up process of discontinuity surface resulting from unstable vortex layer behind aircraft wing p0320 N72-20015  
 [NASA-TT-F-14230] p0320 N72-20015  
 Experimental determination of stability and stall flutter of scale model of tilt-propeller free-wing V/STOL aircraft p0463 N72-25998  
 [NASA-TN-D-6831] p0463 N72-25998  
 Aerodynamic interference between wing and surface of velocity discontinuity in nonuniform potential flow field p0476 N72-27000  
 [NAL-TR-254] p0476 N72-27000  
 Numerical analysis of lifting wings with parabolic wing tips to determine aerodynamic characteristics and stress concentrations p0527 N72-29002  
 [AD-741883] p0527 N72-29002

**WING PLANFORMS**

NT ARROW WINGS  
 NT DELTA WINGS  
 NT INFINITE SPAN WINGS  
 NT SWEEPBACK WINGS  
 NT VARIABLE SWEEP WINGS

# SUBJECT INDEX

# WING TIPS

- Wave drag reduction by antisymmetric wing and body arrangement, discussing application to transport aircraft at supersonic speeds p0122 A72-16534
- Concorde aerodynamic configuration R and D, discussing wing layout in terms of drag, stability, control and weight distribution characteristics p0181 A72-19057
- Aerodynamic data acquisition with magnetic balance on wind tunnel model delta and AGARD G wing planforms and body of revolution p0243 A72-24770
- Supersonic aerodynamic influence coefficients matrices calculation for wings of arbitrary planform, constructing computer program p0314 A72-28142
- Vortex induced wing loads p0450 A72-35257
- Computation of transonic flow about finite lifting wings p0450 A72-35258
- Triangular and conical wings in hypersonic flow with Mach reflection of shock waves from leading edge with optimal L/D ratio p0460 A72-36893
- Downwash distribution at surface of rectangular planform wings with prescribed subsonic aerodynamic loading for various aspect ratios p0503 A72-38809
- Investigation of the interaction between a circular wing and a flow of ideal liquid p0598 A72-43796
- Low speed wind tunnel longitudinal stability tests on cambered wings of mild gothic planform of 1/4 aspect ratio [ARC-CP-1163] p0081 A72-11907
- Lift increase of small span-chord ratio wings with lateral fluid jets directed along span [AD-733858] p0267 A72-19010
- Laboratory simulation of Mach 3 cruise heating on wing structure representative of X-15 aircraft for flight loads measurement [NASA-TN-D-6749] p0283 A72-19922
- Waverider prediction of hypersonic behavior of wing planforms p0617 A72-31997
- Momentum theory for optimum design of wing surfaces p0618 A72-31999
- ## WING PROFILES
- ### NT WING SPAN
- Velocity field of sonic flow about aircraft wing profile, solving mixed Cauchy problem p0013 A72-11178
- Elliptic wing-vortex interaction for various aspect ratios p0123 A72-16542
- Laminar/turbulent boundary layer transition on parabolic wing profile in supersonic wind tunnel, noting critical Reynolds number increase with leading edge thickness p0227 A72-22407
- Supercritical thick wing for structural weight reduction and increased cruise speeds flight tested on Navy T2-C aircraft [SAE-PAPER 720320] p0290 A72-25583
- Book of aircraft design illustrations covering three view and perspective form low drag airfoil, aspect ratio, plain split, slotted and multiple flaps p0361 A72-30776
- Hodographic equations solution containing critical point for compressible fluid two dimensional flow, noting calculation of wing profiles and turbine engine cascades [ONERA, TP No. 1048] p0362 A72-30841
- Vortex sheet simulation method for slender wing-canard surface nonlinear interaction investigation p0413 A72-33695
- Unified area rule for hypersonic and supersonic wing-bodies p0450 A72-35251
- Calculation of an unsteady separation flow past a slender profile p0460 A72-36900
- Supersonic aircraft wing form influence on sonic boom, discussing supersonic wind tunnel tests for noise reduction p0509 A72-39931
- Transonic wind tunnel determination of blunt trailing edge effects on drag and lift characteristics of wing profile p0074 A72-11862
- Low speed wind tunnel measurements of lift and pitching moments of NACA 0012 rotary wing profiles including measurements during pitching oscillations at stall [ARC-CP-1145] p0080 A72-11903
- Transonic wind tunnel tests on three dimensional flow distribution during stall development on rotary wing profiles [ARC-CP-1146] p0080 A72-11904
- Transonic potential flow around quasi-elliptic wing profile: noting shockless compression [REPT-10/1971] p0317 A72-19996
- Supersonic wind tunnel extension for transonic profile measurements [DLR-MITT-72-02] p0468 A72-26213
- Numerical computation of transonic flow around leading edge of wing profile [NASA-TT-F-14285] p0618 A72-32010
- ## WING ROOTS
- Initial dihedral wing-body interaction for supersonic leading edges, determining expansion of velocity potential on root chord p0360 A72-30365
- ## WING SLATS
- ### U LEADING EDGE SLATS
- ## WING SLOTS
- Wind tunnel investigation of unswept rectangular wing with externally blown single slotted flap, determining optimum slot width as function of momentum coefficient and flap deflection p0070 A72-15461
- Two-dimensional flow around sweptback wing slotted flap [ARC-R/M-3681] p0527 A72-28996
- Flow characteristics about uncambered, slender delta wing at 15 deg incidence with high energy blowing from leading edge slots [CRANFIELD-AERO-9] p0635 A72-32992
- ## WING SPAN
- Flat plate wing autorotation experiments about spanwise axis in low speed wind tunnel p0070 A72-15117
- Nonlinear calculation of three dimensional flow of perfect incompressible fluid around wing of finite span with arbitrary form p0071 A72-15558
- Lift and induced drag characteristics of jet flapped finite span wings in close proximity to ground, using method of matched asymptotic expansions p0404 A72-32827
- Evaluation of Reissner's correction for finite span aerodynamic effects p0459 A72-36774
- Optimization of the wing parameters of a glider hovercraft p0509 A72-39902
- Vortex drag factor of untapered swept wing with part span flap, noting spanwise loading [ARC-R/M-3695] p0527 A72-28997
- ## WING STALL
- ### U BOUNDARY LAYER SEPARATION
- ## WING TANKS
- Utilization of wing and empennage volume for aircraft fuel tankage, presenting equations and charts for quick determination of available volume p0299 A72-25811
- ## WING TIPS
- Tip clearance effect on compressor blade aerodynamic characteristics, applying Bolyay analysis to low aspect ratio rectangular wing p0024 A72-12825
- Wing tip shape effects on vortex sheet rolling calculation by Belotserkovskii method p0140 A72-17850
- Natural inertia moment effect of balance weight at wing tip on critical flutter rate p0191 A72-21092
- Blade characteristics of axial flow fan with orifice fan guide investigation by theoretical model with flat plate parallel to wing tip surface p0397 A72-32142
- Effect of several wing tip modifications on a trailing vortex.

p0594 A72-43334  
Effect of wing tip shape on vortex sheet rolling  
up applied to study of straight or moderately  
sweptback wings  
[NASA-TT-F-14111]  
Radial vane array for controlling wing tip vortices  
[ATN-7102]  
Linearized solution for flow separation near tip  
and wake edge of lifting wing with trailing edge  
separation  
[AD-734791]  
Wind tunnel analysis of factors affecting wing tip  
vortex  
[NASA-TM-X-2516]  
Numerical analysis of lifting wings with parabolic  
wing tips to determine aerodynamic  
characteristics and stress concentrations  
[AD-741883]  
Aircraft trailing vortex formation and persistence  
behind large transport aircraft  
[NASA-TM-X-68566]  
Computer program to analyze wing tip vortex as  
function of wing tip shape  
[NASA-TT-F-14538]  
Numerical analysis of axial velocity of wing tip  
vortex and comparison with free stream velocity  
[AD-742311]

## WING-FUSELAGE STORES

Wind tunnel model instrumentation and captive  
trajectory facilities for aircraft stability,  
control and metric wing-pylon store tests for  
performance and structural predictions  
p0053 A72-12921  
Wind tunnel aerodynamic characteristics of V/STOL  
transport model with outboard pod mounted front  
fans and rear fans located in wing-fuselage  
junction  
[NASA-TM-X-62102]  
WINGED ROCKET BOOSTERS  
U WINGED VEHICLES  
WINGED VEHICLES  
Ground effect wing vehicles stability in forward  
motion, deriving characteristic equations by  
linear analysis  
p0249 N72-17987  
p0244 A72-24844

## WINGED ROCKET BOOSTERS

Difference equations and relaxation method for  
three dimensional transonic flow field about  
wings in terms of velocity potential  
[AIAA PAPER 72-189]  
Incipient wing stall detection by unsteady  
pressure monitoring via flush-mounted  
microphones, discussing flow patterns on models  
p0182 A72-19093

Jet-STOL augmentor wing consisting of moderately  
thick airfoil with full span leading edge slat  
and double surface trailing edge flap  
p0197 A72-21899

Wing structural weight estimation for civil  
aircraft preliminary deriving generalized  
formula based on wing root bending moment for  
specified flight condition

p0232 A72-22909  
Automated optimization for preliminary design of  
supersonic aircraft wings, noting flutter,  
stresses and resonant frequency as dynamic  
constraints  
[AIAA PAPER 72-333]  
Unsteady aerodynamic loadings of flexible aircraft  
with nonplanar wings and wing-tail surfaces in  
supersonic flow  
[AIAA PAPER 72-378]  
Shot peen contouring of Boeing 747 wing skins  
combined with incremental chip forming, noting  
principles and manufacturing process  
[ASM PAPER W 72-31,4]  
DC 10 aircraft wing stringers: fabrication and  
processing, discussing stress relieving and  
stretch form contouring techniques, aging and  
tempering processes and flaw detection  
[ASM PAPER W 72-31,3]  
Airframe and wing fatigue life testing, discussing  
results recomputation for changed operating  
conditions

p0358 A72-30276  
Temperature dependent elastoplastic wing  
assemblies and continua analysis via matrix  
displacement method

p0413 A72-33791  
Influence of wing deformations measured during  
flight tests upon the flight performance of a  
glider made of synthetic materials. I

p0603 A72-44452  
Multipropeller slipstream and wing interference,  
noting lift, drag, pitching moment, normal force  
distribution, and wakes

p0029 N72-10015  
Analytical method for determining three  
dimensional vortex interaction effects on  
aerodynamic properties of wing and aircraft  
configurations  
[NASA-TT-F-14074]

p0100 N72-12982  
Prediction of high lift wing characteristics in  
relation to detachment phenomena  
[NASA-TT-F-14073]

p0100 N72-12983  
Destructive crack propagation and fatigue tests on  
C-130 aircraft center wings  
[NASA-CR-112008]

p0112 N72-13884  
Extension of Gersten nonlinear wing theory to  
transonic flow  
[BHV-G-PWT-71-21]  
Forebody and forebody/wing configuration data for  
supersonic inlet performance and distortion  
during maneuvering flight

p0212 N72-16710  
Dual fuselage aircraft design with yawable wing  
and horizontal stabilizer  
[NASA-CASE-ARC-10470-1]

p0332 N72-21010  
Fatigue crack propagation and static residual  
strength characteristics of fatigue damaged wings  
[NASA-CR-2075]

p0525 N72-28899  
Aerodynamic testing of wing sections, using laser  
Doppler velocimeter and conventional pressure  
measuring techniques  
[AD-740901]

p0577 N72-30418  
WIRE  
NT ELECTRIC WIRE  
NT EXPLODING WIRES

Aerospace wire and cables testing methods  
standards for evaluating mechanical, electrical  
and chemical properties, coating thicknesses,  
continuity flaws, flammability, geometrical  
characteristics, etc  
[SAE AS 1198]

p0008 A72-10384  
Lumped mass model of long airborne trailing wire  
antenna and derivation of equations of motion  
p0217 N72-16899

Fatigue testing of mechanical cables for arresting  
gears  
[AD-733988]  
p0257 N72-18273

## WISCONSIN

Environmental impact survey of airport in Park  
Falls, Wisconsin  
[PB-204025-F]

p0483 N72-27284  
Environmental impact statement on proposed  
development of Neillsville Municipal Airport,  
Neillsville, Wisconsin  
[PB-204576-F]

## WOOD AIRCRAFT CONSTRUCTION

## U AIRCRAFT STRUCTURES

**WORK CAPACITY**

Control technique and flight quality for crew workload reduction to improve military and civil aircraft flight safety

p0059 A72-13640

General aviation type light airplanes pilot workload during steep landing approach, comparing flight tested control response parameters with handling qualities criteria [AIAA PAPER 72-125]

p0132 A72-16941

Ground based ATC information processing systems analysis, considering controllers work load

p0229 A72-22778

Area navigation systems integration into existing ATC and man/machine relationship problems, considering cockpit workload coordination

p0546 A72-40280

An area navigation system for a long range airplane.

p0546 A72-40281

**WORK DECREMENT****U WORK CAPACITY****WORK HARDENING**

Helicopter rotor blade spars shot peening in centrifugal vibrator, optimizing Cr-Mo-Ni steel surfaces work hardening

p0304 A72-26820

**WRAP**

Plywrap process for low cost automated fabrication of fiber reinforced plastic composites, noting applications from missile interstages to modular housing

p0312 A72-28081

**WRECKAGE**

Computerized error function method of wreckage trajectory analysis in aircraft accident investigation, using fundamental equations of motion

p0054 A72-13250

**X****X RAY ANALYSIS**

X ray, ultrasonic and eddy current nondestructive testing of aircraft structure for maintenance and special problems

p0180 A72-18840

**X RAY FLUORESCENCE ANALYSIS****U X RAY ANALYSIS****X RAY INSPECTION**

Application of nondestructive testing procedures to maintenance of large commercial aircraft

p0040 N72-11025

**X RAY PHOTOGRAPHY****U RADIOGRAPHY****X RAY TESTING****U X RAY INSPECTION****X-14 AIRCRAFT**

Model following variable stability system for X-14B VTOL aircraft, discussing hardware design and flight evaluation

[AIAA PAPER 72-96]

p0134 A72-16978

**X-15 AIRCRAFT**

Surface-pressure-fluctuation measurements used for boundary layer transition detection on X-15 vertical fin at peak altitudes of 70,000 meters

[NASA-TN-X-2466]

p0102 N72-12994

Laboratory simulation of Mach 3 cruise heating on wing structure representative of X-15 aircraft for flight loads measurement

[NASA-TN-D-6749]

p0283 N72-19922

**X-22 AIRCRAFT**

Integrated airborne-ground based instrumentation system for variable stability X-22A aircraft flying qualities research, discussing telemetry, mobile van, landing aids and airplane design

p0411 A72-33628

An integrated system of airborne and ground-based instrumentation for flying qualities research with the X-22A airplane.

[AHS PREPRINT 654]

p0444 A72-34486

An experimental investigation of STOL longitudinal flying qualities in the landing approach using the variable stability X-22A aircraft.

[AHS PREPRINT 642]

p0447 A72-34502

**X-24 AIRCRAFT**

Pilot safety considerations in design and operation of X-24A lifting body vehicle

p0439 N72-25969

**YV-4 AIRCRAFT**

Effects of variations in stability derivatives on performance of YV-4 aircraft

[AD-744104]

p0625 N72-32066

**YV-5 AIRCRAFT**

Turboprop lift fan design developed for YV-5 VTOL research aircraft, reviewing changes for future commercial and research transport systems

[ASME PAPER 72-GT-111]

p0299 A72-25674

**Y****YAK 40 AIRCRAFT**

Geometric and aerodynamic characteristics of Yak-40 aircraft

[AD-736902]

p0384 N72-23031

**YARNS**

Webbing joints stitching strain, considering nylon and flax yarns stretching properties and various stitching patterns strengths

p0008 A72-10315

**YAW**

Aircraft pitching and yawing cross couplings compensation at high speed

p0008 A72-10506

Airplane sideslip and yaw rate perturbations by continuous random vertical and side gusts, using low pass filtered white noise representation for mathematical modeling

p0313 A72-28125

Full-scale inlet/engine testing at high

maneuvering angles at transonic velocities.

[AIAA PAPER 72-1026]

p0558 A72-41604

Jet interference effects on yaw stability for SAAB 37 and 105 wind tunnel models

p0027 N72-10006

**YAWING MOMENTS**

Direct side force control by rudder deflection and asymmetrical drag utilization to cancel yawing moment, discussing variable stability T-33 flight tests

[AIAA PAPER 72-94]

p0133 A72-16946

Hovercraft internal and external aerodynamic forces, discussing control, suspension, yawing moments, directional and roll stability and random surfaces performances

p0231 A72-22824

Inflight measurement of yawing moment of inertia of HP-115 aircraft using wing-tip parachutes

[ARC-R/M-3691]

p0585 N72-31025

Aero-normalized yawing moment derivatives

[ESDU-71017]

p0617 N72-31988

Effect of fin and rudder on rolling moments due to sideslip and yawing

[ESDU-70006]

p0617 N72-31992

**YAWMETERS****U ATTITUDE INDICATORS****U YAW****YIELD STRENGTH**

Aircraft gas turbine engine Ni base alloy disks and shafts thermomechanical treatment, considering yield strength and high and low cycle fatigue resistance

p0407 A72-33299

**Z****Z TRANSFORM****U LAPLACE TRANSFORMATION****ZENER DIODES****U AVALANCHE DIODES****ZERO CROSSINGS****U ROOTS OF EQUATIONS****ZERO LIFT**

Experimental results regarding drag in supersonic flow without lift in the case of flight bodies with three in front pointed bodies

[DFVLR-SONDDE-215]

p0503 A72-38686

Approximation for towed unbanked body lateral stability in zero lift conditions

[ARC-R/M-3675]

p0527 N72-28995

**ZERO-ZERO WEATHER****U CEILINGS (METEOROLOGY)****U WEATHER**

# PERSONAL AUTHOR INDEX

AERONAUTICAL ENGINEERING / A Special Bibliography

JANUARY 1973

1972 Cumulative Index

## Typical Personal Author Index Listing

Listings in this index are arranged alphabetically by personal author. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document listed (e.g., NASA report, translation, NASA contractor report). The page and accession numbers are located beneath and to the right of the title, e.g., p0632 N72-32765. Under any one author's name the accession numbers are arranged in sequence with the /AA accession numbers appearing first.

## A

- ABBOTT, F. T.  
On the use of freon-12 for increasing Reynolds number in wind-tunnel testing of three dimensional aircraft models at subcritical and supercritical Mach numbers  
[NASA-TM-X-67417] p0077 N72-11879
- ABBOTT, J. E.  
Aerodynamic and acoustic performance of two choked flow inlets under static conditions  
[NASA-TM-X-2629] p0632 N72-32765
- ABDEL-KAWI, S.  
Aerodynamic data acquisition with the University of Southampton magnetic balance.  
p0243 A72-24770
- ABDELHAHID, A. E.  
Unsteady forces and noise from fan-in wing model in cross flow.  
[ASME PAPER 72-GT-92] p0298 A72-25666
- ABDELWAHAB, E.  
Experimental evaluation of a TF30-P-3 turbofan engine in an altitude facility: Afterburner performance and engine-afterburner operating limits  
[NASA-TN-D-6839] p0477 N72-27014
- ABEL, I.  
A wind-tunnel evaluation of analytical techniques for predicting static stability and control characteristics of flexible aircraft  
[NASA-TN-D-6656] p0266 N72-19001
- ABELSHAUSER, L.  
Near misses - A critical discussion on an important topic  
p0233 A72-22972
- ABERNATHY, F. A.  
An estimate of the power required to eliminate trailing vortices by suction  
[IDA-LOG-HQ-69-10164] p0337 N72-21290
- ABRAHAM, R.  
Flight safety by means of redundancy  
p0452 A72-35476
- ABRALOV, M. A.  
Microplasma welding of Kh18N10T steel casings  
p0228 A72-22548
- ABRANOWITZ, P. E.  
Principles of incremental forging, phase 2  
[AD-729012] p0110 N72-13434
- ABROL, R. E.  
Problems of aircraft electrical power systems.  
p0344 A72-28693
- ACH, J. T.  
Inflight vibration and noise study of three

- helicopters  
p0215 N72-16823
- ACKERMAN, G. H.  
Cooling of advanced engines by endothermic reactions of hydrocarbon fuels  
p0047 N72-11672
- ACKLAN, D. J.  
Flight simulator as a design tool.  
p0142 A72-18245
- ADANCZYK, J. J.  
Passage of an airfoil through a three-dimensional disturbance  
p0463 N72-25994
- ADAMS, D. F.  
Airframe structural materials for drone applications  
[AD-736616] p0369 N72-22034
- ADAMS, E.  
Steady laminar hypersonic boundary layers past an axisymmetric hyperboloid at thermochemical equilibrium  
[DLR-PB-72-16] p0519 N72-28280
- ADAMS, F. D.  
A technique for measuring in-plane displacements by holographic interferometry  
[AD-744490] p0629 N72-32483
- ADAMS, G. D.  
Evaluation of STOL instrument landing system (TALAR 4)  
[FAA-RD-72-15] p0326 N72-20587
- ADAMS, G. D.  
Evaluation of STOL modular instrument landing system (MODILS)  
[FAA-NA-72-11] p0436 N72-25605
- ADAMS, H. W.  
Maintenance fault isolation in the seventies  
p0040 N72-11027
- ADAMS, J. E.  
The impact of the Air Transport Association of America /ATA/ collision avoidance system on the 1600 MHz aeronavigation band.  
p0550 A72-40881
- ADAMS, J. J.  
An analysis of aircraft lateral-directional handling qualities using pilot models.  
[AIAA PAPER 72-962] p0561 A72-42347
- ADAMS, R.  
Wind-tunnel simulation of store jettison with the aid of magnetic artificial gravity  
[NASA-CR-1955] p0266 N72-19000
- ADAMS, W. E.  
Study of the application of advanced technologies to long-range transport aircraft. Volume 2: Research and development requirements  
[NASA-CR-112089] p0514 N72-28003
- ADAMS, W. E., JR.  
Analytic prediction of aircraft spin characteristics and analysis of spin recovery.  
[AIAA PAPER 72-985] p0561 A72-42329
- ADAMSON, G. P.  
Jet engine test facilities - Laboratories for tomorrow's engines.  
[ASME PAPER 71-WA/GT-12] p0117 A72-15904
- Modular design concept improves jet engine maintainability  
p0040 N72-11030
- ADCOCK, J. B.  
Supersonic aerodynamic damping and oscillatory stability in pitch and yaw from a model of a variable-sweep fighter airplane with twin vertical tails  
[NASA-TM-X-2555] p0369 N72-22027
- ADDIS, L.  
The electroluminescent lighting research program  
p0376 N72-22644
- ADDY, A. L.  
Correlation of experimental aerodynamic

- coefficients on the basis of curve fitting in the three-dimensional Cartesian alpha, C sub N, C sub m space  
[AD-732834] p0218 N72-17001
- ADE, P. A. R.  
High resolution observations of the submillimetre stratospheric emission spectrum. p0245 A72-25023
- ADEY, A. W.  
Microwave radiometry for surveillance from spacecraft and aircraft p0520 N72-28471
- ADOLPH, C. F.  
Criteria trends obtained from analysis of current aircraft p0620 N72-32025
- AGIN, N. I.  
An algorithm for optimal aircraft scheduling. p0604 A72-44582
- AGUILAR, P. T.  
Dynamic and crashworthy evaluation of the UH-1B, C, D, H, medical attendant's seat  
[AD-737197] p0370 N72-22040
- AHMAD, I.  
Metal matrix composites for high temperature application  
[AD-734304] p0279 N72-19647
- AIBA, T.  
Investigation of the air stream from air-entry holes of the aeronautical gas turbine combustor. p0122 A72-16493  
Investigation of air stream from combustor liner air entry holes. 2: Experiments with paired air entry holes and a numerical analysis  
[NAL-TR-227] p0258 N72-18279
- AIKEN, T. H.  
Full-scale wind-tunnel tests of a small unpowered jet aircraft with a T-tail  
[NASA-TN-D-6573] p0030 N72-10031  
Large scale wind tunnel investigation of a semispan wing equipped with an externally-blown jet flap  
[NASA-TN-X-62079] p0080 N72-11902
- AIRD, R. J.  
The optimisation of undercarriage suspension characteristics by a deterministic method. p0235 A72-23458
- AKAMATSU, Y.  
Calculation, by the potential method, of unsteady forces acting on an assembly of lifting surfaces p0057 A72-13541
- AKHMADULIN, R. N.  
Optimization of the wing parameters of a glider hovercraft p0509 A72-39902
- AKSENOV, A. P.  
Certain features of the metal friction process in an aviation-fuel environment p0315 A72-28183  
Effect of the chemical composition of jet fuels on their antiwear properties p0350 A72-29073  
Effect of some types of aviation fuels on the endurance of steel 45 p0354 A72-29487  
Influence of test time and contact stresses on antiwear properties of jet fuels under rolling friction  
[AD-738883] p0471 N72-26471
- ALABIN, N. A.  
Starting of aircraft gas turbine engines  
[AD-740291] p0538 N72-29812
- ALBER, F.  
The rocket pioneer Friedrich Wilhelm Sander p0525 N72-28966
- ALBERS, J. A.  
Analysis of the effect of engine characteristics on the external aerodynamics of STOL wing propulsion systems  
[NASA-TN-X-2541] p0378 N72-22795  
Two-dimensional potential flow and boundary layer analysis of the airfoil of a STOL wing propulsion system p0483 N72-27286  
Predicted upwash angles at engine inlets for STOL aircraft  
[NASA-TN-X-2593] p0487 N72-27817
- ALBERTI, J. P.  
Oil-starvation test program: Evaluation of VASCO-X2 steel spiral bevel gears  
[AD-744506] p0645 N72-33506
- ALCOCK, R. N.  
Design and evaluation of a helicopter guidance aid p0085 N72-11936
- ALDRICH, G. T.  
A versatile Kalman technique for aircraft or missile state estimation and error analysis using radar tracking data.  
[AIAA PAPER 72-838] p0505 A72-39089
- ALEKSANDROV, V. G.  
Handbook of aircraft materials p0548 A72-40459
- ALESI, P.  
On high turbine entry temperatures in turbojets and gas turbines p0187 A72-20311
- ALEXANDER, A. D., III  
Economic study of future aircraft fuels (1970-2000)  
[NASA-TN-X-62180] p0631 N72-32742
- ALEXANDER, B.  
General aviation and air traffic control long range planning. p0066 A72-14818
- ALEXANDER, D.  
Data acquisition system for operational earth observation missions  
[NASA-TN-X-62107] p0257 N72-18199
- ALEXANDER, J. C.  
Projected map navigation in military helicopters: Applications and operational experience p0085 N72-11938
- ALEXANDER, W. T.  
Dynamic response of the OV-1A aircraft to soft field landings  
[AD-737752] p0422 N72-24030
- ALFARO-BOU, E.  
Ballstone impact simulator.  
[AIAA PAPER 72-163] p0134 A72-16957
- ALFORD, W. J., JR.  
Advanced subsonic transport technology. p0491 A72-37677  
Subsonic-transonic transport aircraft projections p0105 N72-13017
- ALGER, R. S.  
Aircraft ground fire suppression and rescue systems: Basic relationships in military fires  
[AD-745122] p0643 N72-33255
- ALLEGRE, J.  
Rarefied hypersonic flow characteristics of delta wings and trailing edge spoilers. p0450 A72-35229  
Delta wings, with or without trailing edge flap, in a rarefied hypersonic gas flow  
[REPT-71-2] p0149 N72-13980
- ALLEN, A.  
A precision secondary radar. p0547 A72-40289
- ALLEN, F. C.  
Development of a graphite horizontal stabilizer  
[AD-729050] p0107 N72-13039
- ALLEN, J. B.  
Parallel approach surveillance  
[ATC-13] p0578 N72-30587
- ALLEN, L. J.  
The lightning arrestor-connector - A new concept in system electrical protection. p0504 A72-38989
- ALLEN, H.  
Level 12 NASTRAN experiences at General Dynamics, Convair Aerospace Division, Fort Worth Operations p0632 N72-32882
- ALLEN, R.  
Water-based airports. p0126 A72-16695  
Aspects of structural safety in general aviation airplanes.  
[SAE PAPER 720308] p0289 A72-25572
- ALLEN, R. E.  
Design, fabrication and testing of two electrohydraulic vibration isolation systems for helicopter environments  
[NASA-CR-112052] p0368 N72-22022
- ALLEN, R. W.  
Research and development programs  
[AD-726202] p0094 N72-12448  
Pilot experiments for a theory of integrated display format  
[AD-742127] p0532 N72-29031

- ALLEN, T. H.  
Aeronautical reviews: Grades of decompression sickness in unpressurized aircraft  
[AD-731118] p0273 N72-19106

The structure of jet turbulence producing jet noise.  
[AIAA PAPER 72-158] p0180 A72-18957
- The structure of jet turbulence producing jet noise.  
[NASA-CR-126483] p0171 N72-15625
- AMBROSIANI, J. P.  
Analysis of a circulation controlled elliptical airfoil  
p0430 N72-24989
- ANDERS, S.  
Calculation of body interference loads for wing-body combinations at Mach numbers 1.59 to 7.15 with supersonic linear theory, part 1  
[FFA-AU-635-PT-1] p0317 N72-19995
- Calculation of pressure distributions for an airfoil in subcritical flow including the effect of the boundary layer  
[FFA-AU-901] p0463 N72-26001
- ANDERSEN, L. O.  
The use of a powered model for subsonic nacelle optimization.  
[ASME PAPER 72-GT-14] p0293 A72-25613
- ANDERSON, B. H.  
Factors which influence the analysis and design of ejector nozzles  
[NASA-TN-X-67976] p0158 N72-14301
- ANDERSON, C. A.  
A stall inhibitor system for the F-111.  
p0454 A72-35577
- ANDERSON, C. F.  
Use of fixed and moving base flight simulators for the aerodynamic design and development of the S-3A airplane.  
[AIAA PAPER 72-764] p0510 A72-40052
- ANDERSON, D.  
Numerical solution of flowfields behind rectangular wings  
[NASA-CR-126214] p0365 N72-21998
- ANDERSON, D. C.  
Maneuver load control and relaxed static stability applied to a contemporary fighter aircraft.  
[AIAA PAPER 72-870] p0506 A72-39129
- ANDERSON, E. W.  
Information theory approaches to navigation. I - A prospect of navigation.  
p0350 A72-29013
- ANDERSON, G. H.  
Optimal thrust reversing in pursuit evasion games between two aircraft.  
p0183 A72-19282
- A near optimal closed-loop control law for a class of aircraft/aircraft pursuit-evasion differential games.  
p0236 A72-23805
- The dynamic modeling technique for obtaining closed-loop control laws for aircraft/aircraft pursuit-evasion problems.  
p0502 A72-38276
- ANDERSON, J. L.  
A nuclear powered air cushion freighter for the 1980's.  
p0062 A72-14431
- Creating new cities through the large air-cushion vehicle.  
p0115 A72-15776
- ANDERSON, M. S.  
Structures technology for hypersonic vehicles  
p0103 N72-13004
- ANDERSON, P. A.  
Investigation of display requirements for helicopter IFR manual formation flight under various operational and environmental conditions  
[AD-725209] p0031 N72-10044
- IFR manual formation flight: Display evaluation and investigation of skill acquisition and system failures  
[AD-737313] p0385 N72-23041
- Display and system requirements for low-visibility formation flight: Summary of results  
[AD-740375] p0532 N72-29220
- ANDERSON, R.  
A cockpit simulator for air traffic control research.  
p0187 A72-20336
- ANDERSON, R. O.  
Optimal selection of stability augmentation parameters for excellent pilot acceptance.  
p0501 A72-38227
- Theoretical pilot rating predictions  
p0621 N72-32036
- ANDERSON, S. B.  
Revisions to V/STOL handling qualities criteria of AGARD report 408  
p0620 N72-32021
- ANDERSON, W. E.  
Engineering utility and significance of stress corrosion cracking data  
p0341 N72-21901

# Corporate Source Index

AERONAUTICAL ENGINEERING / A Special Bibliography

JANUARY 1973

1972 Cumulative Index

## Typical Corporate Source Index Listing

The title of the document is used to provide a brief description of the subject matter. The page number and NASA or AIAA accession number are included in each entry to assist the user in locating the abstract in the abstract section of an individual supplement of *Aeronautical Engineering*. If applicable, a report number is also included as an aid in identifying the document.

## A

- AAI CORP., COCKEYSVILLE, MD.**  
Low altitude airdrop system investigation employing inflation-aided recovery parachutes for extraction  
[AD-735375] p0332 N72-21013

## FEDERAL AVIATION AGENCY,

## CORPORATE SOURCE INDEX

Potential economic benefits of fog dispersal in the terminal area. Part 1: Estimating procedure [AD-735132] p0280 N72-19722

Washington National and Dulles International Airport forecasts, fiscal years 1972 - 1983 p0283 N72-19975

Review of aviation activity in 1971 and the outlook for 1972 [REPT-72-00207] p0320 N72-20020

The benefits of the use of shoulder harnesses in general aviation aircraft [FAA-AM-72-3] p0335 N72-21077

Effectiveness of restraint equipment in enclosed areas [FAA-AM-72-6] p0335 N72-21078

Air traffic patterns for IFR and VFR aviation, calendar year 1970 [AD-735970] p0339 N72-21641

Measurement of runway friction: Airplane/DBV/MU-Meter correlation tests [PS-160-65-68-4] p0371 N72-22248

Potential economic benefits of fog dispersal in the terminal area. Part 2: Findings [AD-735214] p0372 N72-22603

IFR aircraft handled forecast by air route traffic control center, 1972-1983 [REPT-72-00186] p0376 N72-22646

Potential foreign market for the sale of surplus US jet transports [REPT-72-00185] p0378 N72-22968

Engineering and development program: Goals, achievements, trends p0391 N72-23980

Aviation forecasts: Fiscal years 1972 - 1983 [AD-738360] p0423 N72-24034

Siting criteria for instrument landing systems [DOT-FAA-6750.16] p0423 N72-24338

Operations under the Airport and Airway Development Act [AD-737040] p0424 N72-24352

The national aviation system policy summary [REPT-1000.27-APP-1] p0438 N72-25949

The national aviation system plan 1973-1982 [REPT-1000.27-APP-2] p0438 N72-25950

Simulation of terminal control corridor, Boston, Massachusetts [AD-739130] p0472 N72-26526

Aircraft noise standards and regulations [FAA-RD-71-24] p0514 N72-28005

Test and evaluation of ARTCC air/ground channels at long range radar sites p0517 N72-28177

Airport ranking of air carrier passenger enplanements fiscal year 1971 p0526 N72-28981

Passenger utilization of FAA facilities [AV-72-1] p0526 N72-28982

A selected, annotated bibliography related to aviation's responses toward improving the environment [GA-300-89] p0526 N72-28986

Application of SSB techniques to A/G communications p0532 N72-29119

FAA flying qualities requirements p0619 N72-32020

Report on live test of a cathode-ray tube (CRT) terminal as an M-28 teletype replacement [AT-7330-OT] p0626 N72-32183

Manti-Ephraim Airport, project 72-1-07-49-0018-01, Ephraim, Utah [PB-207064-F] p0626 N72-32270

Baxley Municipal Airport, Baxley, Georgia [PB-206167-F] p0626 N72-32271

Dade County Airport, Trenton, Georgia [PB-205578-F] p0627 N72-32272

[AD-728042] p0091 N72-11976

Integrated engine instrumentation system study:  
Selected studies on energy management  
[AD-731713] p0208 N72-16315

Three-axis fluidic stability augmentation system  
[AD-734343] p0271 N72-19043

VP optimum flight path  
[AD-734167] p0272 N72-19046

Design implications of a better view of the  
multichannel capacity of a pilot  
p0374 N72-22626

Flight calibration tests of F-8 aircraft for  
optimal energy climbs  
[AD-738018] p0423 N72-24035

A three-axis fluidic stability augmentation system  
[AD-739559] p0481 N72-27045

Advanced carrier-based air traffic control  
[AD-739713] p0486 N72-27713

Design method for fully augmented systems for  
variable flight conditions  
[AD-744491] p0626 N72-32068

Conceptual study to apply advanced flight  
control technology to the coin or trim aircraft  
[AD-730571] p0168 N72-15019

IRF steep angle approach: Effects of wind,  
system data rate, and contingency event  
variables  
[AD-734702] p0272 N72-19051

Display and related system requirements for IFR  
steep approach  
[AD-736247] p0370 N72-22038

IFR manual formation flight: Display evaluation  
and investigation of skill acquisition and  
system failures  
[AD-737313] p0385 N72-23041

Feasibility study of a bidirectional jet flap  
device for application to helicopter rotor  
blades. Phase 2: Lift controller development  
[NASA-TM-X-62152] p0464 N72-26010

Display and system requirements for  
low-visibility formation flight; Summary of  
results  
[AD-740375] p0532 N72-29220

HUGHES AIRCRAFT CO., CULVER CITY, CALIF.  
Guidance and control computer actuated display  
system techniques  
p0336 N72-21221

Development of composite constructions with  
improved rain erosion resistance  
[AD-738079] p0426 N72-24616

Aircraft structural electrical bonding and  
grounding including lightning effects and  
electrostatic charge buildup on missiles and  
space vehicles  
[AD-739356] p0480 N72-27037

Security of the TACC data base study  
(Description of automatic data base security  
techniques)  
[AD-735728] p0336 N72-21234

Analysis of data base security and access  
limitation requirements for the post 1975  
automated TACC complex: Tabulation of TACC  
secure data  
[AD-735729] p0337 N72-21235

HUGHES TOOL CO., CULVER CITY, CALIF.  
Designing helicopters for improved crash  
survivability  
p0274 N72-19141

A performance application study of a jet-flap  
helicopter rotor  
[NASA-CR-112030] p0513 N72-28002

HUMAN ENGINEERING LABS., ABERDEEN PROVING GROUND, MD.  
Baseline noise measurements of the OH-58A  
helicopter  
[AD-731467] p0206 N72-15985

What color display element  
p0373 N72-22624

## CORPORATE SOURCE INDEX

## JOINT PUBLICATIONS RESEARCH SERVICE,

## HYDRONAUTICS, INC., LAUREL, MD.

- On the aerodynamics of wake vortices  
[AD-744860] p0636 N72-32998
- HYDROSPACE RESEARCH CORP., SAN DIEGO, CALIF.  
Noise reductions achieved on a 720-023B aircraft  
using a two-segment approach  
[NASA-CR-114417] p0250 N72-18001
- Measurement and analysis of noise from four  
aircraft in level flight (727, KC-135,  
707-320B and DC-9)  
[AD-739870] p0482 N72-27050
- Noise measurements obtained during visual  
approach monitor evaluation in 747 aircraft  
[NASA-CR-114478] p0515 N72-28010

## ILLINOIS INST. OF TECH., CHICAGO.

- Visualization of unsteady flow over oscillating  
airfoils  
[AD-738304] p0434 N72-25320
- ILLINOIS UNIV., CHICAGO.  
Principles of incremental forging, phase 2  
[AD-729012] p0110 N72-13434
- A flight dynamics evaluation of a Singer-Link  
GAT-2 as a quasi-simulator with control  
modifications  
[AD-731135] p0169 N72-15252
- The frequency separated display principle, phase 3  
[AD-735915] p0334 N72-21027
- Theoretical determination of the pressure  
distribution on a lifting, subsonic delta wing  
of arbitrary aspect ratio  
p0379 N72-22992
- Response of flight vehicles to nonstationary  
random atmospheric turbulence  
p0381 N72-23006

IMPERIAL COLL. OF SCIENCE AND TECHNOLOGY, LONDON  
(ENGLAND).

- Transmission of low frequency jet pipe sound  
through a nozzle flow  
[JEFN/69] p0034 N72-10252
- Jet noise at very low and very high speed  
p0034 N72-10253
- A three component gun tunnel balance designed  
for testing thin delta wings  
[ARC-R/M-3664] p0046 N72-11375
- Gun tunnel force measurements on some thin delta  
wings suitable for hypersonic cruising flight  
[ARC-CP-1148] p0080 N72-11905
- A computer program for the calculation of  
boundary layer development  
[IC-AERO-71-24] p0158 N72-14308
- Two more wind tunnels driven by aerofoil-type  
centrifugal blowers  
[IC-AERO-72-10] p0468 N72-26208

## INSTITUT D'AERONOMIE SPATIALE DE BELGIQUE, BRUSSELS.

- Nitrous oxide in the stratosphere  
[A-N-90-1971] p0159 N72-14382
- The production of nitric oxide in the  
stratosphere by oxidations of nitrous oxide  
[BEPT-101] p0469 N72-26287

## INSTITUT FRANCAIS DE PETROLE, GRENOBLE (FRANCE).

- Synthesis and properties of esters of  
tetramethyl-2,2,7,7 octane diol-1,8  
p0050 N72-11696

INSTITUT FRANCO-ALLEMAND DE RECHERCHES, ST. LOUIS  
(FRANCE).

- Aircraft boom distribution during supersonic  
flight in quiet atmosphere. Part 2:  
Horizontal turn at constant velocity  
[ISL-12/70] p0081 N72-11914
- Survey of the activities of the Institut  
Franco-Allemand de Recherches in the field of  
aeronautics  
[ISL-32/71] p0587 N72-31292

## INSTITUTE FOR DEFENSE ANALYSES, ARLINGTON, VA.

- Cost growth and productivity in European  
aerospace development programs  
[AD-725478] p0037 N72-10992
- An estimate of the power required to eliminate  
trailing vortices by suction  
[IDA-LOG-HQ-69-10164] p0337 N72-21290

INSTITUTE FOR TELECOMMUNICATION SCIENCES, BOULDER,  
COLO.

- Interference predictions for VHF/UHF air  
navigation aids (supplement to IER 26-ITSA 26  
and ERL 138-ITS 95)  
[AD-718465] p0171 N72-15598

INSTITUTE OF AVIATION MEDICINE, FUERSTENFELDBRUCH  
(WEST GERMANY).

- Aircraft accident injuries and aircraft accident  
reconstruction  
p0273 N72-19123

INSTRUMENT PILOT INSTRUCTOR SCHOOL, RANDOLPH AFB,  
TEX.

- Evaluation of modification proposal to increase  
ADI and HSI lighting on T-38 aircraft  
[AD-737121] p0385 N72-23043
- Crew duties, mode and function study  
[AD-740502] p0529 N72-29014
- INTERAGENCY COMMITTEE ON TRANSPORTATION SECURITY,  
WASHINGTON, D.C.  
Cargo security equipment applications guide  
p0526 N72-28985

INTERMOUNTAIN FOREST AND RANGE EXPERIMENT STATION,  
MISSOULA, MONT.

- Airborne infrared forest fire detection system  
[AD-726953] p0034 N72-10396

INTERNATIONAL BUSINESS MACHINES CORP.,  
GAITHERSBURG, MD.

tactical aircraft  
p0336 N72-21227

Range-Only Multiple Aircraft Navigation System  
(ROMANS)

- [AD-738696] p0472 N72-26527

A technique for the solution of massive set  
covering problems, with application to airline  
crew scheduling

- [TR-320-3004] p0321 N72-20099

Airline crew scheduling: The non-mathematical  
problem

- [TR-320-3006] p0322 N72-20100

## IOWA STATE UNIV. OF SCIENCE AND TECHNOLOGY, AMES.

- Numerical solution of flowfields behind  
rectangular wings  
[NASA-CR-126214] p0365 N72-21998

ISRAEL PROGRAM FOR SCIENTIFIC TRANSLATIONS, LTD.,  
JERUSALEM.

- New variational methods in flight dynamics.  
[NASA-TT-P-657] p0170 N72-15560

## ITT AVIONICS, NUTLEY, N.J.

- Computers for Loran C/D and Omega navigation and  
guidance systems  
p0336 N72-21225

## JAPAN BROADCASTING CORP., TOKYO.

- The NHK helicopter color camera  
[NHK-LABS-NOTE-142] p0109 N72-13360

## JET PROPULSION LAB., CALIF. INST. OF TECH., PASADENA.

- An anechoic chamber facility for investigating  
aerodynamic noise  
[NASA-CR-128038] p0576 N72-30249

## JOINT PUBLICATIONS RESEARCH SERVICE, ARLINGTON, VA.

- Some characteristics of the hydrodynamics of an  
engine of the flapping wing type  
p0423 N72-24118

Investigation of the influence of oxidation  
resistant coatings on the fatigue strength of  
heat resistant alloy

- [JPRS-55972] p0426 N72-24608

Investigation of failure of gas turbine vanes  
under influence of thermal cycles

- p0428 N72-24815

Statistical evaluation of characteristics of  
heat-resistant materials for gas turbine engines

- [JPRS-56002] p0428 N72-24824

## Increase in reliability of gas turbine engines

- [JPRS-55987] p0428 N72-24825

Fatigue strength of models of gas turbine vanes  
during programmed temperature change  
approximating the optional change

- p0428 N72-24826

Investigation of the condition of turbine disc  
material after operation

- p0428 N72-24827

Geographical limitations of an approximate  
compensation of airplane magnetic fields

- p0434 N72-25435

## The "eyes" of an airport

- [JPRS-56463] p0486 N72-27705

Ensuring reliable performance of aircraft engine  
parts

[JPRS-56674] p0538 N72-29809  
Solution of the problem of an airfoil of  
arbitrary plan configuration moving near a  
ground-effect surface  
[JPRS-56629] p0571 N72-29996  
Aviation gas-turbine engines in power engineering

## CORPORATE SOURCE-INDEX

## NATIONAL AERONAUTICS AND SPACE ADMINISTRATION.

The study of distributive parameter systems for flight control  
[AD-741920] p0573 N72-30017

Study of parachute forces and canopy pressure distribution measured in a subsonic wind tunnel under infinite mass conditions  
[AD-744103] p0625 N72-32063

MISSISSIPPI STATE UNIV., STATE COLLEGE.  
A catalogue of devices applicable to the measurement of boundary layers and wakes on flight vehicles  
[NASA-CR-116776] p0258 N72-18424

MISSOURI UNIV., ROLLA.  
Optimal braking studies  
[NASA-CR-123817] p0587 N72-31279

MITRE CORP., BEDFORD, MASS.  
A summary of spectrum utilization and a frequency allocation plan for the integrated Communications Navigation Identification (CNI) system  
[AD-731751] p0207 N72-16138

Models of information exchange and data rates for a post-1975 automated tactical air control system deployment  
[AD-733584] p0262 N72-18665

Tactical AWACS measures of effectiveness  
[AD-742233] p0575 N72-30168

A survey of propulsion systems for low emission urban vehicles  
[PB-200144] p0036 N72-10830

Cost analysis of the microwave landing system program  
[AD-737036] p0389 N72-23668

Concepts, design and description for the upgraded third generation air traffic control system, as of January 1972. CONUS ATC system. Oceanic ATC system  
[AD-743635] p0630 N72-32645

MOBIL RESEARCH AND DEVELOPMENT CORP., PAULSBORO, N.J.  
Microfog lubricant application system for advanced turbine engine components, phase 2. Tasks 3, 4 and 5: Wettability and heat transfer of microfog jets impinging on a heated rotating disc, and evaluation of reclassifying nozzles and a vortex mist generator  
[NASA-CR-120843] p0535 N72-29533

MONSANTO RESEARCH CORP., DAYTON, OHIO.  
A thermoplastic transparent adhesive for bonding polycarbonate to glass  
[AD-728174] p0094 N72-12520

Environmental degradation of fuels, fluids, and related materials  
[AD-736839] p0389 N72-23805

MONTECATINI EDISON S.P.A., MILAN (ITALY).  
Integrated check-out system for space launchers and aircraft systems  
p0278 N72-19489

MOTOREN-UND TURBINEN-UNION MUENCHEN G.M.B.H. (WEST GERMANY).  
Aerodynamics of thrust reverser design  
p0210 N72-16695

Environmental effects of turbojet engines  
p0270 N72-19030

MOTOROLA, INC., SCOTTSDALE, ARIZ.  
A true 3D or flat 2D display  
p0375 N72-22640

MULLARD RADIO VALVE CO., LTD., RED HILL (ENGLAND).  
Design and evaluation of a helicopter guidance aid  
p0085 N72-11936

Wind tunnel tests to determine the instationary aerodynamic derivatives on a model of a twin bridge  
p0470 N72-26347

NATIONAL AERONAUTICAL ESTABLISHMENT, OTTAWA (ONTARIO).  
The transonic performance of two dimensional, jet flapped aerofoils at high Reynolds numbers  
p0074 N72-11861

Stratospheric turbulence and temperature gradients measured by an RB-57F: Coldscan flights 57 to 92  
[NRC-12318] p0159 N72-14379

Higher-order theory of two-dimensional subsonic wall interference in a perforated wall wind tunnel  
[LR-553] p0207 N72-16205

A flight investigation of lateral-directional handling qualities for V/STOL aircraft in low speed manoeuvring flight  
[AD-735420] p0332 N72-21014

Higher order theory of two dimensional subsonic wall interference in a perforated wall wind tunnel  
[AD-735967] p0337 N72-21307

Dynamic interference effect on dynamic stability of delta-wing shuttle in abort separation at Mach 2.0  
[LTR-UA-18] p0365 N72-21992

The trailing vortex wake and downwash behind a quasi-two-dimensional external flow jet flap  
[LTR-LA-85] p0469 N72-26241

Parameters affecting lateral directional handling qualities at low speeds  
p0621 N72-32033

Flying experience with the Sc1 research aircraft and the P1127 prototype at the Royal Aircraft Establishment, Bedford, England  
p0649 N72-33968

NATIONAL AERONAUTICAL LAB., BANGALORE (INDIA).  
Aeronautical research and technology  
p0634 N72-32958

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION. AMES RESEARCH CENTER, MOFFETT FIELD, CALIF.  
Full-scale wind-tunnel tests of a small unpowered jet aircraft with a T-tail  
[NASA-TN-D-6573] p0030 N72-10031

Aerodynamic characteristics of an all-body hypersonic aircraft configuration at Mach numbers from 0.65 to 10.6  
[NASA-TN-D-6577] p0032 N72-10045

Target contrast considerations in millimeter wave radiometry for airborne navigation  
[NASA-TN-X-62082] p0035 N72-10539

Feasibility of testing a large-chord, swept-panel model to determine wing shock location at flight Reynolds number  
[NASA-TN-X-67414] p0075 N72-11870

Transonic testing in existing wind tunnels  
[NASA-TN-X-67415] p0076 N72-11872

On the use of freon-12 for increasing Reynolds number in wind-tunnel testing of three dimensional aircraft models at subcritical and supercritical Mach numbers  
[NASA-TN-X-67417] p0077 N72-11879

Aerodynamic characteristics of a large scale model with a swept wing and augmented jet flap  
[NASA-TN-X-62029] p0080 N72-11901

Large scale wind tunnel investigation of a semispan wing equipped with an externally-blown jet flap  
[NASA-TN-X-62079] p0080 N72-11902

Digital autopilots: Design considerations and simulator evaluations  
[NASA-TN-X-62094] p0086 N72-11942

Investigation of sonic boom generated by thin, nonlifting, rectangular wings  
[NASA-TN-D-6619] p0087 N72-11949

The pilot-aircraft interface  
p0104 N72-13010

Direct-lift jet V/STOL concepts  
p0104 N72-13014

Effects of advanced technology on STOL transport aircraft  
p0105 N72-13016

Properties of oblique-wing/body combinations for low supersonic speeds

Preliminary results on two-segment noise abatement studies  
 [NASA-TM-X-62098] p0105 N72-13018  
 New fire retardant foams and intumescent p0149 N72-13985  
 Initial rotation-loading and low speed flutter test results for a straight wing version of the space shuttle vehicle  
 [NASA-TM-X-62110] p0174 N72-15898  
 Large-scale wind-tunnel investigation of a V/STOL transport model with podded lift fans forward and aft of a low mounted wing  
 [NASA-TM-X-62102] p0201 N72-15940  
 Data acquisition system for operational earth observation missions  
 [NASA-TM-X-62107] p0249 N72-17987  
 Structural weight analysis of hypersonic aircraft  
 [NASA-TN-D-6692] p0257 N72-18199  
 The requirements for a new full scale subsonic wind tunnel  
 [NASA-TM-X-62106] p0264 N72-18911  
 A flight evaluation of VTOL jet transport under visual and simulated instrument conditions  
 [NASA-TN-D-6754] p0276 N72-19291  
 A study of internal drag of small-scale ducts at Mach number 4  
 [NASA-TM-X-62143] p0319 N72-20012  
 Flexible fire retardant foam  
 [NASA-CASE-ARC-10180-1] p0323 N72-20272  
 Wind-tunnel investigation of the aerodynamic characteristics of the M2-P2 lifting-body entry configuration at transonic and supersonic Mach numbers  
 [NASA-TM-X-2511] p0326 N72-20767  
 Dual fuselage aircraft having yawable wing and horizontal stabilizer  
 [NASA-CASE-ARC-10470-1] p0331 N72-21005  
 Lifting-surface theory for calculating the loading induced on a wing by a flap  
 [NASA-TN-D-6798] p0332 N72-21010  
 Optimum performance of hovering rotors  
 [NASA-TM-X-62138] p0366 N72-22007  
 Magnetic position detection method and apparatus  
 [NASA-CASE-ARC-10179-1] p0367 N72-22019  
 Digital simulation of continuous error models with application to an instrument landing system error  
 [NASA-TM-X-62116] p0373 N72-22619  
 Terminal-area guidance algorithms for automated air-traffic control  
 [NASA-TN-D-6773] p0376 N72-22648  
 Wind tunnel test data for wing trailing vortex flow survey  
 [NASA-TM-X-62148] p0382 N72-23017  
 Effects of body shape on the aerodynamic characteristics of an all-body hypersonic aircraft configuration at Mach numbers from 0.65 to 10.6  
 [NASA-TN-D-6821] p0419 N72-23994  
 Aerodynamic characteristics of a large scale lift fan transport model with podded fans forward and lift cruise fans mounted above the wing  
 [NASA-TM-X-62151] p0419 N72-23996  
 Large-scale wind-tunnel investigation of the noise characteristics of a semispan wing equipped with an externally blown jet flap  
 [NASA-TM-X-62154] p0420 N72-24010  
 Initial operating experience with an aircraft simulator having extensive lateral motion  
 [NASA-TM-X-62155] p0420 N72-24011  
 Experimental investigation of stability and stall flutter of a free-floating wing V/STOL model  
 [NASA-TN-D-6831] p0423 N72-24335  
 Extrapolation of sonic boom pressure signatures by the waveform parameter method  
 [NASA-TN-D-6832] p0463 N72-25998  
 Aspects of investigating STOL noise using large scale wind tunnel models  
 [NASA-TM-X-62164] p0463 N72-26004  
 Transonic transport study, summary  
 [NASA-TM-X-62156] p0464 N72-26008  
 Feasibility study of a bidirectional jet flap device for application to helicopter rotor blades. Phase 2: Lift controller development  
 [NASA-TM-X-62152] p0464 N72-26009

Transonic transport study: Structures and aerodynamics  
 [NASA-TM-X-62157] p0465 N72-26016  
 Navigation for space shuttle approach and landing using an inertial navigation system augmented by data from a precision ranging system or a microwave scan beam landing guidance system  
 [NASA-TM-X-62123] p0472 N72-26516  
 Transonic transport study: Economics  
 [NASA-TM-X-62159] p0477 N72-27015

Interface of materials and structures on airframes. Part 3: Design problems in aircraft structures including proceedings of Monterey Symposium

## CORPORATE SOURCE INDEX

NORTHROP CORP.,

- [AD-736207] p0386 N72-23047  
Engine integration and thrust/drag definition  
[AD-741066] p0478 N72-27023
- The control volume concept in aeronautical engineering  
[AD-741132] p0527 N72-29001
- The design, development and translation of general purpose software for the P3 C aircraft's digital computer  
[AD-741066] p0532 N72-29171
- Laminar boundary layer development downstream of a suction slot  
[AD-742937] p0583 N72-31005
- The derivation, solution, and analysis of airplane spin equations modeled in an inertial coordinate system  
[AD-742929] p0583 N72-31006
- Vibrational and chemical nonequilibrium in a stoichiometric turbojet engine using kerosene-type fuel  
[AD-742948] p0591 N72-31788
- A fixed base variable stability Carrier Approach Landing Simulator (CALS)  
[AD-743768] p0628 N72-32283
- A parameter optimization approach to aircraft gust alleviation  
[AD-743722] p0641 N72-33038
- Development of a fixed base visual approach and landing simulator  
[AD-745200] p0643 N72-33259
- Compatibility of an aircraft and rawinsonde measurements  
[AD-743710] p0646 N72-33616
- Inlet distortion, vorticity, and stall in an axial-flow compressor  
[AD-743725] p0647 N72-33752
- NAVAL RESEARCH LAB., WASHINGTON, D.C.  
Airborne radiac  
[AD-729254] p0159 N72-14473
- Voltage level and wiring weight for aircraft electrical power systems  
[AD-732001] p0207 N72-16164
- Another associative processor  
[AD-737188] p0387 N72-23164
- Simulation of AADC simplex and multiprocessor operation  
[AD-739738] p0518 N72-28207
- NAVAL SHIP RESEARCH AND DEVELOPMENT CENTER, BETHESDA, MD.  
Subsonic wind tunnel facilities  
[AD-741213] p0533 N72-29221
- Correlation of resistance test results from fixed- and free-to-trim methods for a dynamic lift craft model 4667  
[AD-742752] p0588 N72-31311
- Theoretical performance of a pure jet flap rotor at high advance ratios  
[AD-726706] p0030 N72-10037
- Method for predicting the static aerodynamic characteristics of typical missile configurations for angles of attack to 180 degrees  
[AD-729009] p0100 N72-12986
- NAVAL WEAPONS CENTER, CHINA LAKE, CALIF.  
Computation of captive flight loads on air carried weapons  
[AD-733673] p0249 N72-17995
- NAVAL WEAPONS LAB., DAHLGREN, VA.  
Effect of fin slots on the static and dynamic stability characteristics of finned bodies  
[AD-728016] p0027 N72-10003
- NAVY ELECTRONICS LAB., SAN DIEGO, CALIF.  
Noise levels on aircraft-carrier flight decks, and their effects  
[AD-729067] p0107 N72-13038
- NEW YORK UNIV., N.Y.  
Engine airplane interference and wall corrections in transonic wind tunnel tests  
[AD-741066] p0076 N72-11877
- Analysis of the flow past a shockless lifting airfoil in design and off-design conditions  
[NRC-12315] p0109 N72-13269
- Review of the conclusions of the AGARD ad hoc committee on engine airplane interference and wall corrections in transonic wind tunnel tests  
[AD-741066] p0209 N72-16686
- Engine airplane interference definition of the problem and related basic fluid dynamic phenomena
- Aerodynamic studies of wing body  
[AD-741917] p0571 N72-29998
- Experimental verification of low sonic boom configuration  
[NASA-CR-2070] p0572 N72-30007

## CORPORATE SOURCE INDEX

## ROYAL AIRCRAFT ESTABLISHMENT, BEDFORD. CONTD

- The aerodynamic effect of ground proximity on lateral control of slender aircraft in the landing approach  
[ARC-CP-1152] p0088 N72-11961
- Wind tunnel tests at transonic and supersonic speeds to investigate the longitudinal stability of a model of the AVRO 720 aircraft  
[ARC-CP-1140] p0088 N72-11962
- Theoretical assessment of a method for the flight measurement of net engine thrust using towed drag devices  
[ARC-CP-1169] p0089 N72-11964
- Further piloted simulation studies of the handling characteristics of a slender-wing supersonic transport aircraft during approach and landing  
[ARC-R/M-3660] p0089 N72-11966
- Flow unsteadiness and model vibration in wind tunnels at subsonic and transonic speeds  
[ARC-CP-1155] p0092 N72-12198
- Low-speed wind-tunnel calibrations of the pitot and static pressure sensors and wind vanes on the short SC aircraft  
[ARC-CP-1162] p0093 N72-12392
- On large and rapid wind fluctuations which occur when the wind had previously been relatively light  
[ARC-CP-1158] p0095 N72-12553
- Results of a series of flights in the stratosphere over mountainous terrain in the western USA during February 1967  
[ARC-CP-1159] p0095 N72-12554
- Measurements of section pressure distribution at a Mach number of 2.0 on a wing of 70 deg sweep mounted on a waisted body  
[ARC-R/M-3661] p0202 N72-15949
- Theoretical pressure distributions on four simple wing shapes for a range of supersonic flow conditions  
[ARC-CP-1178] p0202 N72-15952
- A simulation of the low speed handling of the BAC 221 slender-wing research aircraft  
[RAE-TR-69257] p0204 N72-15971
- Low-speed wind-tunnel measurements of the oscillatory lateral aerodynamic derivatives of a BAC 221 model and comparison of results with similar Concorde and HP 115 data  
[RAE-TR-70095] p0204 N72-15972
- Possible losses in airspeed during turning manoeuvres in gusty air  
[ARC-R/M-3672] p0204 N72-15973
- Some applications of boundary-layer control by blowing to air inlets for V/STOL aircraft  
p0210 N72-16697
- An investigation of the pressure distributions on a 45 degree swept half wing, including the effects of upper surface spoilers  
[ARC-CP-1184] p0270 N72-19032
- Stability and control tests on a slender wing research aircraft  
p0330 N72-20990
- Theoretical assessment of the general stability and gust response characteristics of STOL aircraft  
[ARC-R/M-3686] p0582 N72-30996
- The measurement of ground effect using a fixed ground board in a wind tunnel  
[ARC-R/M-3689] p0582 N72-30997
- The effect of variations in local gravity and of aircraft speed on the effective weight of aircraft in high performance cruise  
[ARC-R/M-3680] p0585 N72-31024
- Measurement of the yawing moment of inertia of an aircraft (HP115) in flight  
[ARC-R/M-3691] p0585 N72-31025
- Aerodynamics at moderate hypersonic Mach numbers  
p0617 N72-31995
- Optimum shapes  
p0617 N72-31996
- Theory of waveriders  
p0617 N72-31997
- Momentum theory  
p0618 N72-31999
- Flows with heat addition  
p0618 N72-32000
- Turbulence models for the assessment of handling qualities during take off and landing  
p0621 N72-32030
- Some experiments on an engine installation above the wing of a swept-winged aircraft  
[RAE-TR-AERO-1271] p0028 N72-10009
- Sonic bang measurements during exercise summer sky  
[ARC-R/M-3659] p0038 N72-11015
- Category 2: A simulation study of low visibility approaches and landings at night  
[RAE-TR-71044] p0042 N72-11042
- Civil Aircraft Airworthiness Data Recording Programme. Manoeuvre loads during training and test flying  
[ARC-CP-1176] p0042 N72-11043
- Fire and explosion protection of fuel tank ullage  
p0049 N72-11690
- Simulated crash tests as a means of rating aircraft safety fuels  
p0049 N72-11692
- Scale effects in flows over swept wings  
p0073 N72-11855
- A type of stall with leading edge transonic flow and rear separation  
p0073 N72-11858
- Some factors relevant to the simulation of full scale flows in model tests and to the specification of new high Reynolds number transonic tunnels  
p0077 N72-11883
- A scheme for a quiet transonic flow suitable for model testing at high Reynolds number  
p0078 N72-11887
- Flutter research in the United Kingdom, 1969-1971  
[RAE-TR-813] p0079 N72-11892
- Two-dimensional low-speed tunnel tests on the NACA 0012 section including measurements made during pitching oscillations at the stall  
[ARC-CP-1145] p0080 N72-11903
- Low-speed wind-tunnel tests on a family of cambered wings of mild gothic planform of aspect ratio 1.4  
[ARC-CP-1163] p0081 N72-11907
- An improved method for calculating generalised airforces on oscillating wings in subsonic flow  
[RAE-TR-69073] p0081 N72-11910
- The implications of operating helicopters in poor visibility  
p0082 N72-11919
- The effects of semirigid rotors of helicopter autostabiliser design  
p0083 N72-11928
- A further wind tunnel investigation of underwing jet interference  
[ARC-CP-1156] p0088 N72-11963
- Aircraft centre of gravity response to two-dimensional spectra of turbulence  
[ARC-R/M-3665] p0089 N72-11965
- Low-speed wind-tunnel measurements of surface pressure fluctuations on two slender-wing models  
[ARC-CP-1154] p0089 N72-11967
- A comparative assessment of two forms of cycloconverter  
[RAE-TR-70092] p0091 N72-11979
- A system for airborne recording and analysis of ILS localiser and glide path installations  
[RAE-TR-70222] p0096 N72-12590
- Parameter estimation for the log-normal parent population of fatigue failures from a sample containing both failed and non-failed members  
[ARC-CP-1144] p0098 N72-12925
- Operating loads on the main undercarriages of the F-104 G aircraft  
[RAE-LIB-TRANS-1591] p0101 N72-12989
- The influence of near-wake assumption on the lifting characteristics of a rotor blade  
[RAE-TR-71046] p0164 N72-14996
- A dual output 1.6 GHz solid-state power source  
[RAE-TR-70002] p0169 N72-15216
- Scale effects in flows over swept wings  
[RAE-TR-71043] p0169 N72-15292
- An experimental investigation of the effect of thickness on the subsonic longitudinal stability characteristics of delta wings of 70 deg sweep-back  
[ARC-R/M-3673] p0202 N72-15950
- An improved technique of stability testing in free flight at transonic speeds, applied to a non-lifting slender wing  
[ARC-CP-1174] p0202 N72-15951
- Riding qualities of aircraft  
[RAE-LIB-TRANS-1605] p0203 N72-15961

An application of the RAE wind tunnel flight dynamics simulator to the low speed dynamics of a slender delta aircraft (HP 115)  
[RAE-R/M-3669] p0204 N72-15970

Achievements in recording and analysis of civil aircraft operations 1962-1969  
[RAE-TR-71034] p0205 N72-15975

Hard landings encountered by subsonic civil jet aircraft  
[RAE-TR-70187] p0205 N72-15976

Measurements of steady load on a T-tail flutter model  
[RAE-TR-71035] p0249 N72-17991

Some preliminary studies of factors influencing airport capacity including curved final approach paths  
[RAE-TR-71059] p0257 N72-18265

Instruction concerning castings for aeronautical use, edition 3, 30 November 1956  
[RAE-LIB-TRANS-1557] p0259 N72-18501

Free-flight measurements of pressure and heat transfer on a blunt leading-edge caret wing at design and off-design Mach numbers (Mach sub infinity equals 0.9 to 3.36)  
[ARC-R/M-3679] p0267 N72-19007

An approximate analysis of the non-linear lateral motion of a slender aircraft (HP 115) at low speeds  
[ARC-R/M-3674] p0270 N72-19034

Blast testing aircrew escape equipment including an account of a new transonic test facility  
p0274 N72-19147

The velocities induced by distributions of infinite kinked source and vortex lines representing wings with sweep and dihedral in incompressible flow  
[ARC-R/M-3667] p0277 N72-19332

Analysis of the gaseous products arising from insulation coatings on aircraft cabling at elevated temperatures  
[RAE-TR-71134] p0278 N72-19636

Special events of meteorological origin (January 1966 to November 1968)  
[ARC-CP-1188] p0280 N72-19687

Measurement of the drag associated with recessed surfaces: Cutouts of rectangular and elliptical planform  
[RAE-LIB-TRANS-1614] p0317 N72-19992

Development of the FA-200XS experimental aircraft  
[RAE-LIB-TRANS-1606] p0319 N72-20013

A flight investigation of a STOL aircraft  
[RAE-LIB-TRANS-1604] p0422 N72-24026

A review of some published data on the external-flow jet-augmented flap  
[ARC-CP-1194] p0431 N72-24998

An investigation of annular aerofoils for turbofan engine cowls  
[ARC-R/M-3688] p0431 N72-24999

Output filters for aircraft type cycloconvertors  
[RAE-TR-71088] p0434 N72-25273

A review of approach and landing guidance in relation to civil and military operational requirements  
[RAE-TR-71186] p0436 N72-25606

An ILS approach programme unit for the radio environment monitor  
[RAE-TR-71145] p0436 N72-25607

DAMIEN 3 PCM recording system and programming for flight tests  
[RAE-LIB-TRANS-1638] p0517 N72-28175

An approximate treatment of the stability of a towed unbanked object in a condition of zero lift  
[ARC-R/M-3675] p0527 N72-28995

The two-dimensional flow around a slotted flap  
[ARC-R/M-3681] p0527 N72-28996

Exploratory tests on a forward-mounted overwing engine installation  
[ARC-CP-1207] p0527 N72-28998

Boundary-layer pressure fluctuations at high Reynolds numbers on a free-flight test vehicle  
[ARC-CP-1208] p0527 N72-28999

Spontaneous ignition of avtur vapour in various oxygen-nitrogen mixtures  
[ARC-CP-1209] p0537 N72-29799

The Philosophy which underlies the structural tests of a supersonic transport aircraft with particular attention to the thermal cycle  
p0539 N72-29896

The practical implementation of fatigue requirements to military aircraft and helicopters in the United Kingdom  
p0540 N72-29900

A study of dynamic aeroelastic effects on the stability control and gust response of a slender delta aircraft  
[ARC-R/M-3690] p0582 N72-30998

The effect of ridge excrescences and trailing-edge control gaps on two-dimensional aerofoil characteristics  
[ARC-R/M-3698] p0583 N72-31002

Possibilities for thrust determination in an aircraft  
[RAE-LIB-TRANS-1650] p0631 N72-32755

Development of an ice-shedding coating for helicopter rotor blades

## U

ULTRASYSTEMS, INC., NEWPORT BEACH, CALIF.  
Aircraft Reliability and Maintainability  
Situation (ARMS)  
[AD-738536] p0467 N72-26027

UNITED AIR LINES, INC., CHICAGO, ILL.  
The relationship between maintenance and  
operating safety in air transportation  
p0252 N72-18018

UNITED AIRCRAFT CORP., EAST HARTFORD, CONN.  
An analytical and experimental investigation of  
helicopter rotor hover performance and wake  
geometry characteristics  
[AD-728835] p0149 N72-13982

Vortex shedding noise of an isolated airfoil  
[AD-734433] p0272 N72-19048

An investigation of the quantitative  
applicability of model helicopter rotor wake  
patterns obtained from a water tunnel  
[AD-739946] p0482 N72-27052

Experimental investigation of effects of blade  
section camber and planform taper on rotor  
hover performance  
[AD-743232] p0586 N72-31033

A feasible feel augmentation system for  
helicopters  
p0084 N72-11931

Advanced antitorque concepts study  
[AD-729860] p0152 N72-14001

An experimental study of helicopter rotor  
impulsive noise  
[AD-730359] p0155 N72-14018

Full-scale wind tunnel investigation of the  
advancing blade concept rotor system  
[AD-734338] p0271 N72-19038

Investigation of the stabilator on the S-67  
aircraft  
[AD-735766] p0369 N72-22030

Ground test evaluation of the Sikorsky active  
transmission isolation system  
[AD-736347] p0370 N72-22036

Ballistic vulnerability of boron/epoxy double  
wall drive shafts  
[AD-737285] p0388 N72-23509

Application of boron/epoxy reinforced aluminum  
stringers and boron/epoxy skid gear for the  
CH54B helicopter tail cone. Phase 2:  
Fabrication, inspection and flight test  
[NASA-CR-112101] p0529 N72-29009

An experimental investigation of high-speed  
rotorcraft drag  
[AD-740771] p0529 N72-29010

Criteria for externally suspended helicopter loads  
[AD-740772] p0530 N72-29020

Helicopter development reliability test  
requirements  
[AD-742248] p0531 N72-29028

Variable diameter rotor study  
[AD-740911] p0575 N72-30025

Rotor systems research aircraft of predesign  
study. Volume 1: Summary and conclusions  
[NASA-CR-112152] p0638 N72-33014

Rotor systems research aircraft predesign study.  
Volume 2: Conceptual study report  
[NASA-CR-112153] p0638 N72-33015

Rotor systems research aircraft predesign study.  
Volume 3: Predesign report  
[NASA-CR-112154] p0638 N72-33016

Rotor systems research aircraft predesign study.  
Volume 4: Preliminary draft detail  
specification  
[NASA-CR-112155] p0638 N72-33017

Investigation of the speed brakes on the S-67  
aircraft  
[AD-745214] p0641 N72-33039

UNIVERSITY OF SOUTHERN CALIF., LOS ANGELES.  
Analytical techniques for effective maintenance  
p0268 N72-19017

UTAH STATE UNIV., LOGAN.  
Aircraftborne instrumentation for airglow survey  
[AD-739196] p0520 N72-28425

## V

VANDERBILT UNIV., NASHVILLE, TENN.

A study of jet impingement on curved surfaces  
followed by oblique introduction into a  
freestream flow  
[NASA-CR-127124] p0469 N72-26227

VEREINIGTE FLUGTECHNISCHE WERKE-POKKER G.M.B.H.,  
BRENN (WEST GERMANY).

Adaptation of a nonlinear attitude regulator  
developed for a V/STOL aircraft, to a helicopter  
p0321 N72-20026

Outstanding problems of aircraft aerodynamics  
p0369 N72-22029

Evaluation of an integrated flight display for  
the manual IFR-landing of VTOL aircraft  
p0374 N72-22631

Aerodynamic calculations for the interference of  
several propeller-jets with an aerofoil  
p0029 N72-10015

Influence of the wake geometry on the velocity  
and load distribution of VTOL propellers  
p0037 N72-11004

Problems in aerodynamic layouts of V/STOL  
propellers  
[DGLR-71-017] p0381 N72-23010

Methods for developing the adaptability of VTOL  
propellers  
[DGLR-71-023] p0382 N72-23016

VIRGINIA POLYTECHNIC INST., BLACKSBURG.  
Investigation of an aircraft trailing vortex  
using a tuft grid  
[NASA-CR-62077] p0087 N72-11950

Nonequilibrium boundary layer flow on  
highly-swept hypersonic wings  
[PB-204710] p0328 N72-20975

Nonplanar method for predicting incompressible  
aerodynamic coefficients of rectangular wings  
with circular-arc camber  
[NASA-TN-X-67791] p0379 N72-22995

Farfield structure of an aircraft trailing  
vortex, including effects of mass injection  
[NASA-CR-62078] p0534 N72-29237

VIRGINIA UNIV., CHARLOTTESVILLE.  
A preliminary study of containment concepts for  
aircraft landing on elevated STOL-ports  
[NASA-CR-125544] p0203 N72-15960

VON KARMAN INST. FOR FLUID DYNAMICS,  
RHODE-SAINT-GENESE (BELGIUM).

Turbulent Jet Flows  
[VKI-LS-36] p0033 N72-10245

Research on advanced axial compressor concepts  
[AD-725789] p0045 N72-11308

VOUGHT AERONAUTICS, DALLAS, TEX.  
Development of fastener countersink corrosion  
protection seals  
[AD-728039] p0110 N72-13429

A method to simulate gunfire induced vibration  
environment  
p0173 N72-15836

Effects of flight conditions upon gunfire  
induced vibration environment  
p0215 N72-16815

A feasibility study to define inlet flow quality  
and development criteria  
[AD-739858] p0524 N72-28797

## W

WALL COLMONOY CORP., DETROIT, MICH.

Remanufacturing of jet engine components  
employing brazing techniques  
p0040 N72-11024

WASHINGTON UNIV., SEATTLE.

The numerical calculation of plane steady  
transonic flows past thin lifting airfoils  
p0469 N72-26217

Concepts for a theoretical and experimental  
study of lifting rotor random loads and  
vibrations. Phase 5A: Effects of torsional  
blade flexibility on single blade random gust  
response statistics  
[NASA-CR-114386] p0078 N72-11889

Concepts for a theoretical and experimental  
study of lifting rotor random loads and  
vibrations. Phase 5B: Analysis of gust  
alleviation methods and rotor dynamic stability  
[NASA-CR-114387] p0079 N72-11890

Concepts for a theoretical and experimental study of lifting rotor random loads and vibrations. Phase 5C: Development of experimental methods  
[NASA-CR-114388] p0079 N72-11891

The method of multiblade coordinates in the linear analysis of lifting rotor stability and gust response  
p0431 N72-25001

Concepts for a theoretical and experimental study of lifting rotor random loads and vibrations. Phase 6-A: Effects of blade torsion, of blade flap bending flexibility and of rotor support flexibility on rotor stability and random response  
[NASA-CR-114480] p0516 N72-28018

Concepts for a theoretical and experimental study of lifting rotor random loads and vibrations. Phase 6-B: Experiments with progressing/regressing forced rotor flapping modes  
[NASA-CR-114481] p0516 N72-28019

WATERLOO UNIV. (ONTARIO).  
A domestic multi-modal goods distribution model with emphasis on air cargo  
p0341 N72-21969

Simulating the turnaround operation of passenger aircraft using the critical path method  
p0341 N72-21970

WATERVLIET ARSENAL, N.Y.  
The transient aeroelastic response of rotor  
[AD-728818] p0107 N72-13037

Metal matrix composites for high temperature application  
[AD-734304] p0279 N72-19647

Nonclassical forced motion of stationary and rotating beams with tip masses  
[AD-735683] p0341 N72-21939

WEAPONS RESEARCH ESTABLISHMENT, SALISBURY (AUSTRALIA).  
Digital computer calculations of the effects of variation of mass and inertia parameters on the spin of a 60 deg delta-wing fighter aircraft  
[WRE-TN-453(WR/D)] p0099 N72-12974

WEATHER SQUADRON (17TH), MCCLELLAN AFB, CALIF. DETACHMENT 08.  
Terminal forecast reference file for McClellan Air Force Base, California  
[AD-734800] p0280 N72-19714

WEATHER SQUADRON (24TH), COLUMBUS AFB, MISS. DETACHMENT 02.  
Terminal forecast reference file, Columbus Air Force Base, Mississippi  
[AD-734807] p0280 N72-19713

WEATHER WING (1ST), SAN FRANCISCO, CALIF. 96553.  
Forecasting low level turbulence for light aircraft in Hawaii  
[AD-726107] p0046 N72-11525

WEST VIRGINIA UNIV., MORGANTOWN.  
Analysis of a circulation controlled elliptical airfoil  
p0430 N72-24989

WESTINGHOUSE ELECTRIC CORP., BALTIMORE, MD.  
The shock and vibration experienced by Naval avionics during arrested landing  
p0173 N72-15837

WHITTAKER CORP., SAN DIEGO, CALIF.  
Filament composite wheel development for military aircraft  
[AD-745130] p0642 N72-33046

WICHITA STATE UNIV., KANS.  
Effects of leading-edge camber on low-speed characteristics of slender delta wings: Techniques and tabulated data  
[NASA-CR-112016] p0463 N72-25996

Effects of leading-edge camber on low-speed characteristics of slender delta wings  
[NASA-CR-2002] p0636 N72-32996

WORLD AIRWAYS, INC., OAKLAND, CALIF.  
Charters, the new mode: Setting a new course for international air transportation  
p0634 N72-32983

Minimum transportation regulation maximizes tourism's contribution to economic growth  
p0635 N72-32984

WORLD METEOROLOGICAL ORGANIZATION, GENEVA (SWITZERLAND).  
Utilization of meteorological radar for aeronautics

[ONM-264-TP-148] p0044 N72-11147

WYLE LABS., INC., EL SEGUNDO, CALIF.  
Community noise  
[NTID300.3] p0579 N72-30604

WYLE LABS., INC., HAMPTON, VA.  
An evaluation of methods for scaling aircraft noise perception  
[NASA-CR-1883] p0101 N72-12988

Helicopter aural detectability  
[AD-730788] p0155 N72-14017

Propeller noise at low tip speeds  
[AD-731156] p0167 N72-15015

WYLE LABS., INC., HUNTSVILLE, ALA.  
Multi-degree of freedom motion simulator systems for transportation environments  
p0214 N72-16792

An optimum acceleration time history for an escape system  
[AD-731194] p0168 N72-15020

Development of a dynamic analog anthropomorphic dummy for aircraft escape system testing  
[AD-730634] p0205 N72-15977

The dynamics of an ejection seat catapult with a live load  
[AD-730635] p0205 N72-15978

X

IONICS, INC., VAN NUYS, CALIF.  
Vortex observations by the Ionics acoustic radar at NAPEC  
[TR-7] p0168 N72-15140

# CONTRACT NUMBER INDEX

AERONAUTICAL ENGINEERING / A Special Bibliography

JANUARY 1973

1972 Cumulative Index

## Typical Contract Number Index Listing

Listings in this index are arranged alphanumerically by contract number. Under each contract number, the accession numbers denoting documents that have been produced as a result of research done under that contract are arranged in ascending order with the IAA accession numbers appearing first. The accession number denotes the number by which the citation is identified in either the IAA or STAR section. Preceding the accession number is the page number in the particular supplement in which the citation may be found.

# REPORT/ACCESSION NUMBER INDEX

AERONAUTICAL ENGINEERING / A Special Bibliography

JANUARY 1973

1972 Cumulative Index

## Typical Report/Accession Number Index Listing

Listings in this index are arranged alphanumerically by report number. The page number indicates the page in the individual Supplement in which the citation is located. The accession number denotes the number by which the citation is identified. An asterisk (\*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche. A plus sign (+) indicates a document that cannot be microfilmed but for which one-to-one facsimile is available.

REVISED

# CORPORATE SOURCE INDEX

AERONAUTICAL ENGINEERING    NASA SP-7037    SUPPLEMENT 27    JANUARY 1973

## NOTICE

The Corporate Source Index for *A Cumulative Index to the 1972 Issues of Aeronautical Engineering* (NASA SP-7037, Supplement 27) is defective and should be replaced with this revised index. Through an error in the computer program by which the index is produced, several corporate source entries were omitted.

It is suggested that this revised index be maintained as an insert or supplement, and that it be substituted for the original Corporate Source Index in any binding for permanent retention. The other indexes contained in Supplement 27 of *Aeronautical Engineering* were not affected by the error and can continue to be used without change.

# Corporate Source Index

AERONAUTICAL ENGINEERING / A Special Bibliography

JANUARY 1973

1972 Cumulative Index

## Typical Corporate Source Index Listing

The title of the document is used to provide a brief description of the subject matter. The page number and NASA or AIAA accession number are included in each entry to assist the user in locating the abstract in the abstract section of an individual supplement of *Aeronautical Engineering*. If applicable, a report number is also included as an aid in identifying the document.

Piloted simulator investigations of flight near zero rate of climb speed  
[ARC-CP-1165] p0043 N72-11048

A theoretical study of height control in flight close to the ground as affected by elevator lift and cockpit position  
[ARC-R/M-3662] p0043 N72-11049

Some aspects of viscous inviscid interactions at transonic speeds, and their dependence on

## Reynolds number

p0073 N72-11856

The aerodynamic effect of ground proximity on lateral control of slender aircraft in the landing approach  
[ARC-CP-1152] p0088 N72-11961

Wind tunnel tests at transonic and supersonic speeds to investigate the longitudinal stability of a model of the AVRO 720 aircraft  
[ARC-CP-1140] p0088 N72-11962

Theoretical assessment of a method for the flight measurement of net engine thrust using towed drag devices  
[ARC-CP-1169] p0089 N72-11964

Further piloted simulation studies of the handling characteristics of a slender-wing supersonic transport aircraft during approach and landing  
[ARC-R/M-3660] p0089 N72-11966

Flow unsteadiness and model vibration in wind tunnels at subsonic and transonic speeds  
[ARC-CP-1155] p0092 N72-12198

Low-speed wind-tunnel calibrations of the pitot and static pressure sensors and wind vanes on the short SC aircraft  
[ARC-CP-1162] p0093 N72-12392

On large and rapid wind fluctuations which occur when the wind had previously been relatively light  
[ARC-CP-1158] p0095 N72-12553

Results of a series of flights in the stratosphere over mountainous terrain in the western USA during February 1967  
[ARC-CP-1159] p0095 N72-12554

Measurements of section pressure distribution at a Mach number of 2.0 on a wing of 70 deg sweep mounted on a waisted body  
[ARC-R/M-3661] p0202 N72-15949

Theoretical pressure distributions on four simple wing shapes for a range of supersonic flow conditions  
[ARC-CP-1178] p0202 N72-15952

A simulation of the low speed handling of the BAC 221 slender-wing research aircraft  
[RAE-TR-69257] p0204 N72-15971

Low-speed wind-tunnel measurements of the oscillatory lateral aerodynamic derivatives of a BAC 221 model and comparison of results with similar Concorde and HP 115 data  
[RAE-TR-70095] p0204 N72-15972

Possible losses in airspeed during turning manoeuvres in gusty air  
[ARC-R/M-3672] p0204 N72-15973

Some applications of boundary-layer control by blowing to air inlets for V/STOL aircraft  
p0210 N72-16697

An investigation of the pressure distributions on a 45 degree swept half wing, including the effects of upper surface spoilers  
[ARC-CP-1184] p0270 N72-19032

Stability and control tests on a slender wing research aircraft  
p0330 N72-20990

Theoretical assessment of the general stability and gust response characteristics of STOL aircraft  
[ARC-R/M-3686] p0582 N72-30996

The measurement of ground effect using a fixed ground board in a wind tunnel  
[ARC-R/M-3689] p0582 N72-30997

The effect of variations in local gravity and of aircraft speed on the effective weight of aircraft in high performance cruise  
[ARC-R/M-3680] p0585 N72-31024

Measurement of the yawing moment of inertia of an aircraft (HP115) in flight  
[ARC-R/M-3691] p0585 N72-31025

Aerodynamics at moderate hypersonic Mach numbers  
p0617 N72-31995

Optimum shapes  
p0617 N72-31996

Theory of waveriders  
p0617 N72-31997

Momentum theory  
p0618 N72-31999

Flows with heat addition  
p0618 N72-32000

Turbulence models for the assessment of handling qualities during take off and landing  
p0621 N72-32030

## ROYAL AIRCRAFT ESTABLISHMENT, FARNBOROUGH (ENGLAND).

Some experiments on an engine installation above the wing of a swept-winged aircraft  
[RAE-TM-AERO-1271] p0028 N72-10009

Sonic bang measurements during exercise summer sky  
[ARC-R/M-3659] p0038 N72-11015

Category 2: A simulation study of low visibility approaches and landings at night  
[RAE-TR-71044] p0042 N72-11042

Civil Aircraft Airworthiness Data Recording Programme. Manoeuvre loads during training and test flying  
[ARC-CP-1176] p0042 N72-11043

Fire and explosion protection of fuel tank ullage  
p0049 N72-11690

Simulated crash tests as a means of rating aircraft safety fuels  
p0049 N72-11692

Scale effects in flows over swept wings  
p0073 N72-11855

A type of stall with leading edge transonic flow and rear separation  
p0073 N72-11858

Some factors relevant to the simulation of full scale flows in model tests and to the specification of new high Reynolds number transonic tunnels  
p0077 N72-11883

A scheme for a quiet transonic flow suitable for model testing at high Reynolds number  
p0078 N72-11887

Flutter research in the United Kingdom, 1969-1971  
[RAE-TM-813] p0079 N72-11892

Two-dimensional low-speed tunnel tests on the NACA 0012 section including measurements made during pitching oscillations at the stall  
[ARC-CP-1145] p0080 N72-11903

Low-speed wind-tunnel tests on a family of cambered wings of mild gothic planform of aspect ratio 1.4  
[ARC-CP-1163] p0081 N72-11907

An improved method for calculating generalised airforces on oscillating wings in subsonic flow  
[RAE-TR-69073] p0081 N72-11910

The implications of operating helicopters in poor visibility  
p0082 N72-11919

The effects of semirigid rotors of helicopter autostabiliser design  
p0083 N72-11928

A further wind tunnel investigation of underwing jet interference  
[ARC-CP-1156] p0088 N72-11963

Aircraft centre of gravity response to two-dimensional spectra of turbulence  
[ARC-R/M-3665] p0089 N72-11965

Low-speed wind-tunnel measurements of surface pressure fluctuations on two slender-wing models  
[ARC-CP-1154] p0089 N72-11967

A comparative assessment of two forms of cycloconverter  
[RAE-TR-70092] p0091 N72-11979

A system for airborne recording and analysis of ILS localiser and glide path installations  
[RAE-TR-70222] p0096 N72-12590

Parameter estimation for the log-normal parent population of fatigue failures from a sample containing both failed and non-failed members  
[ARC-CP-1144] p0098 N72-12925

Operating loads on the main undercarriages of the F-104 G aircraft  
[RAE-LIB-TRANS-1591] p0101 N72-12989

The influence of near-wake assumption on the lifting characteristics of a rotor blade  
[RAE-TR-71046] p0164 N72-14996

A dual output 1.6 GHz solid-state power source  
[RAE-TR-70002] p0169 N72-15216

Scale effects in flows over swept wings  
[RAE-TR-71043] p0169 N72-15292

An experimental investigation of the effect of thickness on the subsonic longitudinal stability characteristics of delta wings of 70 deg sweep-back  
[ARC-R/M-3673] p0202 N72-15950

An improved technique of stability testing in free flight at transonic speeds, applied to a non-lifting slender wing  
[ARC-CP-1174] p0202 N72-15951

Riding qualities of aircraft  
[RAE-LIB-TRANS-1605] p0203 N72-15961

An application of the RAE wind tunnel flight dynamics simulator to the low speed dynamics of a slender delta aircraft (HP 115)  
[ARC-R/M-3669] p0204 N72-15970

Achievements in recording and analysis of civil aircraft operations 1962-1969  
[RAE-TR-71034] p0205 N72-15975

Hard landings encountered by subsonic civil jet aircraft  
[RAE-TR-70187] p0205 N72-15976

Measurements of steady load on a T-tail flutter model  
[RAE-TR-71035] p0249 N72-17991

Some preliminary studies of factors influencing airport capacity including curved final approach paths  
[RAE-TR-71059] p0257 N72-18265

Instruction concerning castings for aeronautical use, edition 3, 30 November 1956  
[RAE-LIB-TRANS-1557] p0259 N72-18501

Free-flight measurements of pressure and heat transfer on a blunt leading-edge caret wing at design and off-design Mach numbers (Mach sub infinity equals 0.9 to 3.36)  
[ARC-R/M-3679] p0267 N72-19007

An approximate analysis of the non-linear lateral motion of a slender aircraft (HP 115) at low speeds  
[ARC-R/M-3674] p0270 N72-19034

Blast testing aircrew escape equipment including an account of a new transonic test facility  
p0274 N72-19147

The velocities induced by distributions of infinite kinked source and vortex lines representing wings with sweep and dihedral in incompressible flow  
[ARC-R/M-3667] p0277 N72-19332

Analysis of the gaseous products arising from insulation coatings on aircraft cabling at elevated temperatures  
[RAE-TR-71134] p0278 N72-19636

Special events of meteorological origin (January 1966 to November 1968)  
[ARC-CP-1188] p0280 N72-19687

Measurement of the drag associated with recessed surfaces: Cutouts of rectangular and elliptical planform  
[RAE-LIB-TRANS-1614] p0317 N72-19992

Development of the FA-200XS experimental aircraft  
[RAE-LIB-TRANS-1606] p0319 N72-20013

A flight investigation of a STOL aircraft  
[RAE-LIB-TRANS-1604] p0422 N72-24026

A review of some published data on the external-flow jet-augmented flap  
[ARC-CP-1194] p0431 N72-24998

An investigation of annular aerofoils for turbofan engine cowls  
[ARC-R/M-3688] p0431 N72-24999

Output filters for aircraft type cycloconverters  
[RAE-TR-71088] p0434 N72-25273

A review of approach and landing guidance in relation to civil and military operational requirements  
[RAE-TR-71186] p0436 N72-25606

An ILS approach programme unit for the radio environment monitor  
[RAE-TR-71145] p0436 N72-25607

DAMIEN 3 PCM recording system and programming for flight tests  
[RAE-LIB-TRANS-1638] p0517 N72-28175

An approximate treatment of the stability of a towed unbanked object in a condition of zero lift  
[ARC-R/M-3675] p0527 N72-28995

The two-dimensional flow around a slotted flap  
[ARC-R/M-3681] p0527 N72-28996

Exploratory tests on a forward-mounted overwing engine installation  
[ARC-CP-1207] p0527 N72-28998

Boundary-layer pressure fluctuations at high Reynolds numbers on a free-flight test vehicle  
[ARC-CP-1208] p0527 N72-28999

Spontaneous ignition of avtur vapour in various oxygen-nitrogen mixtures  
[ARC-CP-1209] p0537 N72-29799

The Philosophy which underlies the structural tests of a supersonic transport aircraft with

particular attention to the thermal cycle  
p0539 N72-29896

The practical implementation of fatigue requirements to military aircraft and helicopters in the United Kingdom  
p0540 N72-29900

A study of dynamic aeroelastic effects on the stability control and gust response of a slender delta aircraft  
[ARC-R/M-3690] p0582 N72-30998

The effect of ridge excrescences and trailing-edge control gaps on two-dimensional aerofoil characteristics  
[ARC-R/M-3698] p0583 N72-31002

Possibilities for thrust determination in an aircraft

- A survey to determine flight plan data and flight scheduling accuracy

[DOT-TSC-FAA-72-10] p0322 N72-20189  
 Characteristics of a signal data converter for a  
 multi-runway visibility measuring system  
 [DOT-TSC-FAA-72-1] p0323 N72-20254  
 Preliminary survey of potential STOL terminal  
 area operational requirements  
 [DOT-TSC-FAA-71-9] p0323 N72-20255  
 Clear air turbulence radiometric detection program  
 [DOT-TSC-FAA-71-19] p0325 N72-20554  
 Keyboard and message evaluation for cockpit  
 input data link  
 [DOT-TSC-FAA-71-21] p0325 N72-20578  
 Path changing methods applied to the 4-D  
 guidance of STOL aircraft  
 [DOT-TSC-FAA-72-5] p0325 N72-20579  
 Computer systems performance measurement  
 techniques  
 [DOT-TSC-FAA-71-23] p0326 N72-20583  
 A conceptual network model of the air  
 transportation system: The basic, level 1 model  
 [DOT-TSC-FAA-71-3] p0326 N72-20584  
 The calculation of aircraft collision  
 probabilities  
 [DOT-TSC-FAA-71-27] p0330 N72-20997  
 Visibility concepts and measurement techniques  
 for aviation purposes  
 [DOT-TSC-FAA-71-25] p0330 N72-20998  
 Aircraft wake vortex sensing systems  
 [DOT-TSC-FAA-72-13] p0330 N72-20999  
 Proposed control tower and cockpit visibility  
 readouts based on an airport-aircraft  
 information flow system  
 [DOT-TSC-FAA-71-18] p0330 N72-21000  
 A review of available L-band and VHF aircraft  
 antennas for an aircraft satellite  
 communications link  
 [PB-204799] p0335 N72-21165  
 Survey of aircraft emissions and related  
 instrumentation  
 [PB-204794] p0338 N72-21592  
 Evaluation of air traffic control models and  
 simulations  
 [DOT-TSC-FAA-71-7] p0339 N72-21626  
 Microwave scanning beam approach and landing  
 system phased array antenna  
 [DOT-TSC-FAA-71-29] p0339 N72-21627  
 Accurate surveillance in the terminal area  
 [DOT-TSC-FAA-71-26] p0339 N72-21628  
 Oceanic surveillance and navigation analysis, Fy  
 71  
 [DOT-TSC-FAA-71-13] p0339 N72-21629  
 Evaluation of the FAA advanced flow control  
 procedures  
 [DOT-TSC-FAA-72-8] p0339 N72-21630  
 An airport airside system model  
 [PB-204802] p0339 N72-21634  
 The ILS scattering problem and signal detection  
 model  
 [DOT-TSC-FAA-72-7] p0376 N72-22653  
 An investigation of microwave landing guidance  
 system signal requirements for conventionally  
 equipped civilian aircraft  
 [AD-737339] p0389 N72-23669  
 TRI-STATE TRANSPORTATION COMMISSION, NEW YORK.  
 Metropolitan aircraft noise abatement policy  
 study, John F. Kennedy International Airport,  
 New York, New York

 TRW EQUIPMENT LABS., CLEVELAND, OHIO.  
 Resin/graphite fiber composites  
 [NASA-CR-72983] p0324 N72-20508  
 TRW SYSTEMS GROUP, REDONDO BEACH, CALIF.  
 An analytical and experimental study of stresses  
 in turbine blades using holographic  
 interferometry  
 [AD-728802] p0110 N72-13446  
 Dynamic response tests of an air cushion  
 suspension system for the Linear Induction  
 Motor (LIM) of the Tracked Air Cushion  
 Research Vehicle (TACRV)  
 [PB-204440] p0219 N72-17010  
 Thermally stable laminating resins  
 [NASA-CR-72984] p0260 N72-18584  
 Computers for satellite based navigation and  
 guidance systems  
 p0336 N72-21226  
 Nuclear instrument landing systems  
 [SAN-828-1] p0377 N72-22655

TUSTIN INST. OF TECH., SANTA BARBARA, CALIF.  
 A survey of practical problems encountered in  
 reproducing the captive flight environment by  
 means of shakers and shock test machines  
 p0173 N72-15838

TYCO LABS., INC., WALTHAM, MASS.  
 High temperature infrared detectors for aircraft  
 fire detection  
 [AD-734785] p0278 N72-19536

## U

ULTRASYSTEMS, INC., NEWPORT BEACH, CALIF.  
 Aircraft Reliability and Maintainability  
 Situation (ARMS)  
 [AD-738536] p0467 N72-26027

UNITED AIR LINES, INC., CHICAGO, ILL.  
 The relationship between maintenance and  
 operating safety in air transportation  
 p0252 N72-18018

UNITED AIRCRAFT CORP., EAST HARTFORD, CONN.  
 An analytical and experimental investigation of  
 helicopter rotor hover performance and wake  
 geometry characteristics  
 [AD-728835] p0149 N72-13982  
 Vortex shedding noise of an isolated airfoil  
 [AD-734433] p0272 N72-19048

An investigation of the quantitative  
 applicability of model helicopter rotor wake  
 patterns obtained from a water tunnel  
 [AD-739946] p0482 N72-27052  
 Experimental investigation of effects of blade  
 section camber and planform taper on rotor  
 hover performance  
 [AD-743232] p0586 N72-31033

UNITED AIRCRAFT CORP., STRATFORD, CONN.  
 A feasible feel augmentation system for  
 helicopters  
 p0084 N72-11931

Advanced antitorque concepts study  
 [AD-729860] p0152 N72-14001

An experimental study of helicopter rotor  
 impulsive noise  
 [AD-730359] p0155 N72-14018

Full-scale wind tunnel investigation of the  
 advancing blade concept rotor system  
 [AD-734338] p0271 N72-19038

Investigation of the stabilator on the S-67  
 aircraft  
 [AD-735766] p0369 N72-22030

Ground test evaluation of the Sikorsky active  
 transmission isolation system  
 [AD-736347] p0370 N72-22036

Ballistic vulnerability of boron/epoxy double  
 wall drive shafts  
 [AD-737285] p0388 N72-23509

Application of boron/epoxy reinforced aluminum  
 stringers and boron/epoxy skid gear for the  
 CH54B helicopter tail cone. Phase 2:  
 Fabrication, inspection and flight test  
 [NASA-CR-112101] p0529 N72-29009

An experimental investigation of high-speed  
 rotorcraft drag  
 [AD-740771] p0529 N72-29010

Criteria for externally suspended helicopter loads  
 [AD-740772] p0530 N72-29020

Helicopter development reliability test  
 requirements  
 [AD-742248] p0531 N72-29028

Variable diameter rotor study  
 [AD-740911] p0575 N72-30025

Rotor systems research aircraft of predesign  
 study. Volume 1: Summary and conclusions  
 [NASA-CR-112152] p0638 N72-33014

Rotor systems research aircraft predesign study.

Rotor systems research aircraft predesign study.  
 Volume 4: Preliminary draft detail  
 specification  
 [NASA-CR-112155] p0638 N72-33017

Investigation of the speed brakes on the S-67  
 aircraft  
 [AD-745214] p0641 N72-33039

UNIVERSITY OF SOUTHERN CALIF., LOS ANGELES.  
 Analytical techniques for effective maintenance  
 p0268 N72-19017

## UTAH STATE UNIV., LOGAN.

Aircraftborne instrumentation for airglow survey  
[AD-739196] p0520 N72-28425

## V

## VANDERBILT UNIV., NASHVILLE, TENN.

A study of jet impingement on curved surfaces followed by oblique introduction into a freestream flow  
[NASA-CR-127121] p0469 N72-26227

## VEREINIGTE FLUGTECHNISCHE WERKE-FOKKER G.M.B.H., BREMEN (WEST GERMANY).

Adaptation of a nonlinear attitude regulator developed for a V/STOL aircraft, to a helicopter  
p0321 N72-20026

Outstanding problems of aircraft aerodynamics  
p0369 N72-22029

Evaluation of an integrated flight display for the manual IFR-landing of VTOL aircraft  
p0374 N72-22631

## VEREINIGTE FLUGTECHNISCHE WERKE-FOKKER G.M.B.H., MUNICH (WEST GERMANY).

Aerodynamic calculations for the interference of several propeller-jets with an aerofoil  
p0029 N72-10015

Influence of the wake geometry on the velocity and load distribution of VTOL propellers  
p0037 N72-11004

Problems in aerodynamic layouts of V/STOL propellers  
[DGLR-71-017] p0381 N72-23010

Methods for developing the adaptability of VTOL propellers  
[DGLR-71-023] p0382 N72-23016

## VIRGINIA POLYTECHNIC INST., BLACKSBURG.

Investigation of an aircraft trailing vortex using a tuft grid  
[NASA-CR-62077] p0087 N72-11950

Nonequilibrium boundary layer flow on highly-swept hypersonic wings  
[PB-204710] p0328 N72-20975

Nonplanar method for predicting incompressible aerodynamic coefficients of rectangular wings with circular-arc camber  
[NASA-TM-X-67791] p0379 N72-22995

Farfield structure of an aircraft trailing vortex, including effects of mass injection  
[NASA-CR-62078] p0534 N72-29237

## VIRGINIA UNIV., CHARLOTTESVILLE.

A preliminary study of containment concepts for aircraft landing on elevated STOL-ports  
[NASA-CR-125544] p0203 N72-15960

## VON KARMAN INST. FOR FLUID DYNAMICS,

## RHODE-SAINT-GENESE (BELGIUM).

Turbulent Jet Flows  
[VKI-LS-36] p0033 N72-10245

Research on advanced axial compressor concepts  
[AD-725789] p0045 N72-11308

## VOUGHT AERONAUTICS, DALLAS, TEX.

Development of fastener countersink corrosion protection seals  
[AD-728039] p0110 N72-13429

A method to simulate gunfire induced vibration environment  
p0173 N72-15836

Effects of flight conditions upon gunfire induced vibration environment  
p0215 N72-16815

A feasibility study to define inlet flow quality and development criteria  
[AD-739858] p0524 N72-28797

## W

## WALL COLMONOY CORP., DETROIT, MICH.

Remanufacturing of jet engine components employing brazing techniques  
p0040 N72-11024

## WASHINGTON UNIV., SEATTLE.

The numerical calculation of plane steady transonic flows past thin lifting airfoils  
p0469 N72-26217

## WASHINGTON UNIV., ST. LOUIS, MO.

Concepts for a theoretical and experimental study of lifting rotor random loads and vibrations. Phase 5A: Effects of torsional blade flexibility on single blade random gust

response statistics

[NASA-CR-114386] p0078 N72-11889

Concepts for a theoretical and experimental study of lifting rotor random loads and vibrations. Phase 5B: Analysis of gust alleviation methods and rotor dynamic stability  
[NASA-CR-114387] p0079 N72-11890

Concepts for a theoretical and experimental study of lifting rotor random loads and vibrations. Phase 5C: Development of experimental methods  
[NASA-CR-114388] p0079 N72-11891

The method of multiblade coordinates in the linear analysis of lifting rotor stability and gust response  
p0431 N72-25001

Concepts for a theoretical and experimental study of lifting rotor random loads and vibrations. Phase 6-A: Effects of blade torsion, of blade flap bending flexibility and of rotor support flexibility on rotor stability and random response  
[NASA-CR-114480] p0516 N72-28018

Concepts for a theoretical and experimental study of lifting rotor random loads and vibrations. Phase 6-B: Experiments with progressing/regressing forced rotor flapping modes  
[NASA-CR-114481] p0516 N72-28019

## WATERLOO UNIV. (ONTARIO).

A domestic multi-modal goods distribution model with emphasis on air cargo  
p0341 N72-21969

Simulating the turnaround operation of passenger aircraft using the critical path method  
p0341 N72-21970

## WATERVLIET ARSENAL, N.Y.

The transient aeroelastic response of rotor  
[AD-728818] p0107 N72-13037

Metal matrix composites for high temperature application  
[AD-734304] p0279 N72-19647

Nonclassical forced motion of stationary and rotating beams with tip masses  
[AD-735683] p0341 N72-21939

## WEAPONS RESEARCH ESTABLISHMENT, SALISBURY (AUSTRALIA).

Digital computer calculations of the effects of variation of mass and inertia parameters on the spin of a 60 deg delta-wing fighter aircraft  
[WRE-TN-453(WR/D)] p0099 N72-12974

## WEATHER SQUADRON (17TH), MCCLELLAN AFB, CALIF.

## DETACHMENT 08.

Terminal forecast reference file for McClellan Air Force Base, California  
[AD-734800] p0280 N72-19714

## WEATHER SQUADRON (24TH), COLUMBUS AFB, MISS.

## DETACHMENT 02.

Terminal forecast reference file, Columbus Air Force Base, Mississippi  
[AD-734807] p0280 N72-19713

## WEATHER WING (1ST), SAN FRANCISCO, CALIF. 96553.

Forecasting low level turbulence for light aircraft in Hawaii  
[AD-726107] p0046 N72-11525

## WEST VIRGINIA UNIV., MORGANTOWN.

Analysis of a circulation controlled elliptical airfoil  
p0430 N72-24989

## WESTINGHOUSE ELECTRIC CORP., BALTIMORE, MD.

The shock and vibration experienced by Naval avionics during arrested landing  
p0173 N72-15837

## WHITTAKER CORP., SAN DIEGO, CALIF.

Filament composite wheel development for military aircraft  
[AD-745130] p0642 N72-33046

## WICHITA STATE UNIV., KANS.

Effects of leading-edge camber on low-speed characteristics of slender delta wings: Techniques and tabulated data  
[NASA-CR-112016] p0463 N72-25996

Effects of leading-edge camber on low-speed characteristics of slender delta wings  
[NASA-CR-2002] p0636 N72-32996

## WORLD AIRWAYS, INC., OAKLAND, CALIF.

Charters, the new mode: Setting a new course for international air transportation  
p0634 N72-32983

## CORPORATE SOURCE INDEX

XONICS, INC.,

Minimum transportation regulation maximizes  
tourism's contribution to economic growth  
p0635 N72-32984

WORLD METEOROLOGICAL ORGANIZATION, GENEVA  
(SWITZERLAND).  
Utilization of meteorological radar for  
aeronautics  
[OMM-264-TP-148] p0044 N72-11147

WYLE LABS., INC., EL SEGUNDO, CALIF.  
Community noise  
[NTID300.3] p0579 N72-30604

WYLE LABS., INC., HAMPTON, VA.  
An evaluation of methods for scaling aircraft  
noise perception  
[NASA-CR-1883] p0101 N72-12988

Helicopter aural detectability  
[AD-730788] p0155 N72-14017

Propeller noise at low tip speeds  
[AD-731156] p0167 N72-15015

WYLE LABS., INC., HUNTSVILLE, ALA.  
Multi-degree of freedom motion simulator systems  
for transportation environments  
p0214 N72-16792

WYLE LABS., INC., ROCKVILLE, MD.  
An optimum acceleration time history for an  
escape system  
[AD-731194] p0168 N72-15020

Development of a dynamic analog anthropomorphic  
dummy for aircraft escape system testing  
[AD-730634] p0205 N72-15977

The dynamics of an ejection seat catapult with a  
live load  
[AD-730635] p0205 N72-15978

## X

XONICS, INC., VAN NUYS, CALIF.  
Vortex observations by the Xonics acoustic radar  
at NAFEC  
[TR-7] p0168 N72-15140

# PUBLIC COLLECTIONS OF NASA DOCUMENTS

## DOMESTIC

NASA deposits its technical documents and bibliographic tools in eleven special regional libraries located in the organizations listed below. Each library is prepared to furnish the public such services as reference assistance, interlibrary loans, photocopy service, and assistance in obtaining copies of NASA documents for retention.

### CALIFORNIA

University of California, Berkeley

### COLORADO

University of Colorado, Boulder

### DISTRICT OF COLUMBIA

Library of Congress

### GEORGIA

Georgia Institute of Technology, Atlanta

### ILLINOIS

The John Crerar Library, Chicago

### MASSACHUSETTS

Massachusetts Institute of Technology, Cambridge

### MISSOURI

Linda Hall Library, Kansas City

### NEW YORK

Columbia University, New York

### PENNSYLVANIA

Carnegie Library of Pittsburgh

### WASHINGTON

University of Washington, Seattle

NASA publications (those indicated by an "\*" following the accession number) are also received by the following public and free libraries:

### CALIFORNIA

Los Angeles Public Library

San Diego Public Library

### COLORADO

Denver Public Library

### CONNECTICUT

Hartford Public Library

### MARYLAND

Enoch Pratt Free Library, Baltimore

### MASSACHUSETTS

Boston Public Library

### MICHIGAN

Detroit Public Library

### MINNESOTA

Minneapolis Public Library

### MISSOURI

Kansas City Public Library

St. Louis Public Library

### NEW JERSEY

Trenton Public Library

### NEW YORK

Brooklyn Public Library

Buffalo and Erie County Public Library

Rochester Public Library

New York Public Library

### OHIO

Akron Public Library

Cincinnati Public Library

Cleveland Public Library

Dayton Public Library

Toledo Public Library

### OKLAHOMA

Oklahoma County Libraries, Oklahoma City

### TENNESSEE

Memphis Public Library

### TEXAS

Dallas Public Library

Fort Worth Public Library

### WASHINGTON

Seattle Public Library

### WISCONSIN

Milwaukee Public Library

An extensive collection of NASA and NASA-sponsored documents and aerospace publications available to the public for reference purposes is maintained by the American Institute of Aeronautics and Astronautics, Technical Information Service, 750 Third Avenue, New York, New York 10017.

## EUROPEAN

An extensive collection of NASA and NASA-sponsored publications is maintained by the National Lending Library for Science and Technology, Boston Spa, Yorkshire, England. By virtue of arrangements other than with NASA, the National Lending Library also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy or microfiche of NASA and NASA-sponsored documents, those identified by both the symbols "\*" and "#", from: ESRO/ELDO Space Documentation Service, European Space Research Organization, 114, av. Charles de Gaulle, 92-Neuilly-sur-Seine, France.

POSTMASTER: If Undeliverable (Section 158  
Postal Manual) Do Not Return

*"The aeronautical and space activities of the United States shall be conducted so as to contribute . . . to the expansion of human knowledge of phenomena in the atmosphere and space. The Administration shall provide for the widest practicable and appropriate dissemination of information concerning its activities and the results thereof."*

—NATIONAL AERONAUTICS AND SPACE ACT OF 1958

## NASA SCIENTIFIC AND TECHNICAL PUBLICATIONS

**TECHNICAL REPORTS:** Scientific and technical information considered important, complete, and a lasting contribution to existing knowledge.

**TECHNICAL NOTES:** Information less broad in scope but nevertheless of importance as a contribution to existing knowledge.

**TECHNICAL MEMORANDUMS:** Information receiving limited distribution because of preliminary data, security classification, or other reasons. Also includes conference proceedings with either limited or unlimited distribution.

**CONTRACTOR REPORTS:** Scientific and technical information generated under a NASA contract or grant and considered an important contribution to existing knowledge.

**TECHNICAL TRANSLATIONS:** Information published in a foreign language considered to merit NASA distribution in English.

**SPECIAL PUBLICATIONS:** Information derived from or of value to NASA activities. Publications include final reports of major projects, monographs, data compilations, handbooks, sourcebooks, and special bibliographies.

**TECHNOLOGY UTILIZATION PUBLICATIONS:** Information on technology used by NASA that may be of particular interest in commercial and other non-aerospace applications. Publications include Tech Briefs, Technology Utilization Reports and Technology Surveys.

*Details on the availability of these publications may be obtained from:*

**SCIENTIFIC AND TECHNICAL INFORMATION OFFICE  
NATIONAL AERONAUTICS AND SPACE ADMINISTRATION  
Washington, D.C. 20546**
